### Risk and reward profile

#### Risk profile

The Fund's risk/reward profile shows the variations in value that an investment in this Fund has undergone. The Fund's position on this scale is a reasonably accurate reflection of the risk inherent in the Fund under past market conditions. It does not reflect the risk inherent in any future circumstances or events that differ from what the Fund has experienced in the past. Changes in the Fund's alignment within the boundaries set by its investment policy may also impact the Fund's risk/reward profile. In view of this, the Fund's risk rating may change in the future. Please note that higher possible gains generally also imply higher possible losses. The lowest risk rating does not mean that the Fund is free of risk.

The risk/reward profile reflects the interplay between the various risk factors that are relevant to the Fund; extraordinary changes to these factors may have a material impact.

#### Why is the Fund in the specific category?

Investments in debt are affected by changes in interest rates, the size of the market segment, the currency allocation, the economic sector and the credit quality of the bonds. Bond funds with shorter maturities tend to be less affected by changes in interest rates and so are bond funds investing primarily in highly rated governments, municipalities, corporates and other issuers.

#### Are there any other particular risks?

The risk/reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market and operational conditions. It does not reflect the risk to which the Fund may be exposed in the case of extraordinary future events that differ from anything the Fund has experienced in the past; nor does it reflect the risk due to operational failure or other risks that are beyond the control of the Fund and affect the Fund's investments, such as legal and political risks, an unforeseeable drop in market liquidity or the failure of counterparties. In addition, restrictions on currency convertibility, limitations of property rights or other legal and political risks may affect the Fund. Note: As this Fund applies Swing Pricing, transaction costs may have an impact on its risk and reward profile.
