Directors' Report

Dear Shareholder,

We are pleased to present the SICAV's 2023 annual report, of which our board report forms a part. Our board report covers the main business activities of the SICAV.

ACTIVITY DURING THE YEAR

At the end of 2023, the SICAV's fund range was reduced by one fund to 40 funds. Subscriptions overtook redemptions overall, with a net inflow for the SICAV of EUR 830 million and a year-end overall net asset value of EUR 16.2 billion, an increase of 19% year on year. The European Bond fund was liquidated in May 2023 due to the low assets under management and lack of investor interest. This change supports the general simplification initiative by streamlining the Danske Invest product offering. More details about investment activity appear in the investment manager's report.

2023 was a year with high inflation, high interest rates and escalated geopolitical risks. There were several interest rate hikes during the year, and neither the U.S. nor Europe went into recession but reacted well and proved remarkably resilient. By the end of 2023, inflation declined steadily and Europe had, for the most part, learned how to live without Russian gas and oil by finding new partners for energy trade.

Looking back, we have seen that geopolitics have once again taken centre stage, with war breaking out in the Middle East between Hamas and Israel in October 2023. Over the last two years, we have witnessed two significant geopolitical events: Russia's invasion of Ukraine and now the Israel- Hamas war. These events have further fuelled economic fragmentation and highlighted the role of power politics. Many conflicts in the world (Red Sea, Israel, China and Ukraine) can quickly change the dynamics. For 2024, geopolitical risks remain high and geopolitical factors continue to loom large in economic forecasting.

In 2023, the strategy of the management company was to align the operational model of its investment funds across different domiciles and change to market-leading service providers. To this effect, in 2022, J.P. Morgan SE was appointed custodian and depositary for the Danske Invest funds in Denmark. To pursue the strategy, seeking the appointment of J.P. Morgan SE for further services and other Danske Invest funds have been a natural continuation. In conclusion, in November 2023, J.P. Morgan SE, Luxembourg branch was appointed as the new service provider for the provision of fund administration, transfer agency, depositary, and custody services to the SICAV thus replacing CACEIS Investor Services Bank S.A.*

Sustainability considerations

As in 2022, 2023 was also committed to the Sustainable Finance Disclosure Regulation (SFDR) and sustainability in general. To recap, this is a requirement for financial market participants to be more transparent as regards critical environmental, social and governance (ESG) criteria. To be able to offer a wide range of investment products in accordance with Articles 8 and 9 of the SFDR, Danske Invest is continuously building robust sustainability processes, expanding ESG data and developing analytical tools. Consequently, the prospectus was updated in September 2023 to enhance the wording related to sustainability risk and show the expected impact that sustainability risks can have on a fund's return, be it "low", "medium", or "high". By virtue of the same update, the Europe Long Short Equity Factors fund was reclassified from an Article 6 fund to an Article 8 fund.

Furthermore, in 2023 the SFDR annexes attached to the prospectus were updated to strengthen the existing disclosures. This follows the Commission Delegated Regulation (E.U.) 2023/363 of 31 October 2022 whereby the technical standards set out in relation to the disclosure in documents of financial products' investing in environmentally sustainable economic activities were amended.

To fulfil investors' demand, pornography has been added to the list of investment restrictions applying to the Article 8 and Article 9 funds in the SICAV. Additional investment restrictions such as alcohol and gambling apply to the Europe Small Cap fund. Finally, all the funds except Danish Bond, Sverige Småbolag, Sverige Kort Ränta, Sverige Ränta, Aktiv Förmögenhetsförvaltning, Sverige Beta replicated the list of exclusions applied by the central bank of Norway deciding the investment universe of the government pension fund of Norway - namely the Government Pension Fund Global. As of December 2023, we have one Article 6, 32 Article 8 and five Article 9 funds.

The board held seven meetings

During 2023, we had three additional meetings besides our regular quarterly meetings. We also signed five circular resolutions - an electronic means allowing approval of a resolution without a physical meeting (typically used for technical matters only). Given the SICAV's business scope and nature, we do not currently consider it necessary to have any standing committees. Therefore, the entire board addresses all board-related matters, including audit and remuneration.

The Annual General Meeting will be held on April 24, 2024

The meeting will address the following matters related to the 2023 financial year. Since we propose no particular business and are unaware of any proposals from shareholders, we believe the meeting will include the following routine matters only:

- the adoption of audited financial statements and approval of the allocation of the results;
- the re-election of directors;
- the approval of the directors' remuneration;

* Please refer to Note 12.

DANSKE INVEST SICAV

Directors' Report (continued)

- the re-election of the auditor; and
- the discharge of directors' duties.

Based on our review of the information provided, we recommend that shareholders vote to support all board proposals on the above matters, including Deloitte Luxembourg's re-election as the SICAV's auditor. Board compensation includes remuneration (which is not paid to executive directors) and expense reimbursement. Compensation for 2023 can be found in the notes of the audited financial statements. For clarity, the board compensation is part of the operating and administrative fees paid by the funds.

ONGOING POLICIES AND RESPONSIBILITIES

Review of accounts

We reviewed and discussed the SICAV's 2023 accounts with the management company. We find them consistent with the accounting documents and information provided to us. We believe the annual report and accounts (including the SFDR annexes) are fair, balanced, and understandable and provide the information necessary for shareholders to assess the SICAV's financial position, performance, business model, business strategy as well as the sustainable characteristics of each fund.

Internal controls

We have received and reviewed the management company's formal quarterly reports on its activities and responsibilities, including the activities of those to whom it has delegated certain functions, mainly the depositary, CACEIS Investor Services Bank S.A. and J.P. Morgan SE, Luxembourg branch. We believe these reports adequately document compliance with the internal controls. We and the management company, have established to ensure that the SICAV meets the obligations to shareholders based on the prospectus, articles of incorporation and all relevant regulations. However, the management company must inform us immediately if any material issues arise concerning fund administration or accounting.

The results of the annual review and analysis carried out by the management company on the fee level in the SICAV show that Danske Invest is priced competitively on an overall level as well as on all individual asset levels in both fully priced and clean-class funds in the Luxembourg fund market.

Responsible Investment and Active Ownership Policies

For many years, Danske Invest has been working with responsible investments, and with the expertise of the Danske Bank Responsible Investment Team, has built a strong foundation with well-developed processes, systems and resources. The management company has its own Responsible Investment and Active Ownership policies. These policies reflect statutory obligations and are based on several principles that, amongst others, integrate sustainability risks into investment analysis and investment decision-making processes. As a result, we seek to provide investors with funds that meet their sustainability needs.

Active ownership through single engagement, collaborative engagement and voting at annual general meetings is an integral part of our ability to create long-term value for the companies we invest in for our investors. In particular, Danske Invest continues to encourage the SICAV to support company actions to increase transparency and move to more sustainable business practices and policies consistent with sustainability and ESG characteristics.

In Closing

We wish to thank you, our shareholders, for your continued support. We also want to thank everyone involved in the management of Danske Invest SICAV for their dedicated work during the past financial year. We look forward to providing shareholders with the highest possible degree of satisfaction.

Yours sincerely,

Jan Stig RASMUSSEN, Chairperson

On behalf of the board

April 22, 2024

The board has approved this Report from the SICAV's Board of Directors ("the board" or "we") of Danske Invest SICAV ("the SICAV"). The SICAV is part of Danske Invest, the brand name for funds managed by various fund management companies within the Danske Bank Group. It is primarily domiciled in Luxembourg and the Nordic countries. Danske Bank Group sponsors the Danske Invest fund family, and each investment fund is managed according to the local regulations of its domicile. The SICAV's 2023 financial year was the same as the calendar year 2023. Except where the context may indicate otherwise, the terms used in this report have the same definitions as in the prospectus.

Investment Manager's Report for the year ended December 31, 2023

Global economy

2023 was a better year than expected for the global economy. At the start of 2023, there was widespread concern of an economic recession because of the significant tightening of the central banks' monetary policy, which had sent interest rates soaring thus making it more expensive for both consumers and businesses to borrow money. However, the recession did not occur. The economy proved to be resilient – primarily driven by strong US growth, healthy corporate earnings and buoyant economic data, but in early 2023 also supported by the reopening in China after several years of extensive Covid-19 restrictions.

Gradually, the fear of recession was therefore replaced by an expectation of a soft landing in the economies globally. A soft landing denotes a scenario with lower inflation and growth – but not growth so low that it leads to a large increase in unemployment. This expectation was reinforced towards the end of 2023 by positive inflation data, which showed that inflation in both Europe and the US was clearly heading towards the central banks' target of around 2 per cent. Declining inflation led to widespread belief in imminent interest rate cuts, further fuelling expectations of a soft landing in the global economy. At sector level, information technology performed very positively in Q2 and Q3, fuelled by enthusiasm around artificial intelligence. The telecommunications and energy sectors were also leading gainers, whereas utilities and real estate companies underperformed.

EUROPE

Inflation in Europe also fell sharply during 2023, but unlike the US, growth was disappointing. Fortunately, the European economy did not end up in the recession that most expected at the start of the year – driven, among other things, by the energy crisis at the time – but growth has been very low and at times close to zero. Nevertheless, as in the US, the labour market was very robust, with strong employment growth, record low unemployment and still high wage growth.

USA

The expectation of an imminent recession in the US was widespread at the start of 2023, but the US economy was driven by a strong labour market with low unemployment, which at the same time supported strong private consumption. Economic growth remained surprisingly stable at a high level. In fact, growth in the US accelerated so sharply during the late summer that it raised concerns about more interest rate hikes by the US Federal Reserve so as to bring inflation under control. By the end of 2023, however, the mood changed for the better in line with falling inflation and signs of a much-needed slowdown in the labour market with, among other things, decreasing wage inflation.

CHINA

Optimism around China was high at the start of 2023. The strict zero Covid-19 policy was over, and now came the grand reopening. The economic recovery after the re-opening lasted a short time. Growth was particularly strong in the first weeks of the year, but it quickly lost steam. The turbulence surrounding the real estate sector weighed heavily on the economy. Activity in the housing market soon fell back to very low levels prompting the authorities to step in with a series of easing measures. Although by the end of 2023 growth seemed to have stabilized to a decent level, overall the Chinese economy was disappointing in 2023 compared to expectations.

The financial markets

2023 was characterized by significant fluctuations in the financial markets – both when it comes to equities and bonds. Overall, however, it ended up being a good year for most assets, which was much needed after a challenging 2022.

Equity markets

Generally 2023 was a good year for the equity markets with global equities giving an average return of 19 per cent, although with regional differences. The expected economic recession did not materialize, instead a soft landing in the economies globally was priced into equity prices – by the end of the year this was reinforced by the significant drop in inflation and interest rates.

Despite the overall increases, the equity markets experienced several periods of significant price falls. A banking crisis in March 2023 and concerns of wider contagion in the banking sector created great uncertainty in the financial markets, led by the collapse of Silicon Valley Bank and Signature Bank in the US and the failure of Credit Suisse in Europe. Furthermore, in the late summer, investors focused on interest rate decisions by most major central banks when interest rates took a significant jump, when a temporary fear spread that the interest rates of the central banks would remain at a high level for longer than previously assumed.

Bond markets

Where 2022 was marked by the largest interest rate increases in decades, the development was much more subdued in 2023, with large interest rate fluctuations during the year. In particular, Q3 was characterized by significant interest rate increases. While short maturities continued to rise due to central bank rate hikes, yields on long-dated government bonds eased again slightly by Q3 before interest rates fell significantly by the year-end as a result of lower inflation figures and expectations of imminent interest rate cuts from the central banks.

Investment Manager's Report for the year ended December 31, 2023 (continued)

Expectations for 2024*

In 2024 several factors will have a significant effect on the development of the financial markets. A number of geopolitical conflicts could escalate and affect prices negatively and create uncertainty in the financial markets e.g. global energy supplies and energy. This applies, among other things, to the wars in Ukraine and the Gaza strip, the international sanctions against Russia, the tensions in the Middle East, including the Red Sea, and the trade conflict between the US and China. The US presidential election in November 2024 will also receive a lot of attention and could potentially affect the financial markets.

In recent years, inflation has been a major theme for the global economy and the financial markets. Energy prices are a significant factor in inflation, and therefore it can be very important how energy prices develop. Freight rates can also come into focus as a result of geopolitical conflicts.

Global economy

The global economy was more robust than expected in 2023, and the US economy in particular surprised positively. At the start of 2024, unemployment in both Europe and the US therefore remained low, and at the same time inflation had abated, while interest rates appeared to have declined. We therefore expect positive global growth in 2024, although growth is expected to slow down in the US. In Europe, we could potentially see a slight pick-up in growth after an extended period of very low/negative growth in 2023. We also expect economic growth to be supported by interest rate cuts from the central banks in Europe and the US during 2024. Further, we expect real wage increases in 2024 so that households begin to regain their purchasing power.

Equities/Bonds

We expect positive returns from equities in 2024, supported by a soft landing in the global economy and interest rate cuts from central banks. Equities are not cheap at current price levels, but interest rate cuts and the prospect of continued growth could make the pricing look more attractive and could send the equities further up.

We expect positive returns from bonds that benefit from the higher level of interest compared to the years with very low or negative interest rates, and this ensures a reasonable ongoing return. As for credit bonds, we also expect a positive return which will primarily be borne by the current interest payments. With our expectations for economic development in 2024, we see limited potential for a narrowing of credit spreads (the interest rate) on European corporate bonds and emerging markets bonds in hard currency. Looking at emerging markets bonds, we expect returns to potentially be supported by lower interest rates and relatively unchanged exchange rates.

*Please note that the contents of this annual report are not a recommendation to buy or sell units in the SICAV and do not constitute investment advice. Always consult an adviser if you are considering making an investment to ascertain whether a particular investment is appropriate for your investment profile.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Danske Invest SICAV (the "SICAV") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at December 31, 2023 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the SICAV and of each of its sub-funds as at December 31, 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements" section of our report. We are also independent of the SICAV in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the SICAV is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the réviseur d'entreprises agréé thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the SICAV for the Financial Statements

The Board of Directors of the SICAV is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the SICAV determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the SICAV is responsible for assessing the SICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the SICAV either intends to liquidate the SICAV or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the réviseur d'entreprises agréé that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also

Report of the Réviseur d'Entreprises Agréé (continued)

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the SICAV's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the SICAV.
- Conclude on the appropriateness of the Board of Directors of the SICAV use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the SICAV's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the réviseur d'entreprises agréé to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the réviseur d'entreprises agréé. However, future events or conditions may cause the SICAV to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit. *Cabinet de révision agréé*

Jean-Philippe Bachelet, *Réviseur d'entreprises agréé*

DANSKE INVEST SICAV

Notes to the Audited Financial Statements as at December 31, 2023

NOTE 1 – GENERAL

Danske Invest SICAV (the "SICAV") is an investment company incorporated under the laws of the Grand Duchy of Luxembourg as a *Société d'Investissement à Capital Variable* subject to Part I of the amended Law of December 17, 2010 relating to the undertakings for collective investment (the "2010 Law"). The SICAV's purpose is to invest in all kinds of transferable securities, units or shares of other open-ended UCI or UCIs, as well as derivatives on transferable securities and other financial instruments authorised by the 2010 Law.

The SICAV was incorporated on June 30, 2011 for an unlimited period of time and is governed by the law of August 10, 1915 on commercial companies, as amended, and by the 2010 Law.

The registered office of the SICAV is established at 13, rue Edward Steichen, L-2540 Luxembourg. The SICAV is recorded at the Luxembourg "Registre de Commerce et des Sociétés" under the number B 161867.

The Articles of incorporation were first published on August 10, 2011 in the Mémorial C. They were amended on September 6, 2005, October 24, 2005, November 14, 2008, July 16, 2014 and March 2, 2020 and published in the RESA (*Recueil électronique des sociétés et associations*) on November 25, 2005, November 16, 2005, December 8, 2008, October 8, 2014 and April 23, 2020 respectively.

Until December 31, 2019, Danske Invest Management Company served as the designated Management Company of the SICAV under chapter 15 of the 2010 Law and pursuant to the Management Company Agreement dated December 9, 2014 entered into force between the SICAV and the Management Company.

On January 1, 2020, Danske Invest Management Company was absorbed (via a merger) by Danske Invest Management A/S, which is a public limited company incorporated under the Danish laws, which has been authorized by Finanstilsynet (the Danish Financial Supervisory Authority) as management company within the meaning of Directive 2011/61/EU, as amended, and which has its registered office in Parallevej 17, 2800 Kgs., Lyngby, Denmark. This merger was conducted in compliance with articles 1023-1 and following the Luxembourg law dated August 10, 1915 on commercial companies, as amended as well as the applicable Danish law and regulations. Consequently, some functions of the Management Company are performed from its registered office in Denmark with the assistance of its branch established in Luxembourg, namely Danske Invest Management A/S, Luxembourg Branch. In Denmark, Danske Invest Management A/S performs the oversight of the delegated investment management function and the Danske Invest Management A/S, Luxembourg Branch performs the domiciliary services, risk management and oversight of entities to which administration and distribution is delegated.

Danske Invest Management A/S has also been appointed to act as Management Company for the following Investment Funds: Danske Invest, Danske Invest Select, Danske Invest Index, Profil Invest, Danske Invest PCC Ltd, Danske Invest Institutional, AP Invest, Danske Invest SICAV-SIF and Danske Invest Allocation.

The SICAV is an umbrella Fund and as such provides Investors with the choice of investment in a range of several separate Funds, each of which relates to a separate portfolio of liquid assets and other securities and assets permitted by the 2010 Law with specific investment objectives, as described in the relevant Fund "Description" in the current Prospectus. Each Fund "Description" forms an integral part of the current Prospectus.

On December 31, 2023, forty Funds are operational:

- Aktiv Förmögenhetsförvaltning
- China
- Danish Bond
- Danish Mortgage Bond
- Denmark Focus
- Eastern Europe (in liquidation)
- Emerging Markets Sustainable Future

One Fund was liquidated during the financial year; European Bond on May 17, 2023.

As per December 31, 2023, the following cash amounts were outstanding:

- Danske Invest SICAV – Eastern Europe (in liquidation): RUB 1,166,861
- Danske Invest SICAV – Emerging Markets Sustainable Future: RUB 2,714,685
- Danske Invest SICAV – Russia (in liquidation): RUB 76,710

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with generally accepted accounting principles and laws and regulations in force in the Grand Duchy of Luxembourg applicable to undertakings for collective investment in transferable securities.

a) Valuation of investments in portfolio

In general, the value of each Fund's assets is determined as follows:

- (i) Cash in hand or on deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received are valued at full value, adjusted for any appropriate discount or premium we may apply based on our assessments of any circumstances that make the full payment unlikely.
- (ii) Transferable securities and money market instrument that are listed or traded on an official stock exchange or other regulated market are generally valued at the most recent price quoted on the market where they are principally traded.
- (iii) Non-listed securities, or listed securities for which the price determined according to the above methods not representative of fair market value are valued in good faith at a prudent estimate of their sales price.
- (iv) Derivatives that are traded on stock exchanges or regulated markets are valued at the settlement price most recently quoted for a derivative's primary market(s), adjusted if necessary to allow for settlement on a different day if current-day settlement is not possible.

Derivatives that are not traded on stock exchanges or regulated markets are valued at liquidation value, according to policies applied consistently for each given type of derivative.
- (v) Shares or units of UCITS or UCIs are valued at the most recent Net Asset Value reported by the UCITS/UCI, or, if the most recent Net Asset Value does not reflect current market realities, at fair value.
- (vi) Credit default swaps and contracts for difference are valued according to valuation principles set by the Board of Directors of the SICAV, based on mark-to-market practice using standard market practice.
- (vii) All other swaps are valued at market value, with reference to the applicable rate curve.
- (viii) Currencies are valued at the latest mid-market foreign exchange rate (applies to currencies held as assets, to hedging positions, and when translating values of securities denominated in other currencies into the base currency of the Fund).
- (ix) All other assets are valued in good faith at a prudent estimate of their sales price.

DANSKE INVEST SICAV

Notes to the Audited Financial Statements (continued) as at December 31, 2023

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

All valuation methodologies are established by the Board. For any asset, the Board of Directors of the SICAV can choose a different valuation method if it believes that method may result in a fairer valuation. For more information on our asset valuation methods, see the articles.

All assets which are valued in a currency other than the currency in which shares of the relevant Fund are denominated will be converted into the relevant currency at the latest median foreign exchange rate.

(x) Timing of asset pricing. The Funds use snapshot pricing, meaning that the prices used for valuation are as of a specific point during the trading day rather than end-of-day values. Changes in value between the time of pricing and the closure of the relevant market will therefore not normally be reflected in the Net Asset Value.

(xi) The Management Company valued the following security on the basis of the probable realizable value Hesalight 7% 14-12.12.19 at EUR 5.00 per share, which represents 0.10% of the Net Asset of Nordic Corporate Bond on December 31, 2023.

(xii) The Management Company valued the following security Abertis Infraestructura S.A. at EUR 3.00 per share as of September 22, 2021 based on the uncertainty of the outcome of the restructuring undergoing between the company and Hochtief. The security is held in Multi Asset Inflation Strategy, which represents 0.31% of the Net Asset on December 31, 2023.

(xiii) The Management Company valued the following security on the basis of the probable realizable value Neon Capital Ltd. 0% 06.01.28 at JPY 89.42 per share, which represents 0.06% of the Net Asset of Emerging Markets Debt Hard Currency on December 31, 2023.

(xiv) The Management Company valued the following security Nmc Health Plc at zero on March 27, 2020 based on the uncertainty of the outcome of ongoing investigations into company accounts and its debt position. The security is held in Emerging Markets Sustainable Future, Global Index and Global Index Restricted.

(xv) As regards the Russian securities held in the Funds including the Funds under liquidation - Russia and Eastern Europe - the Management Company has decided to evaluate the prices of all Russian Securities in the Funds by applying a 100% reduction of latest estimated prices to reflect a fairer value of the securities in the NAV estimation.

(xvi) The Management Company valued the following security on the basis of the probable realizable value CONTRA ABIOMED, Inc. at zero per share, which represents 0.00% of the Net Asset of Global Index, Global Index Restricted and Global Portfolio Solution – Balanced on December 31, 2023.

b) Unrealised capital gain tax on investments

There may be changes in the tax laws or interpretations of such laws of various jurisdictions in which the Funds operate or invest in. As a result the Fund can become subject to additional or unseen taxation as well as to changes in taxation treaties between the countries in which the Fund operates or invests in. These changes may affect adversely the ability to efficiently realise income or capital gains. Liabilities in respect of taxes payable on unrealised capital gains on investments in certain countries are accrued in the Net Asset Value on a daily basis.

c) Realised profit / (loss) on sale of investments

Profit and loss on sale of investments sold are computed on the basis of average cost.

d) Foreign exchange conversion

All assets valued in a currency other than the base currency of the Fund are converted to the base currency at the exchange rates prevailing at December 29, 2023.

The exchange rates used as at December 31, 2023 for the combined financial statements of the SICAV are as follows:

1 AED	=	0.246169	EUR
1 AUD	=	0.616744	EUR
1 BRL	=	0.186124	EUR

1 VND	=	0.000037	EUR
1 ZAR	=	0.048717	EUR
1 ZMW	=	0.035132	EUR

Income and expenses expressed in a currency other than the base currency of the Fund are converted at the applicable exchange rate prevailing at the transaction date.

e) Cost of investment securities

The acquisition cost of investment securities in each Fund expressed in currencies other than the currency of denomination is converted to the base currency at the exchange rates prevailing at the purchase date.

f) Income/charges from investments

Income on long securities and dividends on securities are recognized net of withholding tax quoted at ex-date, to the extent information thereon is reasonably available to the Fund. Bank interest, interest on fixed income securities and interest on Contracts For Difference (CFDs) are accrued for each net asset valuation.

g) Forward foreign exchange contracts

Profit and loss arising from un-matured forward foreign exchange contracts are determined on the basis of the applicable forward exchange rates at the valuation date, and are recorded in the combined Statement of Net Assets. Net realised profit / loss and change in net unrealised appreciation / depreciation on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at December 31, 2023 are shown in Note 5.

h) Futures contracts

Futures contracts are valued on the last available published price on the valuation date and are recorded in the Statement of Net Assets. Realised profit / loss and change in net unrealised appreciation / depreciation on futures contracts are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at December 31, 2023 are shown in Note 6.

Notes to the Audited Financial Statements (continued) as at December 31, 2023

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Swing Pricing

On business days when trading in a Fund's shares will require net purchases or sales of portfolio investments exceeding a certain percentage of the Fund's net assets (as set by the Management Company and approved by the SICAV), a Fund's Net Asset Value may be adjusted.

This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy subscriptions or redemptions of shares (understanding that a Fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

Swing pricing is intended to reduce the impact of these costs on Shareholders who are not trading their shares at that time. In general, the Net Asset Value will be adjusted upward when there is strong demand to subscribe for Fund shares and downward when there is strong demand to redeem Fund shares. Swing pricing adjustments are automatic and are applied systematically by computation.

Thresholds and adjustment percentages can vary by Fund, but the adjustment will not be larger than 2% of Net Asset Value for all share classes within a Fund. In extraordinary situations the Management Company can raise this limit to protect the interests of Shareholders.

The Net Asset Value for all the Funds in the SICAV have swung during the financial period with the exception of the following Funds:

Eastern Europe, Russia, Sverige Småbolag, Global Portfolio Solution - Balanced, Global Portfolio Solution - Defensive, Global Portfolio Solution - Stable, Global Portfolio Solution - Opportunity and Global Index.

No Fund required a swing adjustment on December 31, 2023.

j) Realised profit / loss on Contracts For Difference ("CFDs")

Net realised profit / loss and change in net unrealised appreciation / depreciation on CFDs are computed on the basis of average cost, and recorded in the Statement of Operations and Changes in Net Assets. The net unrealised profit / loss on CFDs is recorded in the Statement of Net Assets and full details of the contracts open as at December 31, 2023 are shown in Note 8.

k) Swaps and Swaptions

The total return swaps and inflation swaps are valued at fair market value as determined in good faith pursuant to the procedures established by the Board of Directors of the SICAV. The unrealised profit / loss on swaps is presented in the Statement of Net Assets. The realised profit / loss and change in net unrealised appreciation / depreciation on swaps and swaptions are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at December 31, 2023 are shown in Note 7 and Note 9.

A swaption can be defined as the option to enter into a specified swap agreement with the issuer on a specified future date.

l) Options Contracts

Options are valued at the market price on the valuation date. Unrealised gains or losses resulting at the time of reporting from the valuation of options are recorded in the Statement of Net Assets. Net realised profit / loss and change in net unrealised appreciation / depreciation on sale of options are recorded in the Statement of Operations and Changes in Net Assets and full details of the contracts open as at December 31, 2023 are shown in Note 7.

m) Combined financial statements of the SICAV

The combined financial statements represent the sum of the financial statements of each Fund after conversion. The combined financial statements are presented in EUR, using the exchange rate in effect as at December 31, 2023. The difference between the opening net assets stated at the rate of exchange used for conversion into EUR as of December 31, 2023 and December 31, 2022 is shown as Currency conversion in the Combined Statement of Operations and Changes in Net Assets.

NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES

Management fees

The Management Company receives the management fee from the net assets of each share class, payable quarterly in arrears, which in turn pays the Investment Manager and the distributors. The actual annual rates applied on December 31, 2023 are listed in the table below.

Notes to the Audited Financial Statements (continued) as at December 31, 2023

NOTE 3 – MANAGEMENT FEES AND OPERATING AND ADMINISTRATIVE EXPENSES (continued)

Operating and Administrative Expenses

The SICAV pays the Management Company operating and administrative expenses (the “Operating and Administrative Expenses”) as determined in respect of each Fund and/or share class in the relevant Fund description in the SICAV Prospectus. The Operating and Administrative Expenses are fixed, and the actual annual rates applied on December 31, 2023 are listed in the table below.

The Management Company shall bear the excess in actual expenses to any Operating and Administrative Expenses charged to the Fund and/or share class. On the other hand the Management Company is entitled to retain any amount of the Operating and Administrative Expenses charged to the Fund and/or share class, which exceeds the actual related expenses incurred by the respective Fund and/or share class.

Under current law and practice, the SICAV is liable, to an annual subscription tax of 0.05% except those Funds or share classes, which may benefit from the lower rate of 0.01% as more fully described in article 174 of the 2010 Law. No such tax is due on the portion of assets of the Fund invested in other Luxembourg UCITS or UCIs (if any) provided that such assets have already been subject to the subscription tax. This tax is paid by the Management Company out of the Operating and Administrative Expenses.

The Operating and Administrative Expenses covers the administration and safekeeping of assets and in addition other ongoing operating and administrative expenses as follows:

- the Luxembourg tax d'abonnement;
- fees and expenses of the depositary, including charges for local correspondents that exceed the depositary's responsibility;
- fees of the central administration and registrar agent;
- risk and compliance monitoring;
- fees and expenses of professional firms, such as the auditors and legal advisers;
- government, regulatory and registration expenses;
- cost of providing information to shareholders, such as publishing NAVs and notices as well as creating, translating and distributing financial reports, prospectuses and PRIIPs KIDs;
- fund formation expenses;
- reasonable out-of-pocket expenses of board members, and any fees that the board agrees the SICAV should pay to independent board members for their service on the board;
- all other costs associated with operation and distribution, including expenses incurred by the management company and all service providers.

In case a portion of the above mentioned fees of the Service Providers is paid directly from the assets of the Fund and/or share class, the Operating and Administrative Expenses due to the Management Company is reduced accordingly. The Operating and Administrative Expenses do not include the following fees and expenses, which are payable by the Fund:

- 1) brokerage and bank charges incurred on business transactions and securities trades and other transaction-related expenses;
- 2) extraordinary expenses, such as legal or other expertise needed to defend the interest of shareholders.

The above mentioned fees are calculated on each valuation day on the net assets of the relevant Fund and/or share class and are paid quarterly in arrears.

Only share classes active at year end are disclosed:

If the Fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same Management Company or by any other company to which the Management Company is linked by common management or control or by a substantial direct or indirect holding, that Management Company or other company may not charge subscription or redemption fees on account of the Fund's investment in the units of other UCITS and/or other UCI.

In respect of a Fund's investments in UCITS and other UCIs whether managed or not by the Management Company or any other company linked to the Management Company, the total management fee (excluding any performance fee, if any, and taking into account net amount of possible rebates from the other UCITS and/or UCIs in which the Fund invests in) charged to such Fund itself and the other UCITS and/or other UCIs concerned are outlined in the table below:

Fund	Maximum Annual Management Fees incl. Underlying Funds	Maximum Management Fee in % p.a.	Current Management Fee in % p.a.	Maximum Operating & Admin. Expense % p.a.	Current Operating & Admin. Expense % p.a.
Global Portfolio Solution - Balanced - Class X	2.50%	0.95%	0.5525%	0.50%	0.15%
Global Portfolio Solution - Defensive - Class X	2.50%	0.85%	0.44625%	0.50%	0.15%
Global Portfolio Solution - Growth - Class X	2.50%	1.15%	0.7225%	0.50%	0.15%
Global Portfolio Solution - Stable - Class X	2.50%	0.75%	0.3825%	0.50%	0.15%
Global Portfolio Solution - Opportunity - Class X	2.50%	1.05%	0.61625%	0.50%	0.15%

NOTE 4 – PERFORMANCE FEES

The Investment Manager is also entitled to receive a performance fee from Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation calculated, accrued and locked on each valuation day and paid annually in arrears on or after the last valuation day in each financial year. If a performance fee is payable in relation to a relevant share class, the performance fee shall be an amount equal to 20% of the Outperformance for Europe Long-Short Equity Factors and Global Alternative Opportunities and 10% of the Outperformance for Global Tactical Allocation.

The performance fee methodology is in accordance with CSSF Circular 20/764 regarding guidelines on performance fees in UCITS, ESMA Guidelines on performance fees in UCITS and ESMA "Questions and Answers" regarding the application of the UCITS Directive.

A performance fee is charged when a share class of the Fund outperforms its reference benchmark for performance fee calculation, a measure of relevant market performance, as shown below:

DANSKE INVEST SICAV

Notes to the Audited Financial Statements (continued) as at December 31, 2023

NOTE 4 – PERFORMANCE FEES (continued)

Share Class	Reference Benchmark For Performance Fee Calculation	Bloomberg ticker	Benchmark administrator ESMA registered
CHF	Swiss Average Rate Overnight	SSARON	Yes
DKK	Tomorrow/Next Interest Rate	DETNT/N	Yes
EUR	Euro short-term rate	ESTRON	N/A
NOK	Norwegian Overnight Weighted Average Rate	NOWA	N/A
SEK	Stockholm Interbank Offered Rate Tomorrow/Next	STIB1D	No
USD	US Federal Funds effective rate	FEDLO1	No

At the beginning of the first business day of a calculation period, and as soon as a performance fee is crystallised at the end of the calculation period, the accrued fee is set to zero and the respective values of the relevant NAV and the reference benchmark for performance fee calculation are defined as the zero point for the period's performance fee calculations.

On every day that is a business day for a Fund, the performance of the applicable reference benchmark for performance fee calculation is subtracted from the share class performance. A positive result indicates outperformance, a negative number underperformance.

The results from these calculations accrue over the calculation period. When the accruals result in net outperformance for the period to date, they are factored into NAV. When the accruals result in net underperformance for the period to date, no performance fee is factored into NAV, but the accrual calculations continue, meaning that no performance fee can be earned during that calculation period until the accrued underperformance is overcome.

The performance fee is payable only if the performance of the share class exceeds the NAV previously attained when a performance fee was crystallised at the end of the calculation period, or if it exceeds the NAV at inception, if no performance fee has been paid.

This above-mentioned NAV, referred as high watermark, is adjusted for the movements in the reference benchmark for performance fee calculation and takes into account the subscriptions, redemptions or distributions effects. The calculation method is designed to account for the actual investment performance of the Fund and not for NAV increases resulting from new subscriptions. Furthermore, swing pricing or other adjustments intended to mitigate the effects of transaction volumes or costs are not counted in the performance fee calculation.

In cases where the value for the reference benchmark for performance fee calculation is negative, its value is defined as zero for the purposes of the calculation of the performance fee.

Because different share classes of a Fund may have different NAVs, the actual performance fees paid may vary by share class. As at the end of the year, performance fee applied to Europe Long-Short Equity Factors, Global Alternative Opportunities and Global Tactical Allocation, as shown below:

These transaction costs are composed of brokerage costs and are included in cost of securities.

For Bond Funds, transaction costs are included in the spread.

NOTE 12 – EVENTS DURING THE YEAR

In October 2022, CACEIS and Royal Bank of Canada (“RBC”) announced they had signed a memorandum of understanding for the intended acquisition by CACEIS of the European asset servicing business of RBC. As part of this acquisition, CACEIS would acquire the entire issued share capital of RBC Investor Services Bank S.A. (“IS BANK”)

Completion of the sale of IS BANK occurred on July 3, 2023 following regulatory approval and RBC Investor Services Bank S.A. became CACEIS Investor Services Bank S.A.

Danske Invest SICAV – European Bond was liquidated on May 17, 2023.

On November 24, 2023, the service provider for Depositary and Custodian service as well as Administrative Agent and Registrar and Transfer Agent changed from CACEIS Investor Services Bank S.A. to J.P. Morgan SE - Luxembourg Branch.

NOTE 13 – POST BALANCE SHEET EVENTS

There are no post balance sheet events.

RISK EXPOSURE

Danske Invest Management A/S uses a risk management process to monitor and measure at any time the overall risk profile of each fund from direct investment, derivatives, techniques, collateral and all other sources. Global exposure assessments are calculated every trading day (whether or not the fund calculates a NAV for that day), and encompass numerous factors, including coverage for contingent liabilities created by derivative positions, counterparty risk, foreseeable market movements and the time available to liquidate positions.

Any derivatives embedded in transferable securities or money market instrument count as derivatives held by the fund, and any exposure to transferable securities or money market instruments gained through derivatives (except certain index-based derivatives) counts as investment in those securities or instruments.

Risk monitoring approaches: There are three main risk measurement approaches: the commitment approach and the two forms of value at risk (VaR) - Absolute and Relative. These approaches are described in the Prospectus and the approach each fund uses is outlined in the table below.

Name of the fund	Investment Manager	Sub-Investment Manager	Investment Style	Risk Approach	Risk Basis	Base ccy

Remuneration policy

Danske Invest Management A/S (DIMA) current remuneration policy is available on the website www.danskeinvest.lu and several tables on remuneration related information for 2023 are below:

The remuneration to the Danske Invest SICAV Board of Directors is paid out of the operating and administrative expenses from the SICAV.

2023 Remuneration for the Danske Invest SICAV Board in EUR

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
Danske Invest SICAV Board of Directors	87,500	–	87,500	4
Total remuneration	87,500	–	87,500	4

Remuneration in Danske Invest Management A/S for 2023 in DKK 1,000

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
DIMA Board of Directors	473	–	473	6
Management Board	4,979	–	4,979	2
Other material risk takers	12,050	193	12,243	11
Other employees	33,477	1,130	34,607	40
Total remuneration	50,979	1,323	52,302	59

DIMA has delegated portfolio management to Danske Bank A/S in Denmark. The total remuneration for Danske Bank A/S has been allocated to the SICAV based on the SICAV's pro rata share of the total AUM managed by Danske Bank A/S for 2023 as outlined in the table below.

2023 Remuneration for the Investment Manager for Danske Invest SICAV in DKK 1,000

	Fixed remuneration	Variable remuneration	Total remuneration	Head-count
Danske Bank A/S	57,758	13,573	71,331	44
Total remuneration	57,758	13,573	71,331	44

Acceptable Collateral

Asset Category	Asset Sub-Category	Acceptable Jurisdictions
Fixed Income Securities	Securities issued by the sovereign government Securities issued by sovereign government agencies Securities issued or guaranteed by provincial/state governments Corporate bonds with an issuer rating of A- or higher* Bank obligations with a short term issuer rating of A-1 or higher.	Member states of the OECD rated A or higher
	Securities issued by supranational organizations rated AAA or higher	N/A
Equities & Equivalents	Equities listed or traded on the Main Index**	Canada, USA, Kong, Japan, Singapore, Austria, Belgium, Italy, Netherlands, Spain, Sweden, Switzerland, or the UK
	American Depository Receipts, Global Depository Receipts, or convertible securities which are unconditionally convertible into equities listed or traded on the Main Index	
	Exchange traded Funds which are 100% physically backed and which track the Main Index	

* For any Acceptable Collateral that is required to have an issuer rating: ratings are based on the S&P equivalent but if more than one ratings agency has issued rating and the ratings are not equivalent to each other, then the second

** Main index means the main index of an Acceptable Jurisdiction.

As defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions, margin lending transactions and Total Return Swaps.

Accordingly, disclosures required by Article 13 of the Regulation are not applicable for the year ended 31 December 2023.

How to read the SFDR annexes

Funds categorised under SFDR Article 8 and 9

The SFDR-annexes contain the periodic reporting on sustainability-related aspects for funds promoting environmental or social characteristics and/or investing in sustainable investments.

The annexes supplement the financial statements of the funds and are prepared in accordance with reporting requirements outlined in the Sustainable Finance Disclosure Regulation (“**SFDR**”) and the EU Taxonomy Regulation with underlying delegated acts. The reporting captures funds categorised under Article 8 and/or, as relevant, Article 9 of SFDR.

The annexes provide information on the extent to which the funds have succeeded in attaining their promoted environmental and/or social characteristics and/or met their sustainable investment objectives as outlined in the prospectuses.

The reporting is outlined in tables and figures using sustainability indicators (metrics). For ease of reference, the reporting contains information on the so-called binding elements relevant to the each characteristic/objective promoted by the fund. For example, an ESG score might be a relevant sustainability indicator with the binding element being that the fund aims to have an ESG score equal to or higher than 40.

With a few exemptions, the funds report against the PAI indicators seeking to demonstrate the development in respect to potential exposures to activities having an adverse impact on sustainability factors. The reporting should be read with the reservation that the data coverage and quality for those indicators vary. This concerns in particular indicators such as scope 3 GHG emissions, where – still – there is a significant variation in relation to what is reported by investee companies and the general data quality in respect to this indicator. As data quality improves the quality and consistency of reported figures is equally expected to enhance.

The annexes cover the reference period 1 January 2023 – 31 December 2023 and is general based on average values for the year, unless otherwise mentioned in the reports.

For further information on how the funds promote environmental and/or social characteristics, or attain their sustainable investment objective, please refer to the funds’ prospectuses.

For further information on sustainability indicators, data and monitoring, see the information available on the website for each fund in the document named “Sustainability-Related Disclosures”.

Funds categorised under Article 6

The following funds are categorised under Article 6 and not covered by SFDR reporting:

- Danske Invest SICAV – Global Alternative Opportunities.

For those funds, investors should be informed that the investments made by the funds do not consider EU criteria for environmentally sustainable economic activities. Nor does the fund make any considerations or prioritisation of principal adverse impact indicators.

Definition list

Benchmark	Performance metric used for comparison. An indicative benchmark is applied to funds without a benchmark
Carbon Risk Rating Score	Score measuring how the issuers manage different climate related aspects and source from ISS ESG.
Environmental and/or social characteristics	Environmental and/or social characteristics integrated in the investment process through inclusion, exclusion and/or active ownership
ESG	Standard term for environmental ("E"), social ("S") and governance ("G") aspects
ESG-score	Score measuring issuers'/companies' management of ESG aspects. The score is based on a model developed by Danske Bank
Investee companies' / issuers' management of sustainability matters	Reference applied for active ownership activities in the fund in respect of its investments
Reduction of activities and conduct harmful to society	Exclusion criteria based on investment exclusion outlined in the prospectus
Reduction of involvement in non-ethical and controversial activities	Exclusion criteria based on investment exclusions outlined in the prospectus
Reduction of activities resulting in significant negative impact on the climate	Exclusion criteria based on investment exclusions outlined in the prospectus
SDGs	Sustainable Development Goals of the United Nations
SFDR	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector
Sound environmental stewardship	Inclusion criteria for certain funds
Sustainable investment objective	Investments targeting economic activities that contribute to environmental and/or social objectives without significantly harming such objectives while considering good governance
Taxonomy Regulation	Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investments

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Denmark Focus

Legal entity identifier: 549300XWJ5OKA3UNM348

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

4. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

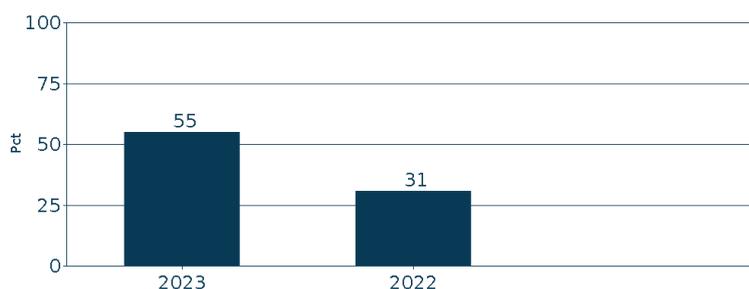

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 15% of its investments in sustainable investments.

Exclusions

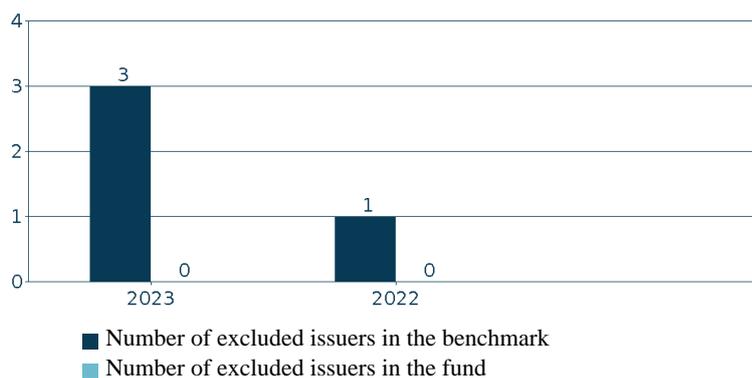

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio

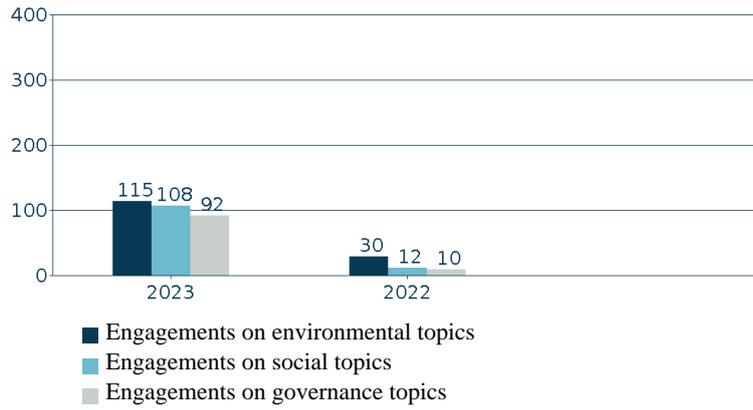

Activities and conduct deemed harmful to society	Good governance	34	1	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	1	0.4%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.4%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

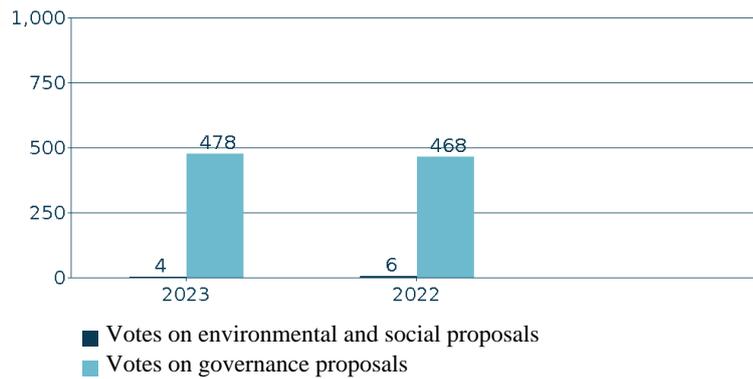

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 55% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,600	98.5%	4,215	99.8%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	77	98.5%	177	99.8%

26	Average rule of law score	0.00	0.0%	0.00	0.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 78 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 5 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already

excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 5 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Tryg	Financials	4.2%	DK

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 55% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

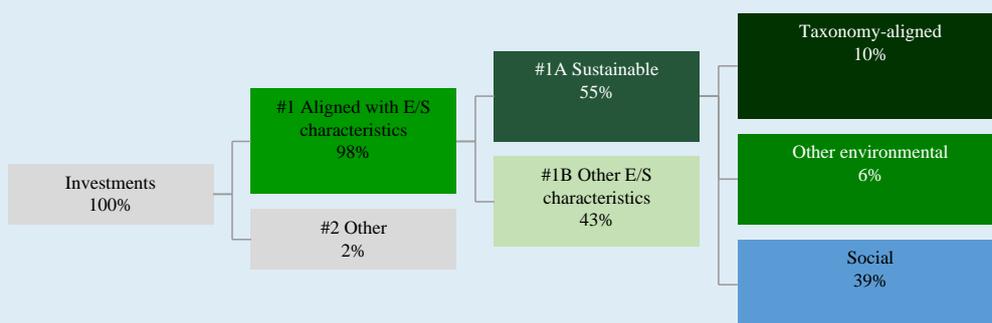

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 99%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 55% in sustainable investments, split with 10% investments aligned with the EU Taxonomy, 6% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 39% investments with a social objective.

