Term

There is no fixed maturity date. An investor can hold their investment for any time period but minimum 5 year(s) is recommended. The Manufacturer can close the fund with notice.

Objectives

The Fund aims to generate a total return greater than the FTSE EPRA Nareit Developed Europe UCITS Capped Net Tax Index and maintain a volatility similar to that of the Index. The Fund mainly invests in equities of European listed property companies and companies related to or with significant exposure to European real estate. The Fund can also invest in real estate companies operating outside Europe. The Fund may also invest in other investments such as corporate bonds (which are similar to a loan and pay a fixed or variable interest rate) and derivatives (Derivatives are sophisticated investment instruments linked to the rise and fall of the value of other assets) to maintain, increase or reduce exposure to securities or indices for investment or hedging. Derivatives can also be used to obtain long or short exposure to specific companies. Overall exposure may be in excess of the net asset value of the Fund or derivatives can be used to reduce it below the Fund's net asset value, known as leverage. The Fund may generate varying amounts of leverage at different times. Over the life of the Fund it has maintained a net position (offsetting long and short positions) of between 85% and 110%. The Fund uses hedging to maintain the currency exposure of the portfolio in line with the Index. The Fund is actively managed in reference to FTSE EPRA Nareit Developed Europe UCITS Capped Net Tax Index. The index is broadly representative of the securities in which the Fund invests, and provides a suitable comparator benchmark against which performance will be measured. The manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index. There is no minimum holding period for this Fund. However, it may not be appropriate for investors who plan to withdraw their money in under 5 years.

Income from investments in the Fund will be added to the value of your shares.

You can buy or sell shares in the Fund on any day which is a business day in Ireland unless the directors have decided that insufficient markets are open. You can find more detail on the investment objective and policy of the Fund in the prospectus. For more information on investment terms used in this document, please see the Glossary available at www.columbiathreadneedle.com.

Intended retail investor

This fund is aimed at Retail and Professional customers and Eligible Counterparties who should have at least a basic level of knowledge and experience of investing in funds. It is designed for investors looking capital growth who can invest their money for at least 5 years. Your capital is not guaranteed which means that investors could lose up to 100% of the amount invested. The fund invests directly and through derivatives in company shares of European Property Companies, the prices of which tend to fluctuate more than other asset classes, as investors directly participate in underlying companies and their profits and losses.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 08/2021 to 12/2023

Moderate scenario: This type of scenario occurred for an investment between 02/2016 to 02/2021

Favourable scenario: This type of scenario occurred for an investment between 01/2014 to 01/2019

Investment EUR 10,000

In case of default of the Manufacturer, the investor may face a financial loss. That loss would not be covered by an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment EUR 10,000	if you exit in after 1 year	if you exit in after 5 years (Recommended Holding Period)
Total costs	799.00 EUR	2,902.00 EUR
Annual Cost impact*	7.99%	4.28%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.73% before costs and 1.45% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.
