CLARTAN - EUROPE, Class D (LU1100076980)

a sub-fund of CLARTAN SICAV

Management Company: CLARTAN ASSOCIÉS

Objectives and investment policy

Management objective: CLARTAN - EUROPE is a sub-fund that seeks, over a period of more than 5 years, to outperform the main European stock exchanges.

Benchmark: We would like to draw the investor's attention to the fact that, given the discretionary management style (see below), the composition of the portfolio will not seek to replicate the composition of a benchmark index at a geographical or sector level. The sub-fund is actively managed without reference to a reference index. However, the Morningstar Developed Markets Europe net return index, denominated in euros, may be used as an ex-post performance indicator.

Investment policy: The sub-fund's investment policy is discretionary and bottom-up, which means that, when taking investment decisions, financial analysis of the companies takes precedence over the perception of the financial markets and the economic and political climate, which supports these decisions.

The sub-fund may invest:

- at least 75% of its net assets in shares of listed companies having their registered office in a Member State of the European Union or another State of the European Economic Area;
- up to 100% of its net assets in shares of European companies not belonging to the euro zone;
- up to 25% of its net assets in listed shares of companies having their registered office in countries belonging to the Council of Europe;
- up to 20% of its net assets in shares of listed companies having their registered office in emerging European countries that are not members of the OECD.

The sub-fund may occasionally invest up to 20% of its net assets in securities assimilated

with equities or bonds, such as convertible bonds, bonds with warrants, priority dividend shares, investment certificates and equity securities. Investment in shares is performed without any sectoral, capital or monetary restrictions.

For the purposes of investing its cash balance, the sub-fund may invest up to 25% of its net assets in bonds from issuers rated at least AA by Standard & Poor's or equivalent. The sub-fund will not invest in Negotiable Debt Securities. The sub-fund may invest up to 10% of its net assets in UCITS and/or other UCI units, including money market funds.

The sub-fund may, from time to time, invest in traded financial futures or options:

- to protect them against drops in the equity or foreign exchange markets;
- to improve their performance by seeking out a better purchase or sales rate.

Exposure will be limited to 100% of the assets.

Any investor who would like a more detailed description of the investment strategy and the assets used is invited to refer to the prospectus.

Income appropriation: distribution

Recommendation: More than 5 years. This sub-fund may not be appropriate for investors who plan to withdraw their money within this period.

Redemption of shares: The investor has the right to redeem their shares upon request. Redemptions take place each bank business day in Luxembourg and France, except bank holidays in Luxembourg and public holidays in France. Investors should take note that in exceptional circumstances, they may only have a limited possibility to request a redemption, or this possibility may be suspended.

Risk and reward profile

What does this synthetic indicator mean?

The shares of Class D are classified in category 6 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.

The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the sub-fund may shift over time. The lowest category does not mean a risk-free investment.

Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

Risk of the impact of using financial techniques involving futures instruments: the use of derivatives may give rise to significant upward or downward fluctuations in the net asset value over short periods.

Currency risk: the sub-fund may invest up to 100% of its assets in securities denominated in currencies other than the euro. Fluctuations in these currencies against the euro may have a negative impact on the sub-fund's net asset value.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the website www.clartan.com.