In 2022, the fund invested 31% in sustainable investments, split with 7% investments aligned with the EU Taxonomy, 5% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 19% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Health Care	Pharmaceuticals	12.29%
Financials	Diversified Banks	11.01%
Industrials	Heavy Electrical Equipment	8.52%
Financials	Property & Casualty Insurance	8.01%
Industrials	Marine Transportation	5.57%
Industrials	Diversified Support Services	5.51%
Consumer Staples	Brewers	5.38%
Industrials	Air Freight & Logistics	5.22%
Industrials	Electrical Components & Equipment	5.19%
Materials	Specialty Chemicals	5.05%
Utilities	Electric Utilities	4.96%
Health Care	Health Care Supplies	4.22%
Industrials	Construction Machinery & Heavy Transportation Equipment	4.10%
Consumer Discretionary	Consumer Electronics	3.11%
Health Care	Biotechnology	2.62%

Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 10% has been invested into activities in support of a climate objective with:

- 4.0% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

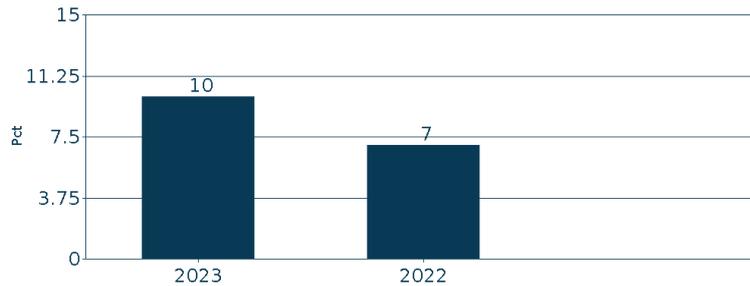

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	10%
Investments aligned with the EU taxonomy (enabling activities)	7%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 6%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 39%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Danish Bond

Legal entity identifier: 549300TV6IZQ3FWIF807

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

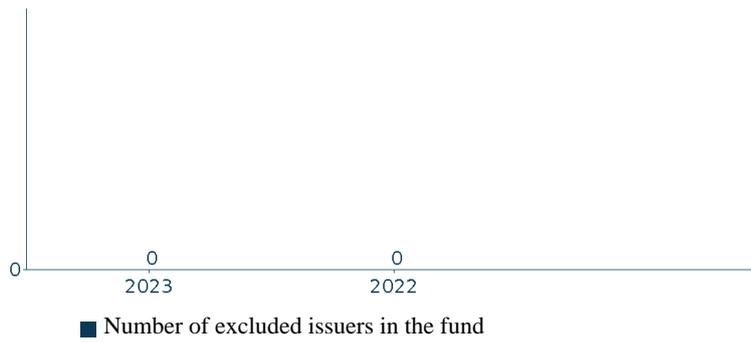

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	0
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	0
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

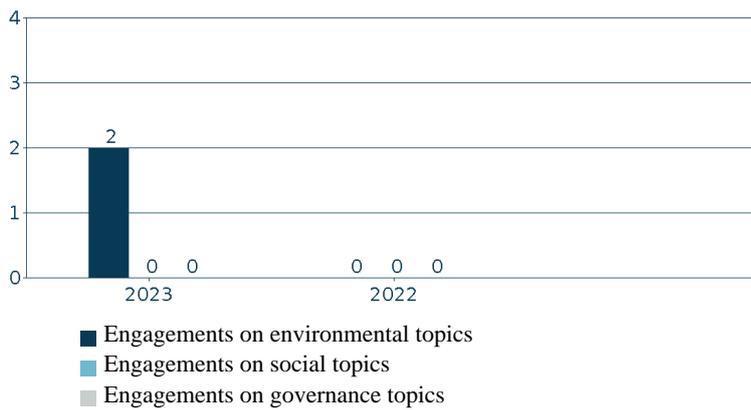

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0	66.2%	0	66.5%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	0	66.2%	0	66.5%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	120	66.2%	135	66.5%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

04	Total GHG emissions (tons)	120	66.2%	135	66.5%
05	Carbon footprint (tCO ₂ e / m€invested)	25	66.2%	21	66.5%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 0 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 1 engagement activities relating to the indicators have been logged for issuers in the fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

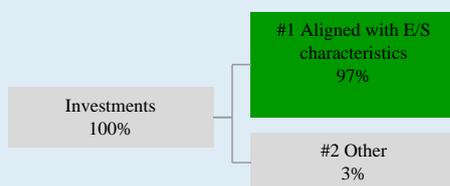

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 97% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 95%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	56.90%
Financials	Thriffs & Mortgage Finance	28.72%
Government bonds		14.39%

Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

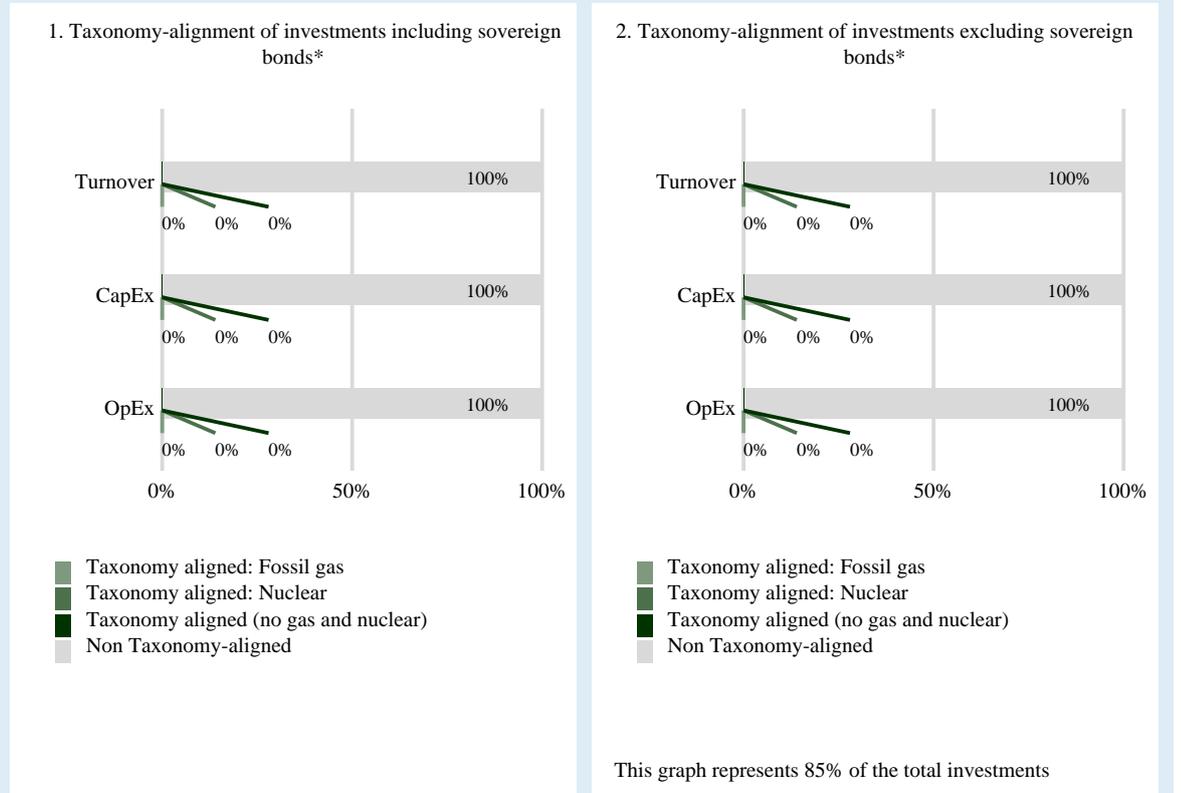

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

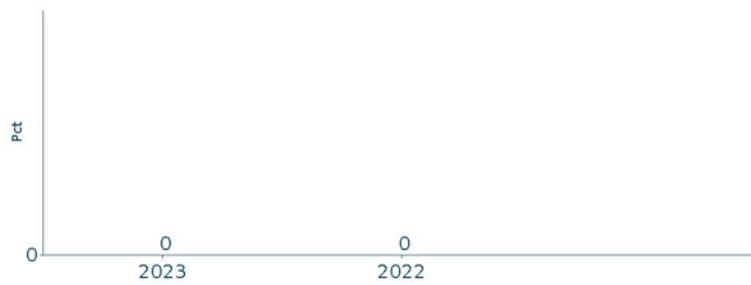

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

For sovereigns and supranationals in the portfolio 1 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Danish Mortgage Bond

Legal entity identifier: 549300B6KUUT2F7KZP39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU)

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

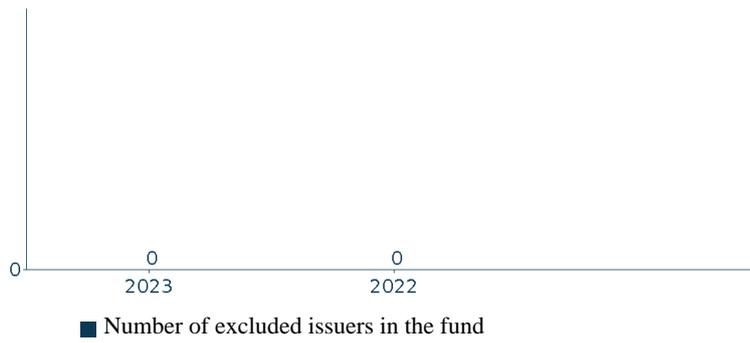

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	0
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	0
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

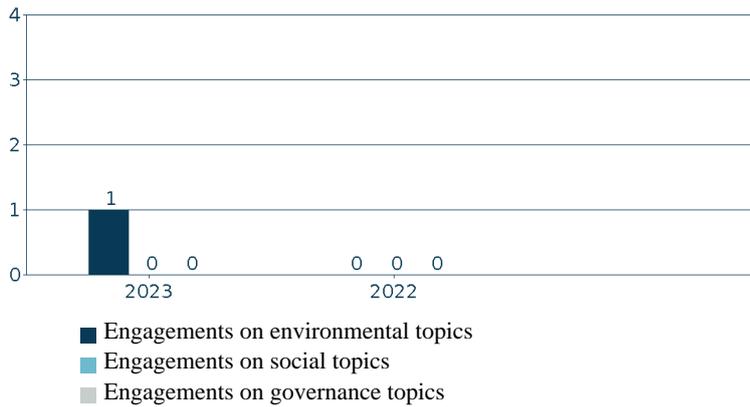

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1	61.5%	1	66.7%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1	61.5%	2	66.7%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	2,596	61.5%	2,861	66.7%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

04	Total GHG emissions (tons)	2,598	61.5%	2,864	66.7%
05	Carbon footprint (tCO ₂ e / m€invested)	28	61.5%	21	66.7%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 0 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

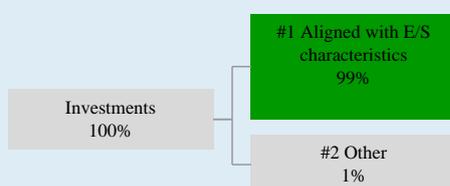

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 99% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 99%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	54.80%
Financials	Thriffs & Mortgage Finance	33.54%
Government bonds		11.65%

Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

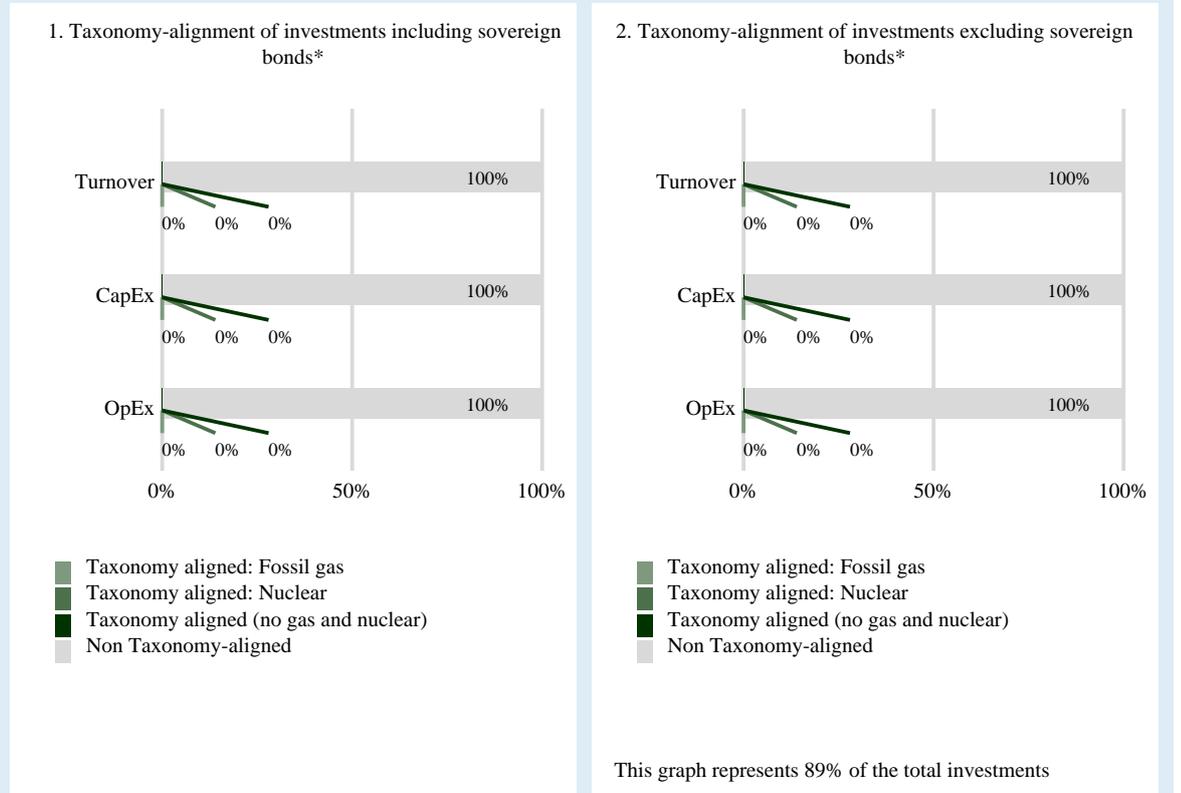

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

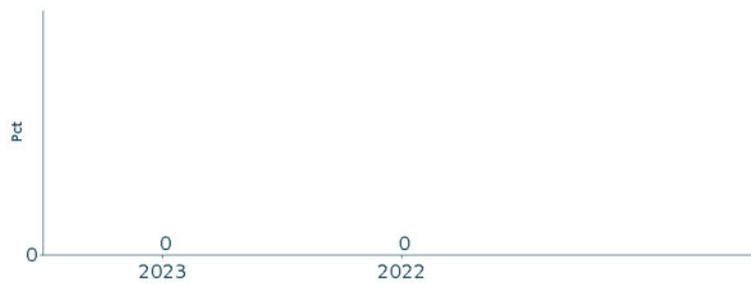

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Emerging Markets

Legal entity identifier: 549300SMAVZ8H285LJ95

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

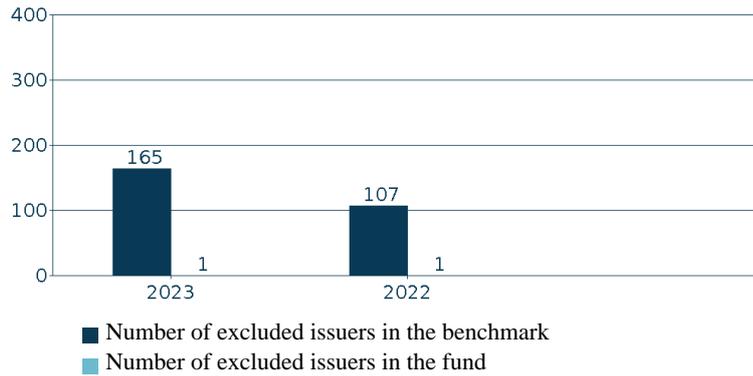

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	10	0.1%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	57	3.6%	1
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	48	1.3%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	1	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	46	3.3%	0
Non-Ethical & controversial activities	Tobacco	126	4	0.0%	0

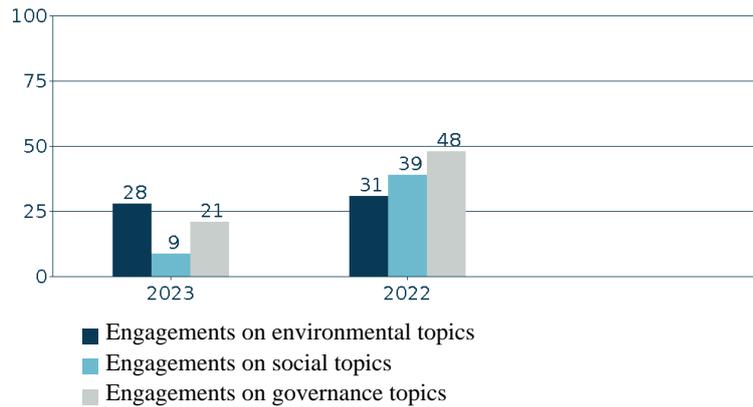

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

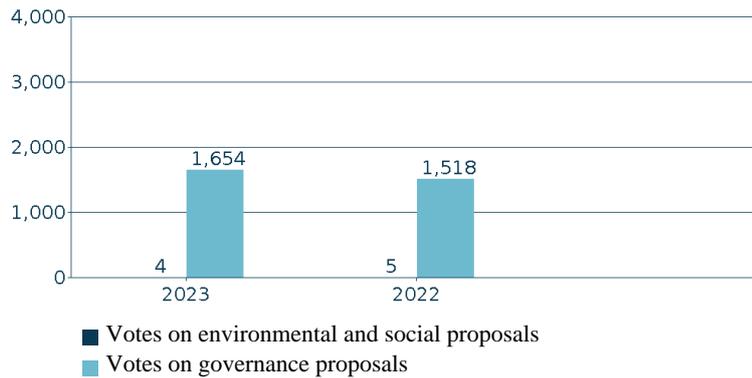

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	21,609	99.1%	14,782	99.7%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	4,814	99.1%	3,750	99.7%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	78,099	99.1%	50,237	99.7%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 24 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 2 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 4 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufactu	Information Technology	10.0%	TW
Samsung Electronics Co. Ltd.	Information Technology	6.7%	KR
Tencent Holdings Ltd.	Communication Services	5.3%	CN
Alibaba Group Holding Ltd.	Consumer Discretionary	3.7%	CN

Netease Inc. (Adr)	Communication Services	1.7%	CN

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

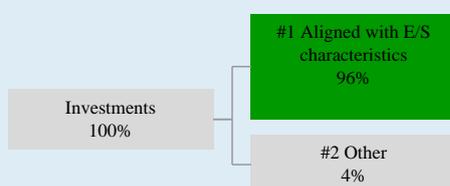

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 96% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 95%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

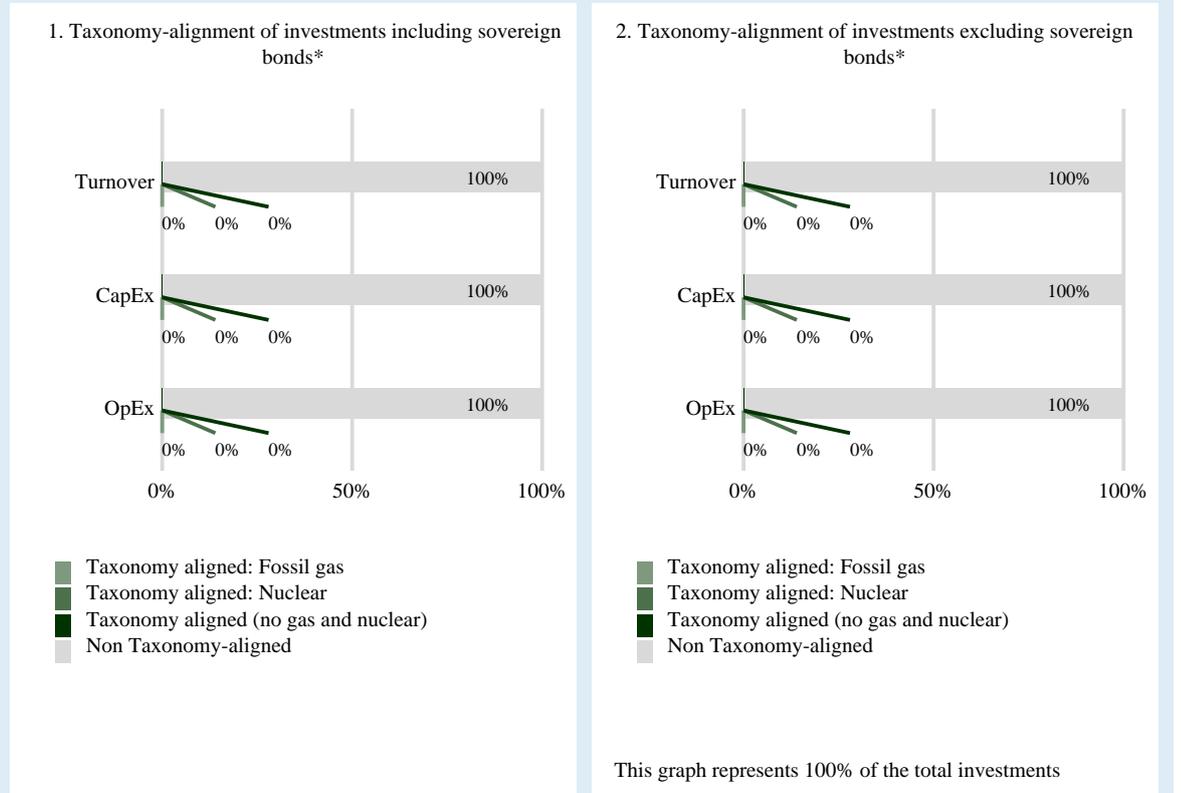

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

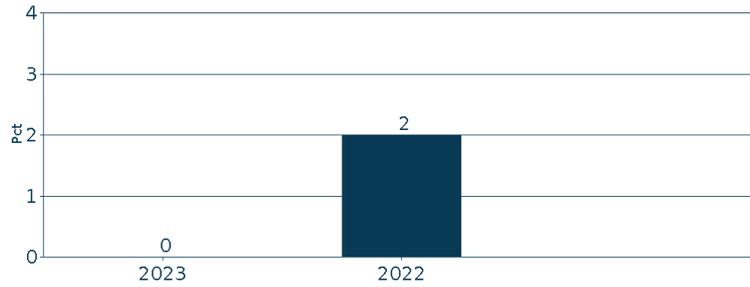

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Euro Investment Grade Corporate Bond

Legal entity identifier: 549300YC7ESBZ6ZJRV49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

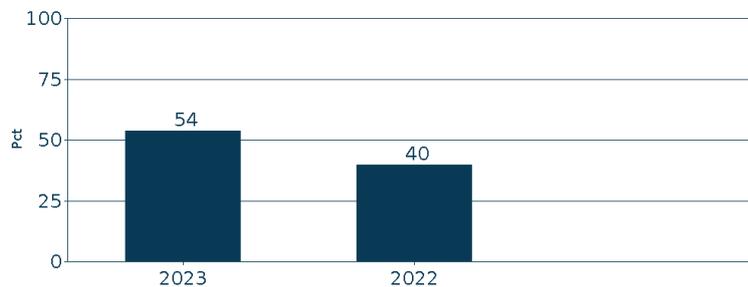

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 25% of its investments in sustainable investments.

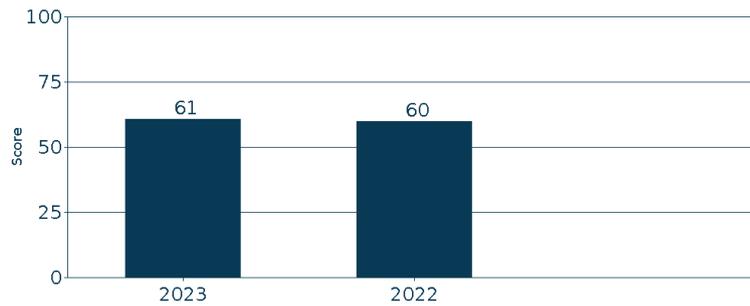

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 82%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

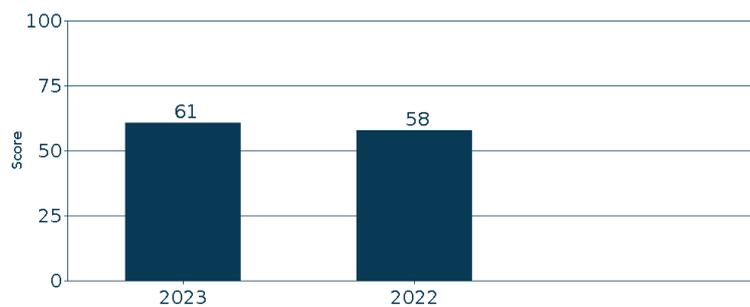

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 79%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

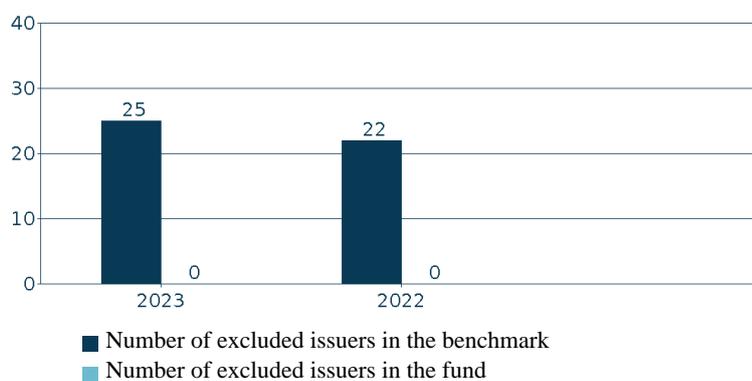

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

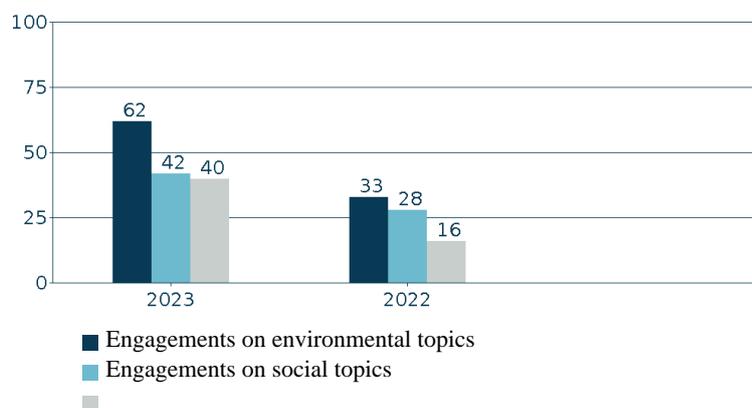

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	3	0.1%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	8	0.4%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	9	1.4%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	7	1.1%	0
Non-Ethical & controversial activities	Tobacco	126	7	0.8%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 27% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

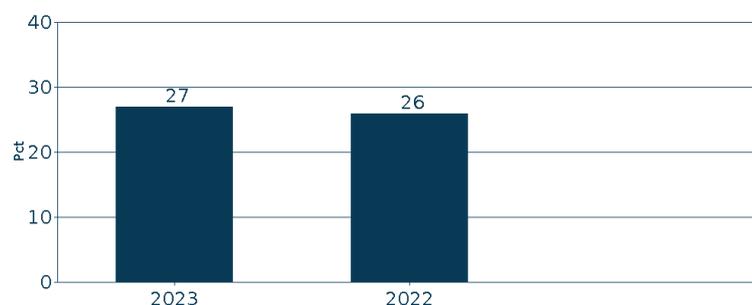

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	24,872	85.2%	13,246	83.6%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 44 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 3 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 9 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

Largest investments	Sector	% Assets	Country
Volkswagen Bank Gmbh 2.5% 31.07.2026	Consumer Discretionary	2.3%	DE

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 54% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

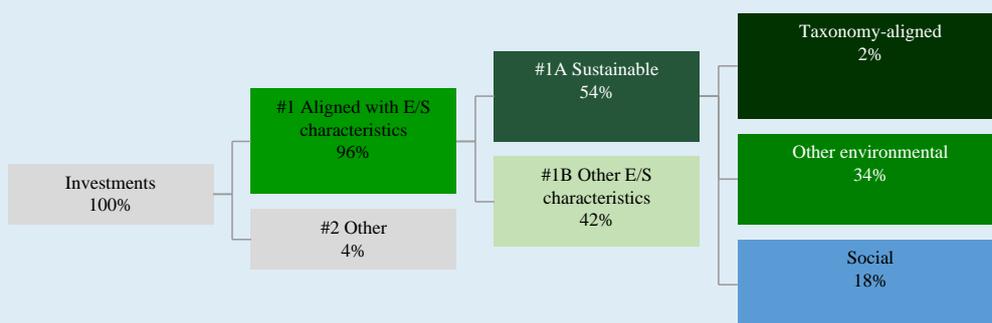

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 96% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 54% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 34% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 18% investments with a social objective.

In 2022, the fund invested 40% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 31% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 7% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.8% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

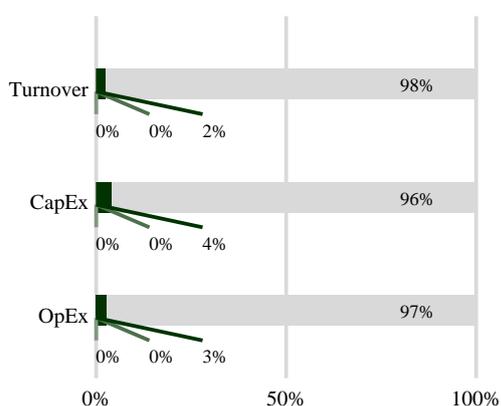

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 In fossil gas
 In nuclear energy
 No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

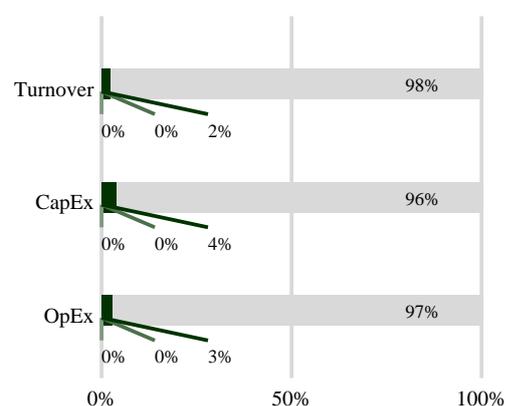

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

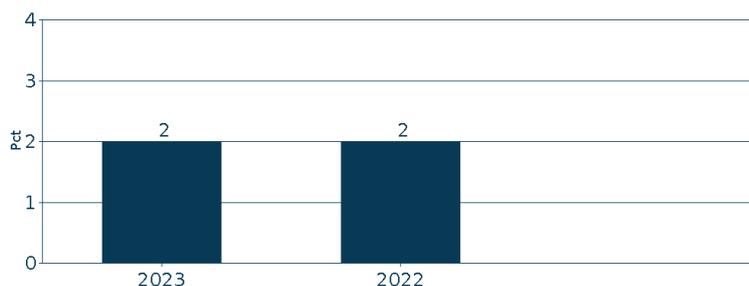

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 18%.

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the "Other" investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under "How did the sustainability indicators perform?". Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund's inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe High Dividend

Legal entity identifier: 549300DBINW48CGYX190

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). Also a commitment in the prospectus has been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

- Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

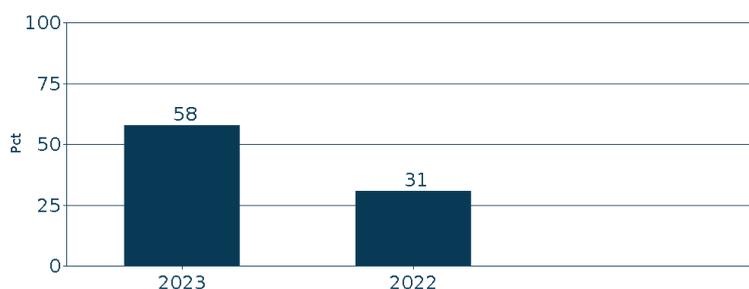

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 15% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

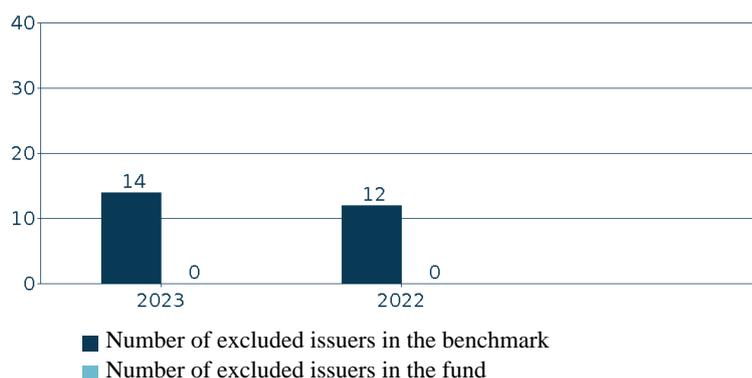

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

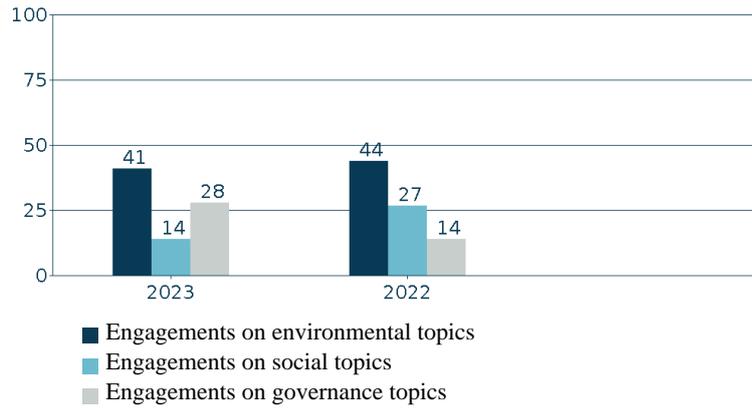

Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	3	0.9%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	2	0.8%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	8	3.1%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	7	4.0%	0
Non-Ethical & controversial activities	Tobacco	126	2	0.9%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

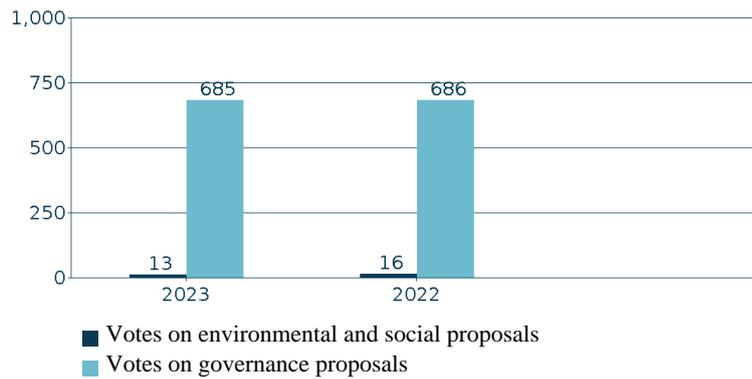

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 58% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,250	99.9%	853	100.0%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	482	99.9%	304	100.0%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	22,063	99.9%	12,266	100.0%
04	Total GHG emissions (tons)	23,795	99.9%	13,423	100.0%
05	Carbon footprint (tCO ₂ e / m€invested)	902	99.9%	703	100.0%
06	GHG intensity of investee companies (tCO ₂ e / m€of revenue)	1,358	99.1%	1,395	100.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 30 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 1 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already

excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 6 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Unilever Plc	Consumer Staples	4.4%	GB
Totalenergies Se	Energy	4.4%	FR
Zurich Insurance Group Ag	Financials	4.3%	CH
Siemens Ag	Industrials	4.2%	DE

Roche Holding Ag	Health Care	3.7%	CH
Kbc Bancassurance Holding N.V.	Financials	3.6%	BE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 58% in sustainable investments.

What was the asset allocation?

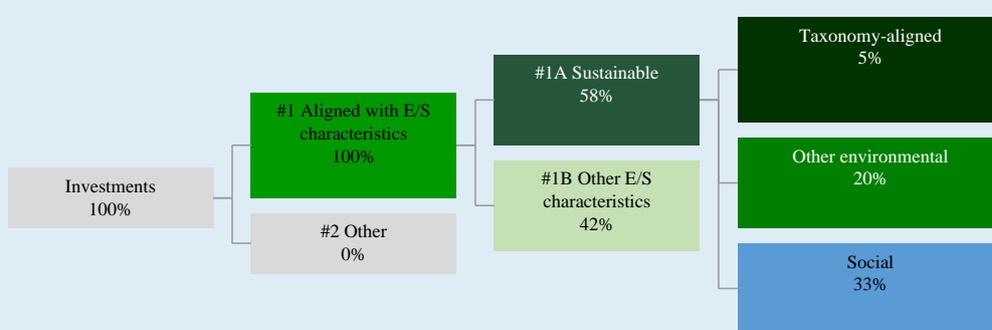

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The asset actual allocation for the reference year was 100% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 100%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 58% in sustainable investments, split with 5% investments aligned with the EU Taxonomy, 20% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 33% investments with a social objective.

In 2022, the fund invested 31% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 10% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 19% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Multi-line Insurance	16.48%
Financials	Diversified Banks	14.77%
Health Care	Pharmaceuticals	11.33%
Utilities	Multi-Utilities	7.09%
Utilities	Electric Utilities	6.56%
Energy	Integrated Oil & Gas	6.42%
Consumer Staples	Personal Care Products	4.29%
Industrials	Industrial Conglomerates	4.11%
Consumer Staples	Packaged Foods & Meats	3.84%
Consumer Staples	Food Retail	3.76%
Consumer Discretionary	Automobile Manufacturers	3.55%
Communication Services	Integrated Telecommunication Services	3.42%
Consumer Discretionary	Tires & Rubber	3.42%
Materials	Paper Products	3.11%
Industrials	Industrial Machinery & Supplies & Components	2.86%
Materials	Diversified Chemicals	2.71%
Utilities	Gas Utilities	2.30%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 5% has been invested into activities in support of a climate objective with:

- 1.8% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

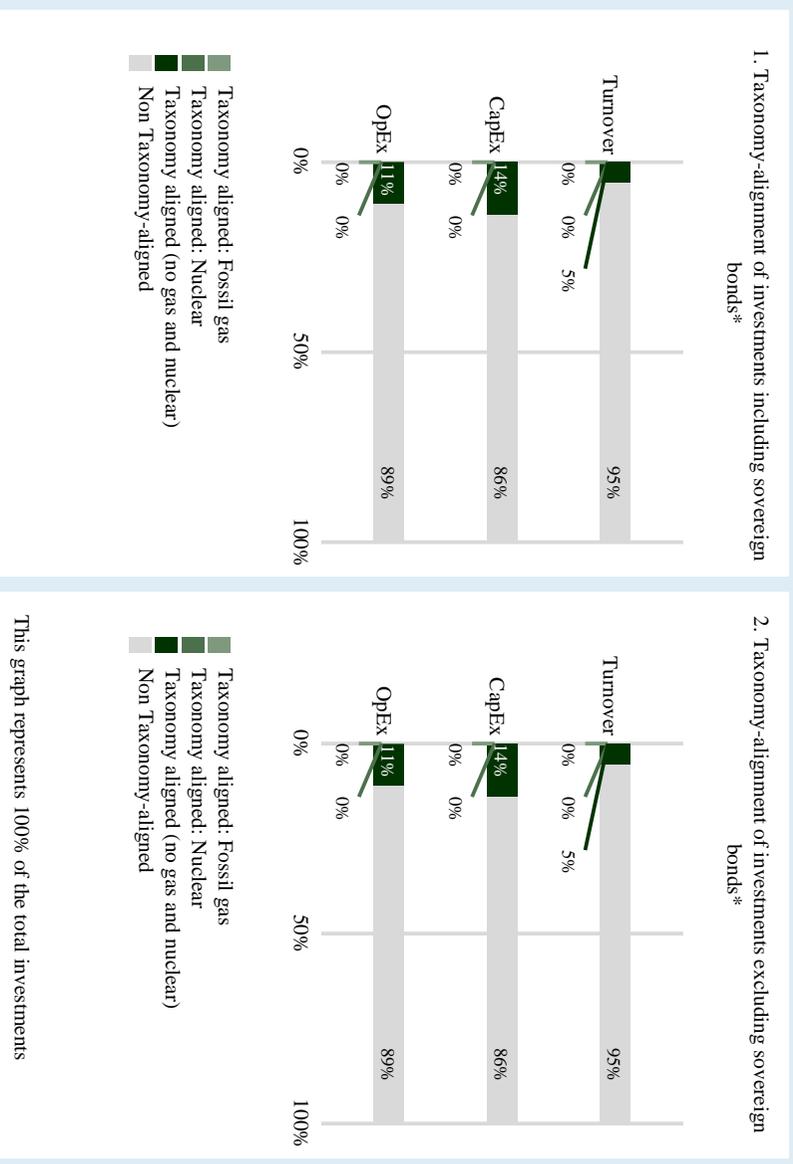

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

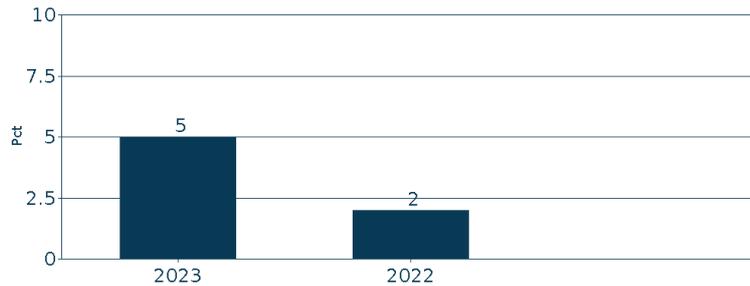

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	5%
Investments aligned with the EU taxonomy (enabling activities)	3%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 33%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

N/A

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV China
Legal entity identifier: 5493008QM35GY8URK268

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

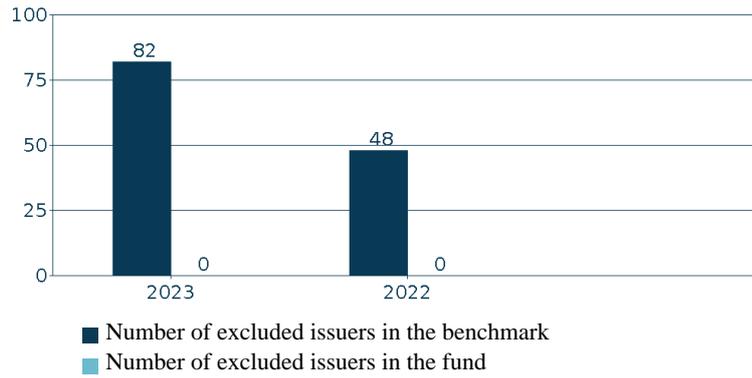

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	9	0.4%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	25	2.4%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	30	2.5%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	17	3.2%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.1%	0

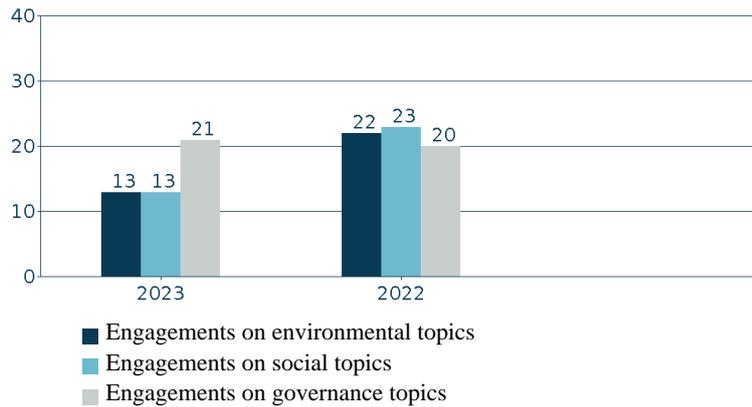

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

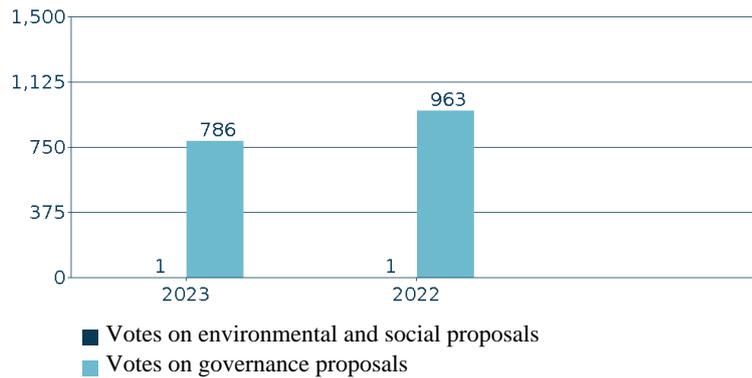

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	600	100.0%	1,979	100.0%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	296	100.0%	502	100.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 12 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 1 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 7 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Tencent Holdings Ltd.	Communication Services	9.6%	CN

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

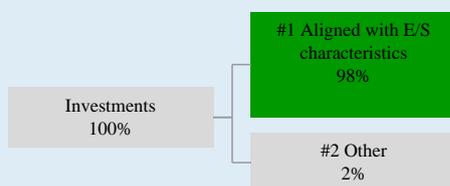

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 97%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

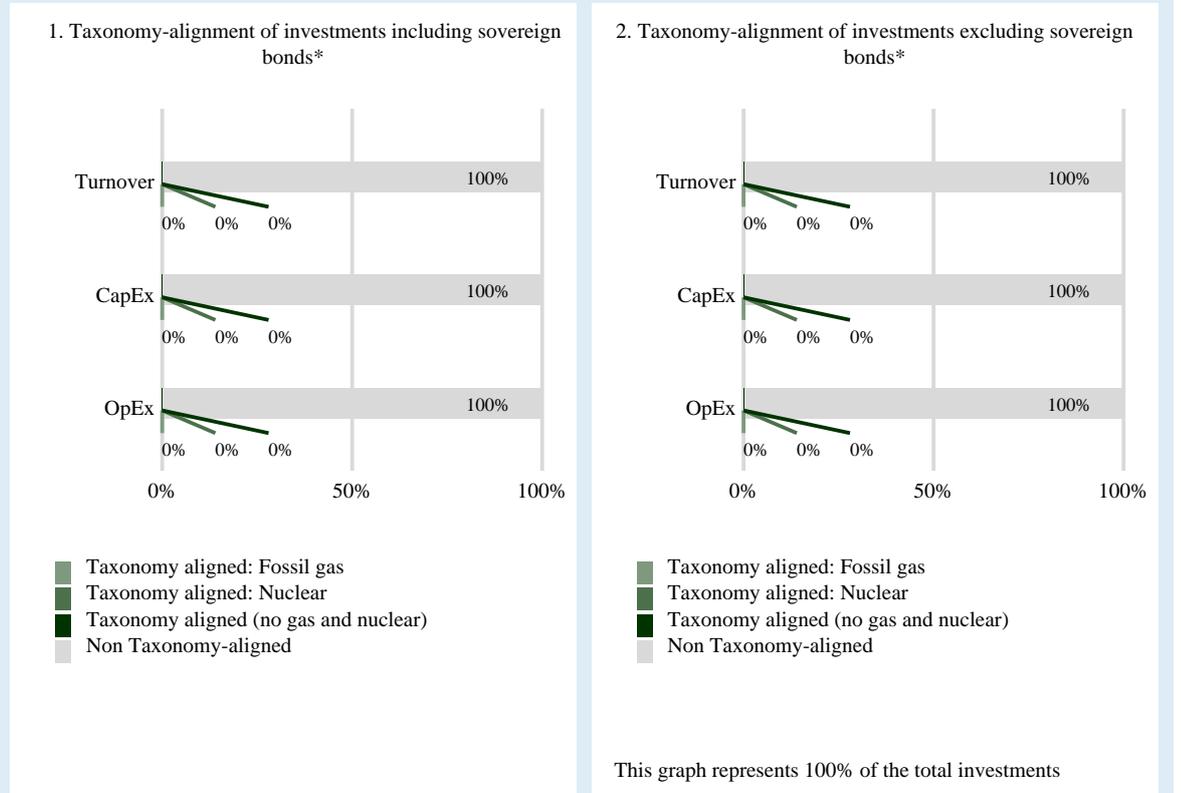

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

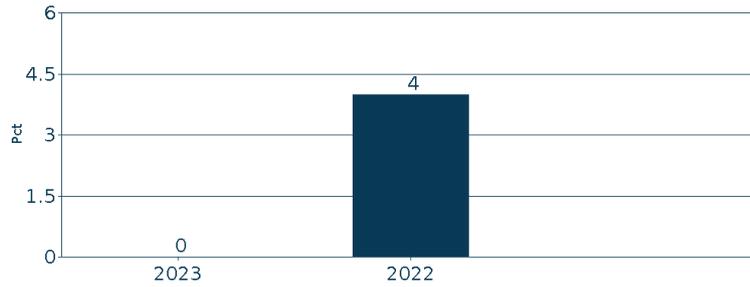

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe Small Cap

Legal entity identifier: 549300ZMX501C56DA227

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for alcohol, commercial gambling, pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). Also a commitment in the prospectus has been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

4. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

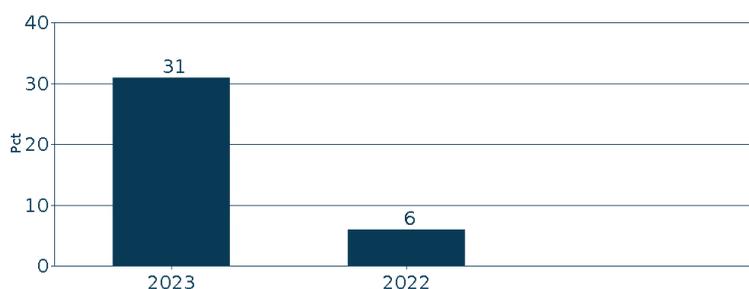

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

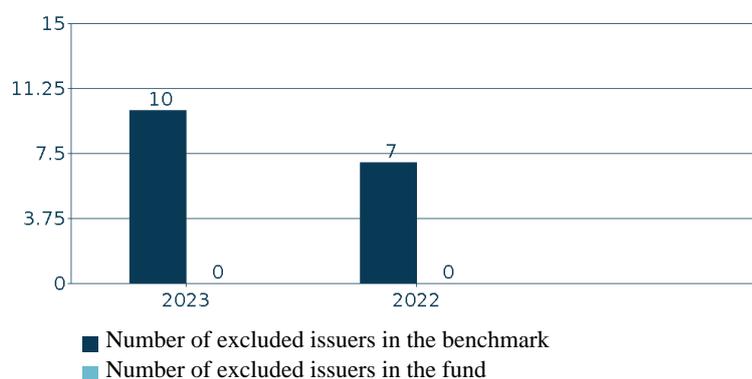

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
--------------------	-----------	---	------------------------	-----------------------	---

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

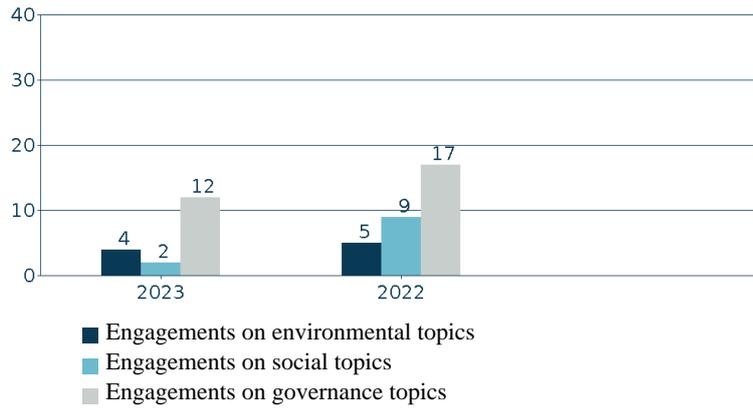

Activities and conduct deemed harmful to society	Good governance	34	1	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	1	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	5	0.3%	0
Non-Ethical & controversial activities	Commercial gambling	307	8	0.3%	0
Non-Ethical & controversial activities	Controversial weapons	98	3	0.6%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	2	0.2%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

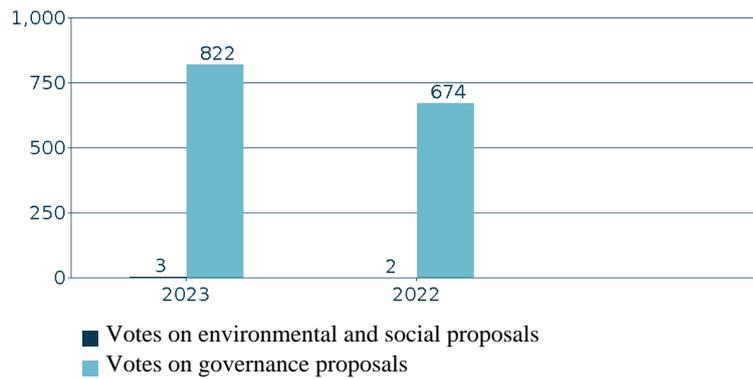

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 31% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	382	82.4%	377	74.5%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 0 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already

excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 31% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

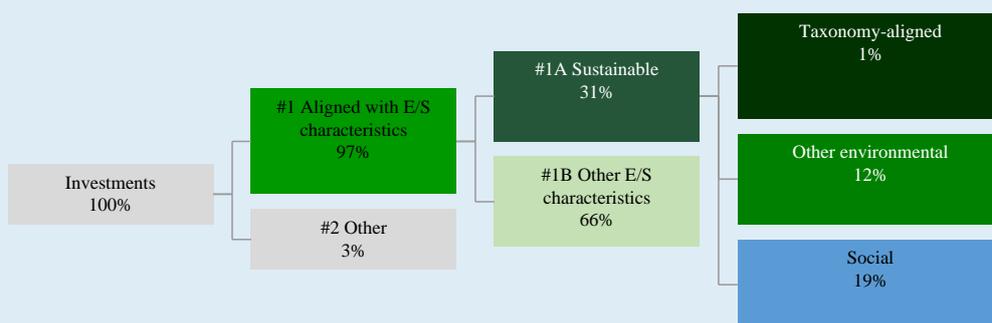

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 97% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 96%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 31% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 12% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 19% investments with a social objective.

