

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CT EMERGING MARKET LOCAL FUND (THE "FUND")

Class 1 Income Shares (EUR) GB00B2B3NZ73, a sub-fund of Columbia Threadneedle Specialist Funds (UK) ICVC (the "Company"), regulated by the FCA.

This sub-fund is managed by Threadneedle Investment Services Limited (the "Management Company") (part of the Columbia and Threadneedle group of companies).

Objectives and Investment Policy

The Fund aims to provide income with the prospect of some investment growth over the long term. It looks to outperform the J.P. Morgan Government Bond Index - Emerging Markets (GBI-EM) Global Diversified over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and seeks to gain at least two-thirds of its investment exposure to emerging market local currencies and local currency denominated debt securities issued either by governments of Emerging Market countries, or companies which are domiciled or have significant business operations in such countries.

The Fund considers Emerging Markets countries to mean those characterised as developing or emerging by the MSCI Emerging Markets Index or those not listed in the OECD country list.

The Fund may also gain exposure to non-emerging market currencies and debt securities, as well as emerging market debt denominated in non-local currencies, if considered appropriate to achieve its investment objectives.

The Fund may invest in government and corporate bonds of any credit quality (including those rated below investment grade, or unrated), as well as treasury bills, and securitised notes. The Fund may also use derivatives for investment purposes. Derivatives may be used to allow the Fund to profit from the fall in the price of an asset (shorting), as well as extending market exposure beyond the value of its assets (leverage). In addition, derivatives may be used with the aim of reducing risk, or managing the Fund more efficiently. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The GBI-EM Global Diversified Index is regarded as an appropriate performance measure of local currency bonds issued by emerging market governments. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

Any income the Fund generates will be paid to you, unless you have chosen to have it reinvested.

You can buy and sell shares in the Fund on any day that is a business day in London. You can find more detail on the objectives and investment policy of the Fund in the section of the prospectus with the heading "Investment Objectives, Policies and Other Details of the Funds".

For more information on investment terms used in this document, please see the Glossary published in the Document Centre on our website: www.columbiathreadneedle.com.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Lower Risk, Typically lower rewards

Higher Risk, Typically higher rewards

- The Fund is rated 4 because historically it has shown a medium level of volatility (how much the value of the Fund goes up and down).
- The lowest category does not mean a risk-free investment.
- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund may enter into financial transactions with selected counterparties. Any financial difficulties arising at these counterparties could significantly affect the availability and the value of Fund assets.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- The Fund invests in markets where economic and regulatory risk can be significant. These factors can affect liquidity, settlement and asset values. Any such event can have a negative effect on the value of your investment.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- Leverage occurs when economic exposure through derivatives is greater than the amount invested. Such exposure, and the use of short selling techniques, may lead to the Fund suffering losses in excess of the amount it initially invested.
- The Fund may invest materially in derivatives. A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- The Fund may invest in the China Interbank Bond Market (CIBM) via Hong Kong Bond Connect which is subject to regulatory, volatility and liquidity risk, as well as risks associated with settlement, default of counterparties and market suspension. Furthermore, the Fund may incur significant trading, taxation and realisation costs.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	5,00%
Exit Charge:	0,00%

These are the maximum charges that we might take out of your money before it is invested. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing Charges:	1,62%
------------------	-------

Charges taken from the fund under specific conditions

Performance Fee:	NONE
------------------	------

The ongoing charges figure is based on expenses for the year ending 30.04.21. This figure may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

Past Performance

Source: Morningstar

Past performance is not a guide to future performance.

Fund launch date: 14.01.2008

Share/unit class launch date: 14.01.2008

Performance is calculated in EUR.

All charges and fees, except any entry, exit and switching charge, have been included within the performance.

On 4 July 2022 the Fund name changed from Threadneedle Emerging Market Local Fund to CT Emerging Market Local Fund.

△ Before this date the Fund had different characteristics.
