Objectives and investment policy

The key features of the UCITS are as follows:

- ▶ The sub-fund aims to outperform its reference indicator over a period exceeding five years.
- ▶ The reference indicator comprises 50% MSCI Emerging Market NR USD index calculated with net dividends reinvested, and 50% JP Morgan GBI-EM Global Diversified Composite Unhedged EUR index calculated with coupons reinvested. It is rebalanced each quarter.
- ▶ The sub-fund invests mainly in international equities and bonds of emerging countries. It offers active management on the international equity, fixed income, credit and currency markets. No more than 50% of the portfolio's net assets will be exposed to equities. Between 50% and 100% of the assets of the sub-fund shall be invested in fixed or variable rate bonds, transferable debt securities or treasury bills. The average rating of the bonds held by the Fund either directly or indirectly via UCITS shall be at least investment grade (as rated by at least one of the leading rating agencies). The sub-fund may invest in inflation-linked bonds.
- ▶ These units are accumulation units.

Other information:

- ▶ The portfolio's modified duration is between -4 and +10. Modified duration is defined as the change in portfolio capital (as %) for a change in interest rates of 100 basis points.
- ▶ The sub-fund may invest in derivative products which are traded on regulated or over-the-counter markets and have credit, currencies, interest rates or inflation rates as their underlying instrument. The sub-fund may also invest in financial instruments such as credit default swaps (CDS) and use call and put options on currencies.
- ▶ This unit class is hedged: hedged against currency risk.
- ▶ The sub-fund may invest up to 10% of its net assets in units or shares of UCIs.
- ▶ This sub-fund may not be suitable for investors planning to withdraw their investment within five years.
- ▶ Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.

|---|---|---|---|---|---|---|

This indicator represents the annual historical volatility of the UCITS over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- ▶ Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the UCITS.
- ▶ The risk category of this UCITS is not guaranteed and may change over time.
- ▶ Category 1 does not mean the investment is risk-free.
- ▶ Exposure to emerging equity markets explains the UCITS' classification in this category.
- ▶ The Fund's capital is not guaranteed.

Risks to which the UCITS may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- ▶ **Credit risk:** The Fund is invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness decline, the value of the bonds or derivatives linked to this issuer may fall.
- ▶ **Counterparty risk:** The Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- ▶ Investing in this sub-fund entails risks associated with China and the use of Stock Connect. A system facilitating equity investment in market A via a Hong Kong-based entity acting as the sub-fund's nominee. Investors are advised to familiarise themselves with the specific risks of this system as outlined in the prospectus.
- ▶ For more information on risks, please refer to the prospectus of the UCITS.