In 2022, the fund invested 6% in sustainable investments, split with 0% investments aligned with the EU Taxonomy, 2% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 4% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.4% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

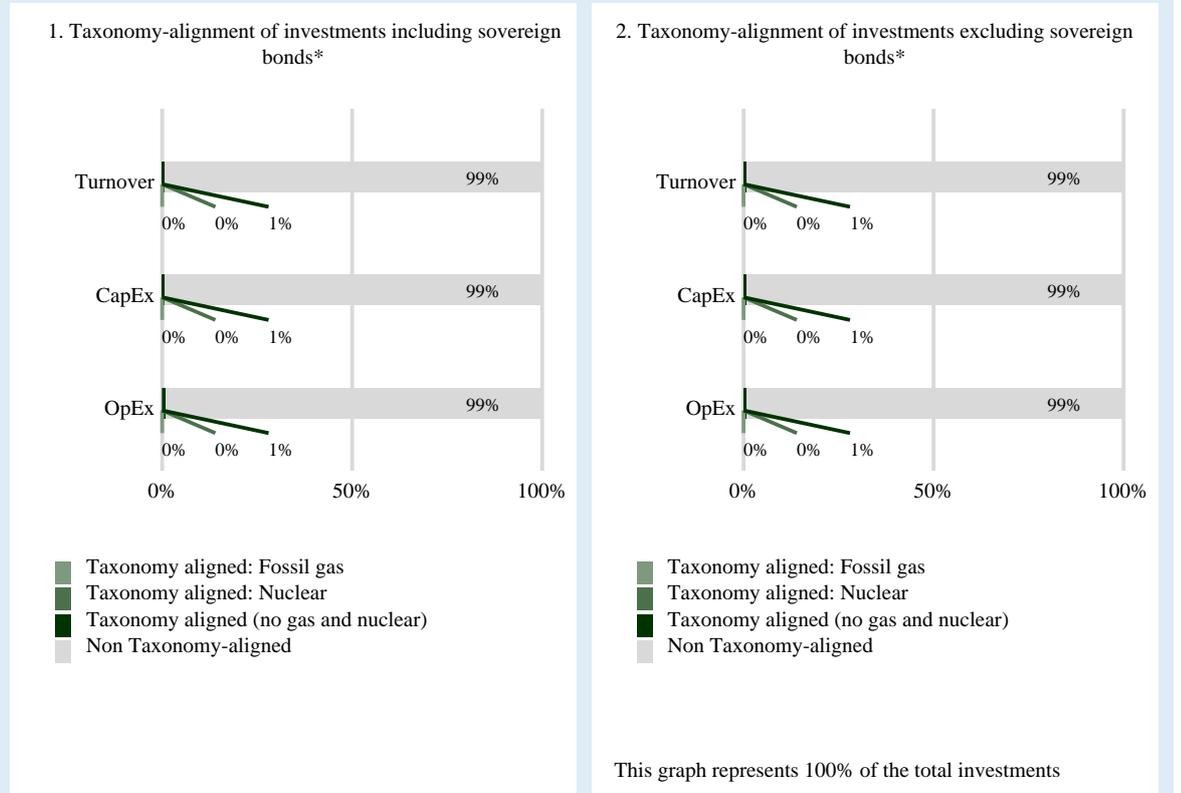

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

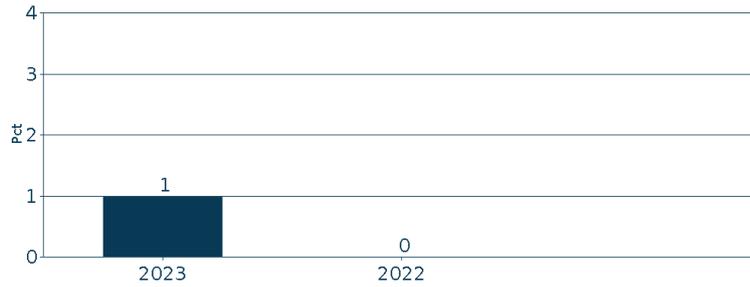

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 19%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Japan
Legal entity identifier: 222100UVNL7Y92U46R39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

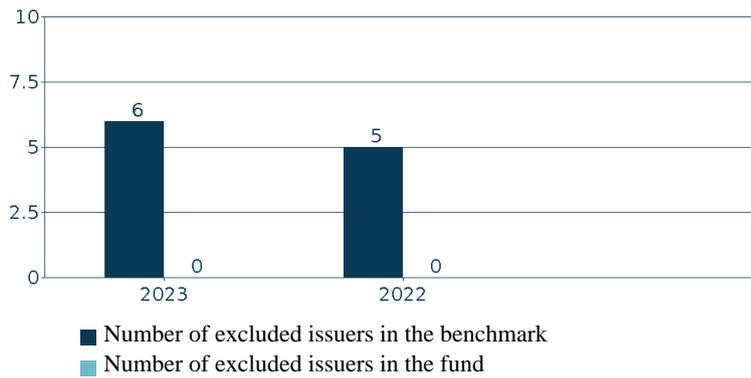

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	4	0.9%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	1	0.9%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.9%	0

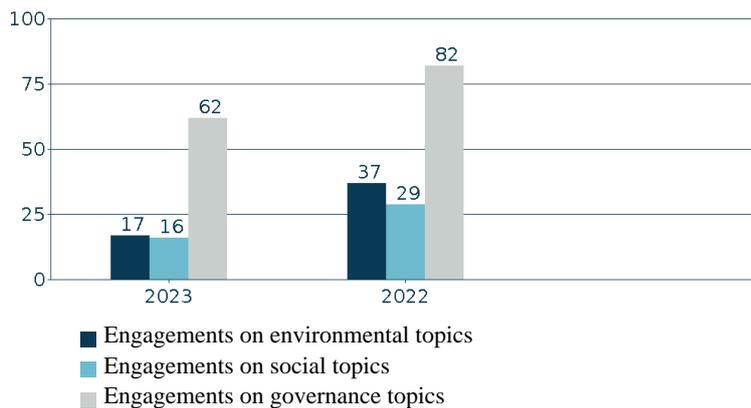

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

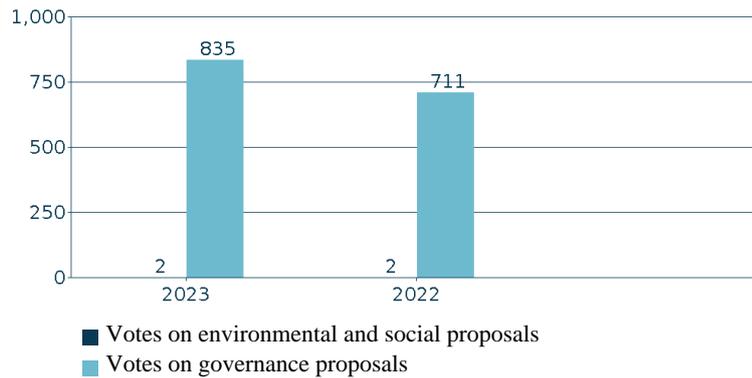

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,188	100.0%	1,339	100.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 12 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 6 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Honda Motor Co. Ltd.	Consumer Discretionary	6.2%	JP
Nissan Motor Co. Ltd.	Consumer Discretionary	5.8%	JP
Mitsubishi Ufj Financial Group	Financials	5.8%	JP

Sompo Holdings Inc.	Financials	2.1%	JP
Fuji Media Holdings Inc.	Communication Services	2.0%	JP

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

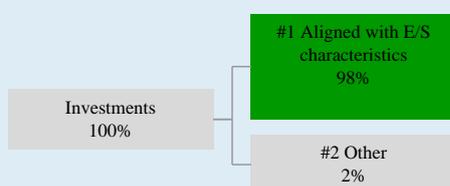

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

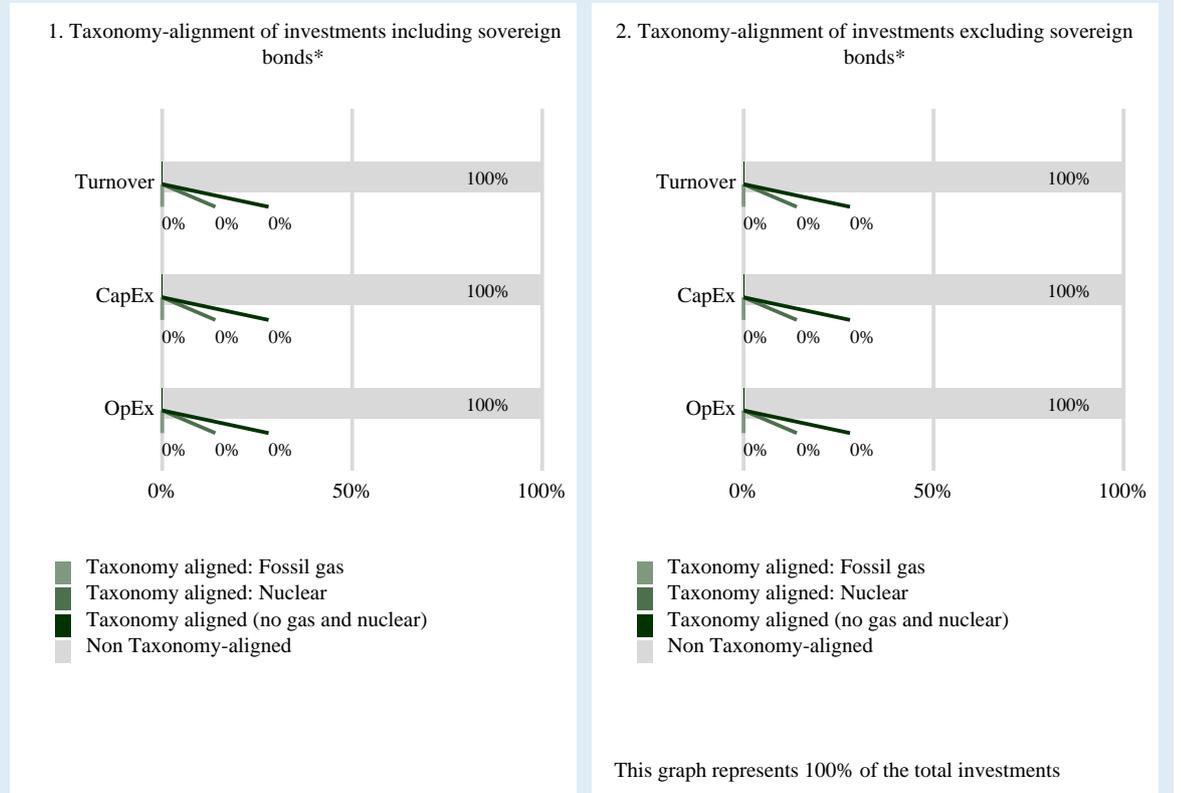

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

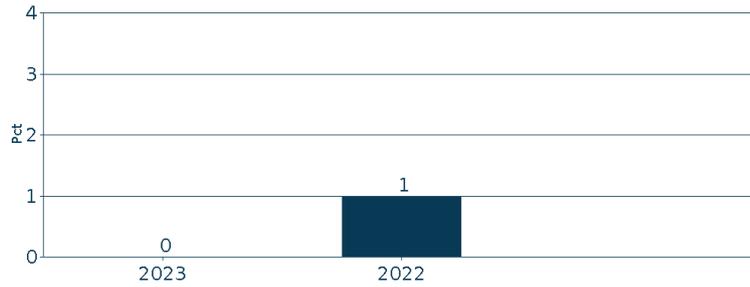

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm
with an environmental
objective that do not tal
into account the criteria
environmentally sustaina
economic activities under
Regulation (EU) 2020/852.

Reference benchmarks are
indexes to measure whether
the financial product attains
the environmental or social
characteristics that they
promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV India
Legal entity identifier: 549300FEU53U3RCW4Q22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

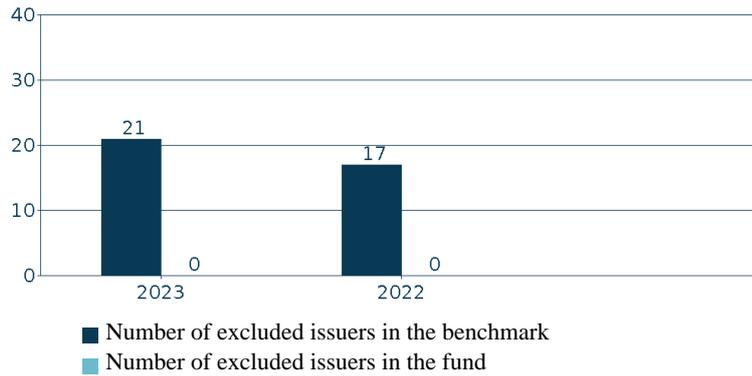

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	7	4.5%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	4	2.9%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	1	2.4%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	9	6.1%	0
Non-Ethical & controversial activities	Tobacco	126	1	1.4%	0

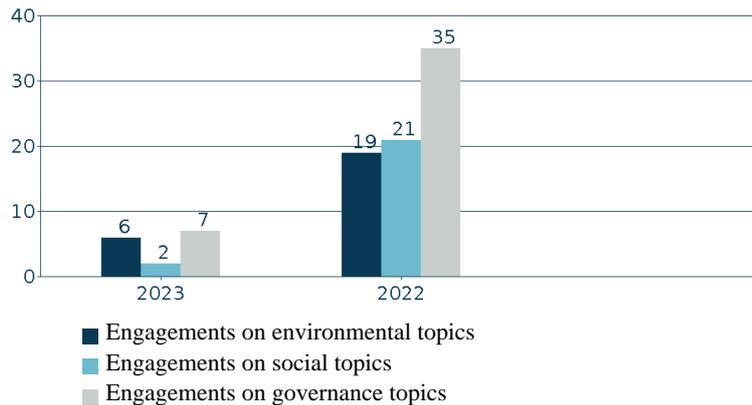

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

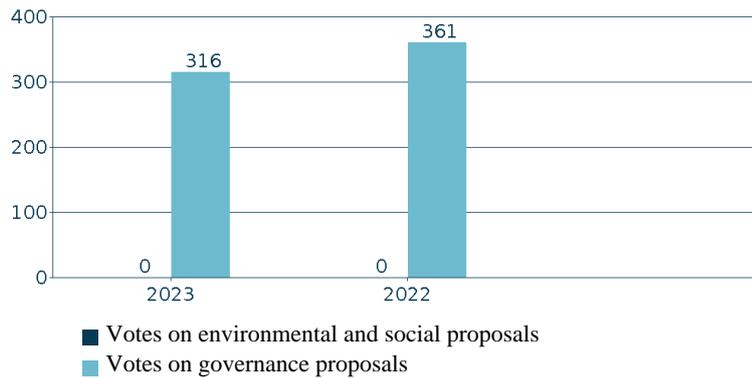

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	6,620	98.3%	5,198	91.1%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 4 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

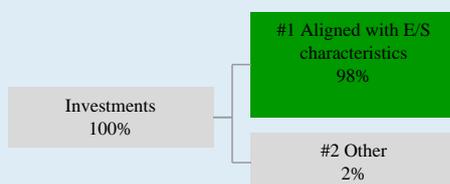

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 99%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

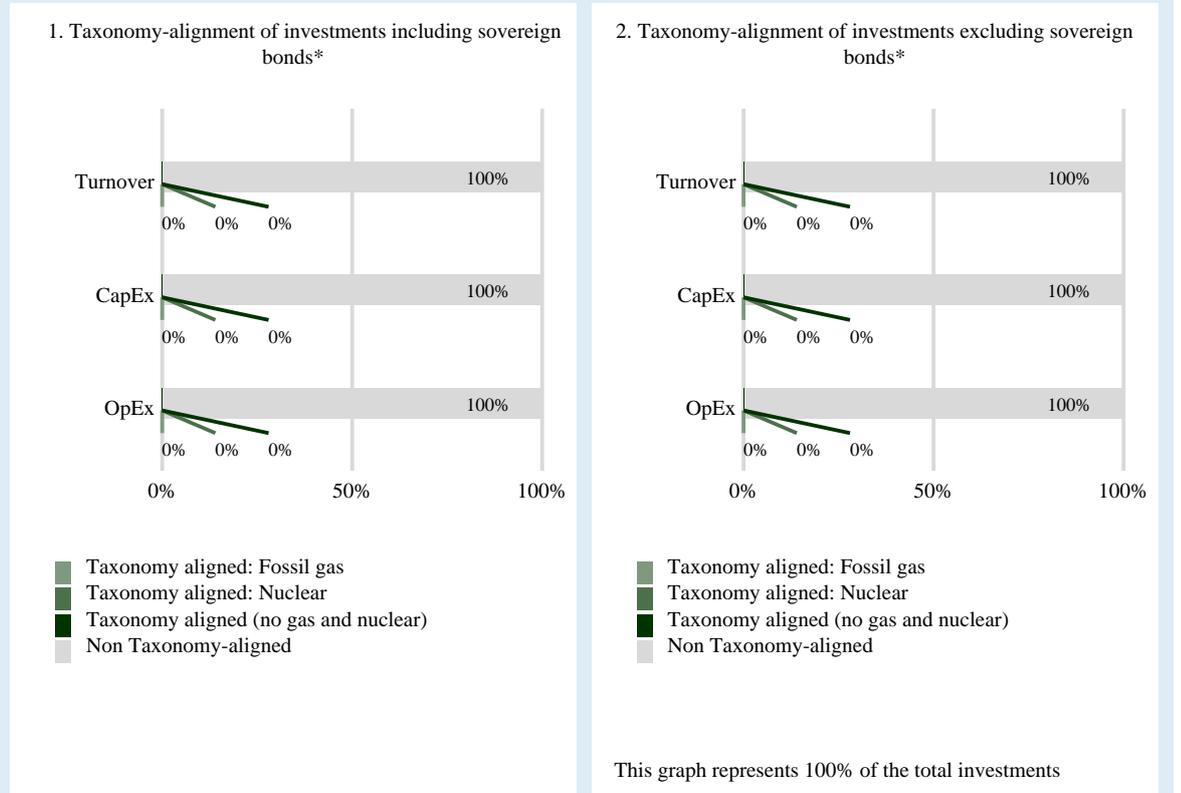

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

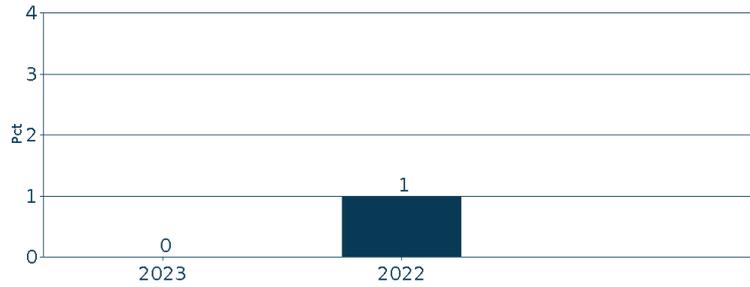

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Emerging Markets Small Cap

Legal entity identifier: 549300U0S0UWX7E6XL91

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

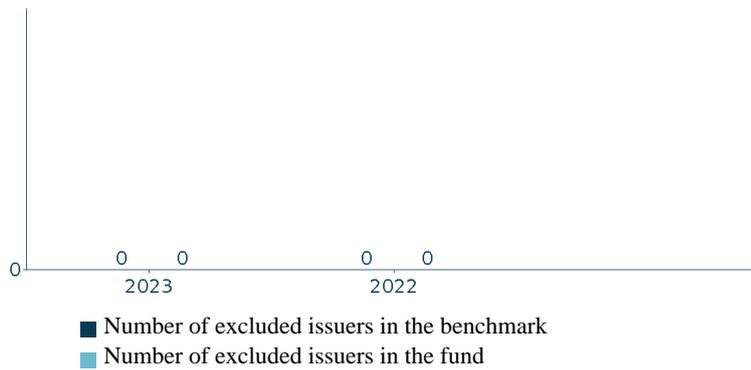

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

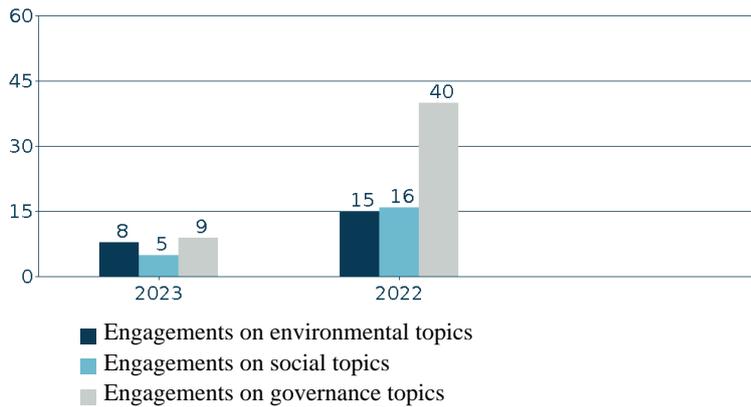

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

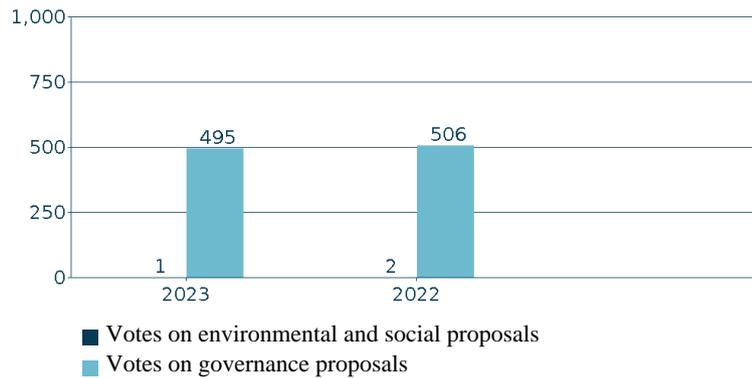

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	374	94.0%	802	87.8%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	190	94.0%	171	87.8%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 5 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Prestige Estates Projects Ltd.	Real Estate	3.9%	IN

Jyothy Labs Ltd.	Consumer Staples	2.9%	IN
Asm International Nv	Information Technology	2.8%	NL
Cyient Ltd.	Information Technology	2.8%	IN

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

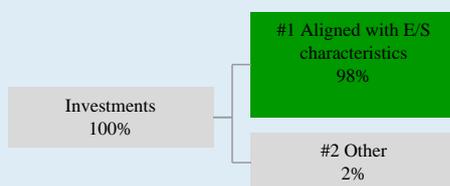

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Information Technology	IT Consulting & Other Services	6.94%
Information Technology	Semiconductors	6.01%
Real Estate	Real Estate Development	5.16%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

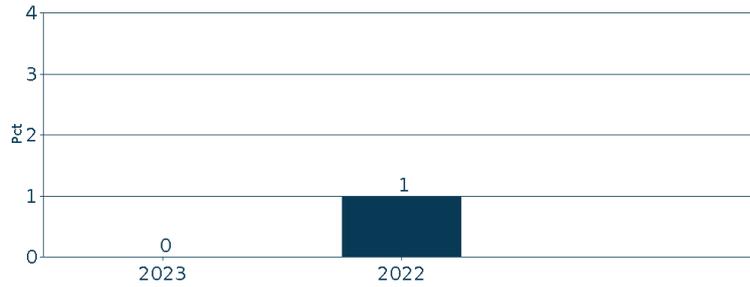

- Yes
- In fossil gas
- In nuclear energy
- No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm
with an environmental
objective that do not tal
into account the criteria
environmentally sustainable
economic activities under
Regulation (EU) 2020/852.

Reference benchmarks are
indexes to measure whether

the environmental or social
characteristics that they
promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe
Legal entity identifier: 549300BRKYYP5GOI24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

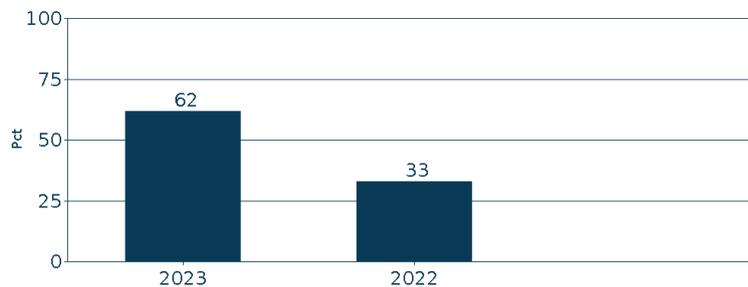

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 25% of its investments in sustainable investments.

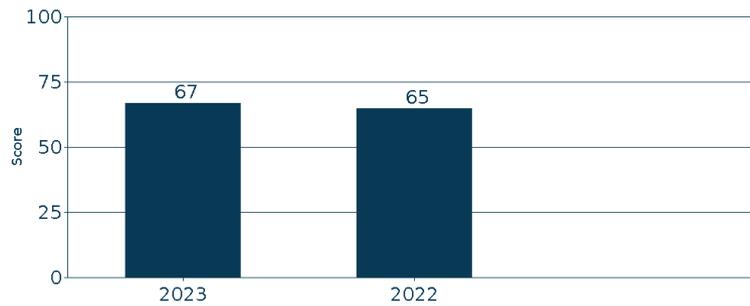

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 99%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

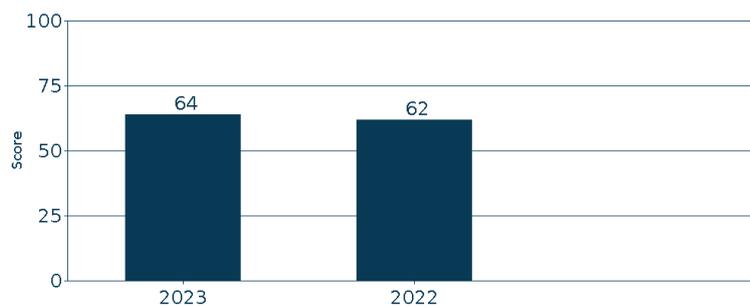

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 99%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

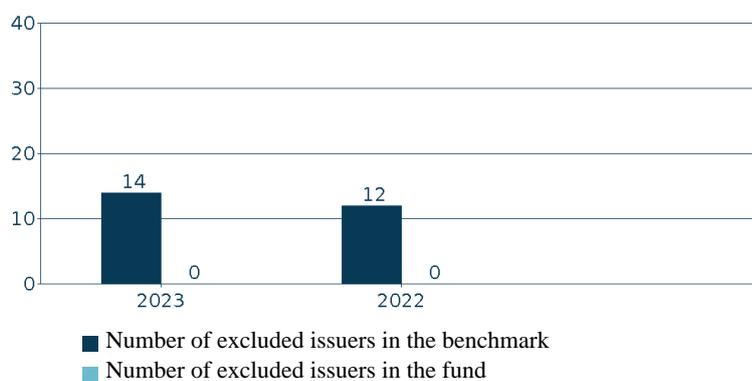

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

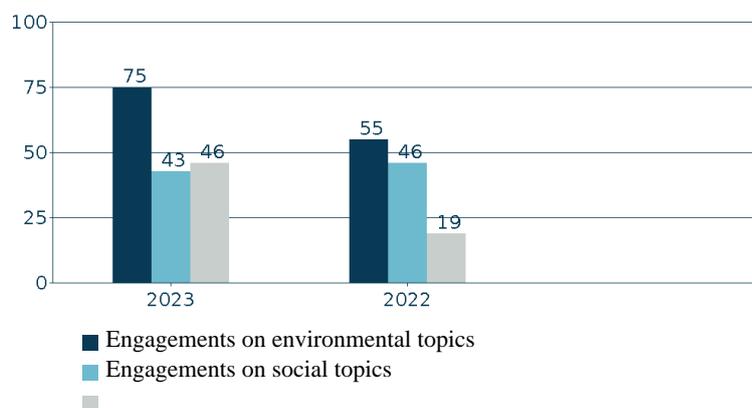

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	3	0.9%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	2	0.8%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	8	3.1%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	7	4.0%	0
Non-Ethical & controversial activities	Tobacco	126	2	0.9%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

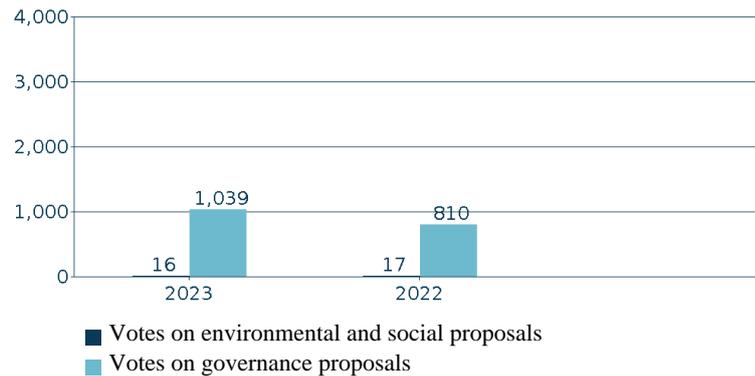

Engagements on governance topics

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 62% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,176	100.0%	3,039	100.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 54 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 8 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Novo Nordisk B	Health Care	5.8%	DK
Asml Holding Nv	Information Technology	5.2%	NL
Novo Nordisk B	Health Care	5.2%	DK
Nestle S.A.	Consumer Staples	4.9%	CH

Zurich Insurance Group Ag	Financials	2.7%	CH

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 62% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

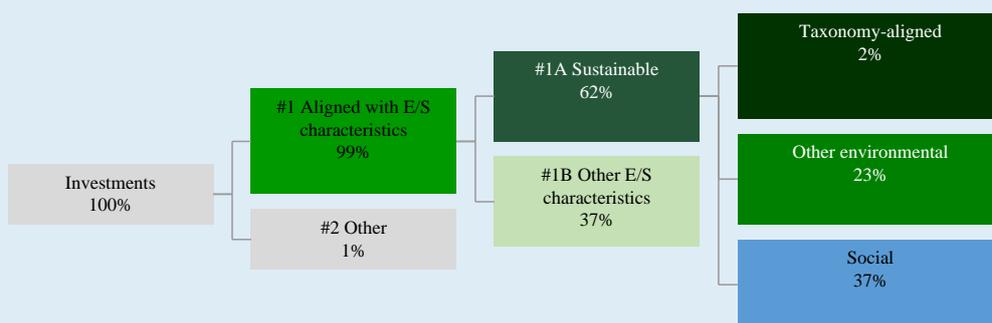

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 99% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 62% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 23% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 37% investments with a social objective.

In 2022, the fund invested 33% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 11% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 21% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Health Care	Pharmaceuticals	14.20%
Financials	Diversified Banks	8.35%
Information Technology	Semiconductor Materials & Equipment	6.81%
Consumer Staples	Packaged Foods & Meats	5.96%

Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 1.2% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
 - In nuclear energy
- No

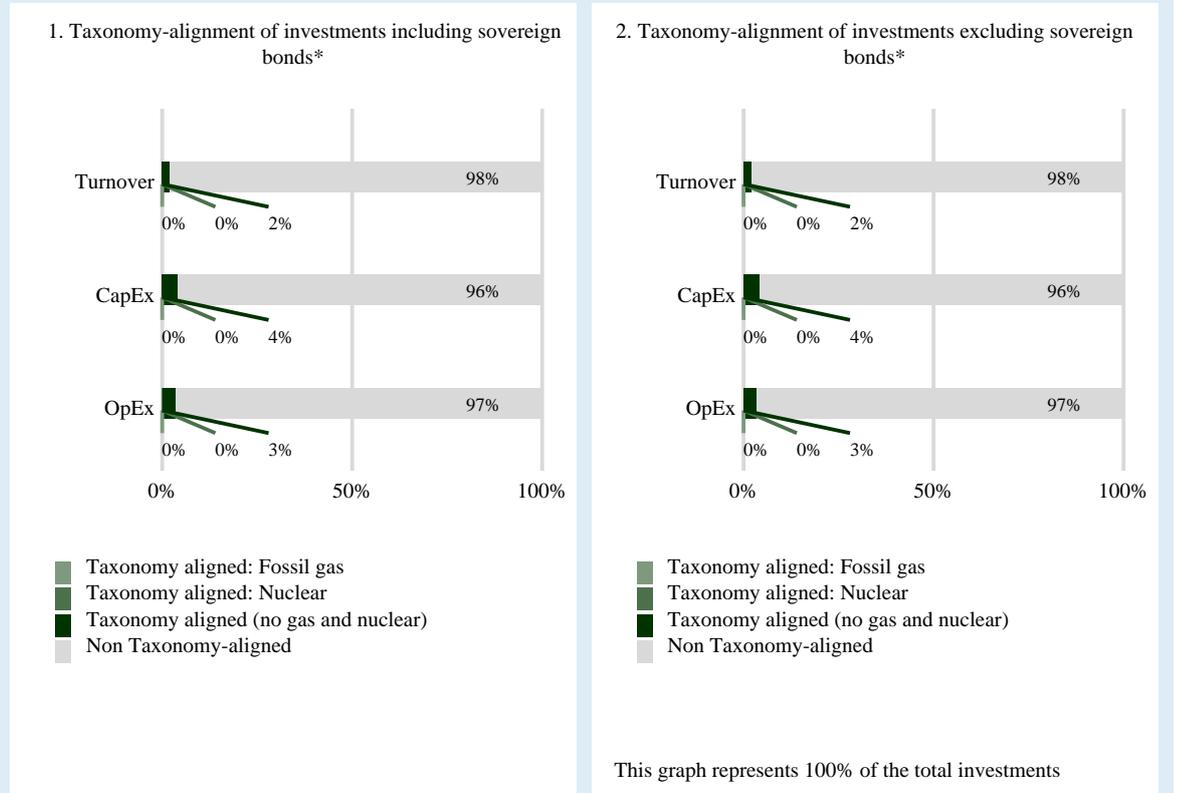

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

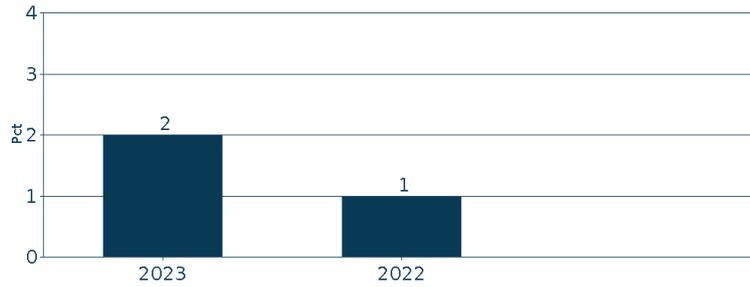

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	2%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 37%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Inflation Linked Bond

Legal entity identifier: 5493007HF4IS7X8ODT09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

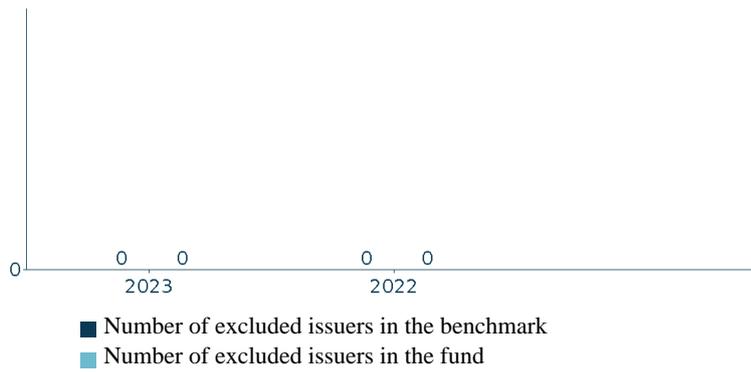

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

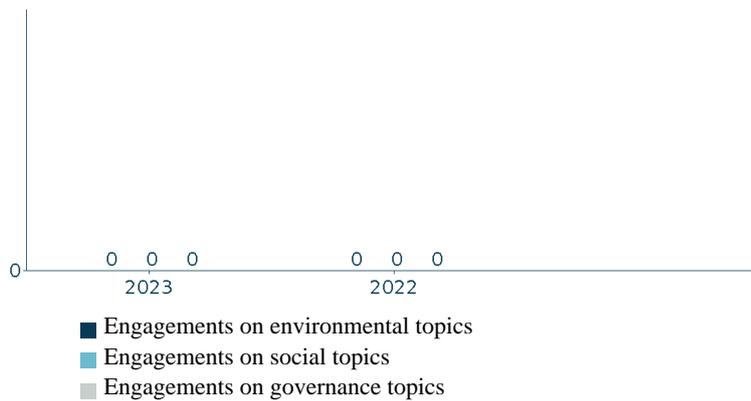

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0	0.0%	0	0.0%

Actions taken in relation to indicators on investee companies

The fund did not invest in investee companies.

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Australian Government 2.5% 20.09.2030	Government bonds	12.2%	AU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

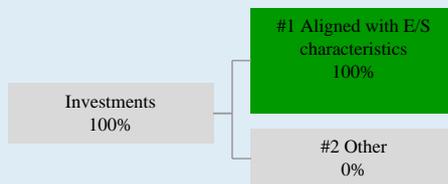

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The asset actual allocation for the reference year was 100% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 100%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Government bonds		100.00%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Exploration & Production	No investments

Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

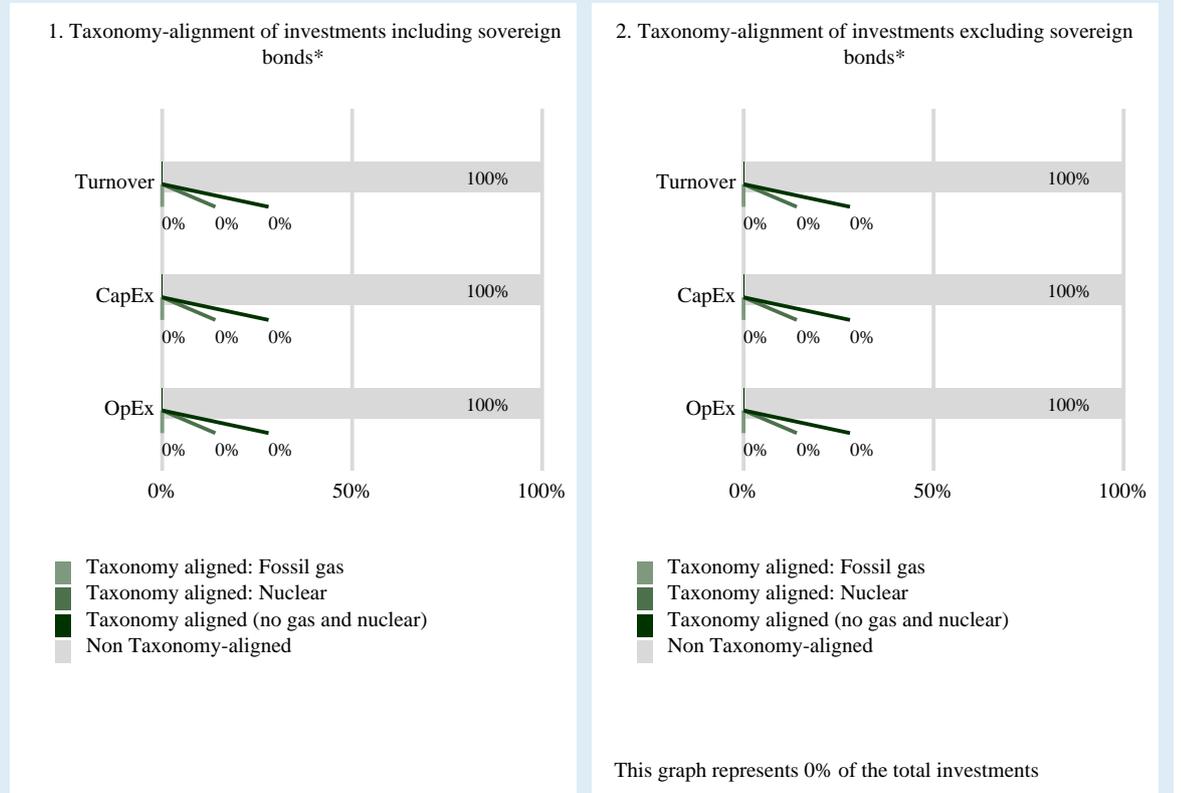

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

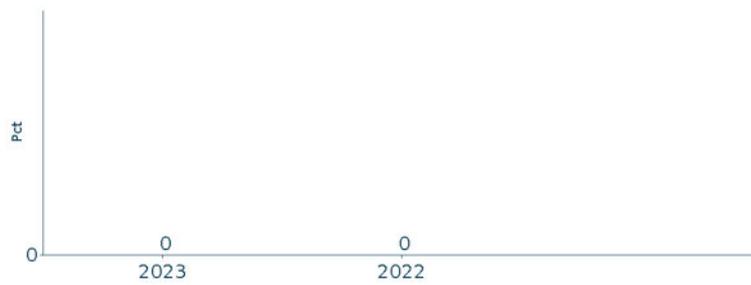

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

N/A

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm
with an environmental
objective that do not tal
into account the criteria
environmentally sustainable
economic activities under
Regulation (EU) 2020/852.

Reference benchmarks are
indexes to measure whether
the financial product attains
the environmental or social
characteristics that they
promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Euro High Yield Bond

Legal entity identifier: 549300WCB1N51WML0156

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

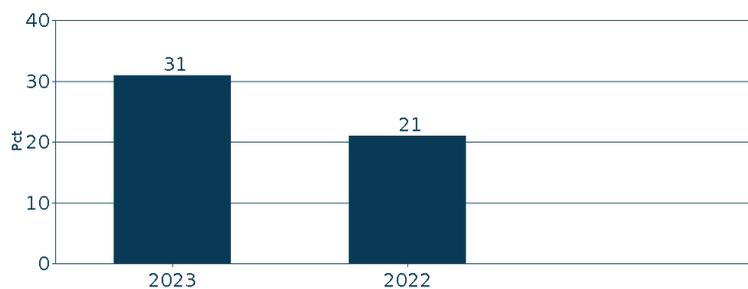

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 25% of its investments in sustainable investments.

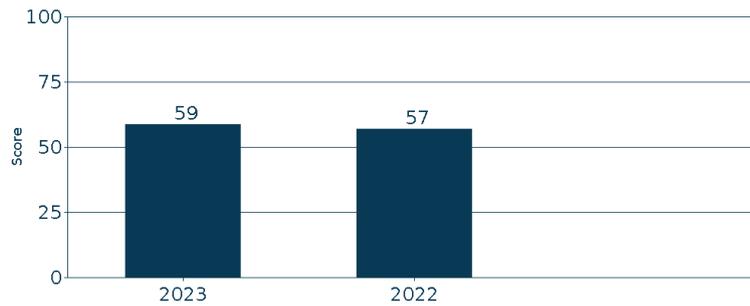

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 54%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

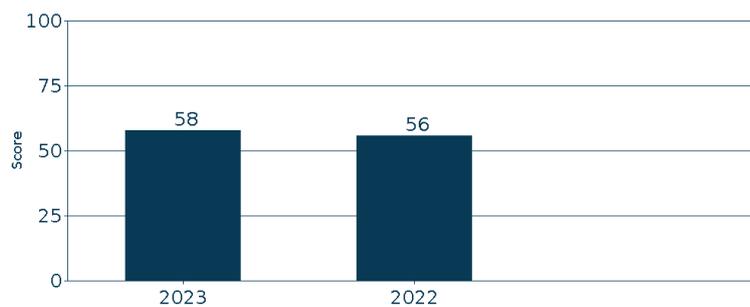

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 56%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

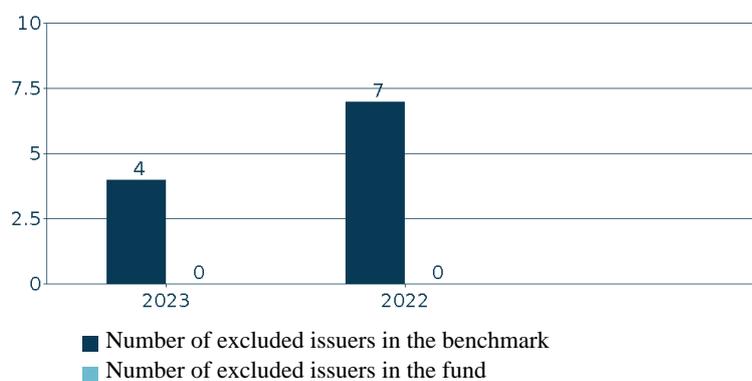

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

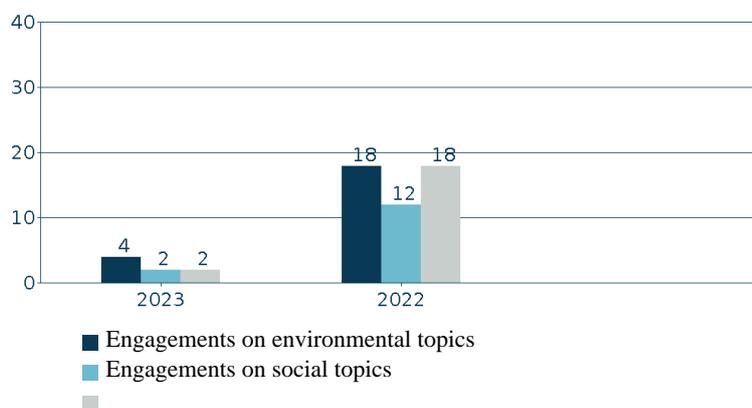

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	1	0.2%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	2	1.6%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	2	0.6%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.5%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 18% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

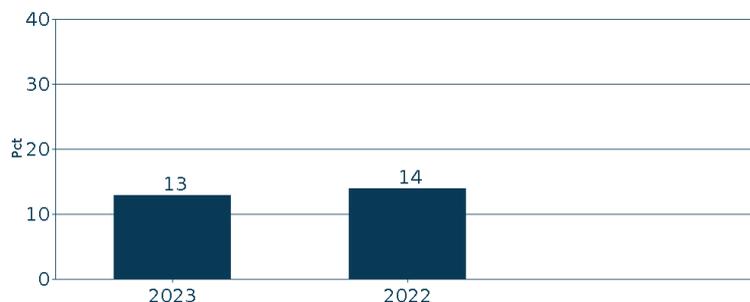

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	95	76.8%	134	69.9%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 2 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 31% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

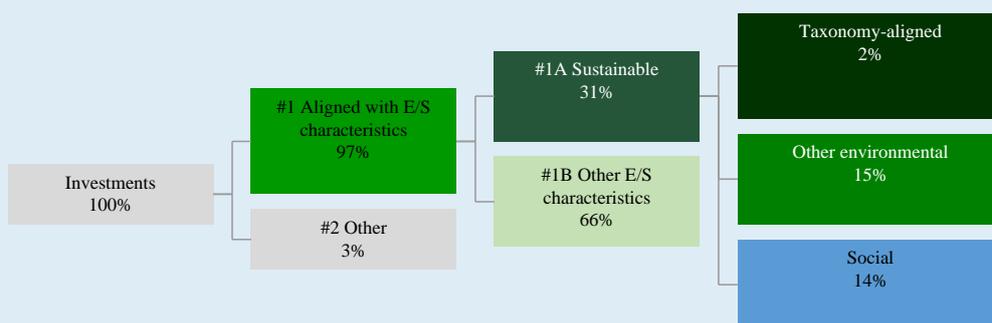

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 97% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 95%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 31% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 15% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 14% investments with a social objective.

In 2022, the fund invested 21% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 14% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Multi-Sector Holdings	12.85%
Materials	Metal, Glass & Plastic Containers	8.93%
Financials	Diversified Banks	8.53%
Health Care	Life Sciences Tools & Services	8.26%
Communication Services	Integrated Telecommunication Services	6.55%
Industrials	Electrical Components & Equipment	4.73%
Consumer Staples	Personal Care Products	4.60%
Financials	Multi-line Insurance	4.43%
Communication Services	Alternative Carriers	4.42%
Information Technology	IT Consulting & Other Services	4.29%
Consumer Discretionary	Automobile Manufacturers	4.27%
Industrials	Highways & Railroads	4.25%
Industrials	Security & Alarm Services	4.18%
Consumer Staples	Packaged Foods & Meats	4.09%
Consumer Discretionary	Automotive Parts & Equipment	4.07%
Industrials	Diversified Support Services	4.05%
Financials	Thriffs & Mortgage Finance	3.35%
Consumer Discretionary	Leisure Facilities	2.56%
Real Estate	Real Estate Operating Companies	1.60%
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Coal & Consumable Fuels	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.2% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

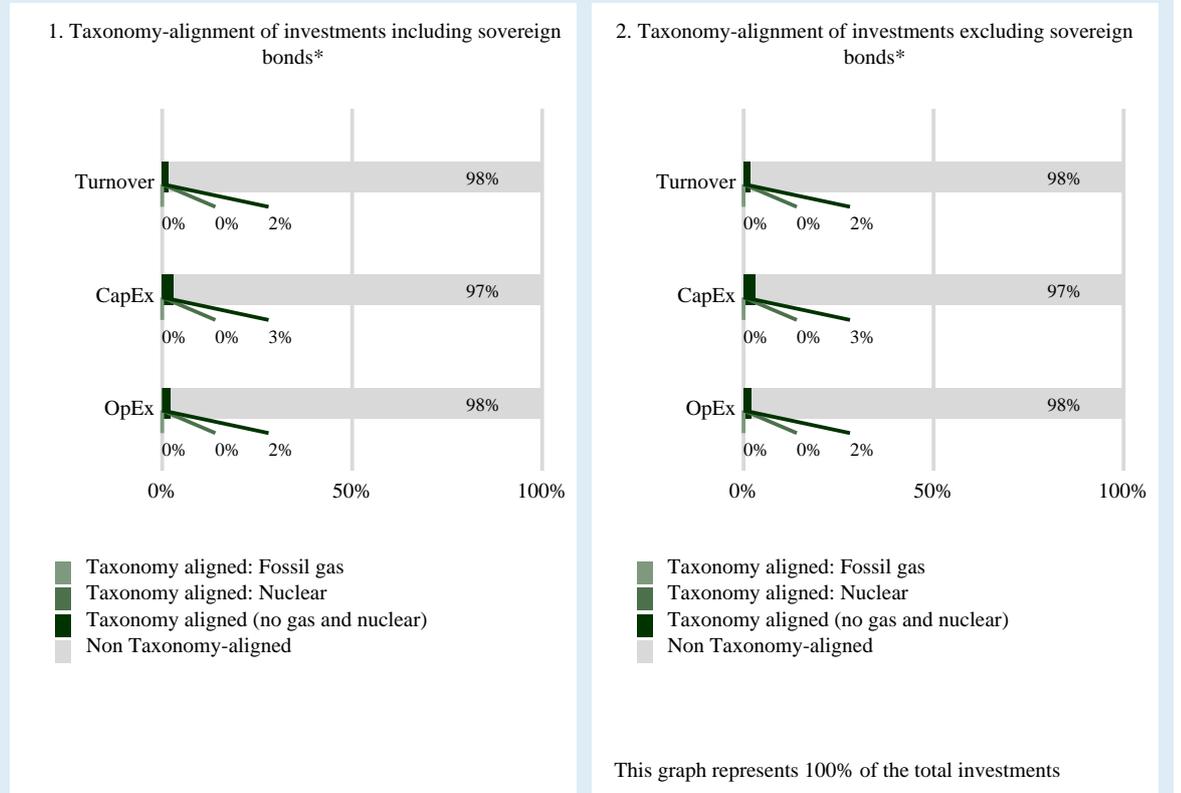

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

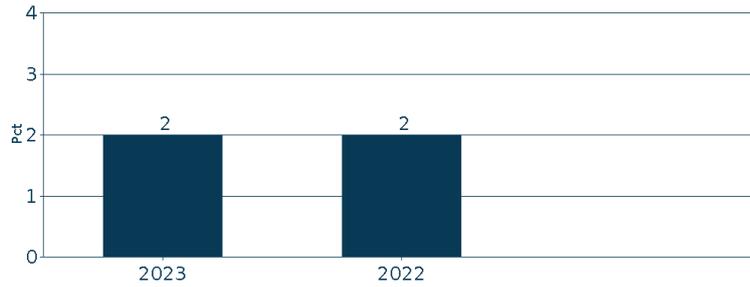

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 14%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Inflation Linked Bond Short Duration
Legal entity identifier: 549300EQVW3W2DDA9C96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

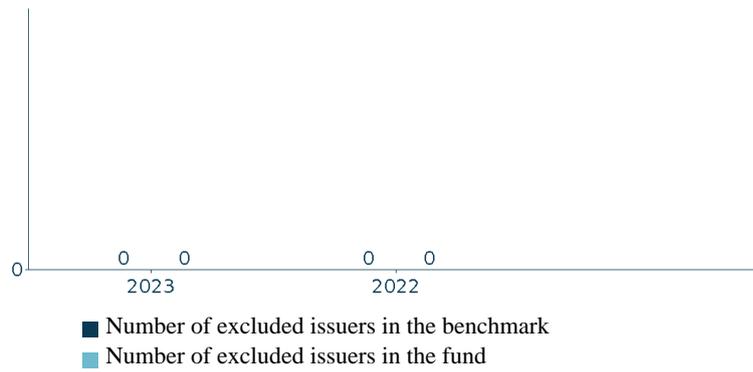

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

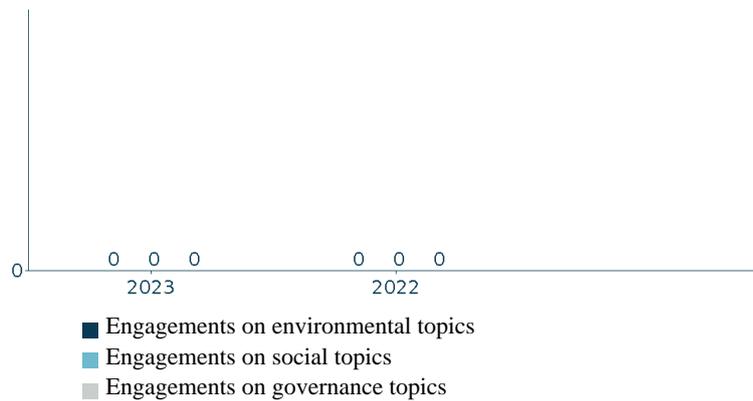

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	0	0.0%	0	0.0%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	0	0.0%	0	0.0%

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

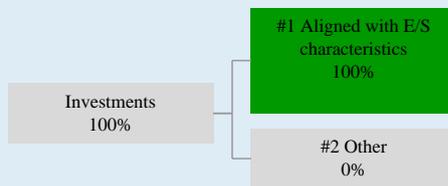

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The asset actual allocation for the reference year was 100% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 100%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Government bonds		100.00%
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Exploration & Production	No investments

Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

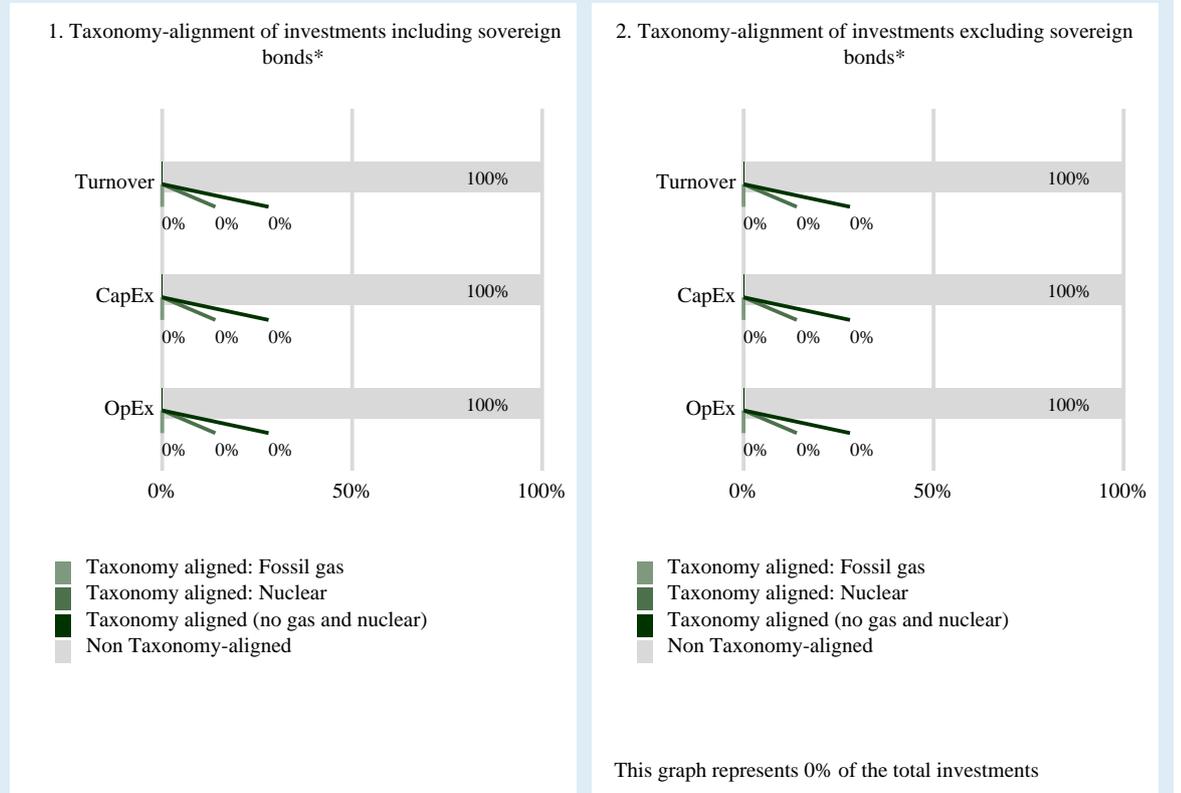

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

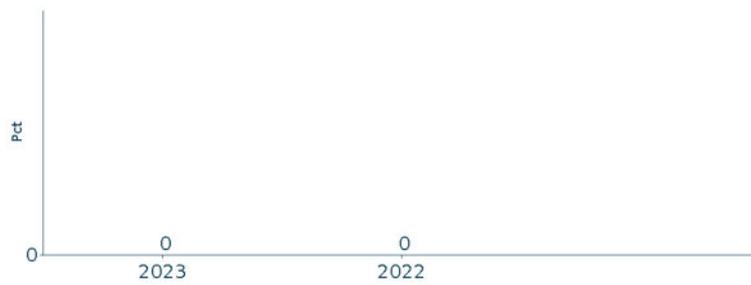

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

N/A

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 0 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Nordic Corporate Bond

Legal entity identifier: 549300QFW4DLJQ50PM36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

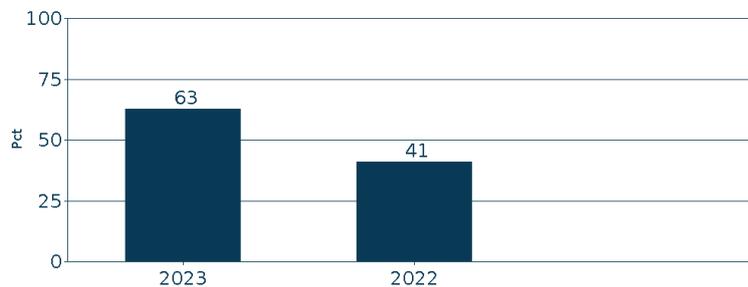

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 25% of its investments in sustainable investments.

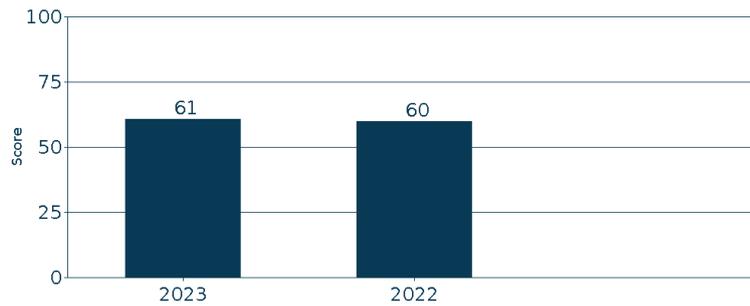

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 76%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

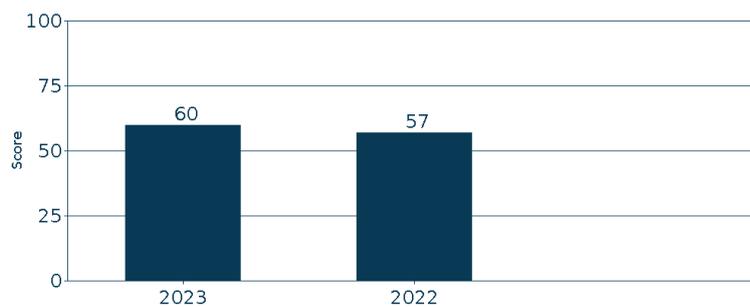

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 73%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

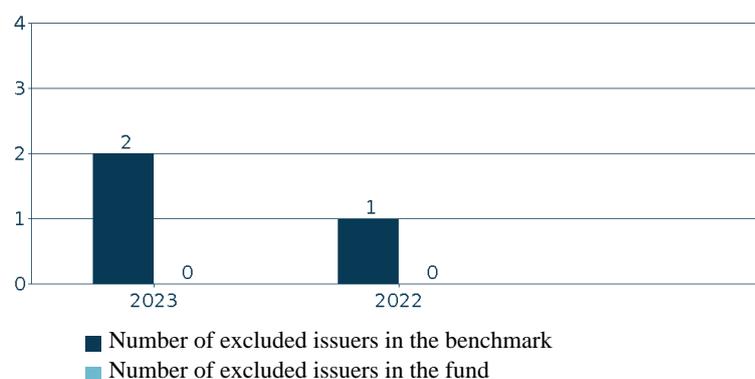

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

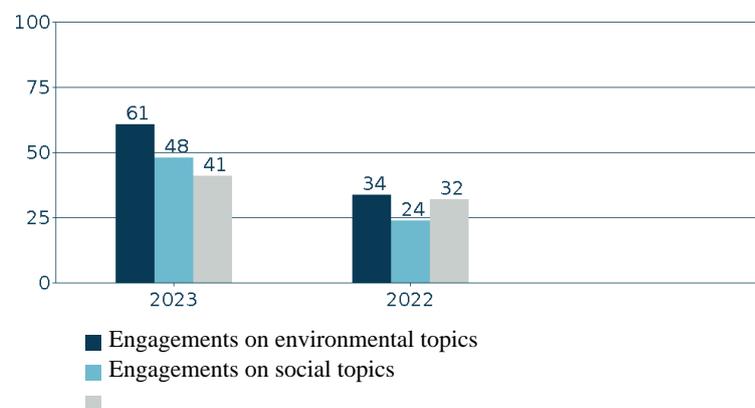

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	1	0.3%	0
Non-Ethical & controversial activities	Tobacco	126	1	0.3%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 28% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

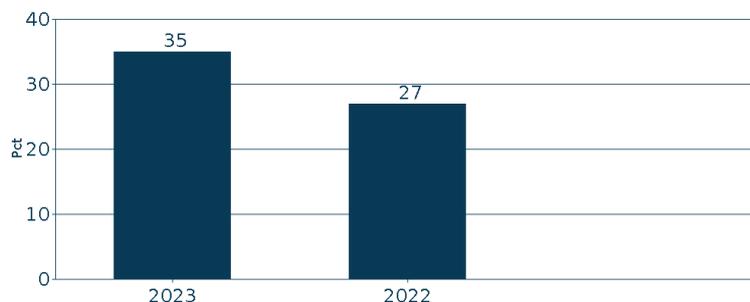

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,562	79.1%	726	77.7%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 42 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 6 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 4 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

Largest investments	Sector	% Assets	Country
Telia Company Ab 30.06.2083	Communication Services	2.2%	SE

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 63% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

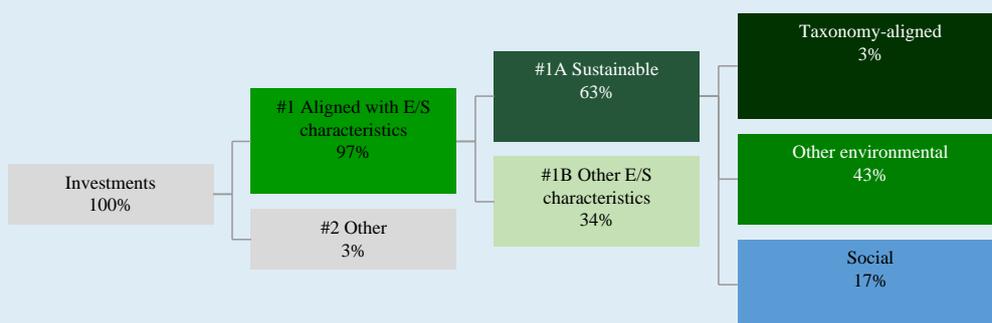

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 97% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 96%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 63% in sustainable investments, split with 3% investments aligned with the EU Taxonomy, 43% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 17% investments with a social objective.

In 2022, the fund invested 41% in sustainable investments, split with 4% investments aligned with the EU Taxonomy, 30% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 7% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 3% has been invested into activities in support of a climate objective with:

- 1.7% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

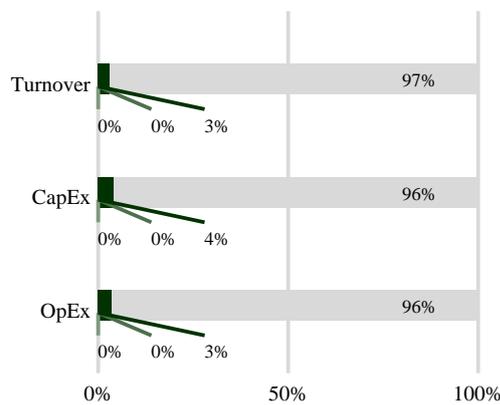

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

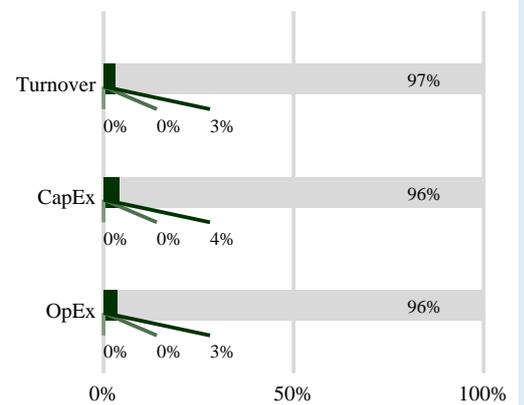

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy aligned: Fossil gas
■ Taxonomy aligned: Nuclear
■ Taxonomy aligned (no gas and nuclear)
■ Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy aligned: Fossil gas
■ Taxonomy aligned: Nuclear
■ Taxonomy aligned (no gas and nuclear)
■ Non Taxonomy-aligned

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

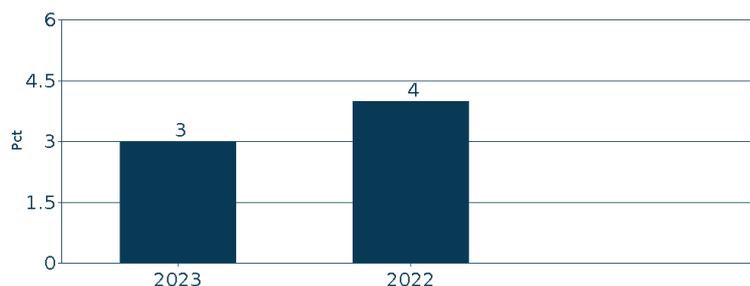

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	3%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 17%.

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the "Other" investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under "How did the sustainability indicators perform?". Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund's inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Emerging Markets Debt Hard Currency
Legal entity identifier: 5493008AKHKXYZJ7FL19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

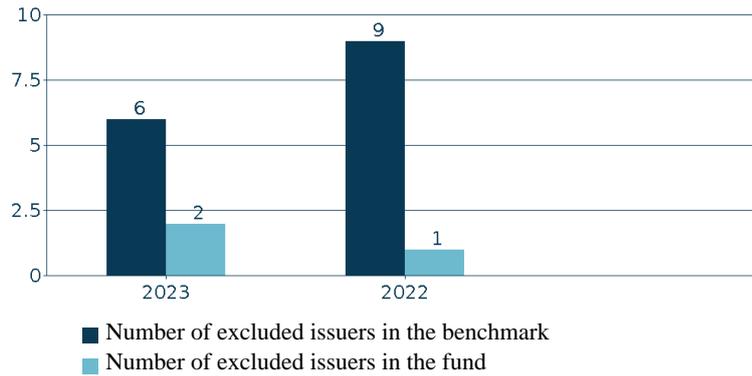

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	1	0.7%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	1
Significant negative impact on the climate	Thermal coal	362	4	0.9%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	1	0.0%	1
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

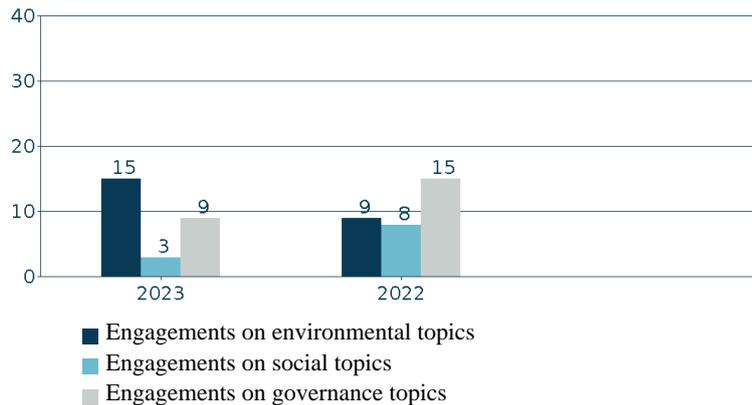

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	4,942	20.8%	8,417	16.5%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	865	20.8%	1,680	16.5%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	17,829	20.8%	41,171	16.5%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

04	Total GHG emissions (tons)	23,636	20.8%	51,278	16.6%
05	Carbon footprint (tCO ₂ e / m€invested)	1,334	20.8%	2,023	16.6%
06	GHG intensity of investee companies (tCO ₂ e / m€of revenue)	2,210	20.8%	3,321	16.6%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	24.8%	20.5%	35.0%	15.7%
08	Share of non-renewable energy – Consumption	93.7%	6.2%	99.1%	6.6%
09	Share of non-renewable energy – Production	11.8%	0.2%	13.0%	0.2%
10	Energy consumption intensity per high impact sector (GWh per million EUR of revenue)		14.4%		4.6%
	Agriculture, forestry and fishing	0.00		0.37	
	Mining and quarrying	3.44		5.31	
	Manufacturing	3.74		0.00	
	Electricity, gas, steam and air conditioning supply	12.35		0.00	
	Water supply; sewerage, waste management and remediationactivities	0.00		0.00	
	Construction	0.00		0.00	
	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.00		0.00	
	Transportation and storage	0.00		0.00	
	Real estate activities	0.00		0.00	
11	Investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (share of investments)	76.3%	19.0%	89.2%	19.0%
Biodiversity - Activities negatively affecting biodiversity-sensitive areas					
12	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	0.0%	20.5%	0.0%	15.7%
Water – Emissions to water					
13	Tonnes of emission to water generated by investee companies per million EUR invested (weighted average)	0.00	0.0%	0.00	0.0%
Waste – Hazardous waste and radioactive waste ratio					
14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested (weighted average)	3.20	4.3%	0.79	1.9%
Social and employee matters					
15	Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (share of investments)	0.0%	20.8%	0.4%	16.5%
16	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (Share of investments without policies to monitor)	37.5%	17.8%	15.9%	13.7%
17	Unadjusted gender pay gap (average)	20.2%	5.5%		0.0%
18	Board gender diversity (Average ratio of female to male)	18.0%	18.7%	14.6%	2.8%
19	Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) (Share of investments)	0.0%	20.5%	0.0%	17.7%

20	Insufficient whistleblower protection (Share of investments without policies on the protection of whistleblowers)	0.0%	12.8%	0.0%	7.1%
21	Lack of human rights policy (Share of investments without a human rights policy)	36.9%	17.8%	19.8%	13.7%

The indicators below apply only to sovereigns and supranationals		2023	Data coverage	2022	Data coverage
22	GHG intensity of investee countries (Emissions / GDP)	429	80.4%	564	79.5%
23	Investee countries subject to social violations (percentage)	50.8 (96.4%)	80.4%	47.5 (96.4%)	79.5%
24	Average Corruption Score	1.14	80.4%	1.17	79.5%
25	Non-cooperative tax jurisdictions	0.5	80.4%	0.2	79.5%
26	Average rule of law score	1.39	80.4%	1.40	79.5%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 5 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers.

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 7 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

Largest investments	Sector	% Assets	Country
lmbd Global Investments 4.4% 09.03.2023		2.3%	MY
North Macedonia 2.75% 18.01.2025	Government bonds	1.8%	MK
Africa Finance Corp 4.375% 17.04.2026	Government bonds	1.6%	NG
Banco Nacional De Panama 2.5% 11.08.2030		1.5%	PA
Republica Orient Uruguay 5.1% 18.06.2050	Government bonds	1.4%	UY

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

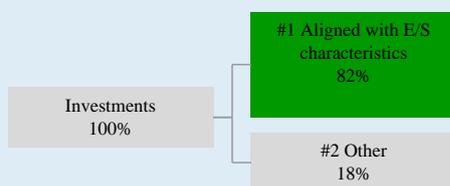

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 82% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 81%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Multi-Sector Holdings	7.58%
Financials	Diversified Banks	7.36%
Energy	Integrated Oil & Gas	3.43%

Energy	Oil & Gas Refining & Marketing	1.30%
Materials	Diversified Metals & Mining	1.04%
Information Technology	Application Software	1.03%
Industrials	Rail Transportation	0.98%
Consumer Discretionary	Leisure Facilities	0.81%
Utilities	Electric Utilities	0.68%
Consumer Discretionary	Household Appliances	0.60%
Financials	Thriffs & Mortgage Finance	0.43%
Consumer Staples	Packaged Foods & Meats	0.41%
Industrials	Construction & Engineering	0.21%
Industrials	Electrical Components & Equipment	0.19%
Utilities	Multi-Utilities	0.19%
Financials	Life & Health Insurance	0.18%
Industrials	Airport Services	0.14%
Utilities	Renewable Electricity	0.14%
Materials	Construction Materials	0.10%
Consumer Discretionary	Homebuilding	0.10%
Government bonds		50.50%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
No sector data		22.59%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

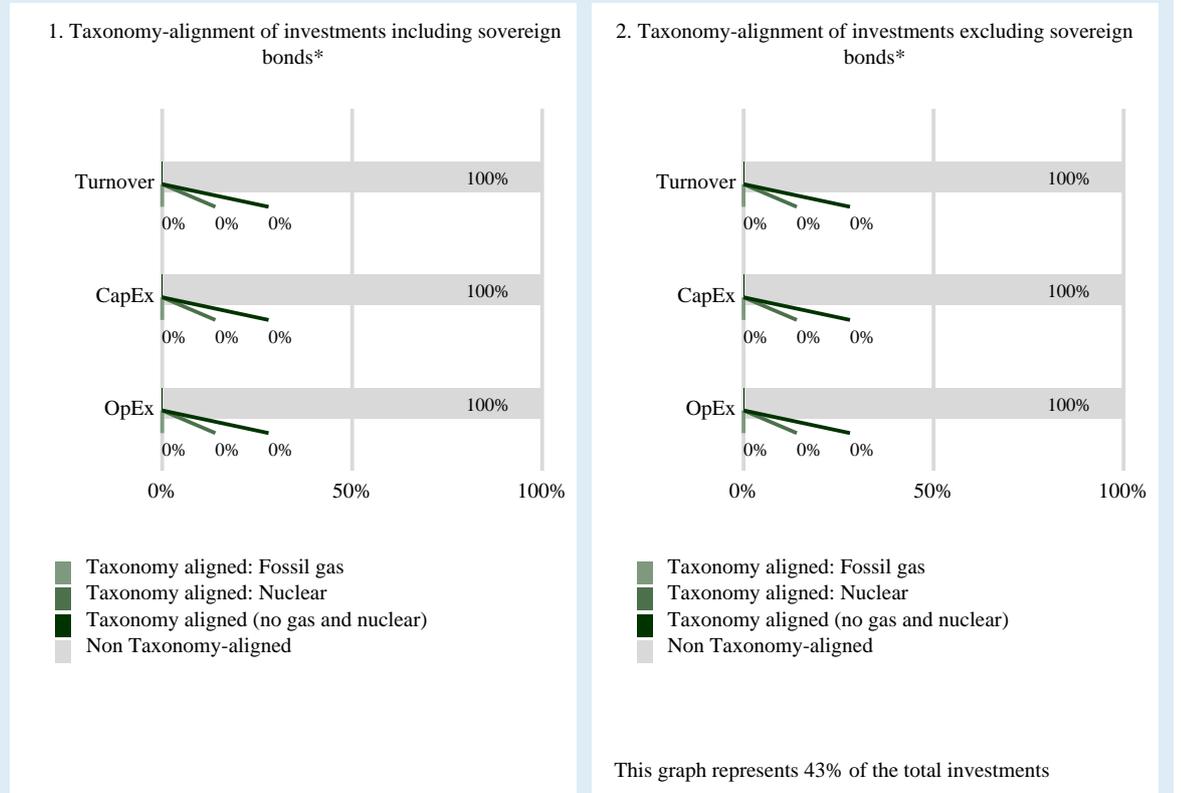

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

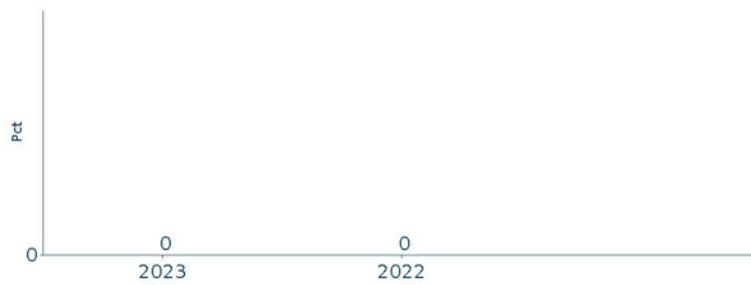

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 5 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 1 on hazardous waste and water emissions, and 1 on social and employee matters.

For sovereigns and supranationals in the portfolio 7 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Småbolag

Legal entity identifier: 549300WL10NPBGIEPI36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 0.1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

- Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

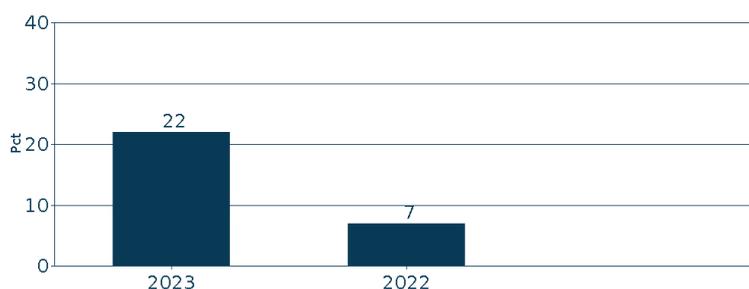

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 10% of its investments in sustainable investments.

Exclusions

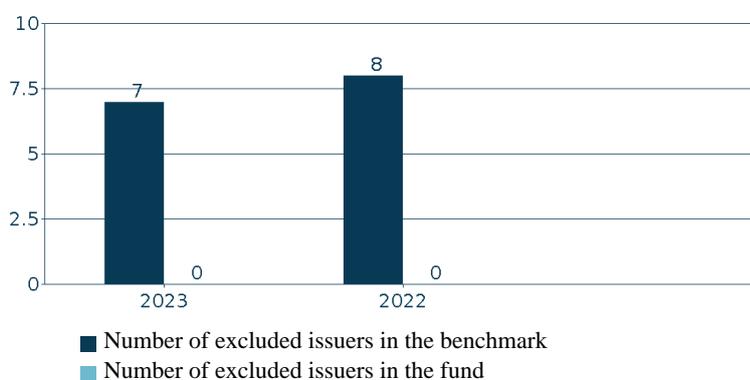

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
--------------------	-----------	---	------------------------	-----------------------	---

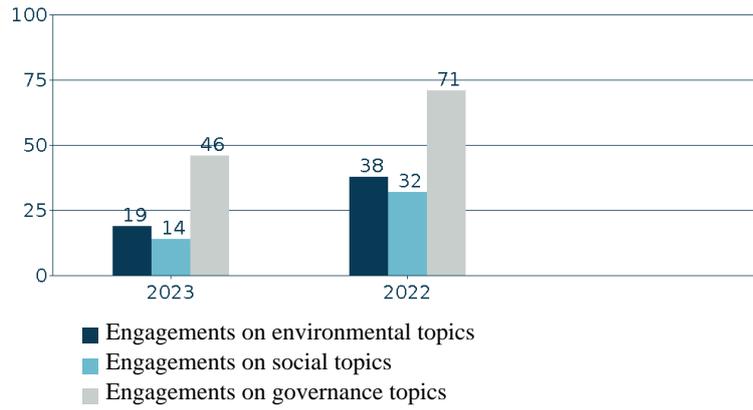

Activities and conduct deemed harmful to society	Good governance	34	1	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	3	0.1%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	1	0.4%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	3	2.5%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

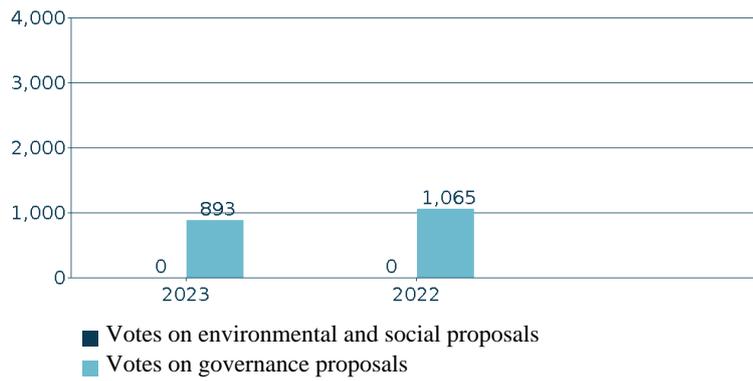

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 22% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,780	95.8%	1,480	90.8%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,596	95.8%	1,642	90.8%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	94,427	95.8%	74,315	90.8%
04	Total GHG emissions (tons)	97,803	95.8%	77,437	90.8%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 2 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already

excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 22% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

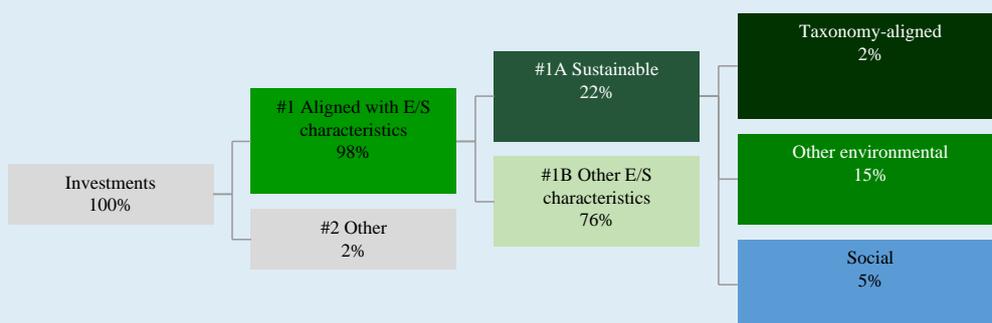

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 98% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 96%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 22% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 15% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

In 2022, the fund invested 7% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 5% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 1% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Real Estate	Real Estate Operating Companies	16.32%

Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Equipment & Services	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.6% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

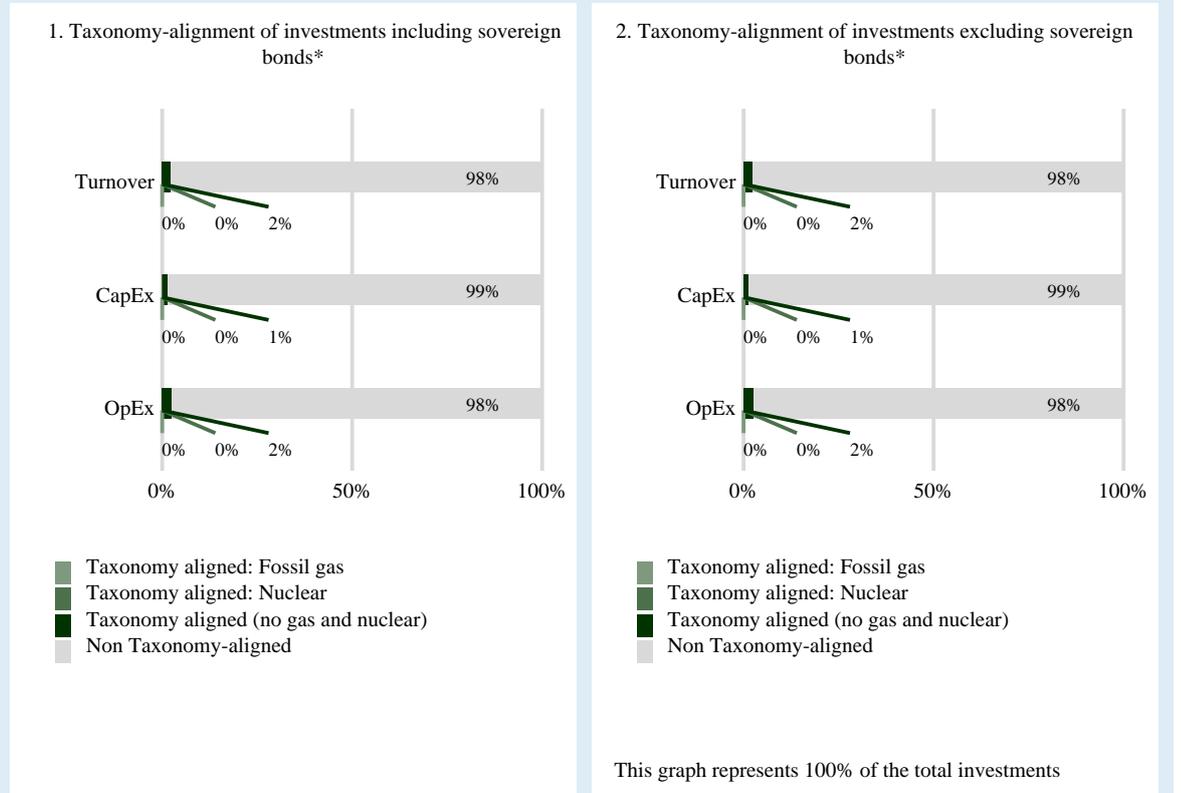

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

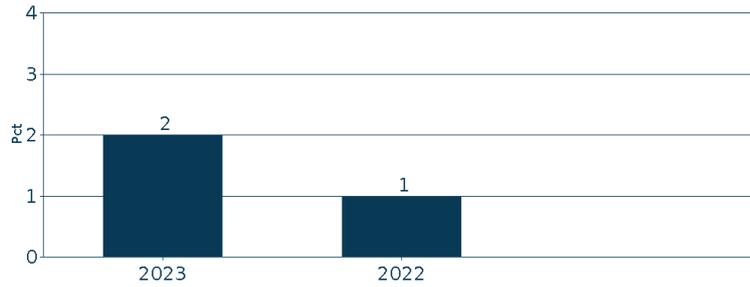

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 5%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Multi Asset Inflation Strategy

Legal entity identifier: 549300ZNG5YOV42XBB23

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

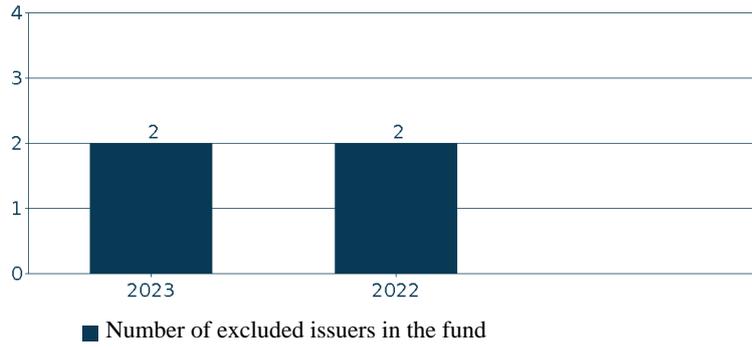

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

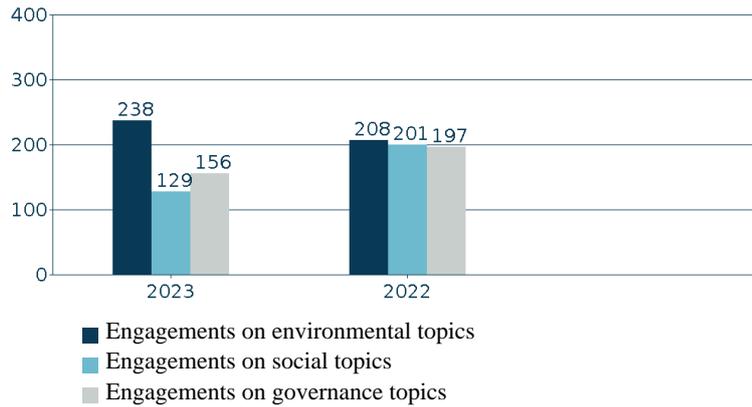

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

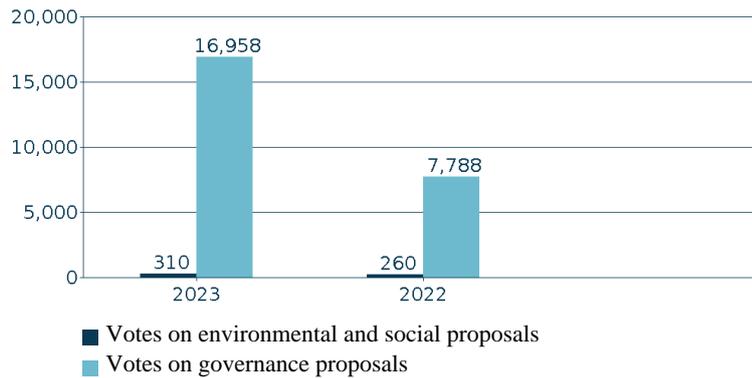

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not consider principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not as of this given date able to monitor, prioritise and report on principal adverse impacts.

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

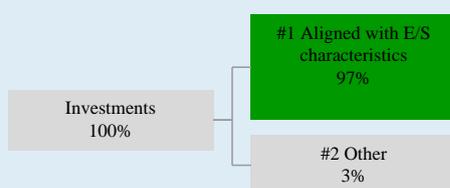

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics.

The asset actual allocation for the reference year was 97% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 93%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

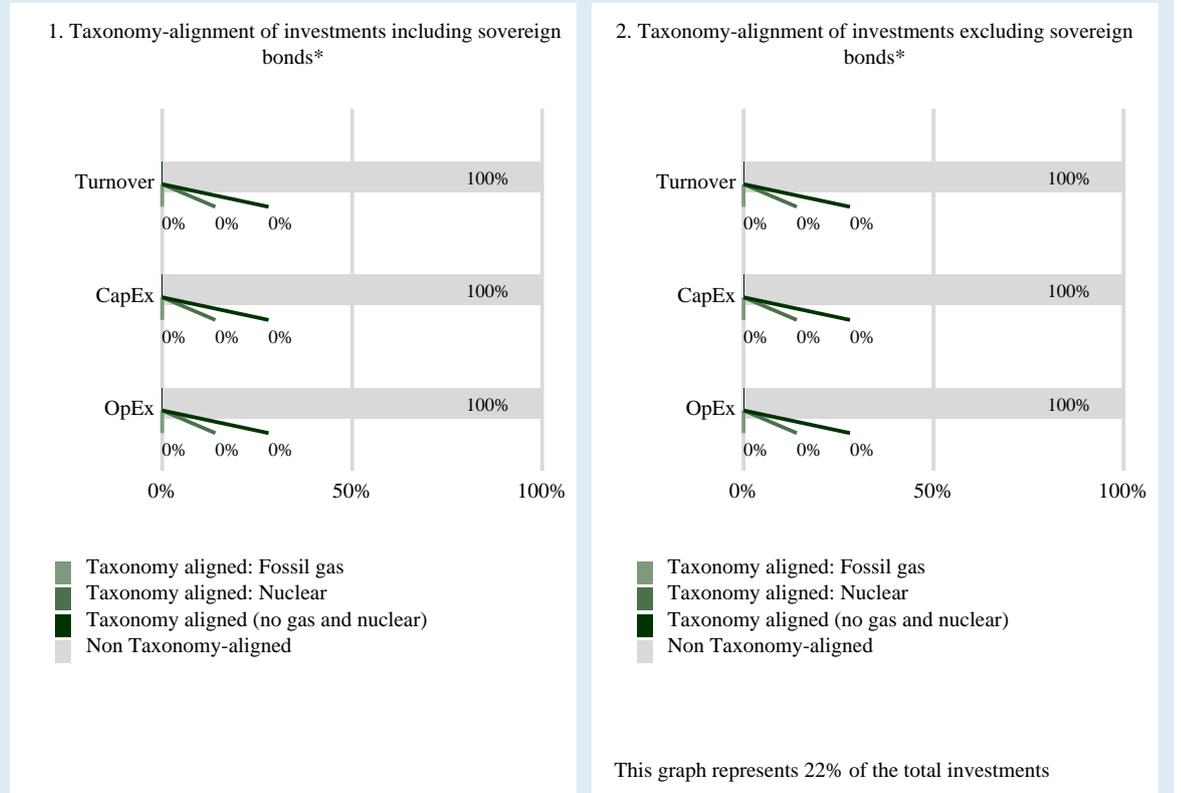

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

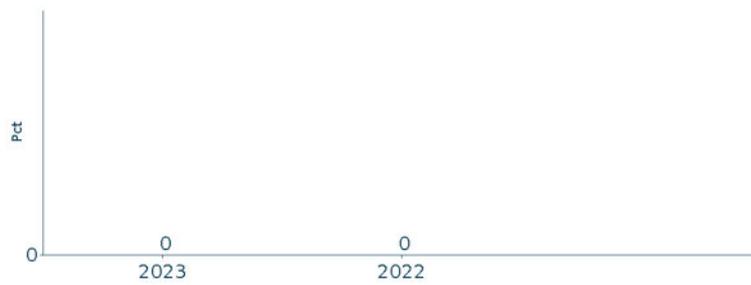

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 156 engagements have been logged on climate/GHG related topics, 6 for biodiversity, 18 on hazardous waste and water emissions, and 30 on social and employee matters.

For sovereigns and supranationals in the portfolio 7 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Europe Long-Short Equity Factors

Legal entity identifier: 549300KX95W1G0YGNP56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Missing

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies. The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) of the

EU Taxonomy, climate change mitigation and/or climate change adaptation.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

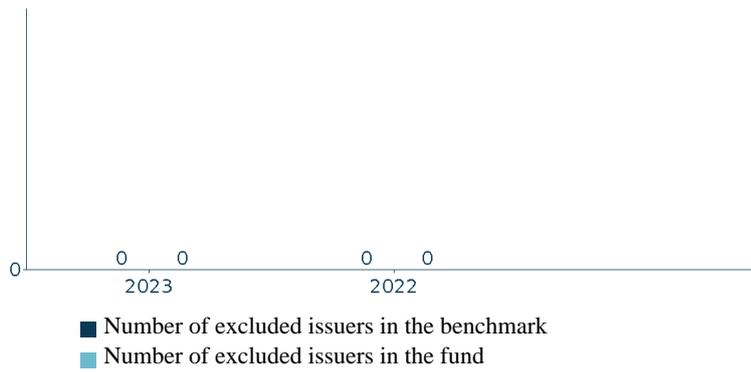

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

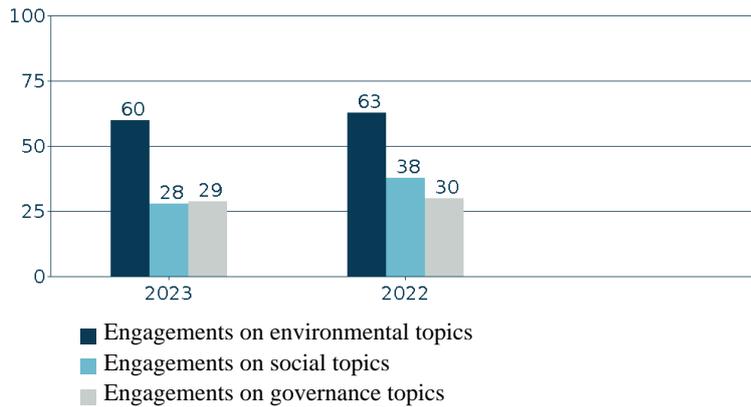

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not consider principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not as of this given date able to monitor, prioritise and report on principal adverse impacts.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Novo Nordisk B	Health Care	1.7%	DK
Sodexo Alliance Sa	Consumer Discretionary	1.7%	FR
Astrazeneca Plc	Health Care	1.6%	GB
Sage Group Plc/The	Information Technology	1.6%	GB
Centrica Plc	Utilities	1.5%	GB
3i Group Plc	Financials	1.5%	GB
Hugo Boss Ag	Consumer Discretionary	1.4%	DE
Infineon Technologies Ag	Information Technology	1.4%	DE
Novartis Ag	Health Care	1.4%	CH
Endesa S.A.	Utilities	1.4%	ES
Beazley Plc	Financials	1.4%	GB
Relx Plc	Industrials	1.4%	GB
Edenred Se	Information Technology	1.4%	FR
Ipsen S.A.	Health Care	1.4%	FR
Wolters Kluwer Nv	Industrials	1.4%	NL

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

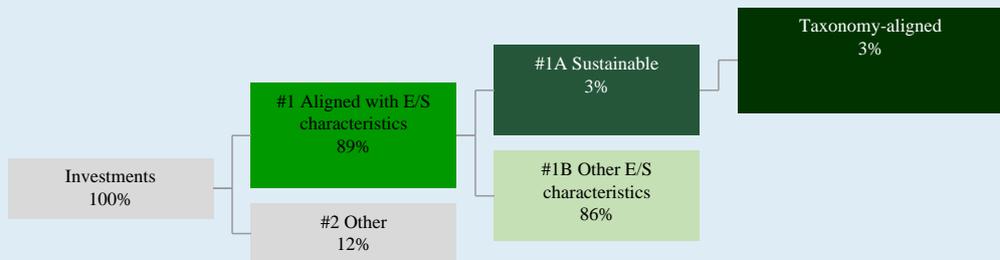

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics.

The asset actual allocation for the reference year was 89% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 0%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 3% has been invested into activities in support of a climate objective with:

- 1.5% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

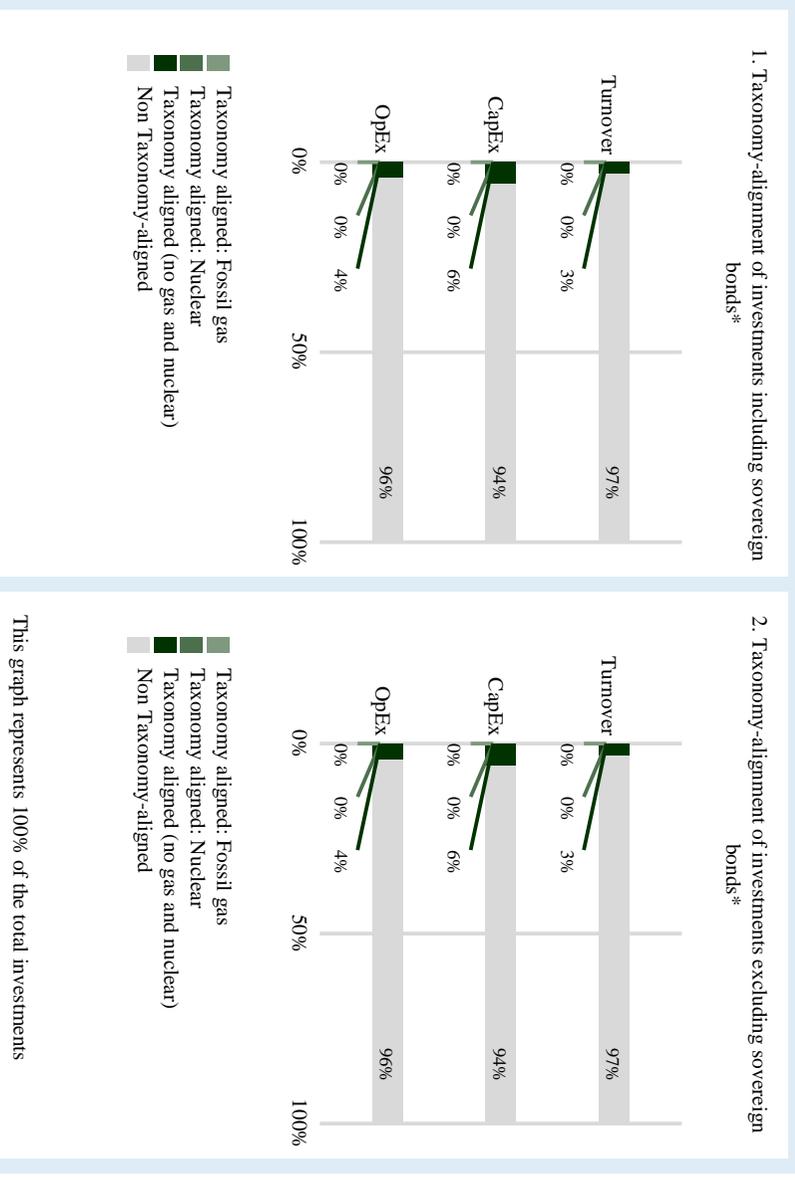

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

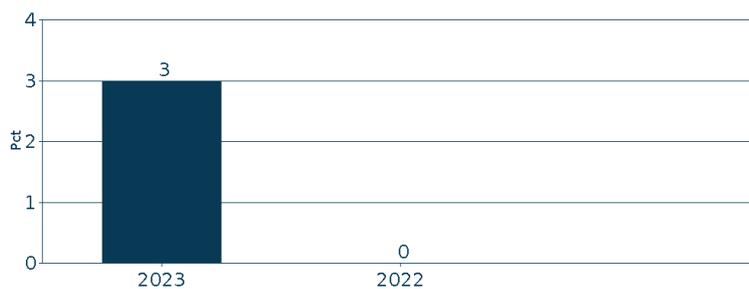

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	3%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities)	1%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the "Other" investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under "How did the sustainability indicators perform?". Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Stable

Legal entity identifier: 549300XSGI6UMI3LYG86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

4. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

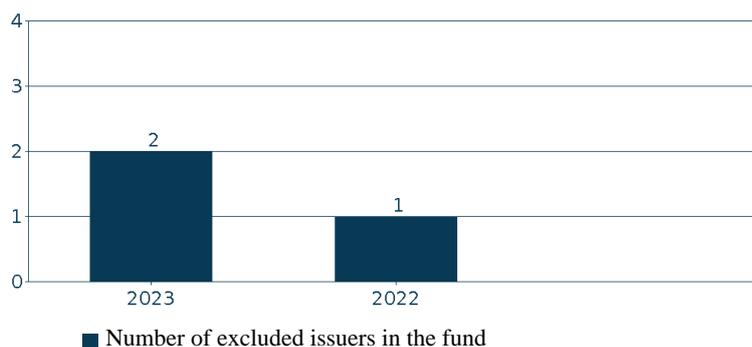

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
--------------------	-----------	---	------------------------	-----------------------	---

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

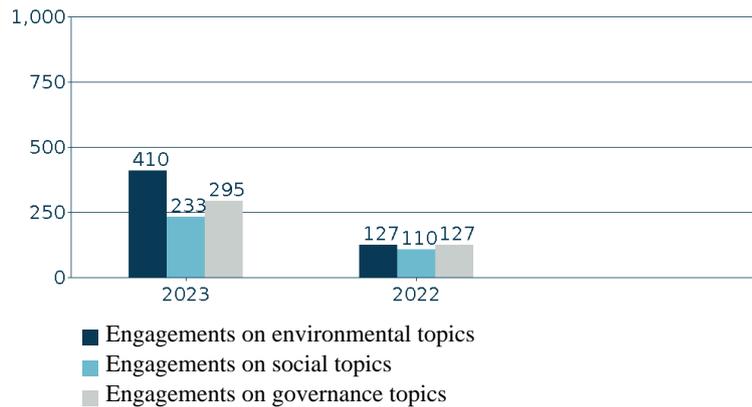

Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 8% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives. Reference is also made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund. The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be

representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	90	80.7%	58	67.3%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	18	80.7%	14	67.3%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	909	80.7%	540	67.3%

26	Average rule of law score	2.20	98.7%	2.05	98.7%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 260 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 10 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 23 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 54 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 8 engagement activities relating to the indicators have been logged for issuers in the fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 12% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

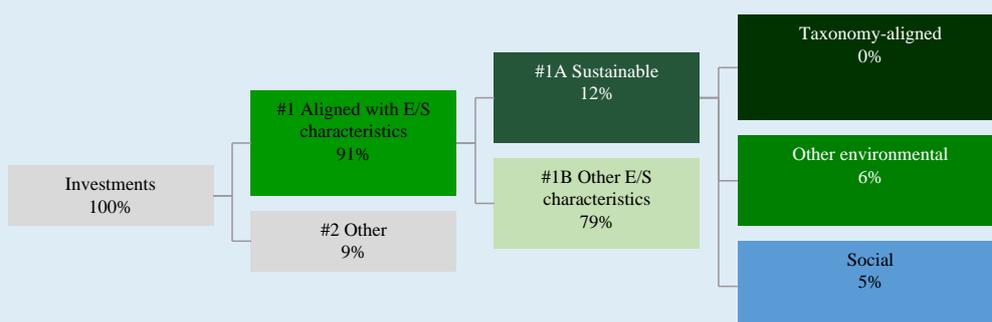

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 91% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 93%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 12% in sustainable investments, split with 0% investments aligned with the EU Taxonomy, 6% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

In 2022, the fund invested 6% in sustainable investments, split with 0% investments aligned with the EU Taxonomy, 4% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 1% investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 In fossil gas
 In nuclear energy
 No

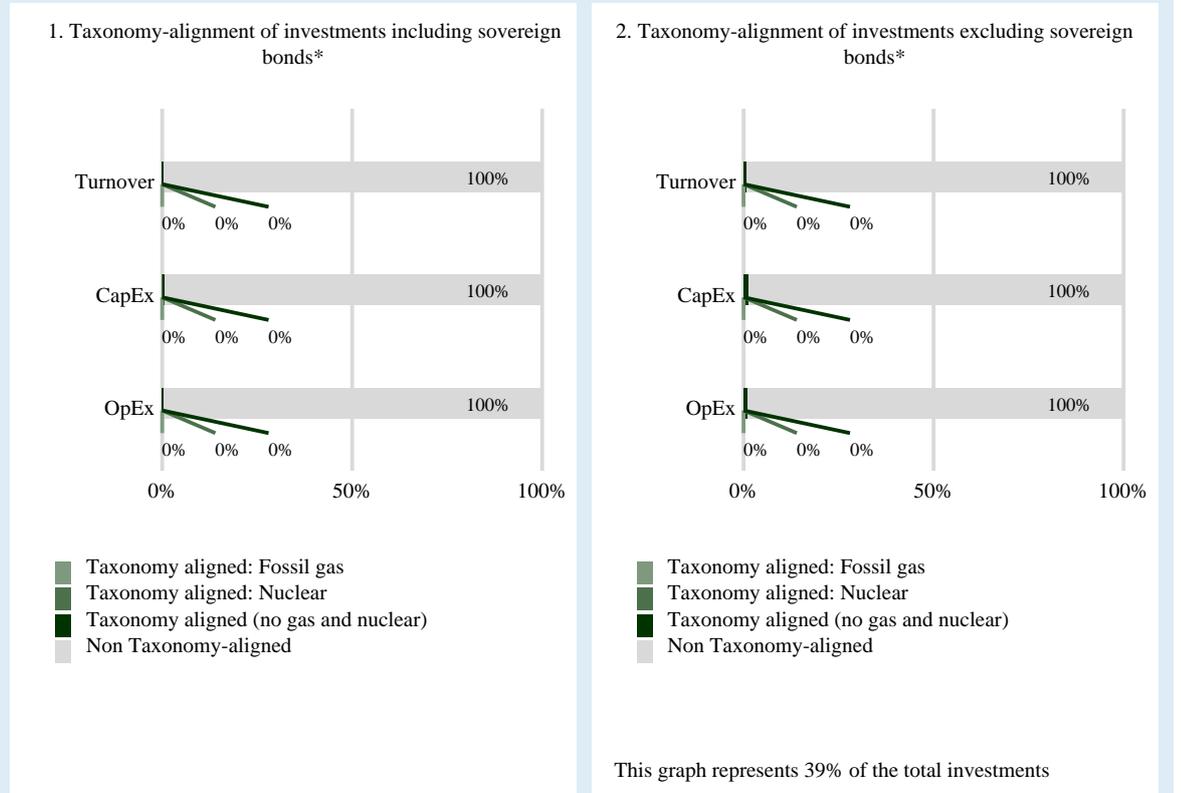

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

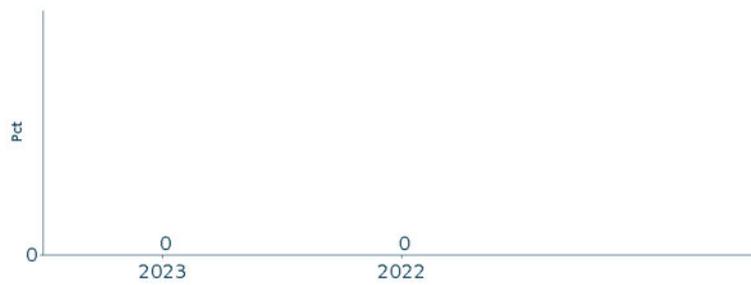

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 6%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 5%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 260 engagements have been logged on climate/GHG related topics, 10 for biodiversity, 23 on hazardous waste and water emissions, and 54 on social and employee matters.

For sovereigns and supranationals in the portfolio 8 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Defensive

Legal entity identifier: 549300G9X5JEULJZXY68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 18% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

- Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

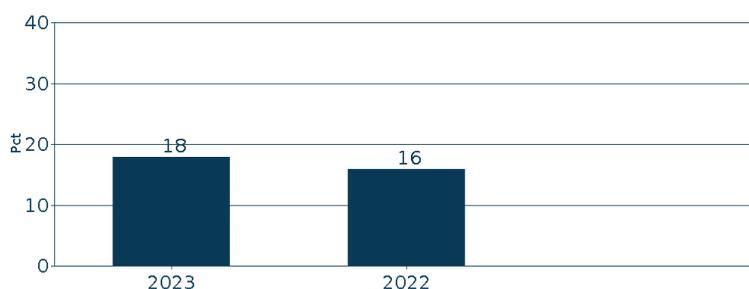

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
--------------------	-----------	---	------------------------	-----------------------	---

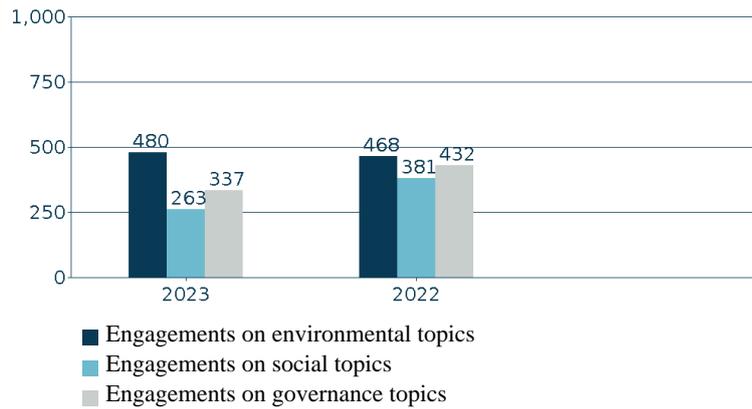

Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

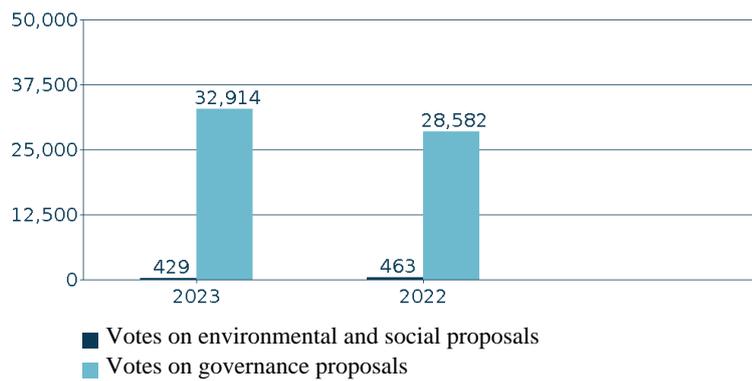

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines. This includes voting conducted at the level of underlying funds.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 14% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives. Reference is also made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund. The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	10,639	86.7%	6,673	87.6%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 307 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 16 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 34 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 64 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 8 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 18% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

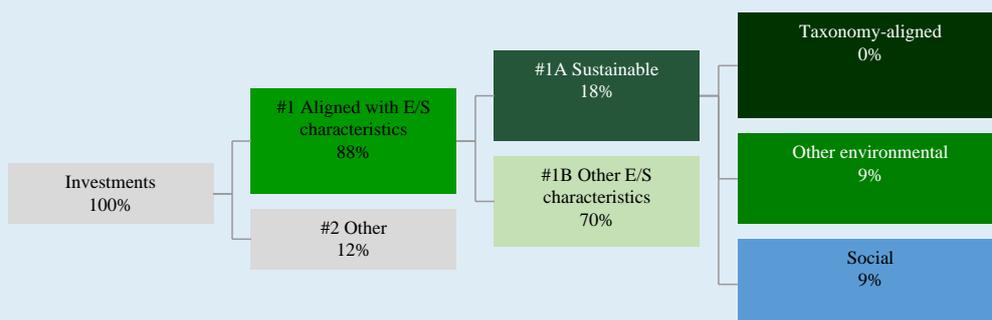

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 88% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 87%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 18% in sustainable investments, split with 0% investments aligned with the EU Taxonomy, 9% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 9% investments with a social objective.

In 2022, the fund invested 16% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 12% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 3% investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 In fossil gas
 In nuclear energy
 No

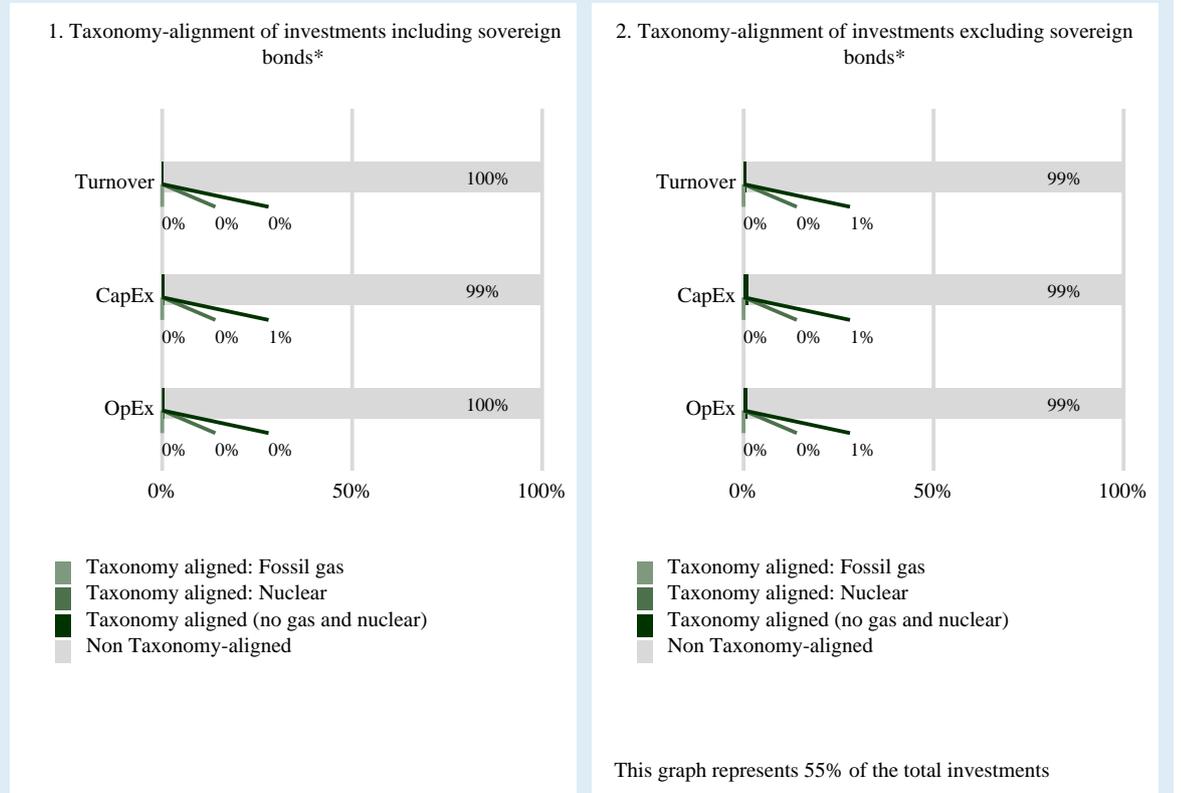

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

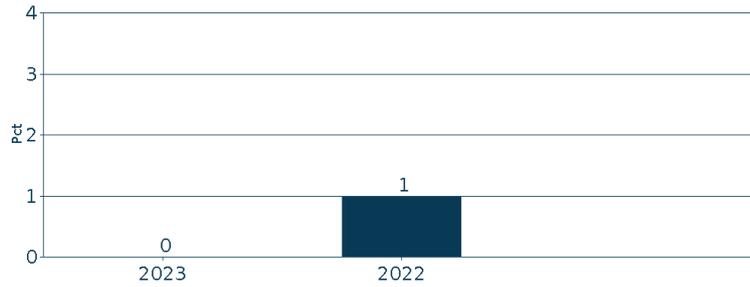

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 9%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 9%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 307 engagements have been logged on climate/GHG related topics, 16 for biodiversity, 34 on hazardous waste and water emissions, and 64 on social and employee matters.

For sovereigns and supranationals in the portfolio 8 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Balanced

Legal entity identifier: 5493001EOHUS6IRLM853

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

As the fund partly invested into funds tracking an EU Climate Index, any sustainable investments reported for these investments are based on the methodology of such indices.

How did the sustainability indicators perform?

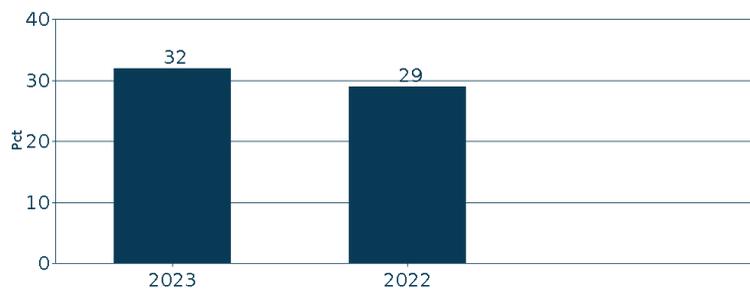

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

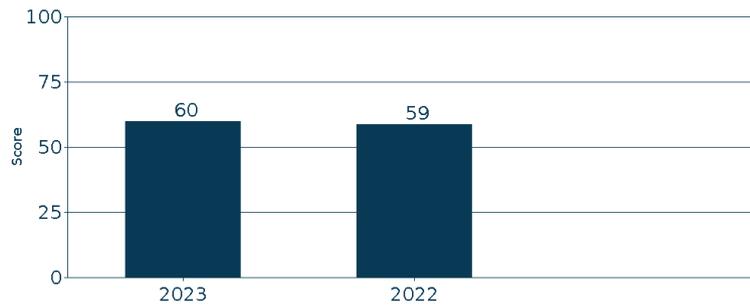

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 64%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

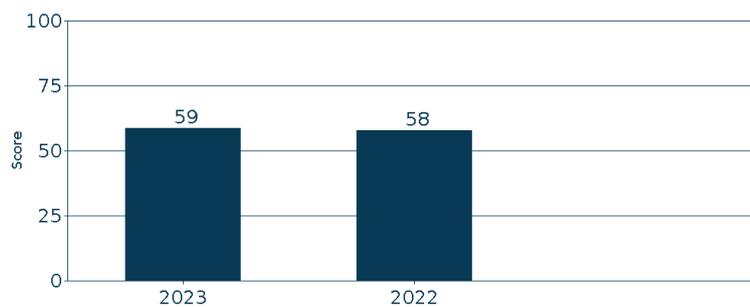

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 63%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

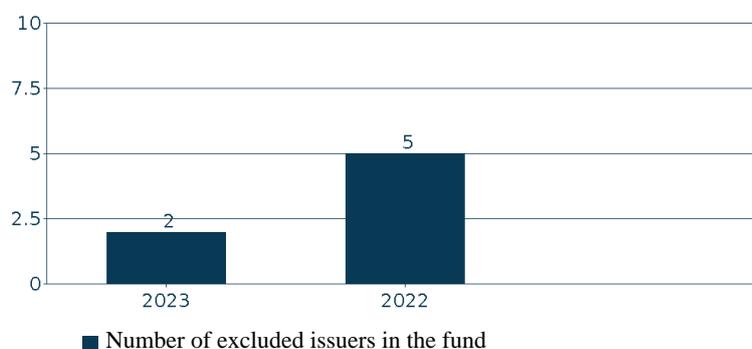

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0

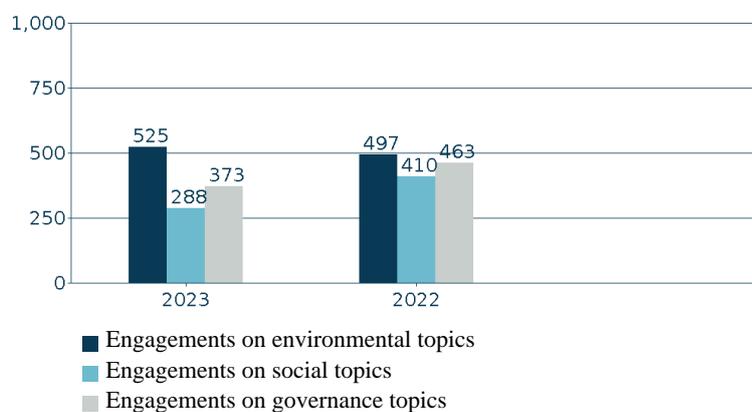

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

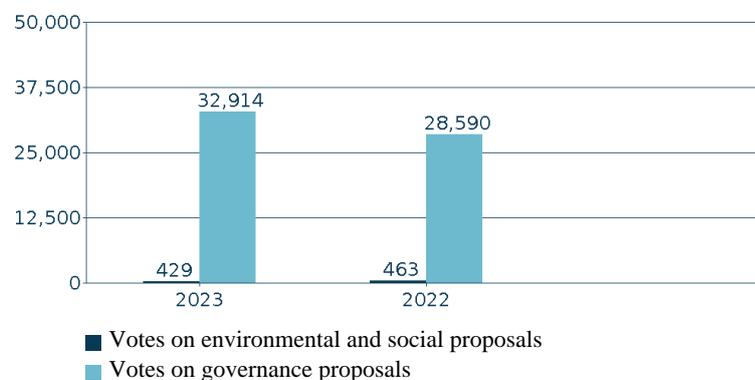

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines. This includes voting conducted at the level of underlying funds.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.
- in issuers in funds with the sustainable investment objective of reducing carbon emissions to meet the long-term goals of the Paris Agreement.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 26% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the

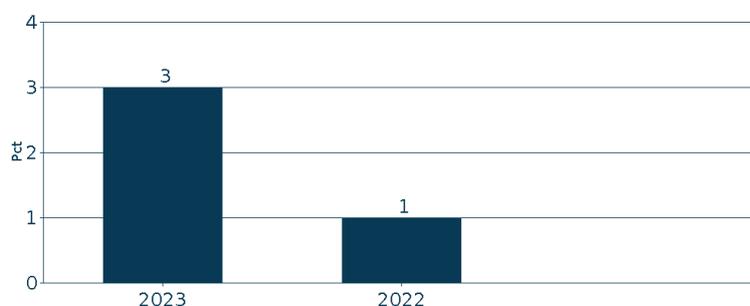

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

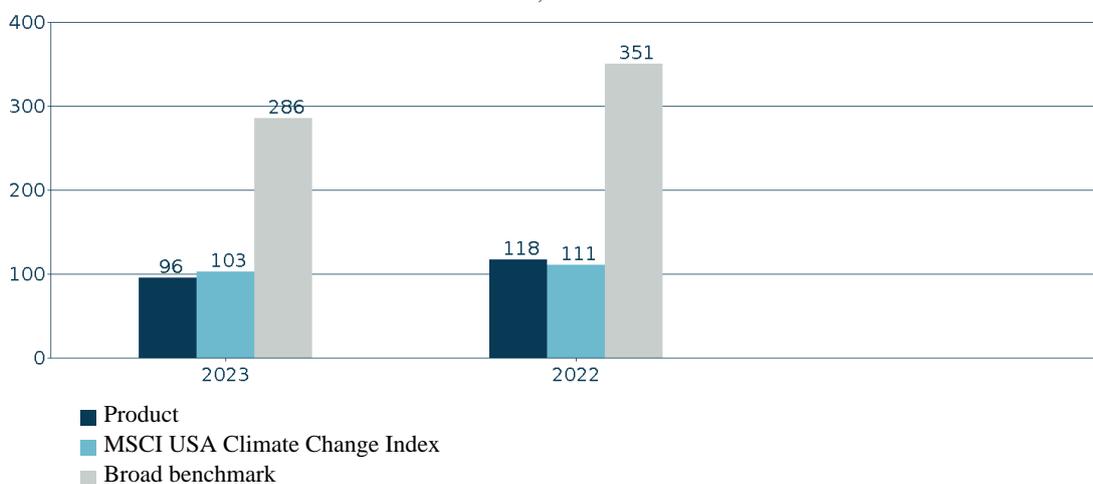

Investments with a CO2 reduction objective

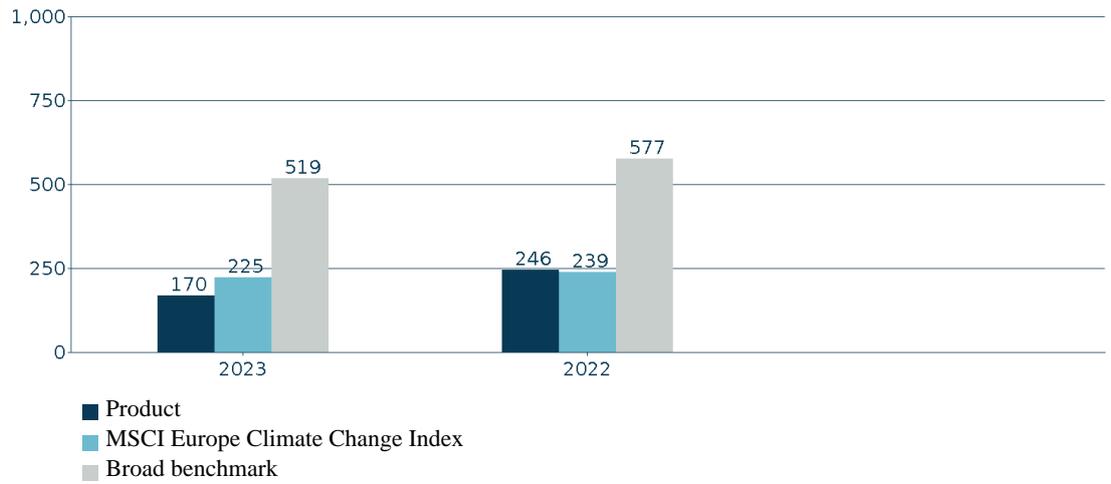

The fund has invested in passive funds tracking an EU Climate Benchmark with an objective to reduce carbon emissions in order to achieve the long-term ambitions of the Paris Agreement (weighted average share 3%).

The table shows the weighted average carbon intensity (WACI) of the passive funds as compared to their respective EU Climate Benchmark and the broad market benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives. Reference is also made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the “do no significant harm” assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the “do no significant harm” assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies (“PAI thresholds”). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund. The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles’ on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	46,278	93.3%	33,377	92.3%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 334 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 17 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 36 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 69 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability

standards Screening with 27 issuers on the country exclusion list in 2023. 8 engagement activities relating to the indicators have been logged for issuers in the fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 32% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

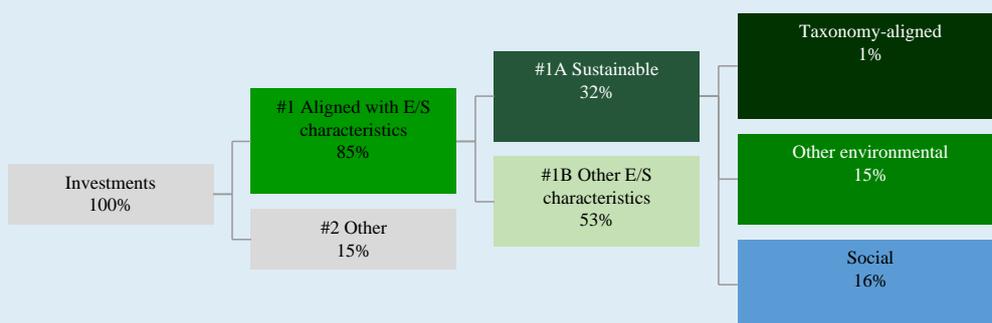

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 85% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 85%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 32% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 15% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 16% investments with a social objective.

In 2022, the fund invested 29% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 22% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.3% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

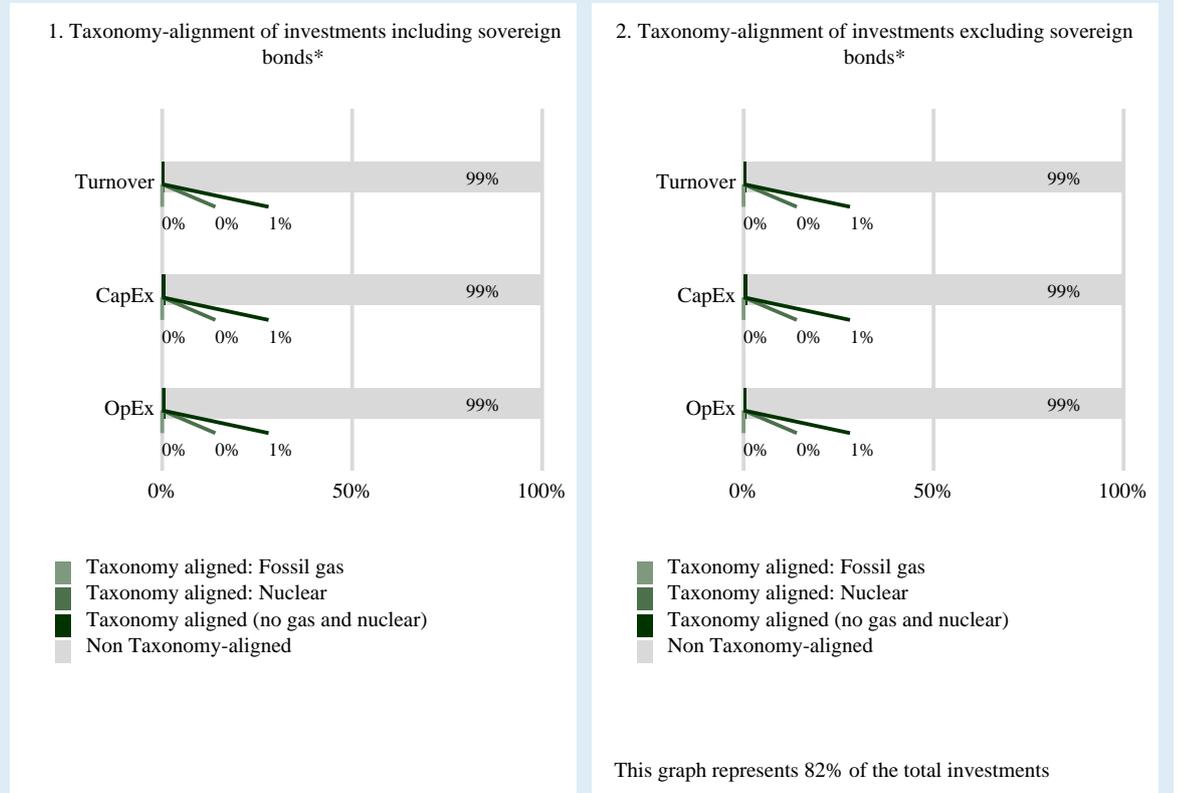

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

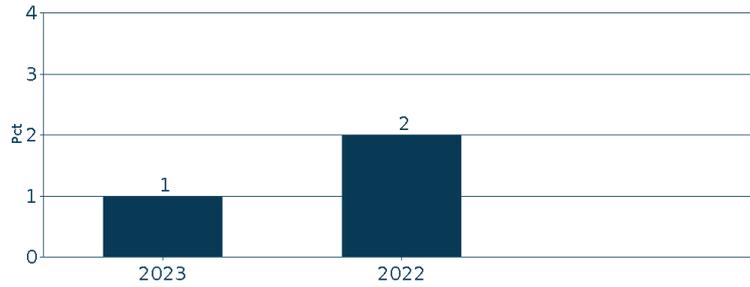

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 16%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 334 engagements have been logged on climate/GHG related topics, 17 for biodiversity, 36 on hazardous waste and water emissions, and 69 on social and employee matters.

For sovereigns and supranationals in the portfolio 8 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Opportunity

Legal entity identifier: 549300ZHHC41G2BKHF76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

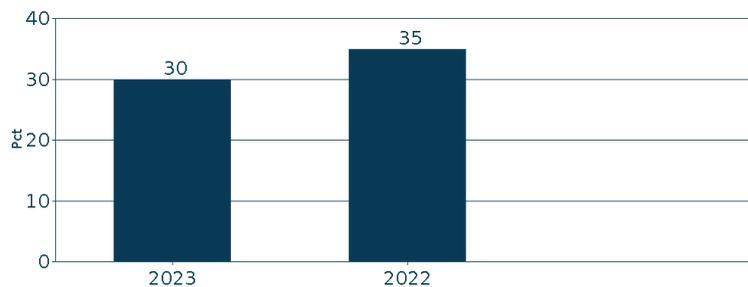

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

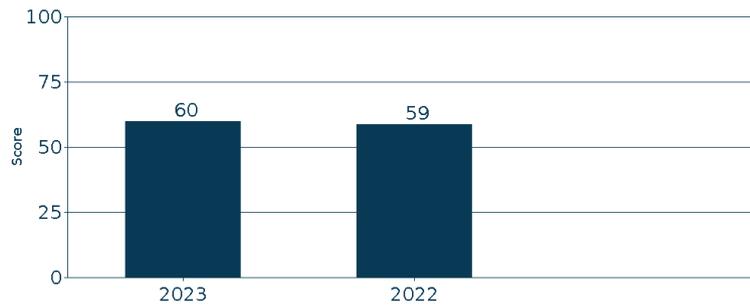

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 63%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

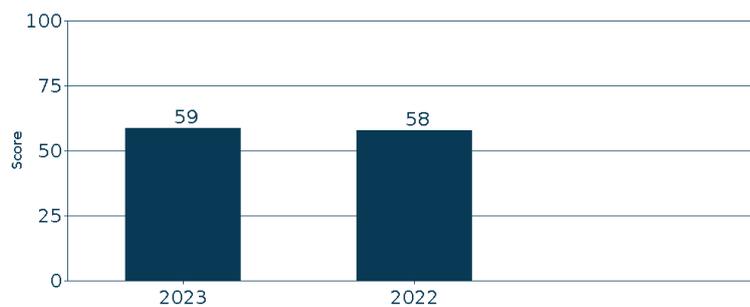

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 62%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0

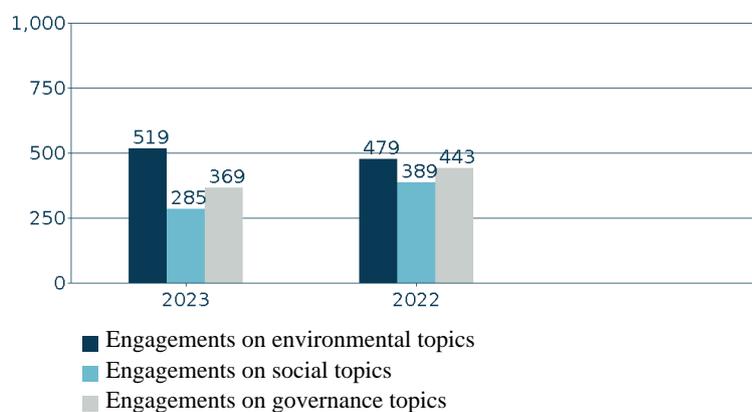

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

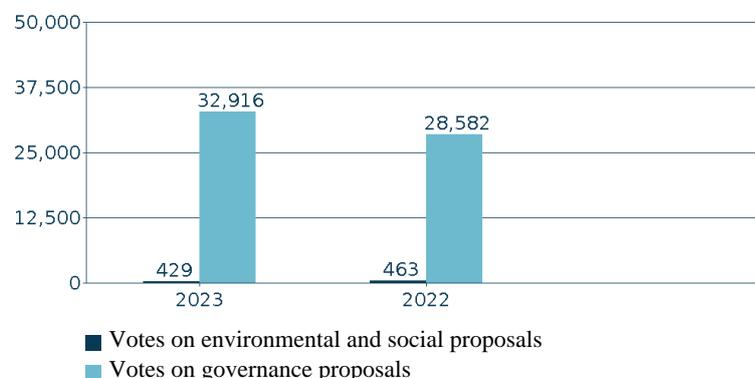

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines. This includes voting conducted at the level of underlying funds.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 27% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at [danskebank.com](https://www.danskebank.com), and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives. Reference is also made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund. The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with

calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	16,211	92.4%	13,130	93.5%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	3,877	92.4%	3,852	93.5%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	191,491	92.4%	146,297	93.5%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 332 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 17 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 35

engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 70 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 8 engagement activities relating to the indicators have been logged for issuers in the fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 30% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

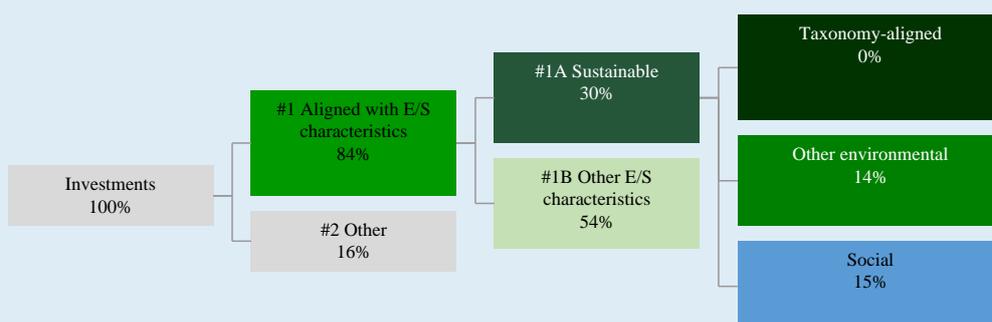

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 84% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 86%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 30% in sustainable investments, split with 0% investments aligned with the EU Taxonomy, 14% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 15% investments with a social objective.

In 2022, the fund invested 35% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 27% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 6% investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 In fossil gas
 In nuclear energy
 No

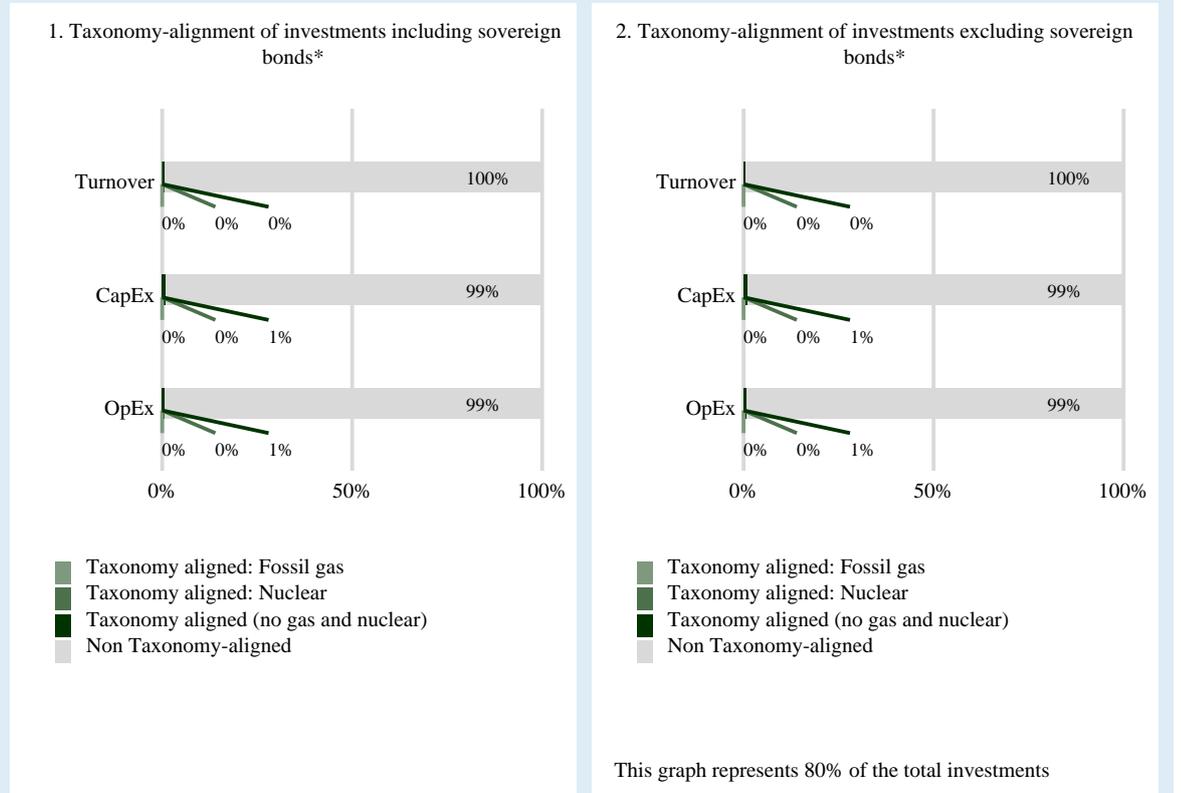

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

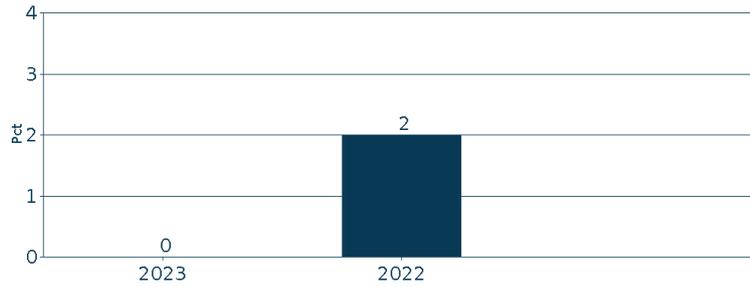

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 332 engagements have been logged on climate/GHG related topics, 17 for biodiversity, 35 on hazardous waste and water emissions, and 70 on social and employee matters.

For sovereigns and supranationals in the portfolio 8 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Portfolio Solution - Growth

Legal entity identifier: 549300B65BU74MZQ2P61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjons Utland (SPU). A commitment in the prospectus has also been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

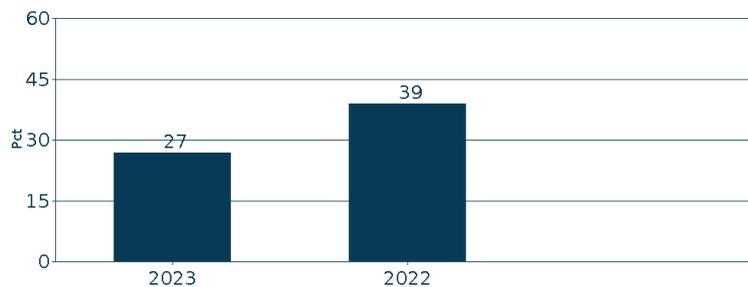

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

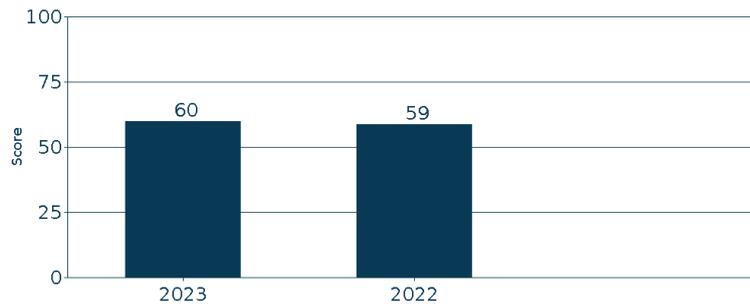

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 52%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

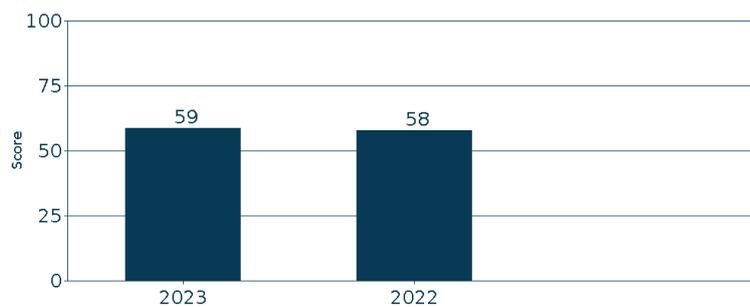

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 52%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	N/A	N/A	0

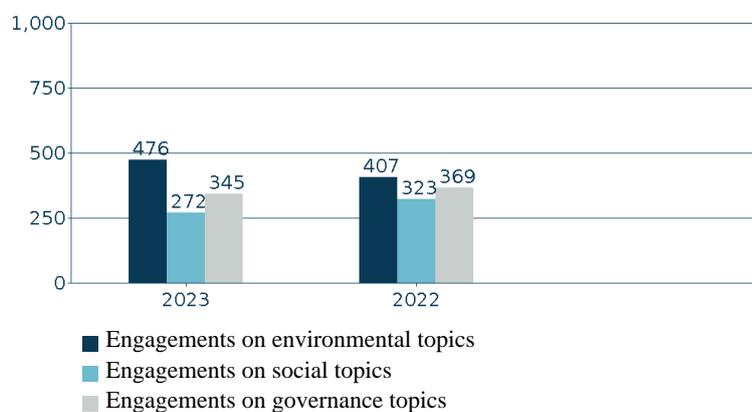

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	N/A	N/A	0
Activities and conduct deemed harmful to society	Restricted Countries	25	N/A	N/A	1
Significant negative impact on the climate	Thermal coal	362	N/A	N/A	0
Significant negative impact on the climate	Peat-fired power generation	0	N/A	N/A	0
Significant negative impact on the climate	Tar sands	22	N/A	N/A	1
Non-Ethical & controversial activities	Controversial weapons	98	N/A	N/A	0
Non-Ethical & controversial activities	Pornography	11	N/A	N/A	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	N/A	N/A	0
Non-Ethical & controversial activities	Tobacco	126	N/A	N/A	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

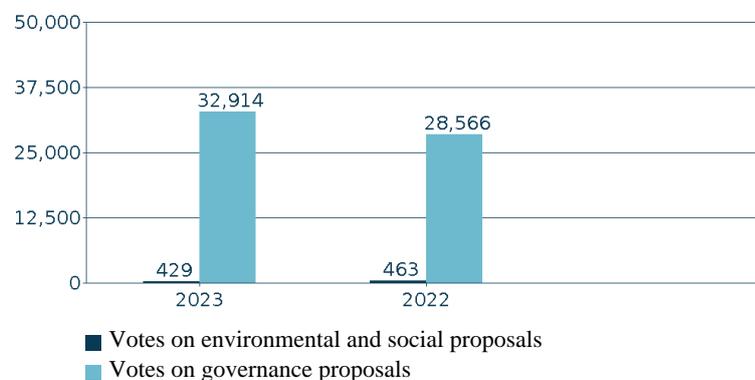

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals. This includes voting conducted at the level of underlying funds.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through indirect and/or direct investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 23% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives. Reference is also made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund. The degree to which the principal adverse impact indicators were otherwise addressed might have varied at the level of the underlying funds.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	416	89.7%	368	94.4%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	94	89.7%	112	94.4%

26	Average rule of law score	2.09	93.9%	2.03	96.3%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 309 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 13 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 31 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 69 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 8 engagement activities relating to the indicators have been logged for issuers in the fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 27% in sustainable investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made "Other investments".

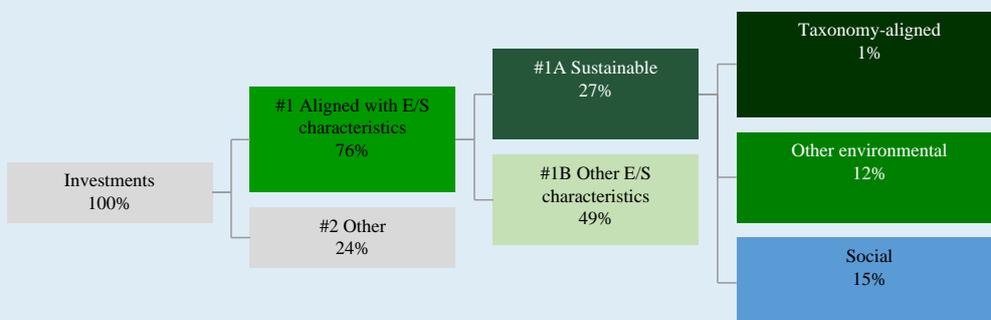

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 76% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 83%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 27% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 12% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 15% investments with a social objective.

In 2022, the fund invested 39% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 31% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.2% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

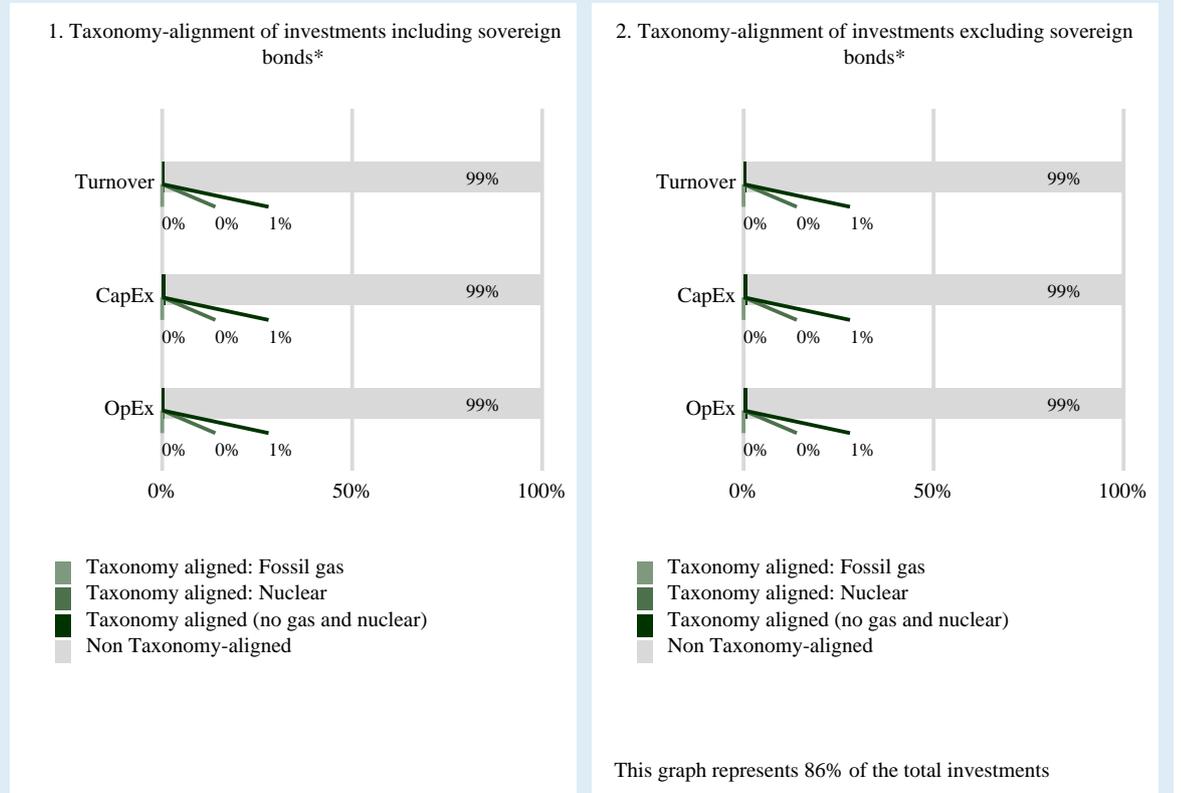

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

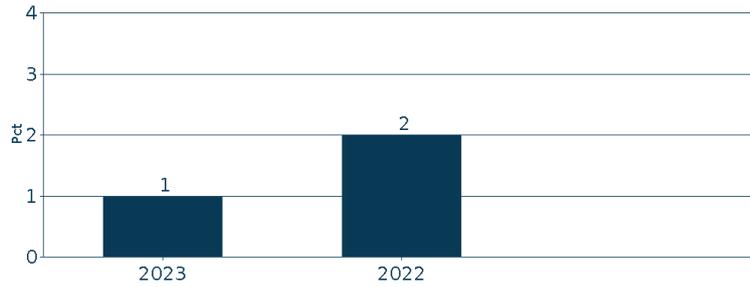

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 309 engagements have been logged on climate/GHG related topics, 13 for biodiversity, 31 on hazardous waste and water emissions, and 69 on social and employee matters.

For sovereigns and supranationals in the portfolio 8 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Tactical Allocation

Legal entity identifier: 549300MGJZ0TCOWNH176

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

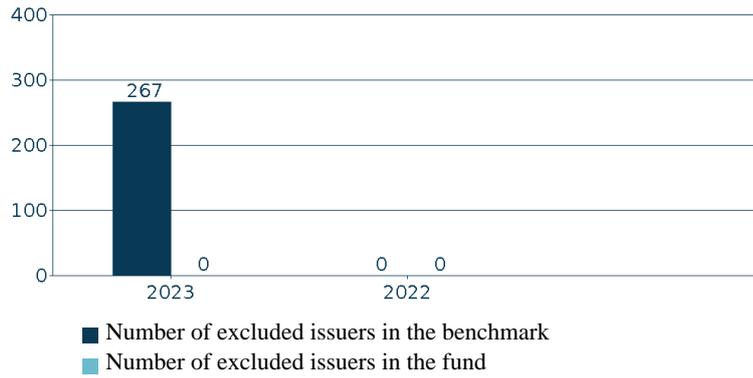

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	10	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	80	1.4%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	80	0.8%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	5	0.1%	0
Non-Ethical & controversial activities	Controversial weapons	98	26	1.3%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	83	1.8%	0
Non-Ethical & controversial activities	Tobacco	126	9	0.3%	0

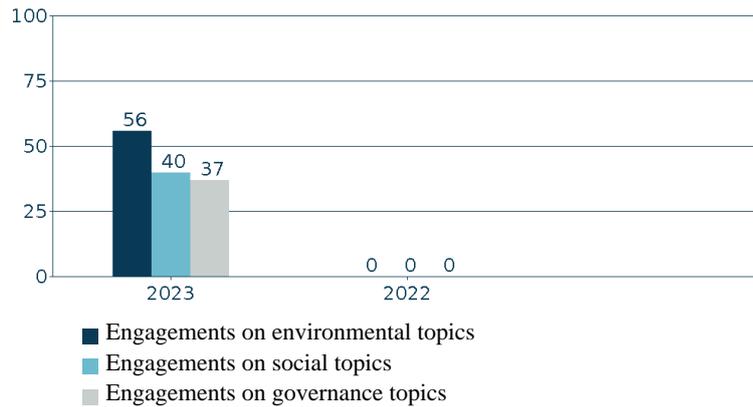

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

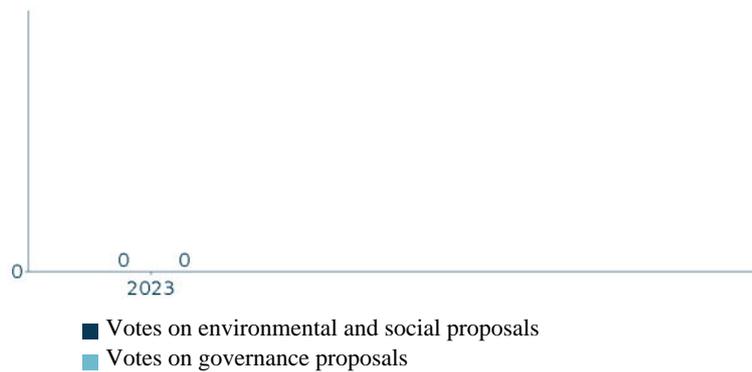

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not consider principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not as of this given date able to monitor, prioritise and report on principal adverse impacts.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

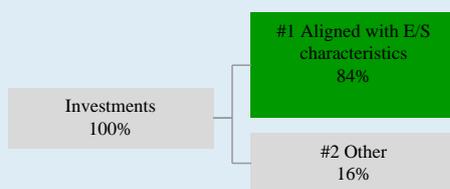

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics.

The asset actual allocation for the reference year was 84% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 92%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

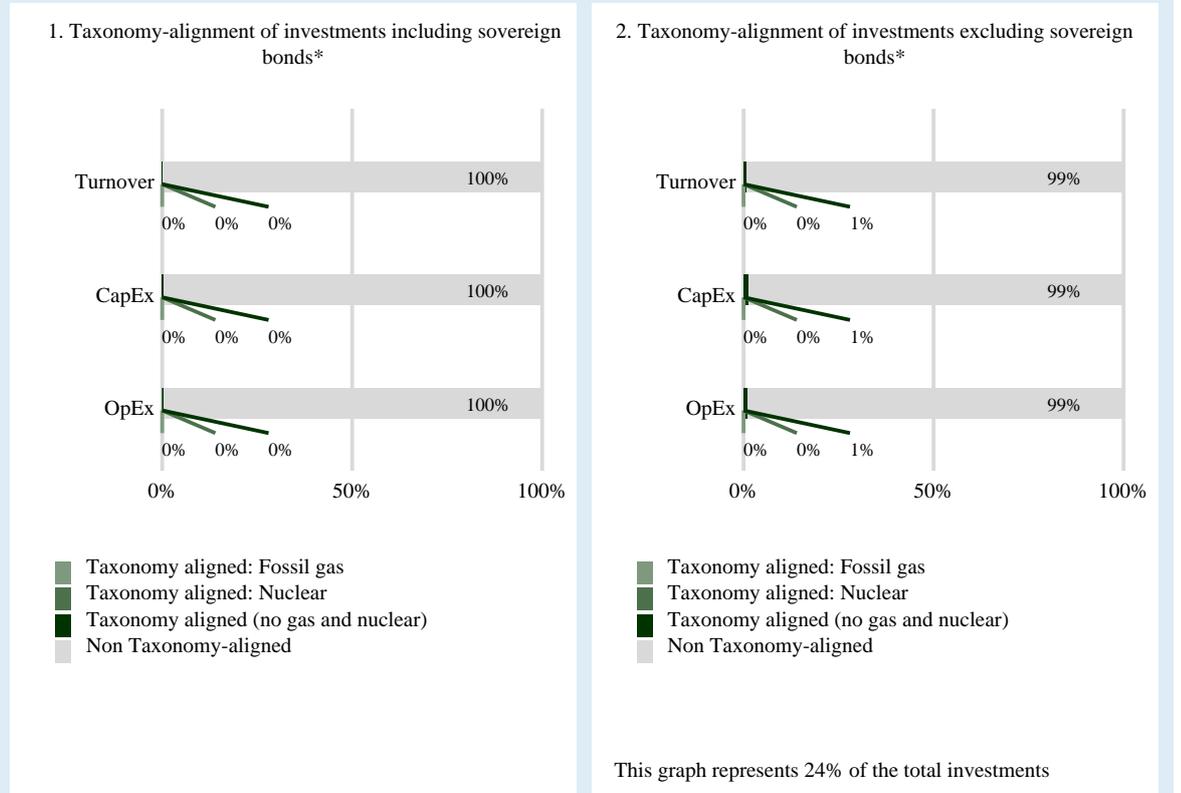

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

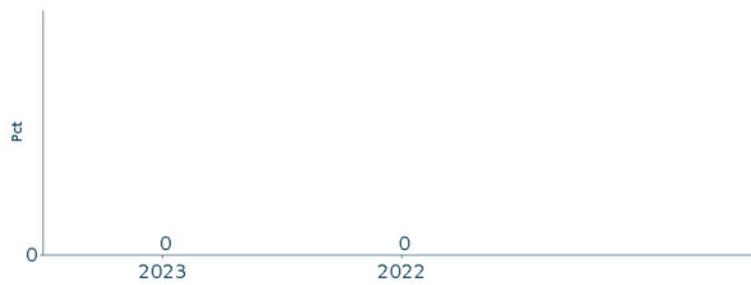

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity and derivatives and other investments used for hedging or risk management purposes..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 37 engagements have been logged on climate/GHG related topics, 4 for biodiversity, 1 on hazardous waste and water emissions, and 11 on social and employee matters.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Russia
Legal entity identifier: 549300ZDQFYL6L4U6W11

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

There was a commitment to conduct active ownership if prompted due to relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social

characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not consider principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not as of this given date able to monitor, prioritise and report on principal adverse impacts.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Tcs Group Holding Plc (Gdr)	Financials	16.6%	CY
Ozon Holdings Plc (Adr)	Consumer Discretionary	10.6%	RU
Novolipetsk Steel Gdr (Gb)	Materials	1.9%	RU
Severstal Pao (Gdr)	Materials	0.6%	RU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

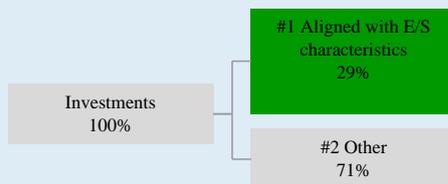

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics.

The asset actual allocation for the reference year was 29% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 63%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	55.75%
Consumer Discretionary	Broadline Retail	35.75%
Materials	Steel	8.50%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

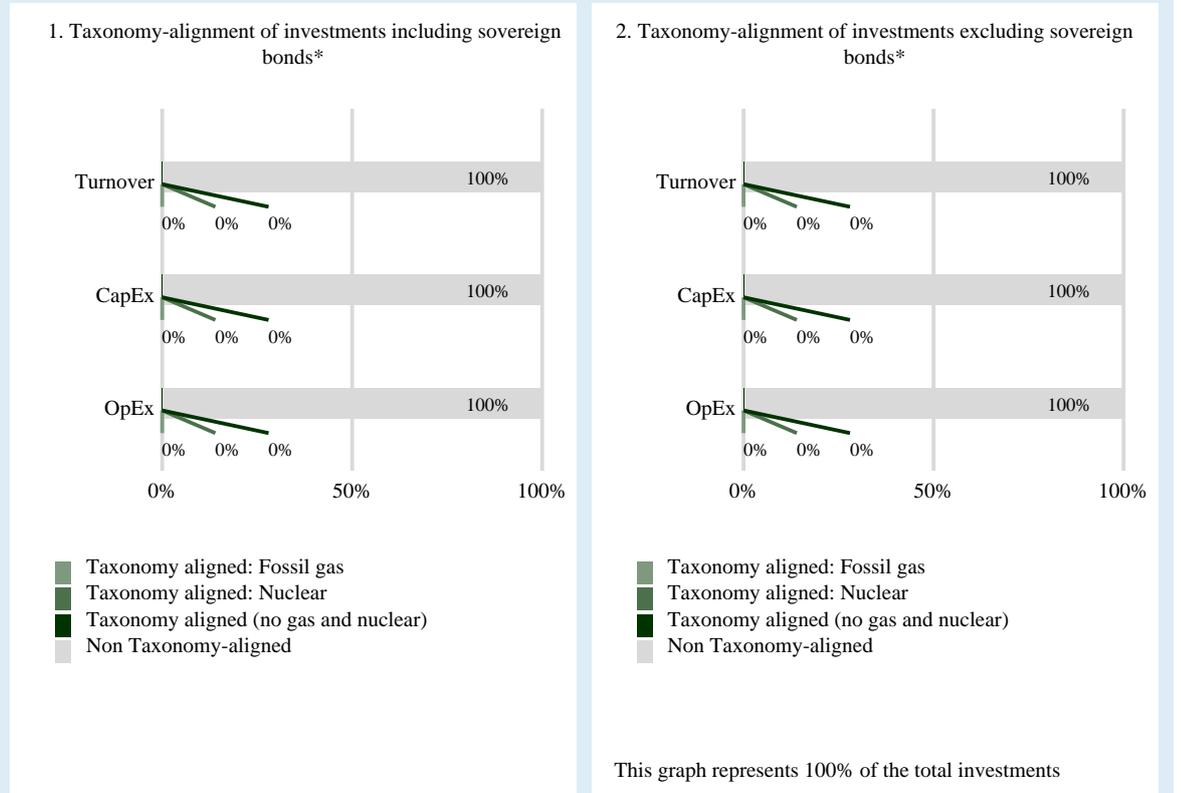

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

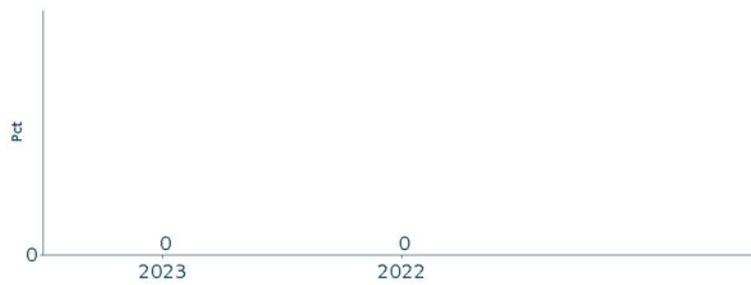

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund did not consider principal adverse impacts on sustainability factors. Due to the investment strategy of the fund and limited data availability, the fund is not as of this given date able to monitor, prioritise and report on principal adverse impacts.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Gazprom Adr (Gb)	Energy	25.0%	RU
Capitea S.A.	Financials	2.5%	PL
Novatek Pjsc (Gdr)	Energy	0.5%	RU

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30

What was the proportion of sustainability-related investments

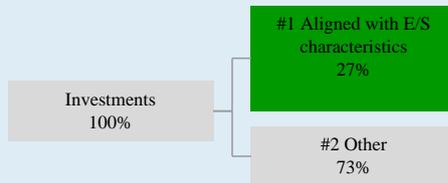

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics.

The asset actual allocation for the reference year was 27% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 58%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Energy	Integrated Oil & Gas	90.78%
Financials	Specialized Finance	9.22%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in activities aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
- In nuclear energy
- No

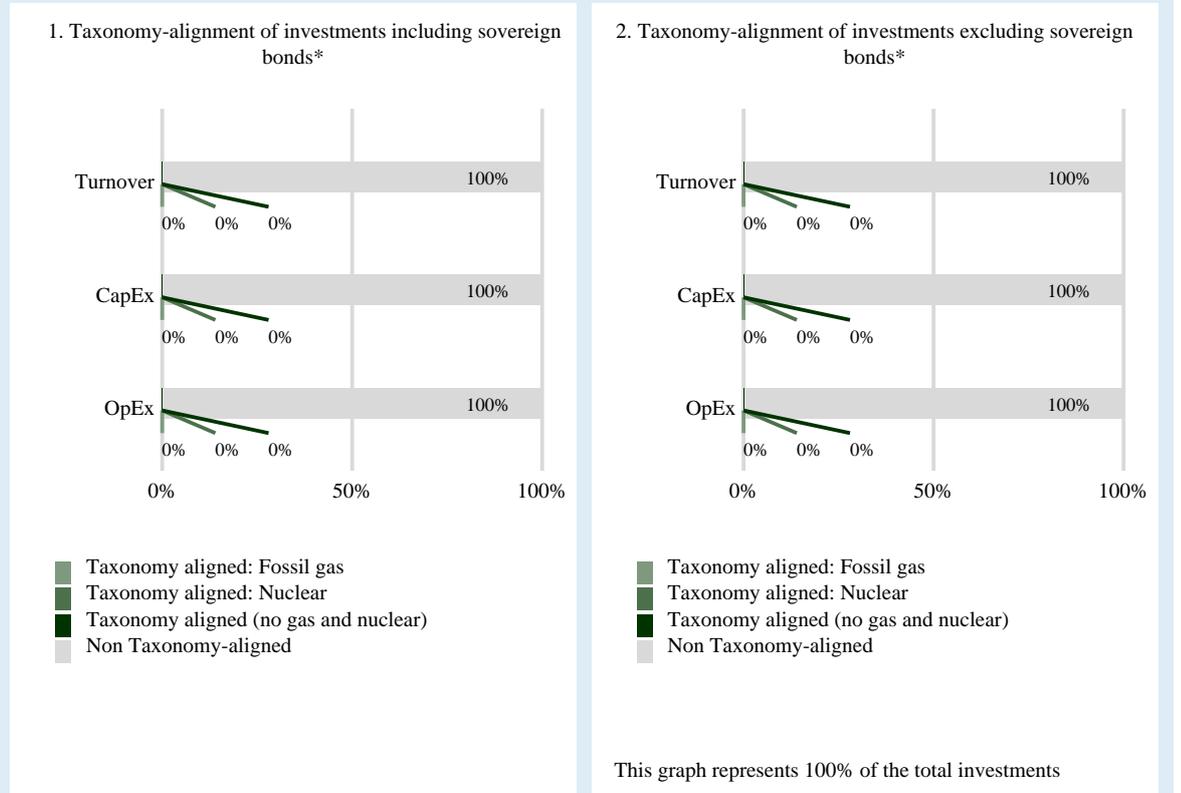

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

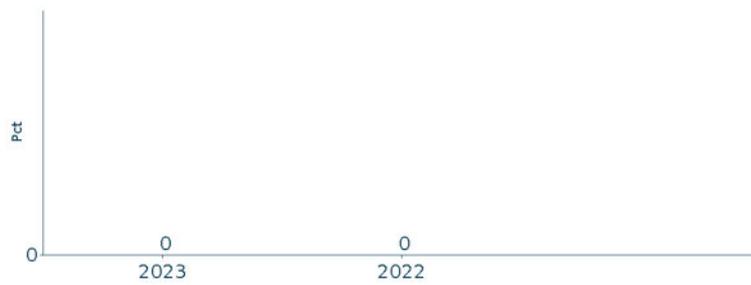

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	0%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Aktiv Förmögenhetsförvaltning

Legal entity identifier: 54930060Y487AD62NS45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through

- screenings on activities and conducts deemed harmful to society.
5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
 6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

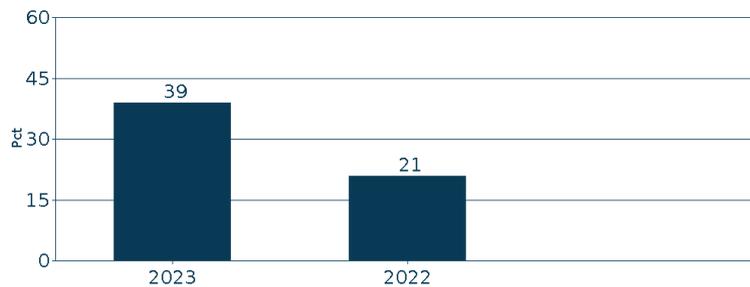

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

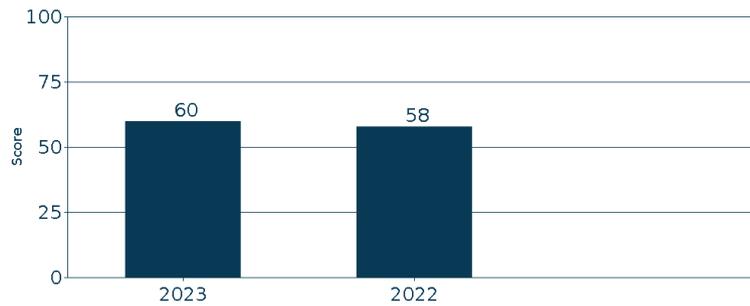

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 78%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

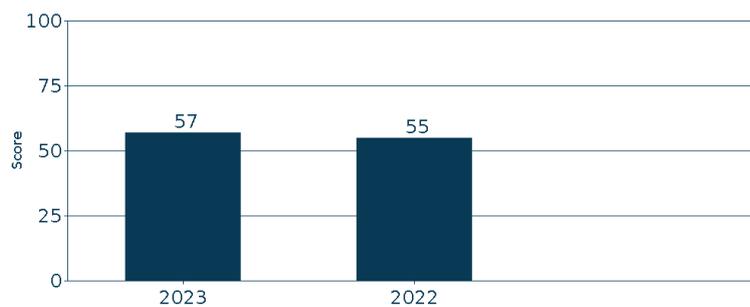

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 77%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

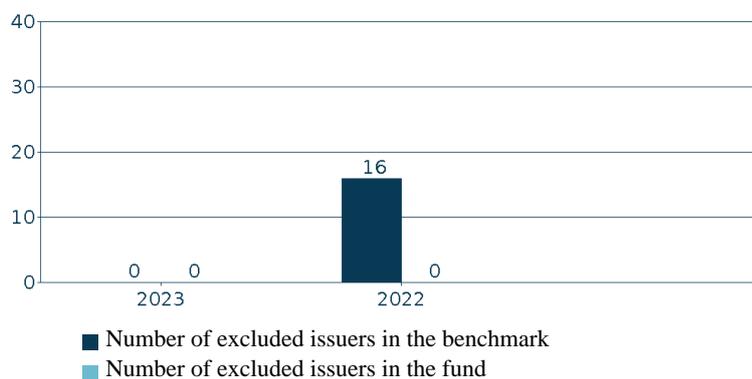

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

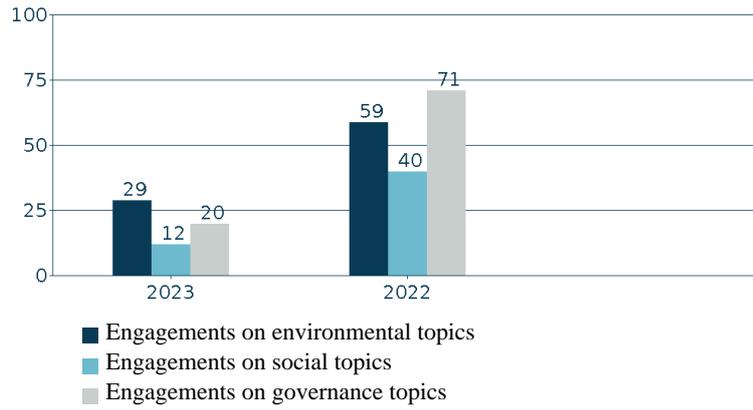

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

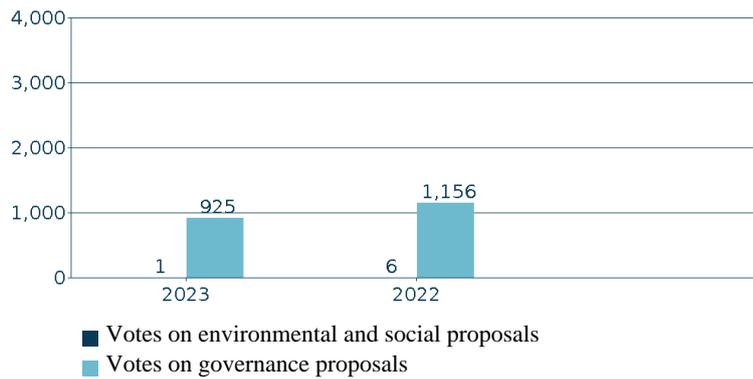

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 35% of the fund.

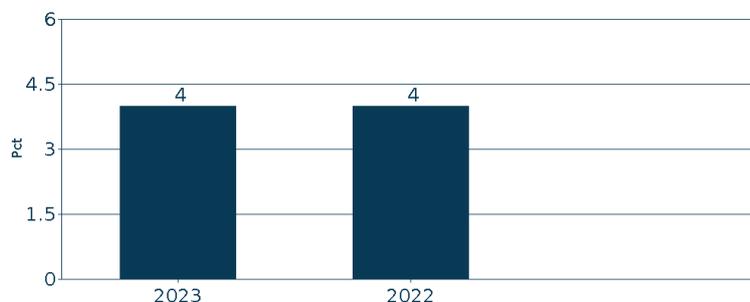

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a ‘do not significant harm’ principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The ‘do no significant harm’ principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,234	86.2%	1,341	84.6%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	941	86.2%	1,262	84.6%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 16 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 5 engagement activities relating to the indicator have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 39% in sustainable investments.

What was the asset allocation?

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made "Other investments".

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

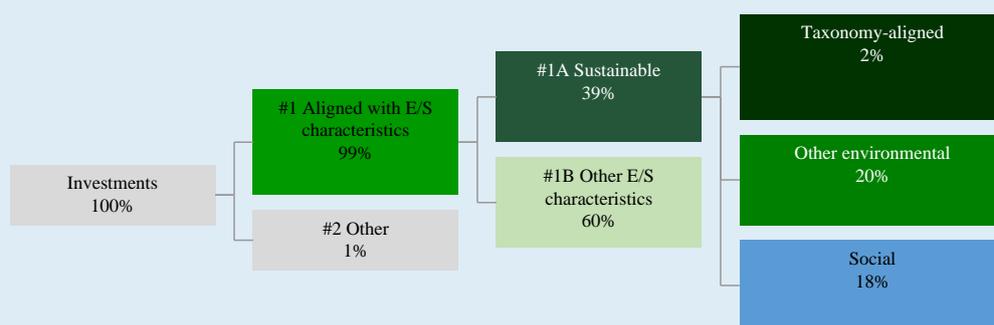

The asset actual allocation for the reference year was 99% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 39% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 20% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 18% investments with a social objective.

In 2022, the fund invested 21% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 12% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 8% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	25.87%
Industrials	Industrial Machinery & Supplies & Components	9.71%
Financials	Thriffs & Mortgage Finance	9.55%
Real Estate	Real Estate Operating Companies	9.42%
Industrials	Construction Machinery & Heavy Transportation Equipment	5.92%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.5% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

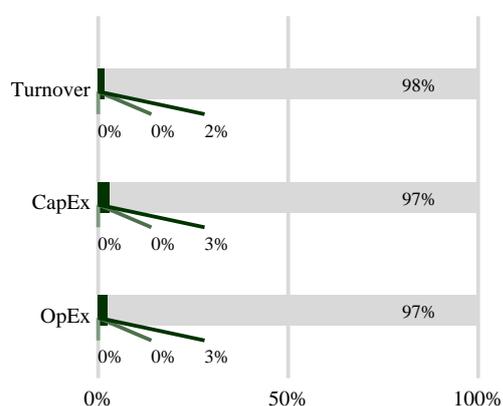

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 In fossil gas
 In nuclear energy
 No

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

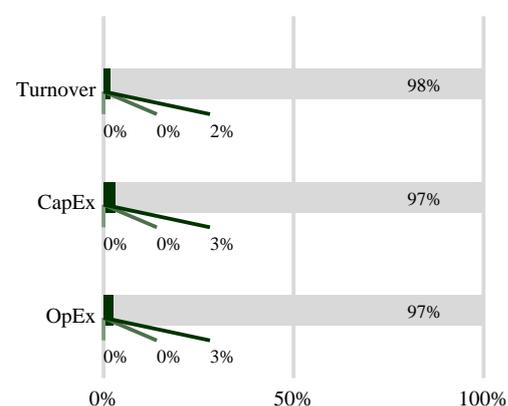

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

This graph represents 97% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

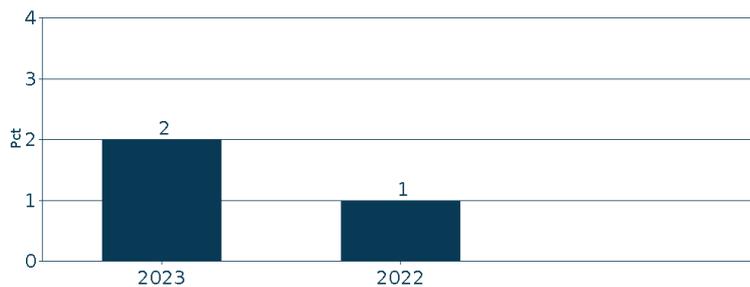

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 18%.

What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the "Other" investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under "How did the sustainability indicators perform?". Other investments included cash held as ancillary liquidity .

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund's inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 16 engagements have been logged on climate/GHG related topics, 5 for biodiversity, 1 on hazardous waste and water emissions, and 1 on social and employee matters.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Beta

Legal entity identifier: 549300JJONK1X5R87Z42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 2% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies. The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) of the EU Taxonomy, climate change

mitigation and/or climate change adaptation.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

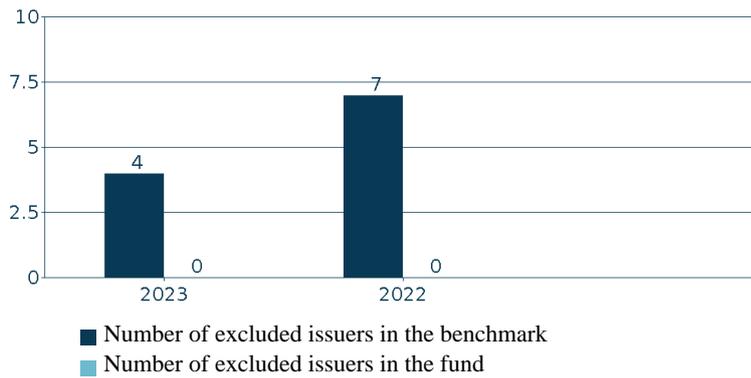

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	3	0.2%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	2	3.6%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	1	0.7%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

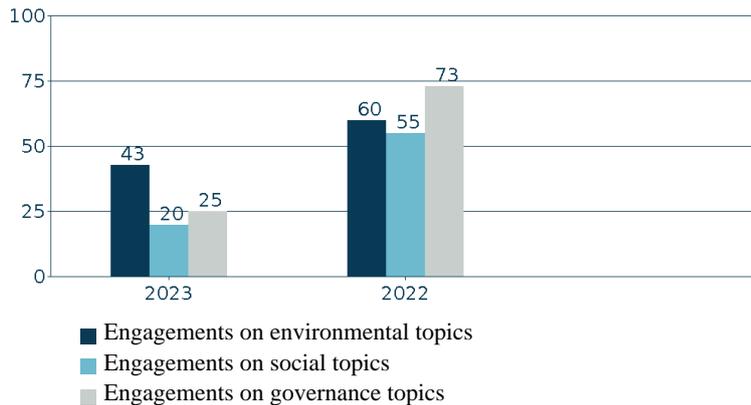

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

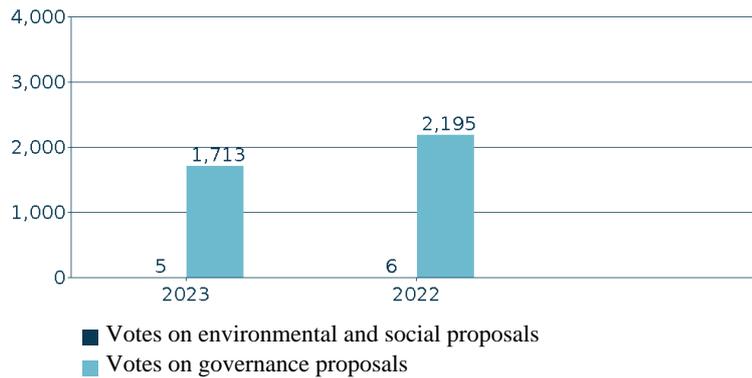

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,288	100.0%	1,371	99.4%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	826	100.0%	589	99.4%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 26 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 3 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 2 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 4 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Investor Ab B	Financials	6.6%	SE
Atlas Copco Ab A	Industrials	6.1%	SE

Svenska Handelsbanken Ab A	Financials	2.6%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

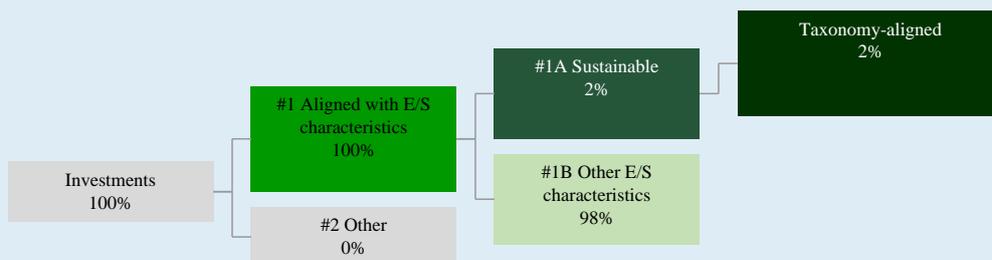

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The asset actual allocation for the reference year was 100% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 100%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 1.2% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
 - In nuclear energy
- No

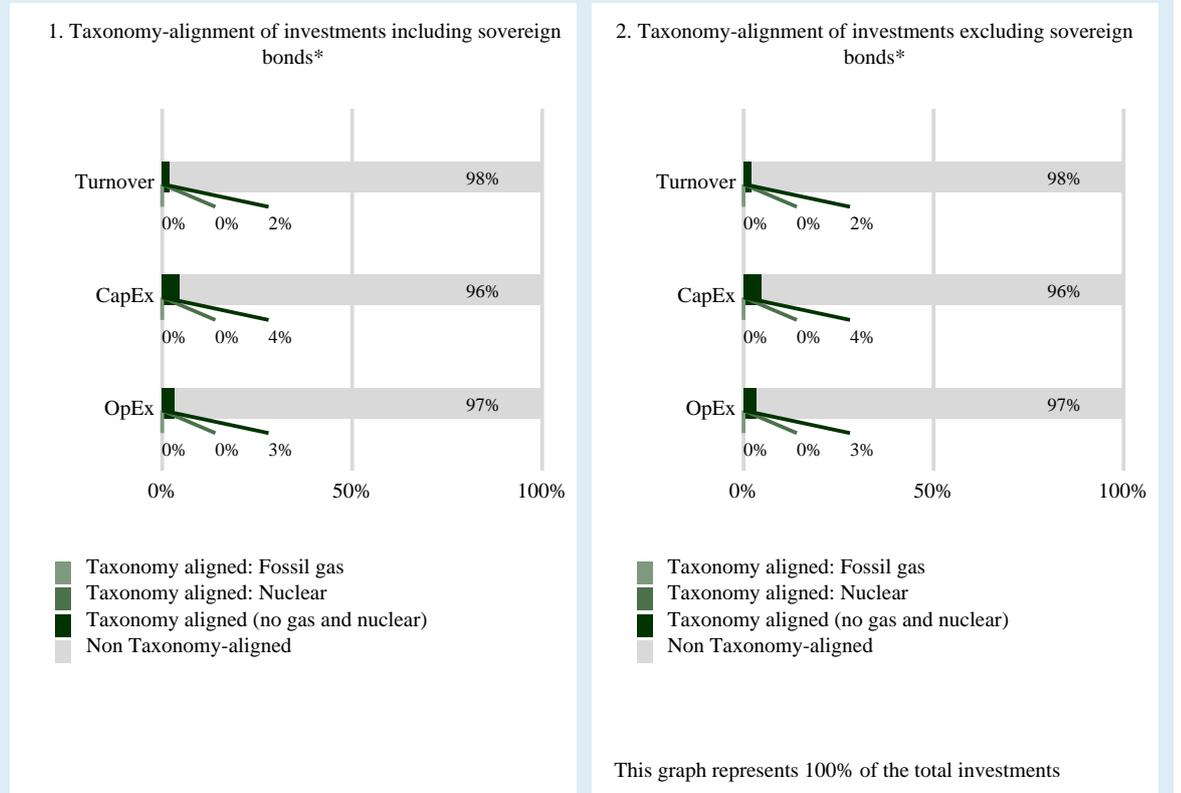

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

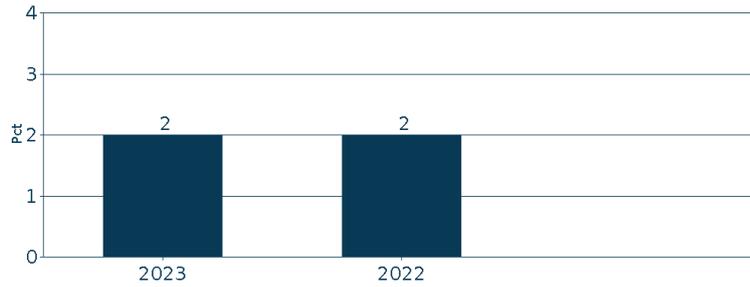

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

N/A

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Index
Legal entity identifier: 5493002GPY5GWYKQ0R14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to apply exclusions for pornography and follow the exclusion list of Statens Pensjonsfond Utland (SPU).

The fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active

ownership, if prompted in accordance with relevant processes and policies. The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) of the EU Taxonomy, climate change mitigation and/or climate change adaptation.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Exclusions

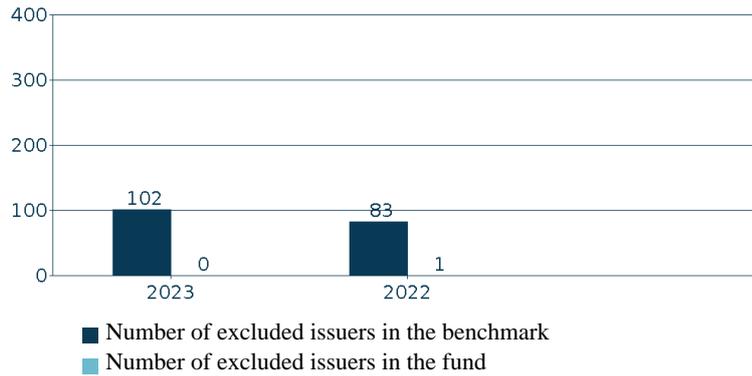

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	23	2.2%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	32	1.3%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	5	0.2%	0
Non-Ethical & controversial activities	Controversial weapons	98	25	2.1%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	37	2.9%	0
Non-Ethical & controversial activities	Tobacco	126	5	0.6%	0

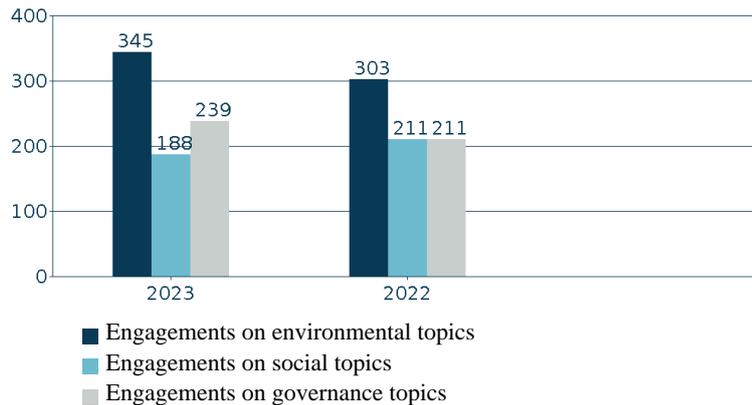

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

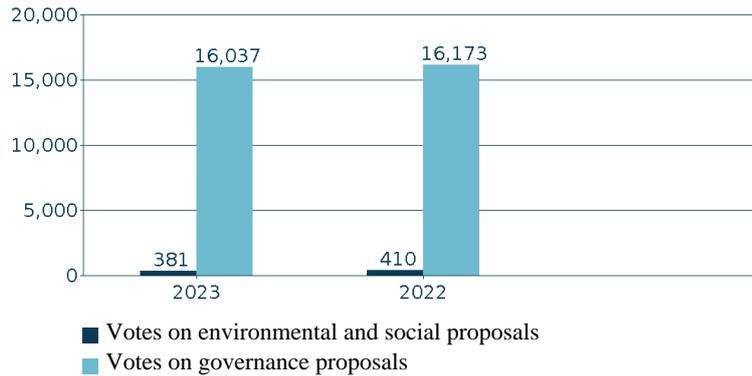

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

N/A

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	115,381	99.8%	92,576	99.9%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	28,990	99.8%	24,774	99.9%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	1,432,482	99.8%	986,298	99.9%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, and 22 for tar sands. 226 engagement activities relating to the indicators have been logged for issuers in the fund.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 9 engagement activities relating to the indicator have been logged for issuers in the fund.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 20 engagement activities relating to the indicators have been logged for issuers in the fund.

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 48 engagement activities relating to the indicators have been logged for issuers in the fund.

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Apple Inc.	Information Technology	5.4%	US
Microsoft Corp.	Information Technology	4.7%	US
Amazon.Com Inc.	Consumer Discretionary	2.4%	US
Nvidia Corp.	Information Technology	2.1%	US
Endeavour Mining Plc	Materials	2.0%	GB
Alphabet Inc. A	Communication Services	1.4%	US
Tesla Inc.	Consumer Discretionary	1.3%	US
Meta Platforms Inc. A	Communication Services	1.3%	US
Alphabet Inc. C	Communication Services	1.3%	US
Unitedhealth Group Inc.	Health Care	1.0%	US
Johnson & Johnson	Health Care	0.9%	US
Berkshire Hathaway Inc. B	Financials	0.9%	US
Eli Lilly & Co.	Health Care	0.9%	US
Jpmorgan Chase & Co.	Financials	0.8%	US
Broadcom Inc.	Information Technology	0.8%	US

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

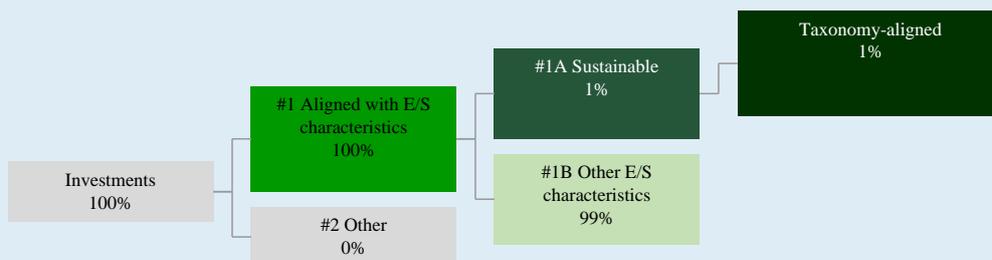

The "asset allocation" overview demonstrates the allocation of investments used for the attainment of the environmental and/social characteristics of the fund and "other" investments. In the reference year the fund did not invest in accordance with a commitment to make sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions and needs to conduct active ownership activities. The asset actual allocation for the reference year was 100% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 100%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.3% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
 - In nuclear energy
- No

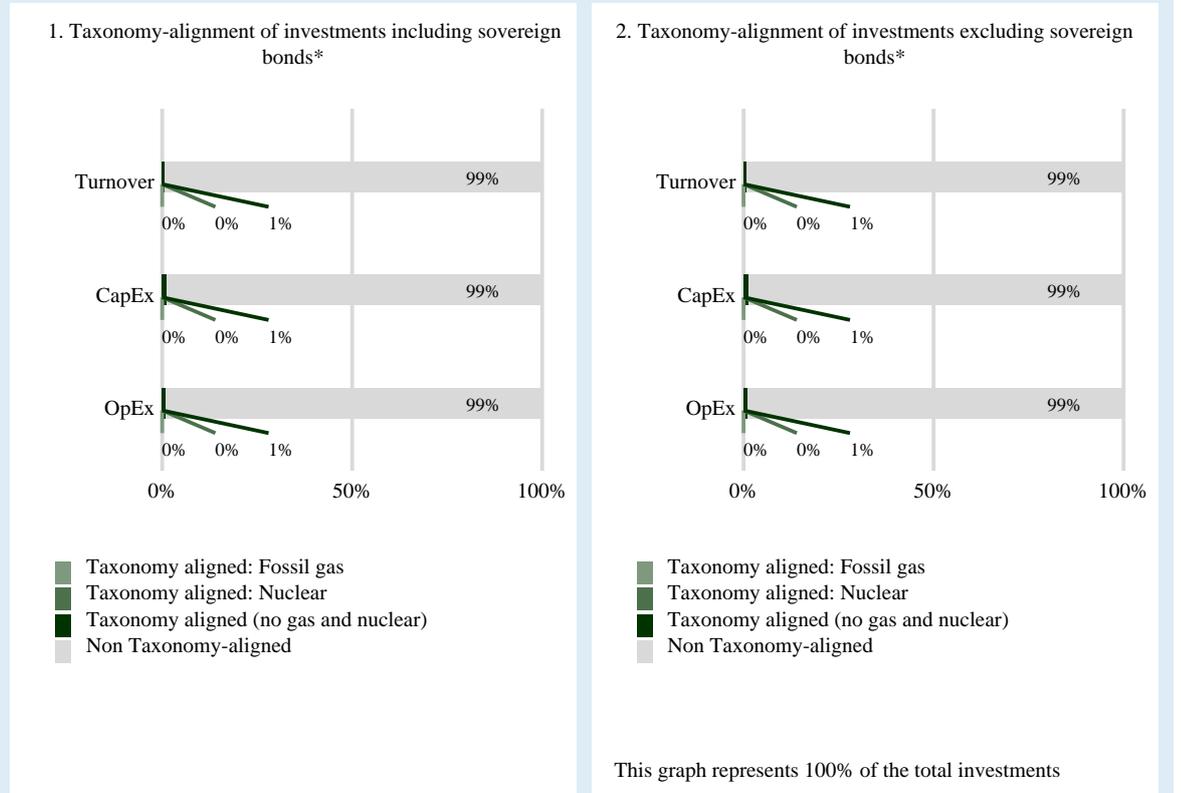

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

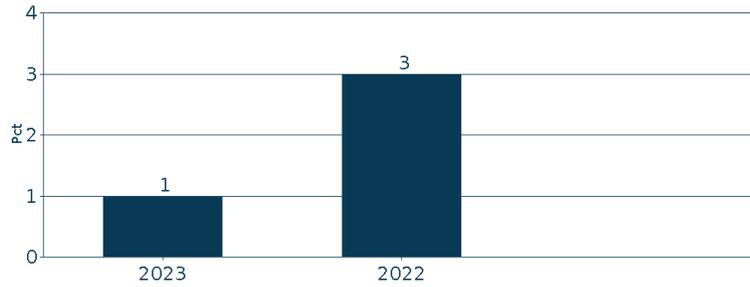

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

N/A

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

How did this financial product perform compared to the reference benchmark?

N/A

are sustainable investm with an environmental objective that do not tal into account the criteria environmentally sustainable economic activities under Regulation (EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige
Legal entity identifier: 549300CXH1PTTFD73005

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to follow the exclusion list of Statens Pensjonsfond Utland (SPU). Also a commitment in the prospectus has been introduced for the fund to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Sound sustainability practices through inclusion of issuers aligned with the sustainability-profile of the fund as measured through governance, social and environmental related KPIs.
3. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as measured through climate-related KPIs.
4. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding

Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.

5. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
6. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

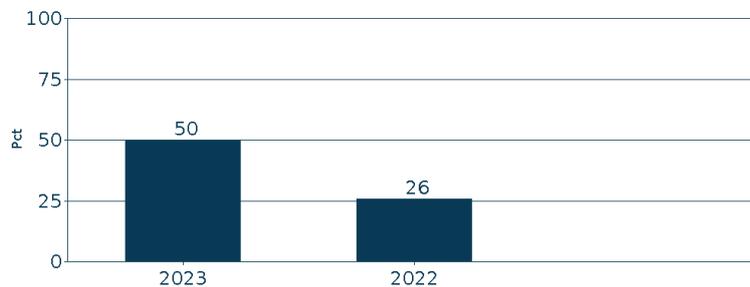

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 10% of its investments in sustainable investments.

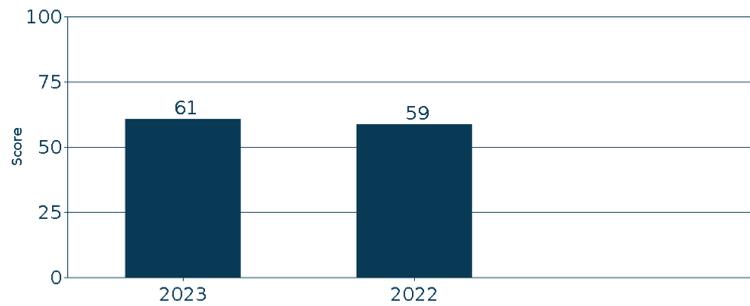

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 99%.

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

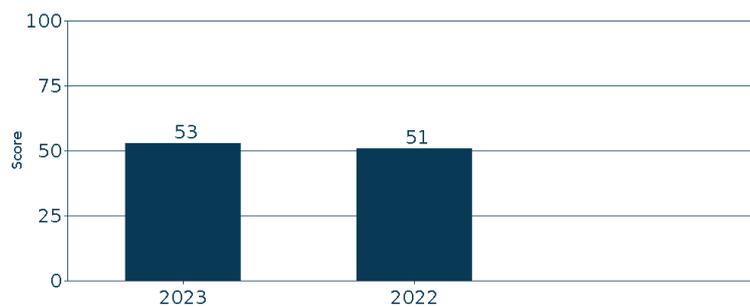

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 99%

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual issuers may have scored below 40 as long as the total measured part of the portfolio scored 40 or above.

Exclusions

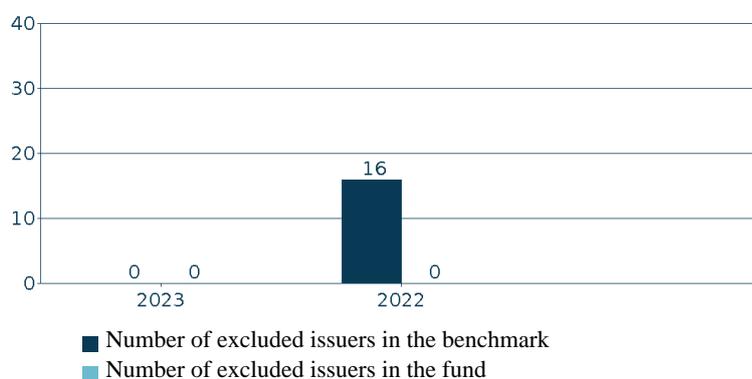

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

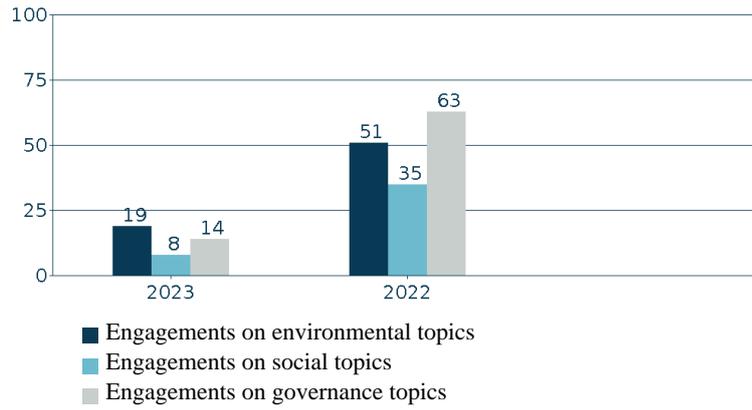

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

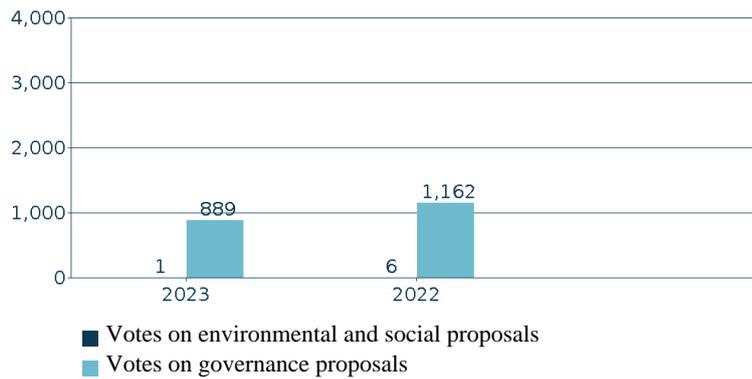

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

Voting

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 50% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do no significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	1,220	100.0%	1,742	98.0%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	897	100.0%	1,578	98.0%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	113,144	100.0%	142,189	98.0%
04	Total GHG emissions (tons)	115,261	100.0%	145,508	98.0%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 10 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trade warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already

excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 1 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? ".

Indicators applicable to sovereigns and supnationals

The fund did not invest in sovereigns and supnationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Investor Ab B	Financials	10.0%	SE
Atlas Copco Ab B	Industrials	9.9%	SE
Hexagon Ab B	Information Technology	7.2%	SE
Assa Abloy Ab B	Industrials	6.6%	SE

Lifco Ab B	Industrials	3.7%	SE
Aak Ab	Consumer Staples	3.5%	SE

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 50% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, inclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

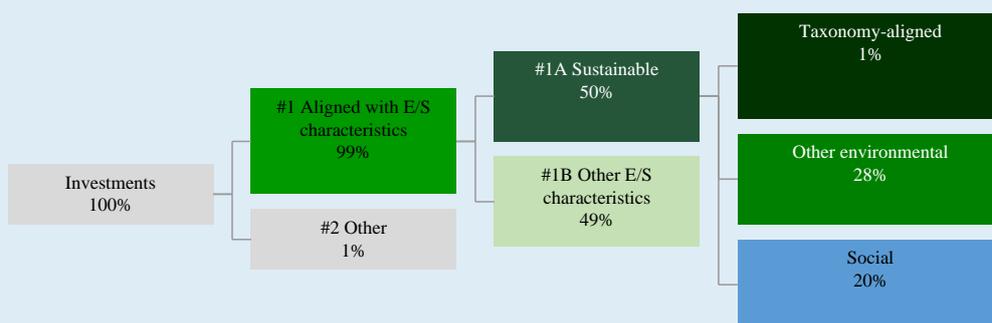

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 99% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 98%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 50% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 28% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 20% investments with a social objective.

In 2022, the fund invested 26% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 13% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 11% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Industrials	Industrial Machinery & Supplies & Components	16.42%
Financials	Diversified Banks	11.32%
Industrials	Construction Machinery & Heavy Transportation Equipment	9.97%
Financials	Multi-Sector Holdings	9.61%
Industrials	Building Products	8.79%
Information Technology	Electronic Equipment & Instruments	7.04%
Real Estate	Real Estate Operating Companies	5.73%
Industrials	Electrical Components & Equipment	4.51%
Industrials	Trading Companies & Distributors	4.10%
Health Care	Pharmaceuticals	3.52%
Information Technology	Application Software	3.39%
Consumer Staples	Household Products	3.23%
Consumer Staples	Packaged Foods & Meats	3.15%
Industrials	Industrial Conglomerates	2.40%
Materials	Forest Products	2.22%
Health Care	Health Care Technology	1.39%
Financials	Investment Banking & Brokerage	1.26%
Health Care	Life Sciences Tools & Services	1.10%
Consumer Discretionary	Leisure Products	0.84%
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Exploration & Production	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.6% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

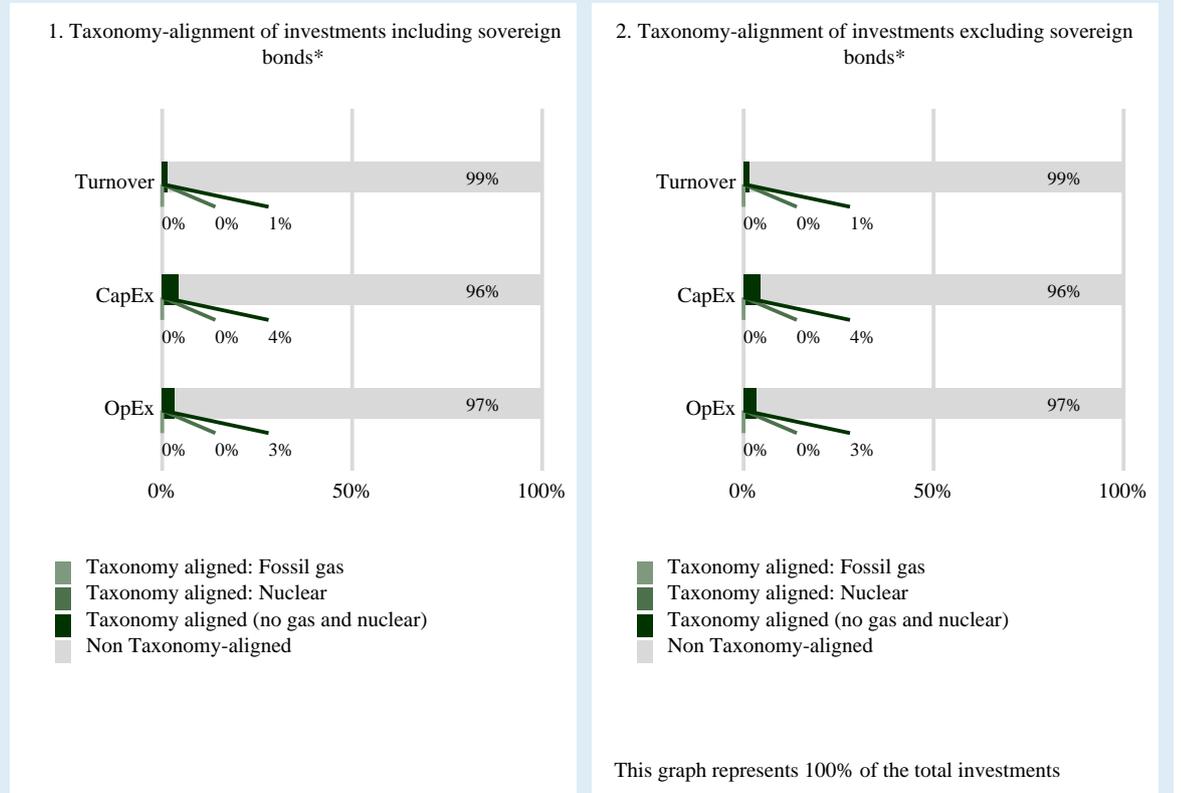

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

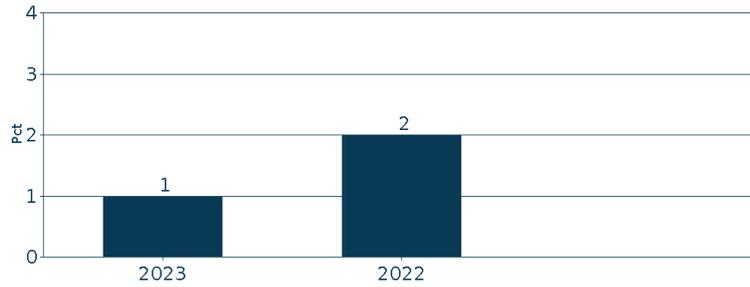

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 28%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 20%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product, that issuers have been selected for in accordance with the fund’s inclusion criteria or criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Kort Ränta

Legal entity identifier: 549300PQLXHY57M39Z35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: %

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to invest min. 1% of sustainable investments in support of an environmental objective and min. 0.01% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
4. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical

or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

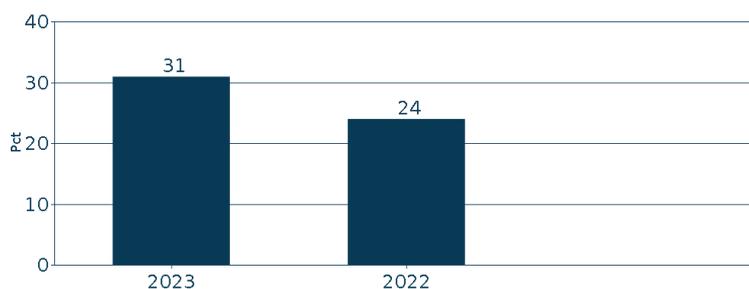

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 10% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

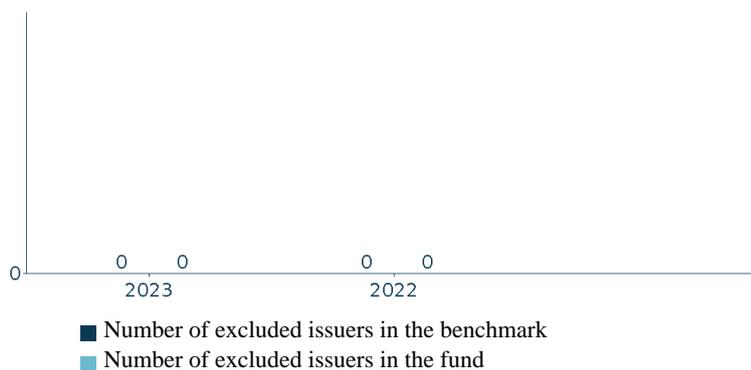

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

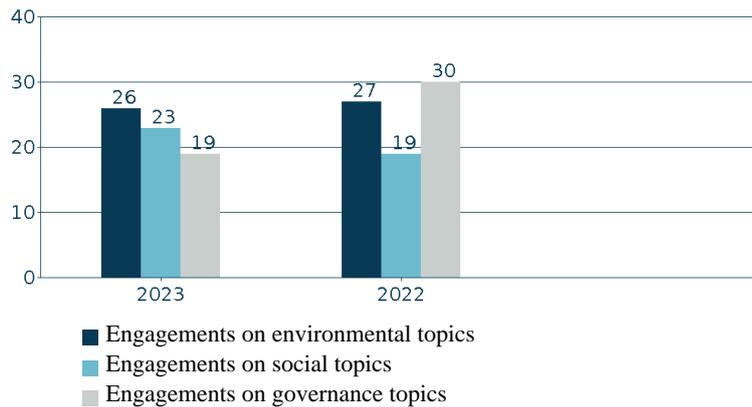

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 – Life Below Water, SDG 15 – Life on Land, and/or SDG 17 – Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 10% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

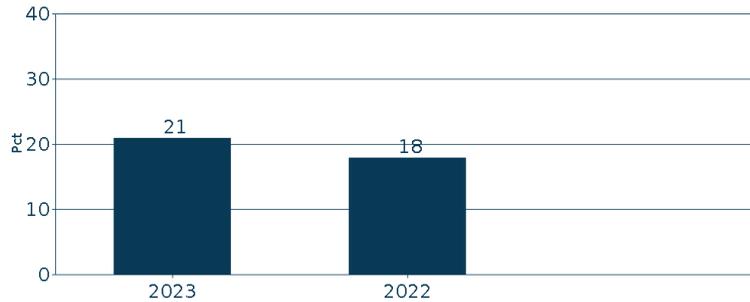

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	4,532	44.3%	6,241	49.2%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,467	44.3%	2,082	49.2%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	259,716	44.3%	456,281	49.2%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 19 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 3 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

Largest investments	Sector	% Assets	Country
Stadshypotek Ab 1.5% 03.12.2024	Financials	8.0%	SE

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 31% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

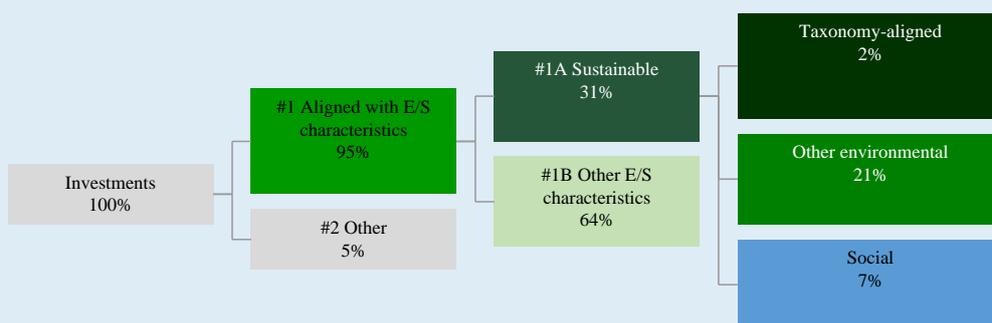

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 95% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 96%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 31% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 21% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 7% investments with a social objective.

In 2022, the fund invested 24% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 21% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 2% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	46.17%
Real Estate	Real Estate Operating Companies	14.96%
Financials	Thriffs & Mortgage Finance	6.46%
Consumer Discretionary	Automobile Manufacturers	4.34%
Utilities	Electric Utilities	2.58%
Industrials	Research & Consulting Services	2.09%
Real Estate	Real Estate Development	1.92%
Materials	Forest Products	1.92%
Consumer Staples	Packaged Foods & Meats	1.89%
Industrials	Airport Services	1.35%
Industrials	Industrial Machinery & Supplies & Components	1.28%
Consumer Staples	Food Retail	1.19%
Industrials	Security & Alarm Services	1.19%

Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Oil & Gas Equipment & Services	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments
No sector data		9.39%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.5% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

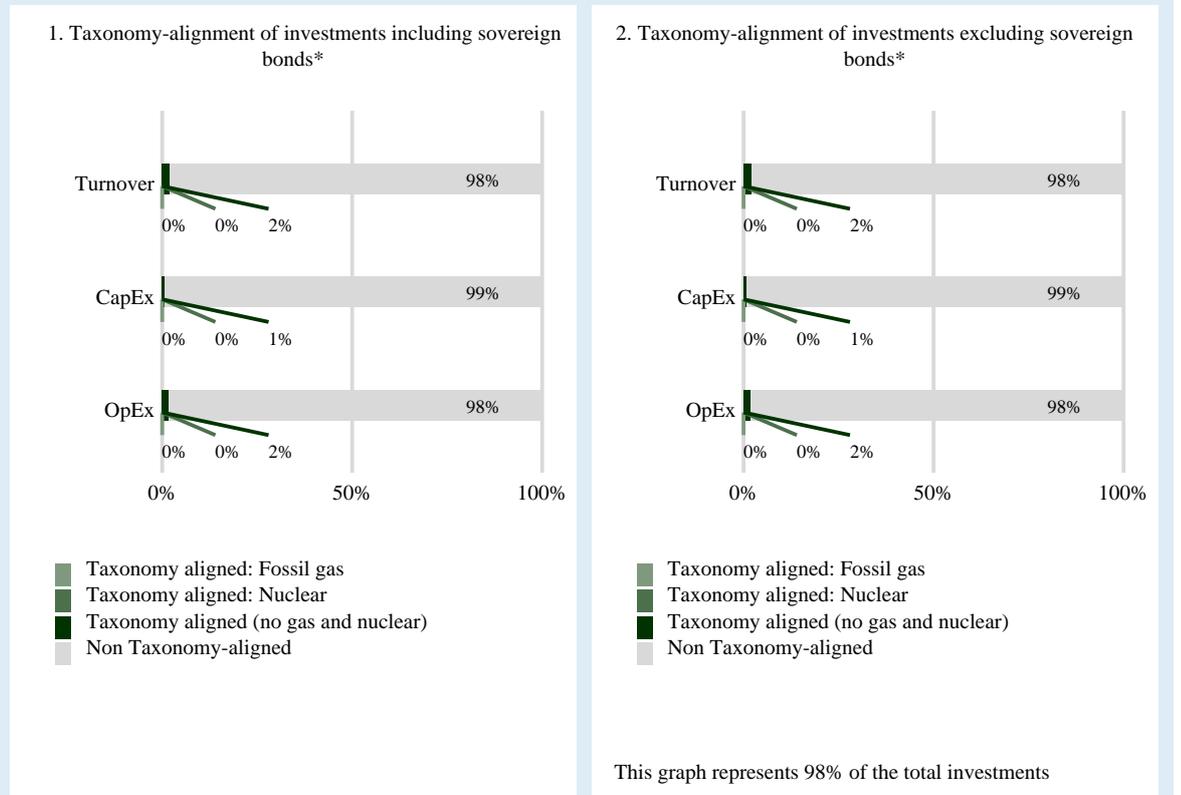

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

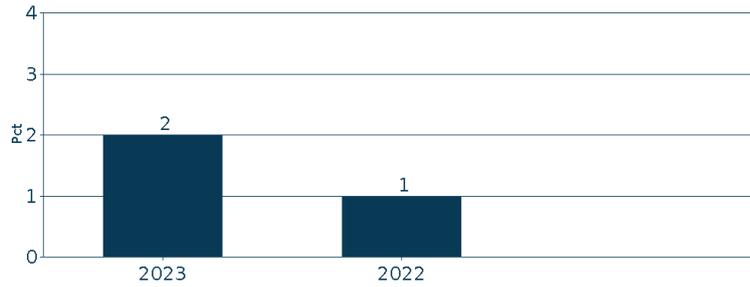

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 7%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 19 engagements have been logged on climate/GHG related topics, 3 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Annex IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Sverige Ranta
Legal entity identifier: 549300DKUK3TPYXDJD76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference year, the investment strategy of the fund was changed as stated in the prospectus to invest min. 1% sustainable investments in support of an environmental objective and min. 1% in support of a social objective.

The fund promoted:

1. The UN Sustainable Development Goals (UN SDGs) by partially investing in sustainable investments contributing to the goals.
2. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
3. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
4. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical

or controversial.

The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies.

The fund did not apply a reference benchmark for the attainment of its environmental and/or social characteristics.

How did the sustainability indicators perform?

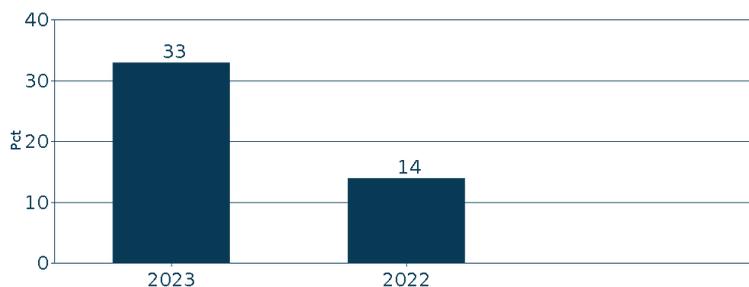

The tables below demonstrate the average performance of sustainability indicators relating to the environmental and social characteristics of the fund measured throughout the year. The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The weighted share of investments in the portfolio contributing to the UN SDGs and deemed to be sustainable investments.

Binding element: The fund is committed to invest a minimum of 5% of its investments in sustainable investments.

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

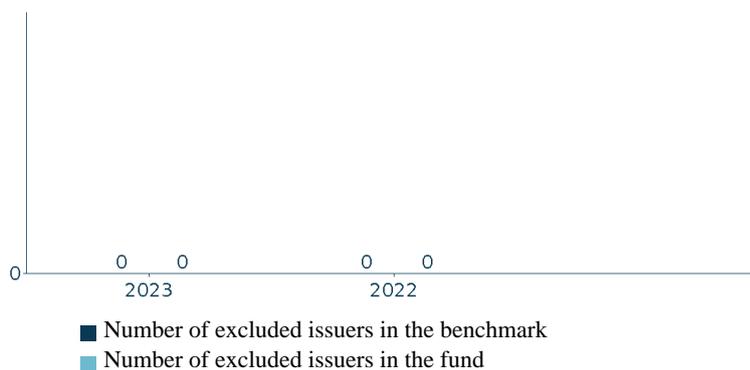

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of its exclusion criteria and thresholds.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

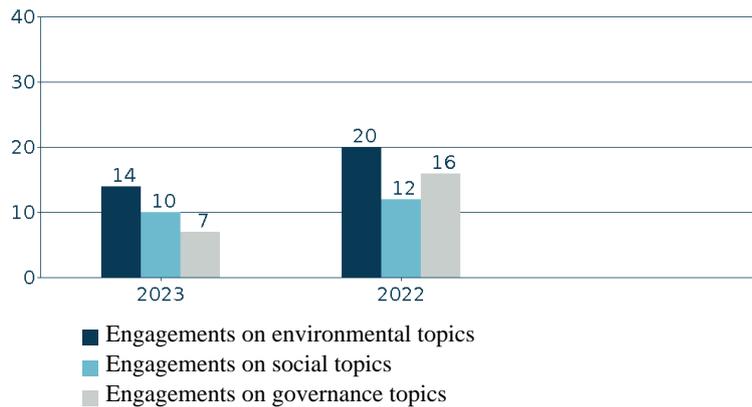

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	0	0.0%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	0	0.0%	0
Significant negative impact on the climate	Fossil Fuel	1447	0	0.0%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	0	0.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	0	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	0	0.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund is committed to ensure engagement with issuers' impact on material sustainability matters.

... and compared to previous periods?

The tables above provide historical comparisons against previous reporting periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the sustainable investments of the fund is to contribute to the UN SDGs. The environmental objectives of the UN SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The fund contributed to the UN SDGs through investments:

- in issuers considered sustainable on basis of a proprietary SDG model of Danske Bank A/S (the "SDG Model")
- in sustainability labelled bonds.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Sustainable investments according to the SDG Model

The sustainable investments under the SDG Model represents 23% of the fund.

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available at sustainability related disclosures of the fund at danskebank.com, and the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance. Model assumptions rely on third-party data, including FactSet and Util.

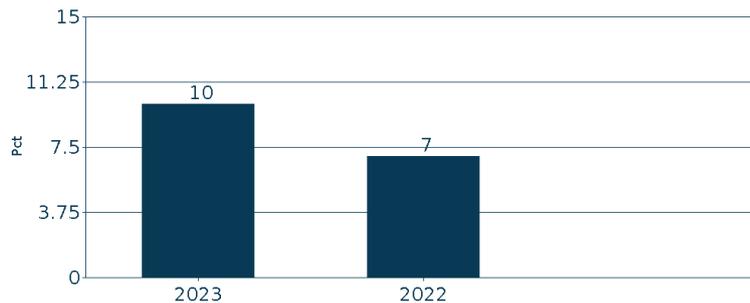

The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The weight of sustainability-labelled bonds in the portfolio is demonstrated in the graph below.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund's exclusions limited investments in issuers with significant harm to social and environmental objectives in respect to the sustainable investments made. In addition, reference is made to the safeguards listed in "How were the indicators for adverse impacts on sustainability factors taken into account?" and "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below.

For the "do no significant harm" assessments of Taxonomy-aligned activities, the fund has leveraged data from issuers reporting their taxonomy-alignment in accordance with the screening criteria set out in the EU Taxonomy Regulation.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including the enhanced screening capturing country exclusions, and quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The 'do not significant harm' principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	296	69.0%	546	66.2%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	368	69.0%	761	66.2%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	124,612	69.0%	93,577	66.2%
04	Total GHG emissions (tons)	125,276	69.0%	94,883	66.2%
05	Carbon footprint (tCO ₂ e / m€invested)	234	69.0%	172	66.2%
06	GHG intensity of investee companies (tCO ₂ e / m€of revenue)	484	69.0%	469	66.2%
07	Exposure to companies active in the fossil fuel sector (Share of investments)	0.0%	69.0%	0.0%	66.2%
08	Share of non-renewable energy – Consumption	50.5%	14.5%	71.3%	3.8%
09	Share of non-renewable energy – Production	0.0%	0.7%	0.0%	0.7%

Actions taken in relation to indicators on investee companies

GHG Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 2,094 for fossil fuels, and 22 for tar sands. 10 engagement activities relating to the indicators have been logged for issuers in the fund. Approx 900 issuers were covered by pre-trade warnings related to the indicators. This means that a warning is triggered prior to trading in an issuer that exceeds the thresholds defined for the indicators. The pre-trades warnings have not triggered any overrides in respect to new investments by the fund. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?"

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 3 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by pre-trade warnings for the indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to an environmental objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Social and Employee matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 0 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by pre-trade warnings related to these indicators. Issuers covered by the fund's pre-trade warnings may partially overlap with already excluded issuers. The sustainable investments of the fund integrated these indicators in the assessment of whether an issuer did significant harm to a social objective. See "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? "

Indicators applicable to sovereigns and supranationals

Indicators 22-26 form part of the country exclusion assessment criteria under the Enhanced Sustainability standards Screening with 27 issuers on the country exclusion list in 2023. 0 engagement activities relating to the indicators have been logged for issuers in the fund.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 30 December 2023

Largest investments	Sector	% Assets	Country
Danske Hypotek Ab 1% 17.12.2025	Financials	18.2%	SE

What was the proportion of sustainability-related investments

The "asset allocation" overview demonstrates to which extent the fund has invested in sustainability-related investments and the allocation of investments otherwise used for the attainment of the environmental and/or social characteristics as well as other investments. As can be seen, the fund has invested 33% in sustainable investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund promoted environmental and/or social characteristics through screening that provided the foundation for its exclusions, sustainable investments and needs to conduct active ownership activities. The fund also made “Other investments”.

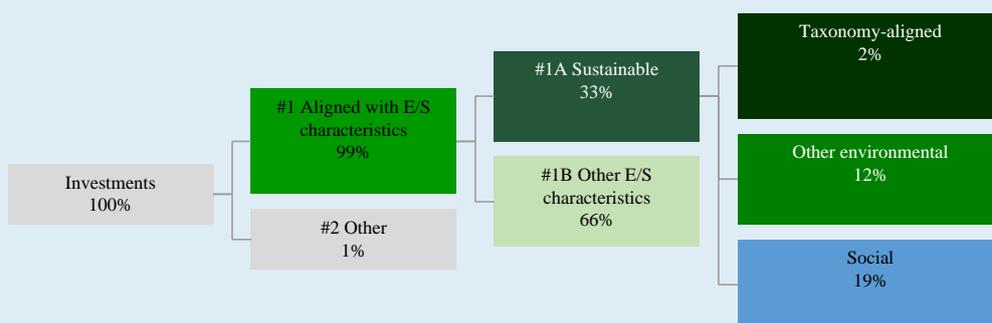

Investments in the "Other" bucket have not been screened in accordance with the processes used to attain the fund's promoted environmental and social characteristics. Further, the fund cannot guarantee that these investments have otherwise been prioritised in the fund's management and prioritisation of principal adverse impacts.

The asset actual allocation for the reference year was 99% investments aligned with the environmental and social characteristics of the fund. In year 2022, this allocation was 99%. Investments aligned with environmental and/or social characteristics are calculated against the total market value of the fund's investments.

The fund invested 33% in sustainable investments, split with 2% investments aligned with the EU Taxonomy, 12% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 19% investments with a social objective.

In 2022, the fund invested 14% in sustainable investments, split with 1% investments aligned with the EU Taxonomy, 9% investments with an environmental objective not aligned with the EU Taxonomy-aligned investments, and 5% investments with a social objective.

Share of Taxonomy-aligned investments is based on turnover.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	56.92%
Financials	Thriffs & Mortgage Finance	11.34%
Real Estate	Real Estate Operating Companies	8.63%
Financials	Multi-Sector Holdings	3.50%
Industrials	Research & Consulting Services	2.48%
Consumer Discretionary	Automobile Manufacturers	1.57%
Real Estate	Real Estate Operating Companies	1.29%
Industrials	Rail Transportation	0.96%
Consumer Staples	Food Retail	0.77%
Industrials	Construction Machinery & Heavy Transportation Equipment	0.74%
Consumer Discretionary	Household Appliances	0.64%
Information Technology	Electronic Equipment & Instruments	0.63%
Industrials	Security & Alarm Services	0.33%
Consumer Staples	Agricultural Products & Services	0.29%
Consumer Staples	Packaged Foods & Meats	0.28%
Materials	Forest Products	0.15%
Utilities	Electric Utilities	0.02%
Government bonds		3.10%
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments
No sector data		6.37%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has not invested in accordance with a commitment to make Taxonomy-aligned activities, however, is reporting any actual exposures to such activities in the graph below.

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.6% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

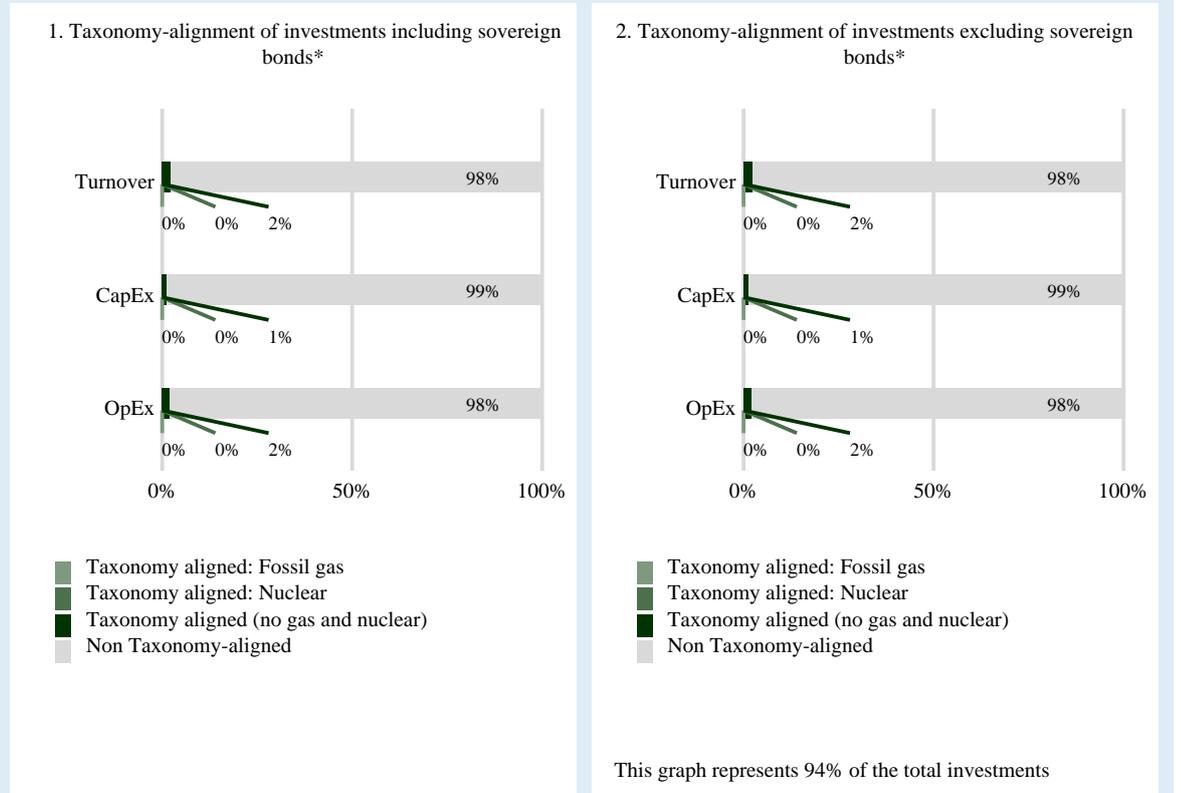

* Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

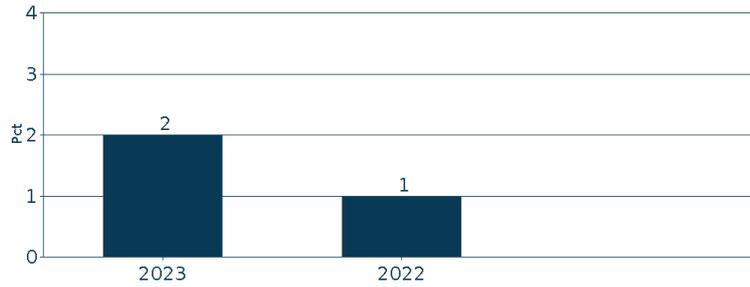

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of
 -Turnover reflects the 'greenness' of investee companies today.
 -Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 -Operational expenditure (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities)	0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 12%.

The reason why the fund invested in sustainable investment an environmental objective that are not aligned with the EU Taxonomy is due to low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 19%.

What investments were included under ‘other’, what was their purpose and were there any minimum environmental or social safeguards?

The fund’s underlying assets that did not contribute to the attainment of environmental and/or social characteristics of the fund are categorised in the “Other” investment bucket. The fund did not apply minimum environmental or social safeguards, including restrictions, for these investments and they are therefore not included in the report under “How did the sustainability indicators perform?”. Other investments included cash held as ancillary liquidity .

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the environmental and/or social characteristics, meaning that issuers have been screened and, as relevant excluded by the product criteria for sustainable investments.

Relevant monitoring has been in place to ensure the attainment of the environmental and/or social characteristics.

For investee companies in the portfolio 10 engagements have been logged on climate/GHG related topics, 3 for biodiversity, 0 on hazardous waste and water emissions, and 0 on social and employee matters.

For sovereigns and supranationals in the portfolio 0 engagements have been logged in respect to the management of principal adverse impacts.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Sustainable Future
Legal entity identifier: 549300HN1DPAOUTKSW13

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: 34%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: 64%

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent was the sustainable investment objective of this financial product met?

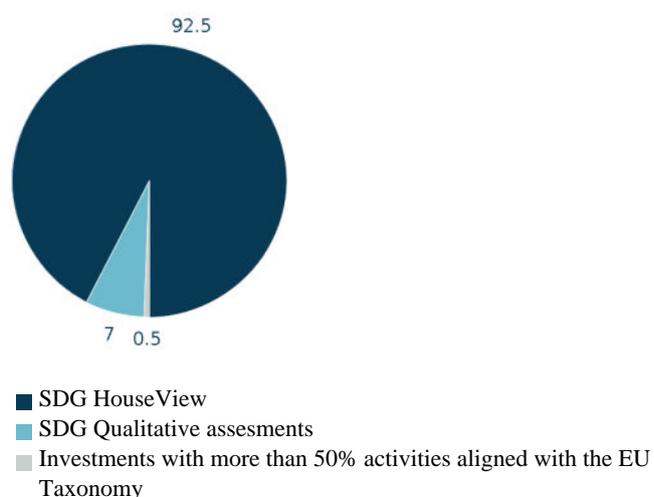

The sustainable investment objective of the fund is to positively contribute to the achievement of the United Nations Sustainable Development Goals (the "SDGs"). The SDGs are the globally agreed framework for achieving a better and more sustainable future for all. They consist of 17 interlinked goals, made actionable by underpinning 169 targets.

The environmental objectives of the SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The social objectives of the SDGs cover SDG 1 - No Poverty, SDG 2 Zero Hunger, SDG 3 - Good Health and Well-being, SDG 4 - Quality Education, SDG 5 - Gender Equality, SDG 8 - Decent Work and Economic Growth, SDG 10 - Reduced Inequalities, SDG 16 - Peace, Justice and Strong Institutions and/or SDG 17 - Partnership for the Goals.

The sustainable investments of the fund are identified through a proprietary model of Danske Bank A/S (the “SDG Model”). The SDG Model consists of a quantitative based methodology leveraging data from external vendors such as Util and Factset. The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

The chart below demonstrates the allocation of the fund's sustainable investments to each of the applied methodology. The allocation is measured at the end of the reference period.

Where the taxonomy-related investments in the chart are investments considered fully sustainable based on >50% taxonomy-aligned activities, the weight of all taxonomy-aligned activities in the fund are reported in the section "To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy" below.

To support the identification of sustainable investments the fund has also for the reference year of 2023 applied so-called critical contribution points (CCPs), a method applied to set engagement and sustainability-performance targets for investee companies in the fund. For further information on this and other indicators applied to measure the attainment of the sustainable investment objective of the, please refer to the section "How did the sustainability indicators perform?".

Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through the inclusion of issuers aligned with the sustainability-profile of the fund as maintained through a minimum ESG score of 40 at portfolio level based on governance, social and environmental related KPIs.
2. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as maintained through a minimum carbon risk rating score of 40 at portfolio level based on climate-related KPIs.
3. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
4. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.

5. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.
6. The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

How did the sustainability indicators perform?

The tables below demonstrate the measured performance of sustainability indicators applied for the attainment of the fund's sustainable investment objective and promotion of related environmental and/or social characteristics. Unless specifically stated, the reported performance is calculated as an annual average of quarterly values measured throughout the year.

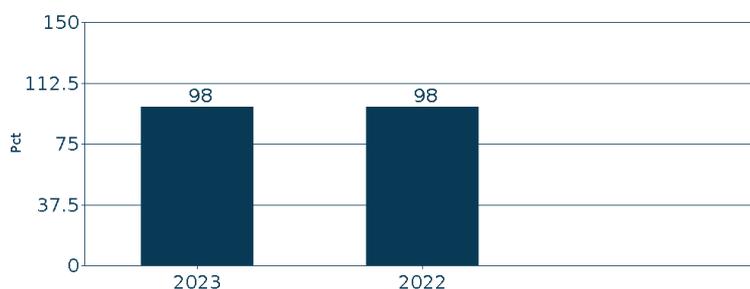

The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The number of sustainable investments identified and measured through the criteria and underlying methodologies of critical contribution points and the SDG model, including the EU Taxonomy. The performance of the indicators applied through these methodologies is demonstrated below.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

SDG Model

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available through the sustainability-related disclosures of the fund available through https://www.danskeinvest.lu/page/responsible_investments_insight. Further, the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

The table below shows the fund's top sustainable product exposures identified through the quantitative methodology of the model. The portfolio revenue figures are derived through multiplying the business activity revenue with the weight of the holding(s). The table also outlines which of the SDGs a given business activity is assessed as contributing positively to.

Revenue - Service & Product Contribution	Business Activity	SDG Contribution
4.2%	Search engine	SDG 3, 4
4.1%	Electronic Payment Processing	SDG 11
3.6%	Bioanalytical Instruments	SDG 3
3.4%	Life/Health Insurance	SDG 1, 3, 11
3.3%	Silicon-based IC	SDG 9
3.3%	Non-Insulin Dependent Diabetes Mellitus (NIDDM)/Type 2 Diabetes Therapeutics	SDG 3
2.9%	Analog/Mixed Signal Semiconductors	SDG 9
2.8%	Step and Scan Photolithography	SDG 9
2.8%	IT Infrastructure	SDG 2, 3, 4, 9, 11
2.4%	Industrial Gas Manufacturing	SDG 9
2.2%	Commercial/Industrial Electric Products	SDG 7, 9
2.1%	Automation Support Products	SDG 9
1.9%	Biopharmaceuticals	SDG 2, 3
1.9%	Garbage Collection Services	SDG 11, 12, 13, 14, 15
1.9%	Insurance Claims/Risk Management Services	SDG 1, 3
1.9%	Home/Office Productivity Software	SDG 4
1.8%	Property and Casualty Insurance	SDG 1, 3, 11, 13
1.8%	Accounting Software	SDG 9
1.7%	Diabetes Drugs	SDG 3

The SDG Model methodology equally includes an assessment on how the issuer through its operations has a positive or negative contribution to the SDGs (Operational Contribution). This assessment is among others based on the indicators for principal adverse impacts on sustainability factors.

By combining the Product & Service Contribution with the Operational Contribution the total contribution to the SDGs is aggregated through the model. The table below demonstrates the sum of contribution of all issuers that have been assessed sustainable through the quantitative component of the SDG Model as measured end of reference period.

Operational Contribution	Product & Service Contribution (revenues)				
	<0%	0-25%	25-50%	50-75%	>75%
Very positive	0%	0%	0%	8%	29%
Positive	0%	0%	2%	11%	25%
Neutral	0%	0%	0%	0%	12%
Harm	0%	0%	0%	0%	5%
Significant harm	0%	0%	0%	0%	0%

Qualitative assessments under the SDG Model

The table below lists issuers in the fund's portfolio end of reference period that have been identified as a sustainable investment in accordance with a qualitative assessment under the SDG Model.

Issuer	Reason
SSE Plc	SSE develops and operates low-carbon infrastructure supporting the net zero transition, including onshore and offshore wind, hydro power, electricity transmission and distribution grids, efficient gas and energy from waste, alongside providing energy products and services for businesses.
Epiroc AB A	Clear targets on improving efficiency and safety of heavy industries operations. Use 90% renewable energy as source in their operations. Invest in innovation to transform mining industry to be electric and automated. Less emissions and less injuries for their customers as a result. The approval was granted on the condition basis of attentiveness to considerations around geographical risk.
Ecolab Inc.	Company revenue data was not granular enough for the SDG quantitative model. Ecolab reported by business divisions (client types), however SDG model utilize product lines. Therefore an qualitative assessment where initiated, requesting relevant information from the company. The assessment concluded with a substantial sustainable revenue from the company and a positive assessment of their operations.

Critical Contribution Points

CCPs are key measurement points (indicators) defined to assess and measure how issuers accelerate in their contribution to the UN SDGs. Through the CCPs, issuers are evaluated on their contribution towards selected SDGs, and in particular towards the targets and indicators underpinning those SDGs.

By the end of the reference period, CCPs were defined for seven investee companies in the portfolio representing a weight of 21.9%.

Investments with more than 50% activities aligned with the EU Taxonomy

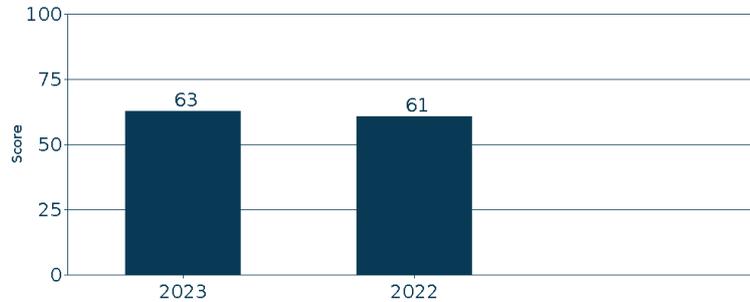

The table below lists the issuers in the fund end of reference that have been identified as sustainable investments by having a more than 50% overweight of activities substantially contributing to an environmental objective of the EU Taxonomy.

Issuer	Taxonomy aligned revenue	Objective
Ørsted	73%	Climate change mitigation

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 99%.

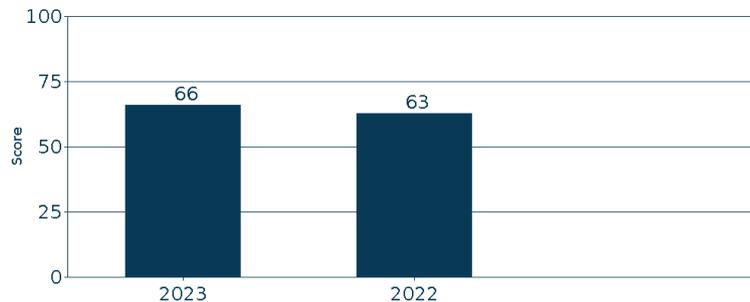

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 99%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

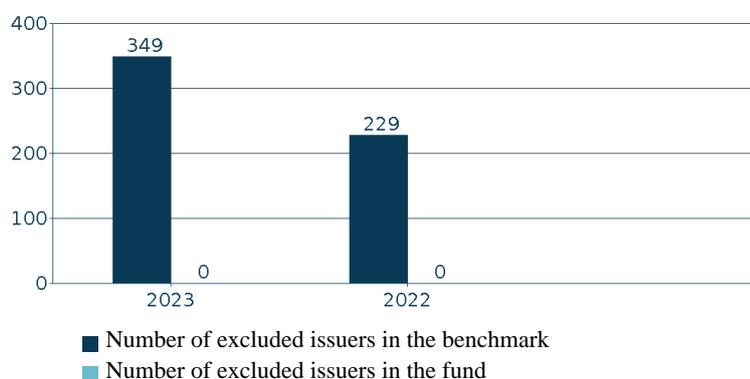

Exclusions

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

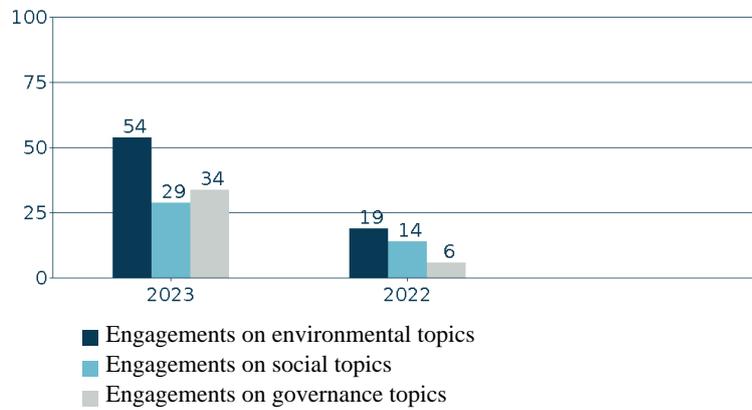

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	23	2.2%	0
Activities and conduct deemed harmful to society	PAI	1189	55	3.2%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	32	1.3%	0
Significant negative impact on the climate	Fossil Fuel	1447	137	7.4%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	5	0.2%	0
Non-Ethical & controversial activities	Alcohol	399	19	1.1%	0
Non-Ethical & controversial activities	Commercial gambling	307	16	0.3%	0
Non-Ethical & controversial activities	Controversial weapons	98	25	2.1%	0
Non-Ethical & controversial activities	Military equipment	341	36	2.4%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	37	2.9%	0
Non-Ethical & controversial activities	Tobacco	126	5	0.6%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

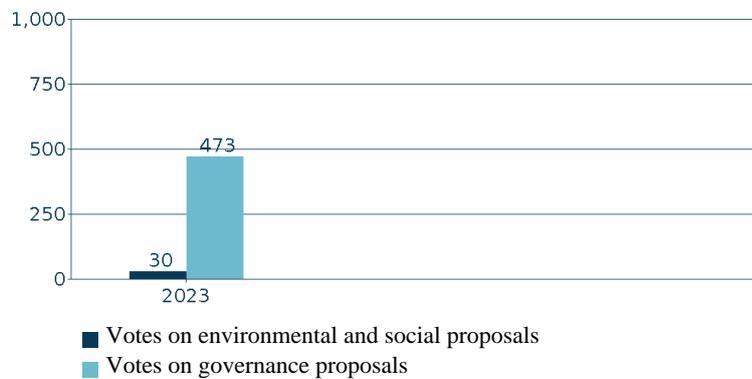

Binding element: The fund commits to engage with issuers on material sustainability topics.

Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions and methods for identification of sustainable investments prevented the fund from investing in issuers causing significant negative harm on environmental and/or social objectives.

For further information on excluded issuers, please refer to the section "How did the sustainability indicators perform?".

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factors. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including exclusions based on quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack of human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%.

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	10,836	99.6%	14,490	100.0%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	3,222	99.6%	2,699	100.0%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	239,238	99.6%	270,425	100.0%
04	Total GHG emissions (tons)	253,296	99.6%	287,614	100.0%

Actions taken in relation to indicators on investee companies

Greenhouse Gas Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 1,447 for fossil fuels, and 22 for tar sands. 39 engagement activities relating to the indicators have been logged for issuers in the fund. Approximately 900 issuers were covered by PAI-thresholds relating to these indicators.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 3 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by the PAI-thresholds applied in relation to this indicator, noting that the threshold equally tied to indicators on fossil fuel involvement and lack of carbon reduction initiatives.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 3 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by the PAI-thresholds.

Social and Employee Matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights,

etc. In addition, there were 98 on the exclusion list for controversial weapons.⁴ engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by PAI-thresholds applied for these indicators.

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Microsoft Corp.	Information Technology	9.1%	US
Alphabet Inc. A	Communication Services	7.1%	US
Visa Inc. A	Information Technology	5.3%	US
Novo Nordisk B	Health Care	4.7%	DK
Novo Nordisk B	Health Care	4.5%	DK
Asml Holding Nv	Information Technology	4.3%	NL
Roche Holding Ag	Health Care	3.9%	CH
Synopsys Inc.	Information Technology	3.8%	US
Trane Technologies Plc	Industrials	3.7%	IE
Zurich Insurance Group Ag	Financials	3.6%	CH
Intuit Inc.	Information Technology	3.6%	US
Thermo Fisher Scientific Inc.	Health Care	3.6%	US
Taiwan Semiconductor Manufactu (Adr)	Information Technology	3.5%	TW
Aia Group Ltd.	Financials	3.4%	HK
Reckitt Benckiser Group Plc	Consumer Staples	3.4%	GB

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 31 December 2023.

What was the proportion of sustainability-related investments

Within the reference year, the fund in average has in average invested 98% in sustainable investments against the total market value of the fund's investments. The fund has not invested in accordance with a minimum commitment to invest in environmentally sustainable economic activities. The actual proportion of investments in such activities within the reference year is reported in the sections and tables below.

What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental and socially sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Other investments".

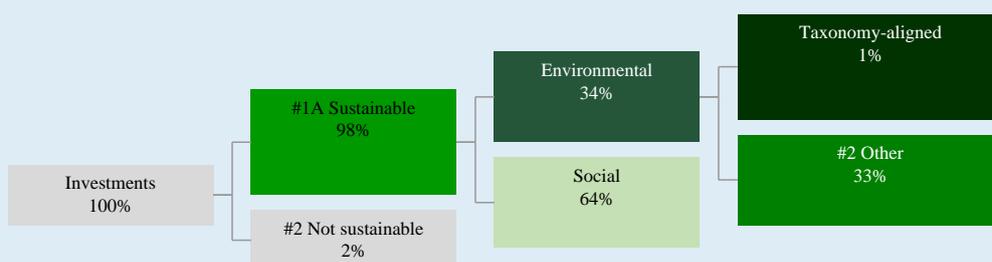

The actual allocation for the reference year was 98% sustainable investments split with 34% in support of an environmental objective and 64% in support of a social objective. 1% of the investments were aligned with the EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Health Care	Pharmaceuticals	10.76%
Information Technology	Application Software	8.76%
Information Technology	Semiconductors	8.55%
Information Technology	Systems Software	8.30%
Communication Services	Interactive Media & Services	6.56%
Health Care	Life Sciences Tools & Services	6.01%
Consumer Staples	Household Products	5.32%
Industrials	Electrical Components & Equipment	4.88%
Financials	Transaction & Payment Processing Services	4.21%
Information Technology	Semiconductor Materials & Equipment	4.10%
Financials	Life & Health Insurance	3.45%
Utilities	Electric Utilities	3.40%

Financials	Multi-line Insurance	3.26%
Materials	Specialty Chemicals	2.93%
Materials	Industrial Gases	2.79%
Financials	Financial Exchanges & Data	2.65%
Financials	Diversified Banks	2.62%
Industrials	Environmental & Facilities Services	2.56%
Industrials	Research & Consulting Services	1.94%
Health Care	Health Care Supplies	1.93%
Industrials	Industrial Machinery & Supplies & Components	1.89%
Industrials	Building Products	1.81%
Industrials	Construction Machinery & Heavy Transportation Equipment	1.32%
Energy	Oil & Gas Exploration & Production	No investments
Energy	Oil & Gas Refining & Marketing	No investments
Energy	Oil & Gas Storage & Transportation	No investments
Energy	Integrated Oil & Gas	No investments
Energy	Coal & Consumable Fuels	No investments
Energy	Oil & Gas Drilling	No investments
Energy	Oil & Gas Equipment & Services	No investments

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.3% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

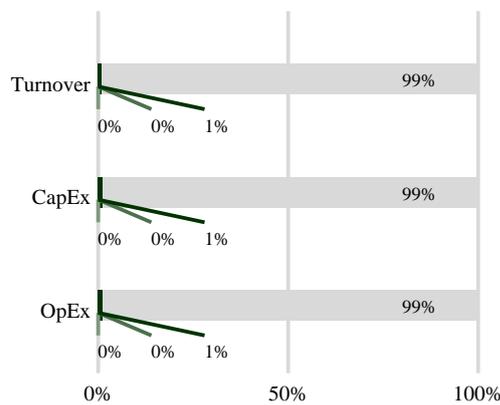

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
 - In fossil gas
 - In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

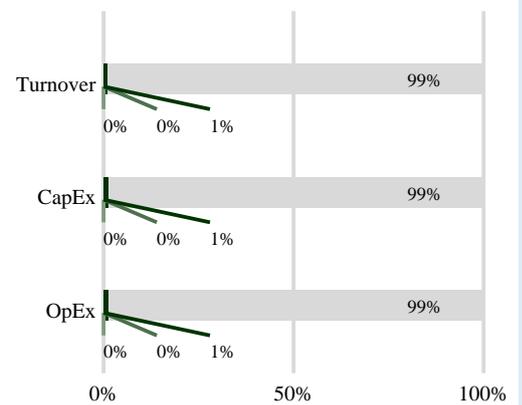

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

- Taxonomy aligned: Fossil gas
- Taxonomy aligned: Nuclear
- Taxonomy aligned (no gas and nuclear)
- Non Taxonomy-aligned

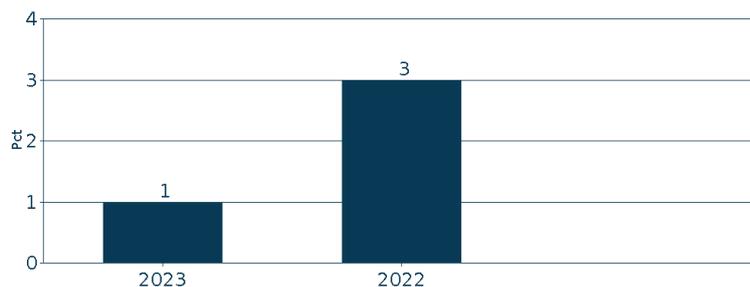

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities) - Fund	0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 33%.

In 2022, the share of sustainable investments in the fund in support of an environmental objective not aligned with EU Taxonomy was 55%.

The reason why the fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 64%.

In 2022, the share of sustainable investments in the fund in support of a social objective was 40%.

What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis of inclusion criteria and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 39 engagements have been logged on climate/GHG related topics, 3 for biodiversity, 3 on hazardous waste and water emissions, and 4 on social and employee matters.

How did this financial product perform compared to the reference sustainable benchmark?

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV European Corporate Sustainable Bond
Legal entity identifier: 5493004X6FWMGJNRJS88

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: 70%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: 25%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the fund is to positively contribute to the achievement of the United Nations Sustainable Development Goals (the "SDGs"). The SDGs are the globally agreed framework for achieving a better and more sustainable future for all. They consist of 17 interlinked goals, made actionable by underpinning 169 targets.

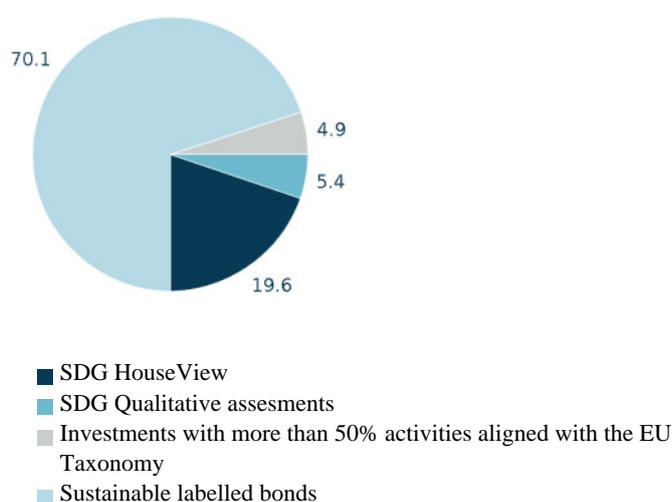

The environmental objectives of the SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The social objectives of the SDGs cover SDG 1 - No Poverty, SDG 2 Zero Hunger, SDG 3 - Good Health and Well-being, SDG 4 - Quality Education, SDG 5 - Gender Equality, SDG 8 - Decent Work and Economic Growth, SDG 10 - Reduced Inequalities, SDG 16 - Peace, Justice and Strong Institutions and/or SDG 17 - Partnership for the Goals.

The sustainable investments of the fund are identified through a proprietary model of Danske Bank A/S (the “SDG Model”). The SDG Model consists of a quantitative based methodology leveraging data from external vendors such as Util and Factset. The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

The fund further invests in sustainable investments by investing in sustainability-labelled bonds classified in accordance with the ICMA bond framework.

The chart below demonstrates the allocation of the fund's sustainable investments to each of the applied methodology. The allocation is measured at the end of the reference period.

Where the taxonomy-related investments in the chart are investments considered fully sustainable based on >50% taxonomy-aligned activities, the weight of all taxonomy-aligned activities in the fund are reported in the section "To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy" below.

Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through the inclusion of issuers aligned with the sustainability-profile of the fund as maintained through a minimum ESG score of 40 at portfolio level based on governance, social and environmental related KPIs.
2. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as maintained through a minimum carbon risk rating score of 40 at portfolio level based on climate-related KPIs.
3. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
4. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
5. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.

- The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

How did the sustainability indicators perform?

The tables below demonstrate the measured performance of sustainability indicators applied for the attainment of the fund's sustainable investment objective and promotion of related environmental and/or social characteristics. Unless specifically stated, the reported performance is calculated as an annual average of quarterly values measured throughout the year.

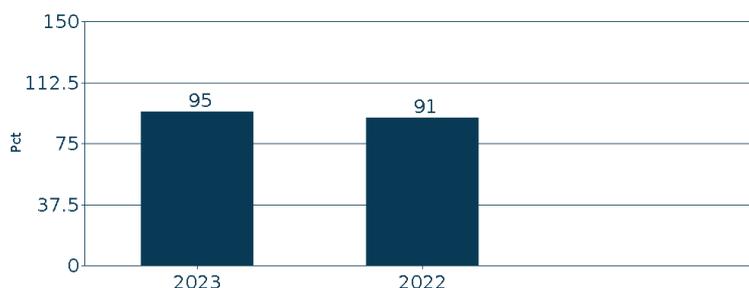

The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The number of sustainable investments identified and measured through the criteria and underlying methodologies of sustainability labelled bonds and the SDG model, including the EU Taxonomy. The performance of the indicators applied through these methodologies is demonstrated below.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

SDG Model

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available through the sustainability-related disclosures of the fund available through https://www.danskeinvest.lu/page/responsible_investments_insight. Further, the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance.

The table below shows the fund's top sustainable product exposures identified through the quantitative

Sustainability indicators measure how the sustainable objectives of this financial product are attained

methodology of the model. The portfolio revenue figures are derived through multiplying the business activity revenue with the weight of the holding(s). The table also outlines which of the SDGs a given business activity is assessed as contributing positively to.

Revenue - Service & Product Contribution	Business Activity	SDG Contribution
0.9%	Healthcare	SDG 2,3,4
0.9%	Commercial/Industrial Electric Products	SDG 7, 9
0.9%	Telecommunications Wireless Services	SDG 3,4,9,11
0.8%	Industrial Cleaning Services	SDG 3
0.7%	Industrial Gas Manufacturing	SDG 9
0.7%	Bioanalytical Instruments	SDG 3
0.6%	Heating, Ventilation, and Air Conditioning (HVAC)	SDG 11, 13
0.6%	Equipment for Assited Hearing	SDG 3
0.5%	Ostomy Treatment - Gastroenterology	SDG 3
0.5%	Staffing Services	SDG 1, 9
0.4%	Medical Devices	SDG 3
0.4%	Urology Treatment Medical Devices	SDG 3,4
0.4%	Life Insurance	SDG 3
0.3%	Automation Support Products	SDG 9
0.3%	Wireless Telecommunication Equipment Sales	SDG 3, 4 9

The SDG Model methodology equally includes an assessment on how the issuer through its operations has a positive or negative contribution to the SDGs (Operational Contribution). This assessment is among others based on the indicators for principal adverse impacts on sustainability factors.

By combining the Product & Service Contribution with the Operational Contribution the total contribution to the SDGs is aggregated through the model. The table below demonstrates the sum of contribution of all issuers that have been assessed sustainable through the quantitative component of the SDG Model as measured end of reference period.

Operational Contribution	Product & Service Contribution (revenues)				
	<0%	0-25%	25-50%	50-75%	>75%
Very positive	0%	.9%	2.2%	0%	1.2%
Positive	0%	0%	1.8%	2.4%	6.1%
Neutral	0%	0%	0%	0%	2.9%
Harm	0%	0%	0%	0%	.8%
Significant harm	0%	0%	0%	0%	0%

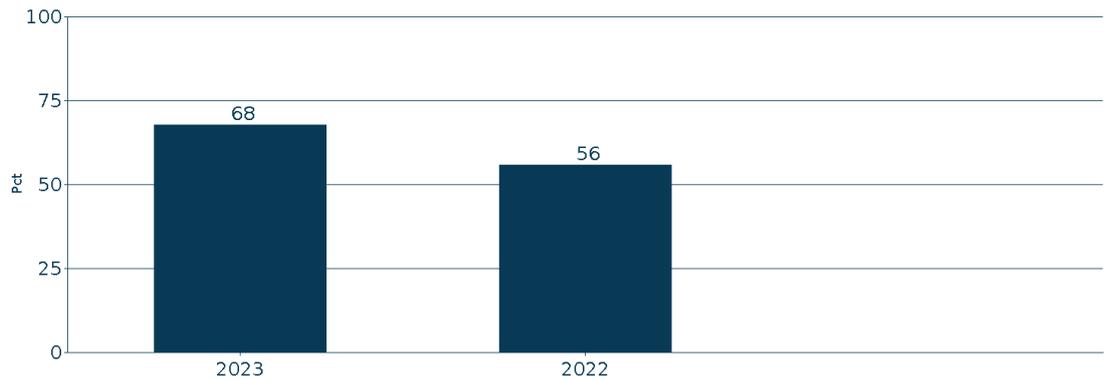

Qualitative assessments under the SDG Model

The table below lists issuers in the fund's portfolio end of reference period that have been identified as a sustainable investment in accordance with a qualitative assessment under the SDG Model.

Issuer	Reason
SANDOZ	ESG data not correctly assigned to the company requiring a qualitative assessment of the company. The company is a spin-off from Novartis and was created in October 2023. There is no data on operations. However, as Novartis has positive operations, and it should be assumed that spin-offs will be categorized the same way as they have been part of Novartis. Company revenues documented to positively contribute to the SDGs, with the company among others providing affordable medicine.
Haleon PLC	Lack of data for assessments under the quantitative components of the SDG Model. Through a qualitative assessment process, it was documented that the company meets the contribution criteria of the model by working to improve everyday health of hundreds of millions of people through OTC (over the counter) medicines and concrete targets for empowering people to be more included in opportunities for better everyday health.
Deutsche Bahn	Company increasingly focusing on clean solutions and products. Core business for industry installations. Climate change adaptation and mitigation case as some products are developed with mitigation purposes and others are adapted to provide energy efficiency. Sustainable mode of transport, clean fuel in logistic part of business, clear and ambitious environmental targets. EU Taxonomy estimations show alignment.
Danfoss	Lack of data/reporting to qualify for an assessment under the quantitative components of the SDG Model. Through a qualitative assessment process, it was documented that the company meets the contribution criteria of the model. The company has as its core business to manufacture industry installations while e.g. developing products aimed at energy efficiency, and other products serving climate change mitigation purposes.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The average weight of sustainability-labelled bonds in the reference period is demonstrated in the graph below.

Investments with more than 50% activities aligned with the EU Taxonomy

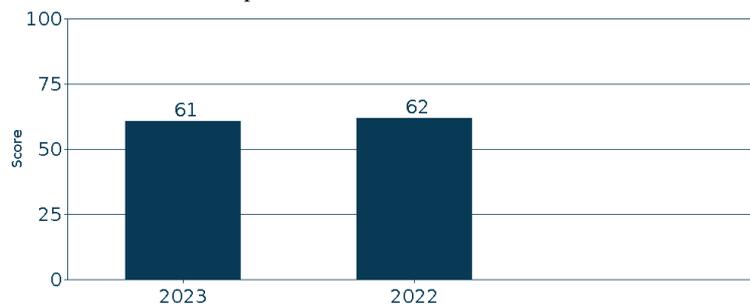

The table below lists the issuers in the fund end of reference that have been identified as sustainable investments by having a more than 50% overweight of activities substantially contributing to an environmental objective of the EU Taxonomy.

Issuer	Taxonomy aligned revenue	Objective
VESTAS WIND SYSTEMS A/S	96%	Climate change mitigation
Ørsted A/S	73%	Climate change mitigation

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 72%.

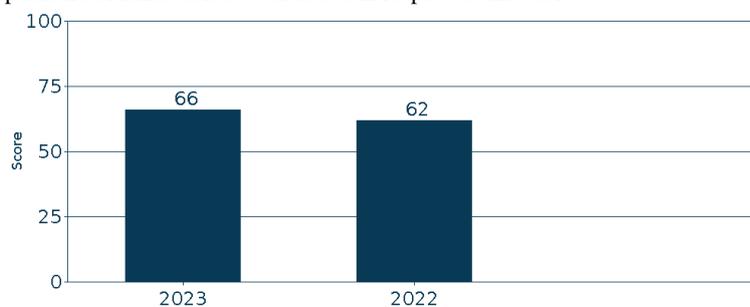

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 73%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Exclusions

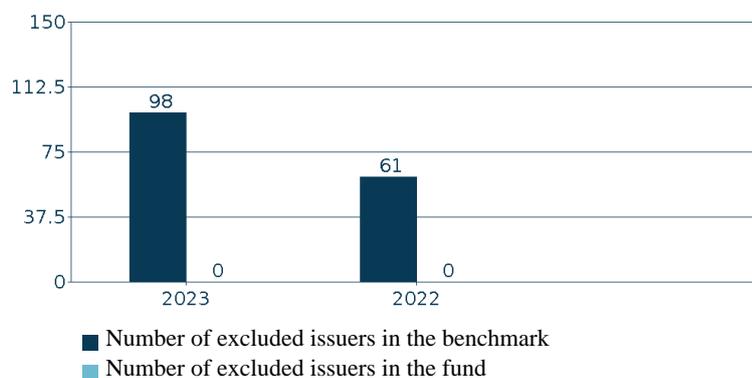

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	2	0.1%	0
Activities and conduct deemed harmful to society	PAI	1189	17	2.3%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	8	0.5%	0
Significant negative impact on the climate	Fossil Fuel	1447	55	7.6%	0

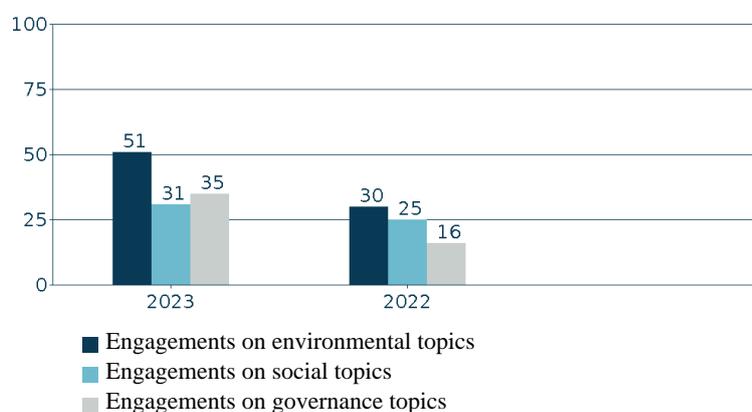

Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	8	2.1%	0
Non-Ethical & controversial activities	Commercial gambling	307	0	0.0%	0
Non-Ethical & controversial activities	Controversial weapons	98	4	0.8%	0
Non-Ethical & controversial activities	Military equipment	341	5	0.3%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	3	0.5%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund commits to engage with issuers on material sustainability topics.

...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions and methods for identification of sustainable investments prevented the fund from investing in issuers causing significant negative harm on environmental and/or social objectives.

For further information on excluded issuers, please refer to the section "How did the sustainability indicators perform?".

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factors. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including exclusions based on quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%.

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	12,657	79.1%	18,874	82.4%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	6,513	79.1%	6,708	82.4%
03	Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	152,957	79.1%	115,864	82.4%

Actions taken in relation to indicators on investee companies

Greenhouse Gas Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 1,447 for fossil fuels, and 22 for tar sands. 37 engagement activities relating to the indicators have been logged for issuers in the fund. Approximately 900 issuers were covered by PAI-thresholds relating to these indicators.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by the PAI-thresholds applied in relation to this indicator, noting that the threshold equally tied to indicators on fossil fuel involvement and lack of carbon reduction initiatives.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability

Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 0 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by the PAI-thresholds.

Social and Employee Matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 8 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by PAI-thresholds applied for these indicators.

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 31 December 2023.

What was the proportion of sustainability-related investments

Within the reference year, the fund in average has in average invested 95% in sustainable investments against the total market value of the fund's investments. The fund has not invested in accordance with a minimum commitment to invest in environmentally sustainable economic activities. The actual proportion of investments in such activities within the reference year is reported in the sections and tables below.

What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental and socially sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Other investments".

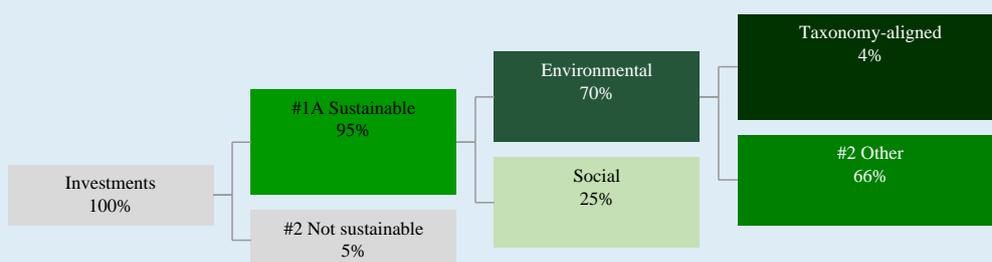

The actual allocation for the reference year was 95% sustainable investments split with 70% in support of an environmental objective and 25% in support of a social objective. 4% of the investments were aligned with the EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 4% has been invested into activities in support of a climate objective with:

- 1.5% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

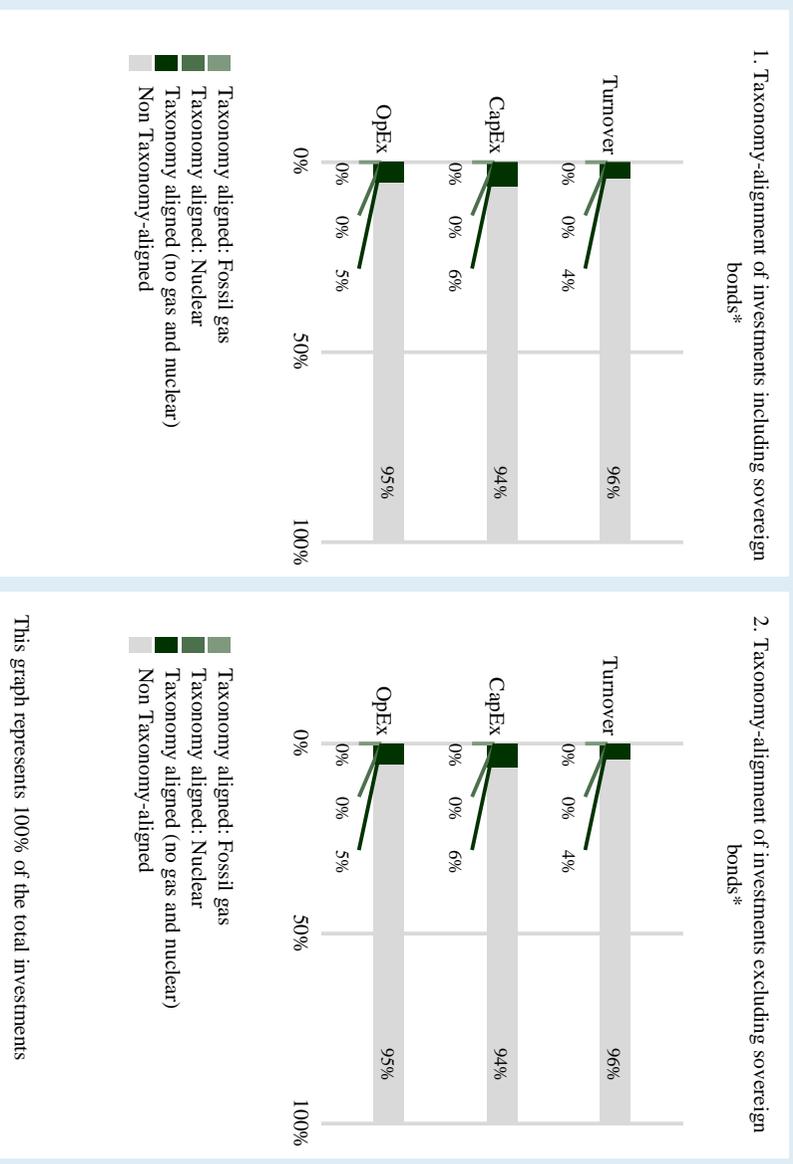

- Yes
 - In fossil gas
 - In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds* the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other than sovereign bonds.

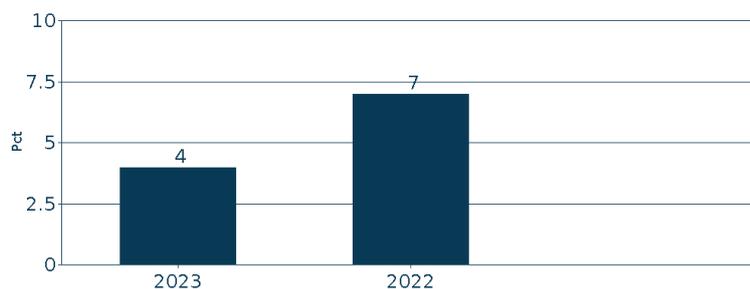

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	4%
Investments aligned with the EU taxonomy (enabling activities)	2%
Investments aligned with the EU taxonomy (transitional activities) - Fund	0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 66%.

In 2022, the share of sustainable investments in the fund in support of an environmental objective not aligned with EU Taxonomy was 71%.

The reason why the fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 25%.

In 2022, the share of sustainable investments in the fund in support of a social objective was 14%.

What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis of inclusion criteria and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 37 engagements have been logged on climate/GHG related topics, 2 for biodiversity, 0 on hazardous waste and water emissions, and 8 on social and employee matters.

How did this financial product perform compared to the reference sustainable benchmark?

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Corporate Sustainable Bond
Legal entity identifier: 549300UVDV4FV60VIO93

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective: 69%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective: 25%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the fund is to positively contribute to the achievement of the United Nations Sustainable Development Goals (the "SDGs"). The SDGs are the globally agreed framework for achieving a better and more sustainable future for all. They consist of 17 interlinked goals, made actionable by underpinning 169 targets.

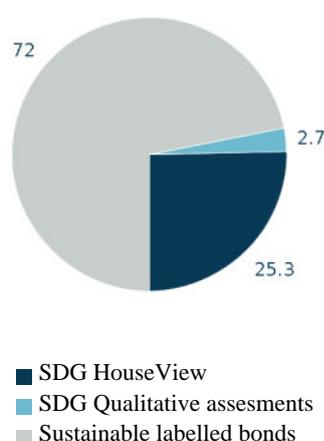

The environmental objectives of the SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The social objectives of the SDGs cover SDG 1 - No Poverty, SDG 2 Zero Hunger, SDG 3 - Good Health and Well-being, SDG 4 - Quality Education, SDG 5 - Gender Equality, SDG 8 - Decent Work and Economic Growth, SDG 10 - Reduced Inequalities, SDG 16 - Peace, Justice and Strong Institutions and/or SDG 17 - Partnership for the Goals.

The sustainable investments of the fund are identified through a proprietary model of Danske Bank A/S (the “SDG Model”). The SDG Model consists of a quantitative based methodology leveraging data from external vendors such as Util and Factset. The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

The fund further invests in sustainable investments by investing in sustainability-labelled bonds classified in accordance with the ICMA bond framework.

The chart below demonstrates the allocation of the fund's sustainable investments to each of the applied methodology. The allocation is measured at the end of the reference period.

Where the taxonomy-related investments in the chart are investments considered fully sustainable based on >50% taxonomy-aligned activities, the weight of all taxonomy-aligned activities in the fund are reported in the section "To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy" below.

Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through the inclusion of issuers aligned with the sustainability-profile of the fund as maintained through a minimum ESG score of 40 at portfolio level based on governance, social and environmental related KPIs.
2. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as maintained through a minimum carbon risk rating score of 40 at portfolio level based on climate-related KPIs.
3. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
4. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
5. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.
6. The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

How did the sustainability indicators perform?

The tables below demonstrate the measured performance of sustainability indicators applied for the attainment of the fund's sustainable investment objective and promotion of related environmental and/or social characteristics. Unless specifically stated, the reported performance is calculated as an annual average of quarterly values measured throughout the year.

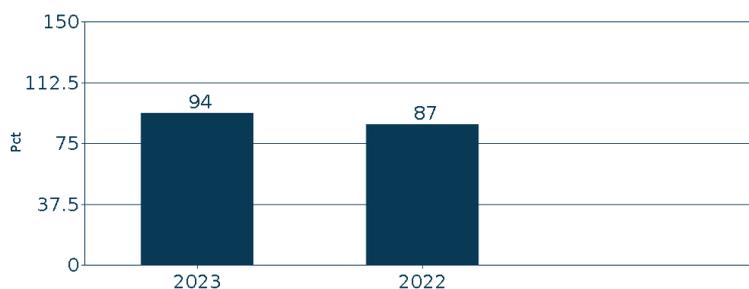

The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The number of sustainable investments identified and measured through the criteria and underlying methodologies of sustainability labelled bonds and the SDG model, including the EU Taxonomy. The performance of the indicators applied through these methodologies is demonstrated below.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

SDG Model

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available through the sustainability-related disclosures of the fund available through https://www.danskeinvest.lu/page/responsible_investments_insight. Further, the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance.

The table below shows the fund's top sustainable product exposures identified through the quantitative methodology of the model. The portfolio revenue figures are derived through multiplying the business activity revenue with the weight of the holding(s). The table also outlines which of the SDGs a given business activity is assessed as contributing positively to.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

Revenue - Service & Product Contribution	Business Activity	SDG Contribution
1.0%	Bioanalytical Instruments	SDG 3
1.0%	Life/Health Insurance	SDG 1, 3, 11, 13
0.8%	Garbage Collection Services	SDG 11, 12, 13, 14, 15
0.7%	Silicon-based IC	SDG 9
0.6%	Network Software	SDG 4, 9
0.6%	Healthcare	SDG 2,3,4
0.6%	Healthcare and Life Sciences Property Management	SDG 3
0.6%	Compressor and Pumping Equipment	SDG 9
0.5%	Autoimmune Disorders Therapeutics	SDG 3
0.5%	Heating, Ventilation, and Air Conditioning (HVAC)	SDG 11, 13
0.5%	Web Hosting Service	SDG 9
0.5%	HIV/AIDS Antivirals	SDG 2, 3
0.5%	Virtualization	SDG 4, 9, 11, 12
0.5%	Water Utilities	SDG
0.5%	Hospitals	SDG 3
0.4%	Graphics Accelerator/Controller (GPU)	SDG 9
0.4%	Equipment for Assited Hearing	SDG 3
0.4%	Biopharmaceuticals	SDG 2, 3
0.3%	Application Service Providers (ASPs)	SDG 49
0.3%	Telecommunications Wireless Services	SDG 3, 4, 9, 11

The SDG Model methodology equally includes an assessment on how the issuer through its operations has a positive or negative contribution to the SDGs (Operational Contribution). This assessment is among others based on the indicators for principal adverse impacts on sustainability factors.

By combining the Product & Service Contribution with the Operational Contribution the total contribution to the SDGs is aggregated through the model. The table below demonstrates the sum of contribution of all issuers that have been assessed sustainable through the quantitative component of the SDG Model as measured end of reference period.

Operational Contribution	Product & Service Contribution (revenues)				
	<0%	0-25%	25-50%	50-75%	>75%
Very positive	0%	.7%	.4%	0%	3.3%
Positive	0%	1.7%	2.2%	2.3%	8.3%
Neutral	0%	0%	0%	1.2%	5%
Harm	0%	0%	0%	0%	0%
Significant harm	0%	0%	0%	0%	0%

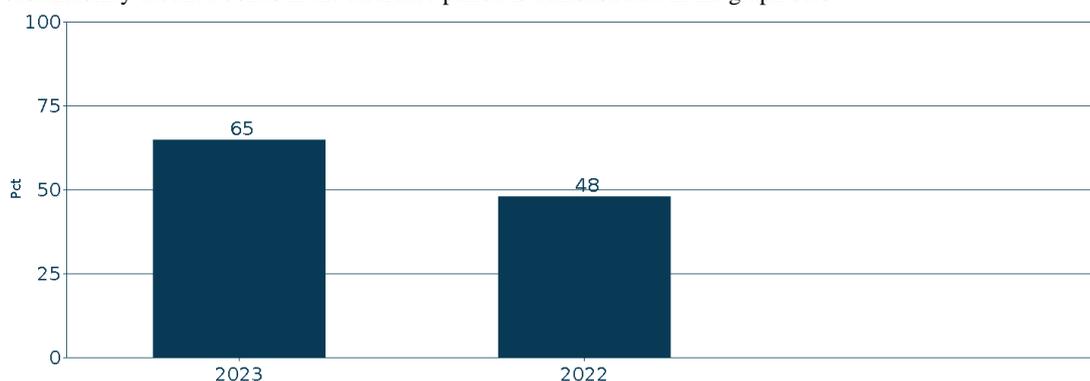

Qualitative assessments under the SDG Model

The table below lists issuers in the fund's portfolio end of reference period that have been identified as a sustainable investment in accordance with a qualitative assessment under the SDG Model.

Issuer	Reason
Ecolab Inc.	Company revenue data was not sufficiently granular for the assessments under the quantitative component of the SDG Model. Ecolab is reporting by business divisions (client types), however the SDG model utilizes product lines. Therefore a qualitative assessment where initiated, requesting relevant information from the company. The assessment that the company did substantially contribute through its revenue lines to the SDGs, supplemented by a positive assessment of their operations.

Sustainability labelled bonds

The fund has invested in sustainability-labelled bonds classified under the ICMA bond framework with the use of proceeds financing eligible environmental or social projects tied to the ICMA criteria. The average weight of sustainability-labelled bonds in the reference period is demonstrated in the graph below.

Investments with more than 50% activities aligned with the EU Taxonomy

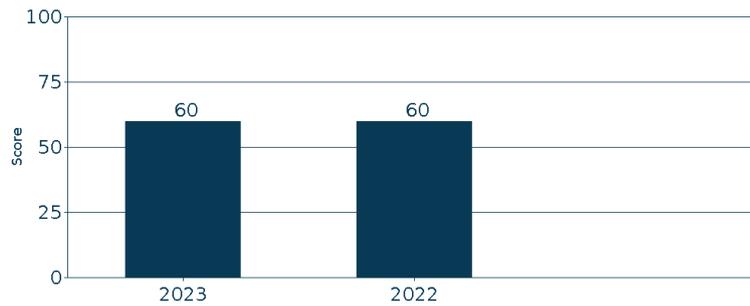

The table below lists the issuers in the fund end of reference that have been identified as sustainable investments by having a more than 50% overweight of activities substantially contributing to an environmental objective of the EU Taxonomy.

Issuer	Taxonomy aligned revenue	Objective
--------	--------------------------	-----------

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 81%.

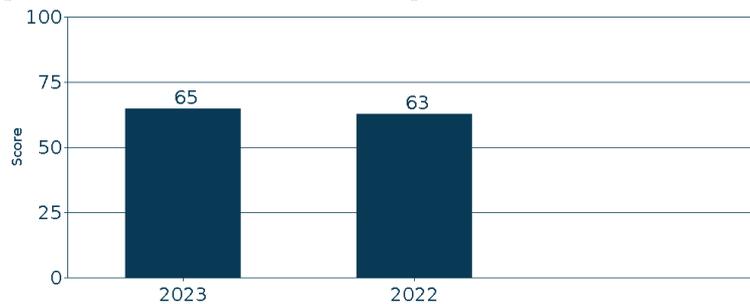

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 81%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Exclusions

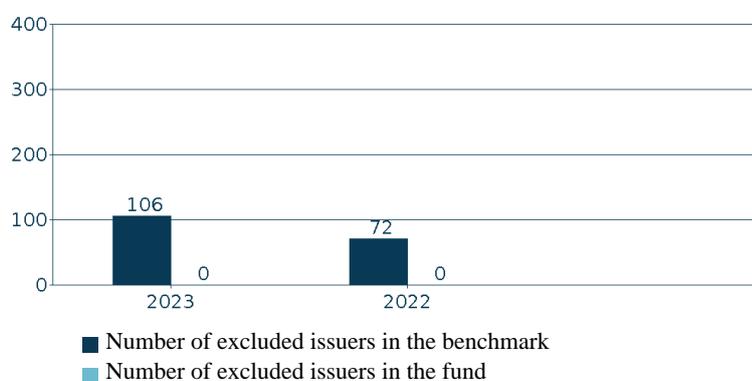

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0

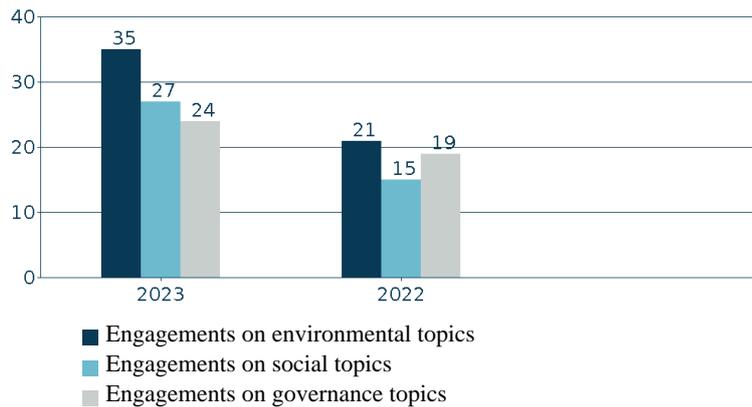

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	16	1.9%	0
Activities and conduct deemed harmful to society	PAI	1189	27	2.9%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	15	0.8%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	4	0.1%	0
Non-Ethical & controversial activities	Alcohol	399	10	1.2%	0
Non-Ethical & controversial activities	Commercial gambling	307	2	0.1%	0
Non-Ethical & controversial activities	Controversial weapons	98	13	2.0%	0
Non-Ethical & controversial activities	Military equipment	341	11	1.6%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	16	2.0%	0
Non-Ethical & controversial activities	Tobacco	126	7	1.1%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

Binding element: The fund commits to engage with issuers on material sustainability topics.

...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions and methods for identification of sustainable investments prevented the fund from investing in issuers causing significant negative harm on environmental and/or social objectives.

For further information on excluded issuers, please refer to the section "How did the sustainability indicators perform?".

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factors. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including exclusions based on quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%.

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01 Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	405	81.7%	667	87.1%
02 Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	187	81.7%	206	87.1%
03 Scope 3 GHG Emissions (tons) All other indirect emissions that occur across the value chain	8,215	81.7%	7,917	87.1%

Actions taken in relation to indicators on investee companies

Greenhouse Gas Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 1,447 for fossil fuels, and 22 for tar sands. 24 engagement activities relating to the indicators have been logged for issuers in the fund. Approximately 900 issuers were covered by PAI-thresholds relating to these indicators.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 2 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by the PAI-thresholds applied in relation to this indicator, noting that the threshold equally tied to indicators on fossil fuel involvement and lack of carbon reduction initiatives.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 3 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by the PAI-thresholds.

Social and Employee Matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 5 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by PAI-thresholds applied for these indicators.

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

Canadian Imperial Bank 0.95% 23.10.2025	Financials	1.7%	CA

What was the proportion of sustainability-related investments

Within the reference year, the fund in average has in average invested 94% in sustainable investments against the total market value of the fund's investments. The fund has not invested in accordance with a minimum commitment to invest in environmentally sustainable economic activities. The actual proportion of investments in such activities within the reference year is reported in the sections and tables below.

What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental and socially sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Other investments".

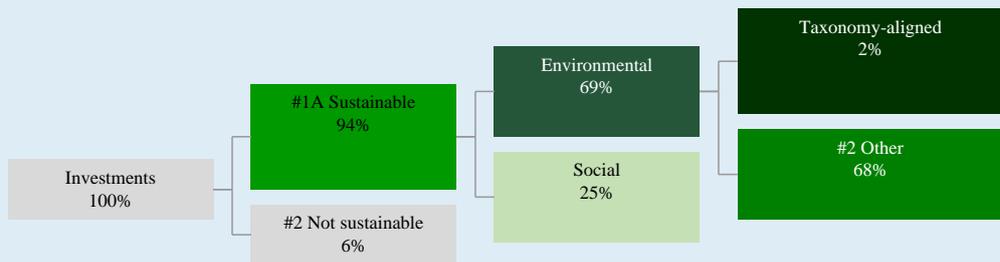

The actual allocation for the reference year was 94% sustainable investments split with 69% in support of an environmental objective and 25% in support of a social objective. 2% of the investments were aligned with the EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Financials	Diversified Banks	29.92%
Communication Services	Integrated Telecommunication Services	5.38%
Industrials	Building Products	4.95%

Energy	Oil & Gas Drilling	No investments
Energy	Integrated Oil & Gas	No investments
No sector data		2.37%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 0.1% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

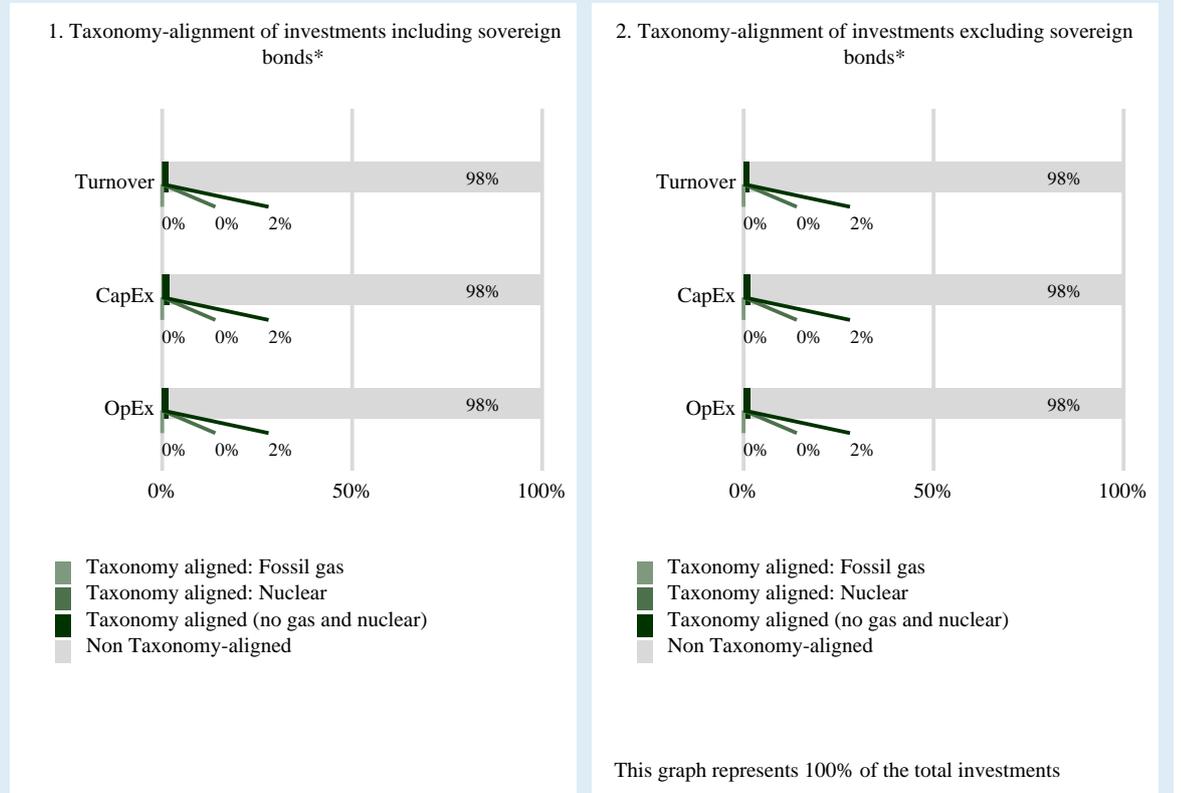

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

- Yes
- In fossil gas
 - In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

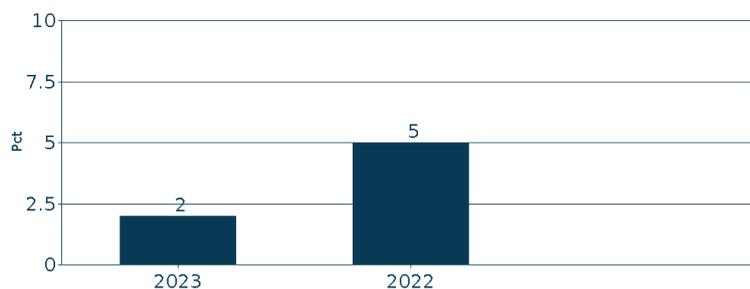

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	1%
Investments aligned with the EU taxonomy (transitional activities) - Fund	0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 68%.

In 2022, the share of sustainable investments in the fund in support of an environmental objective not aligned with EU Taxonomy was 66%.

The reason why the fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 25%.

In 2022, the share of sustainable investments in the fund in support of a social objective was 16%.

What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis of inclusion criteria and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 24 engagements have been logged on climate/GHG related topics, 2 for biodiversity, 3 on hazardous waste and water emissions, and 5 on social and employee matters.

How did this financial product perform compared to the reference sustainable benchmark?

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Emerging Markets Sustainable Future
Legal entity identifier: 549300EKECJZY2H6FG16

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: 36%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: 62%

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent was the sustainable investment objective of this financial product met?

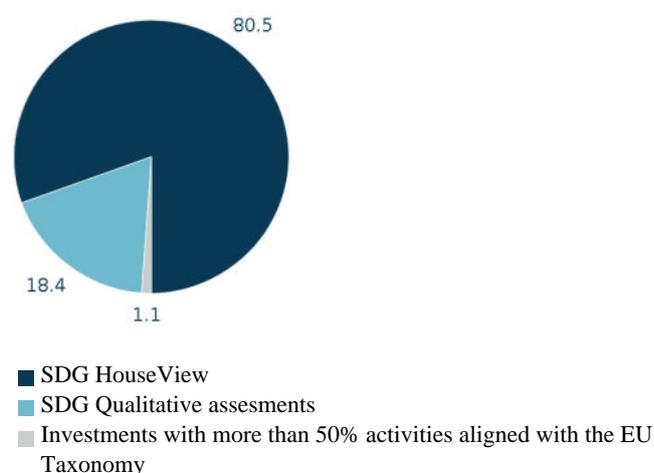

The sustainable investment objective of the fund is to positively contribute to the achievement of the United Nations Sustainable Development Goals (the "SDGs"). The SDGs are the globally agreed framework for achieving a better and more sustainable future for all. They consist of 17 interlinked goals, made actionable by underpinning 169 targets.

The environmental objectives of the SDGs cover SDG 6 - Clean Water and Sanitation, SDG 7 - Affordable and Clean Energy, SDG 9 - Industry, Innovation and Infrastructure, SDG 11 Sustainable Cities and Communities, SDG 12 - Responsible Consumption and Production, SDG 13 - Climate Action, SDG 14 - Life Below Water, SDG 15 - Life on Land, and/or SDG 17 - Partnerships for the Goals.

The social objectives of the SDGs cover SDG 1 - No Poverty, SDG 2 Zero Hunger, SDG 3 - Good Health and Well-being, SDG 4 - Quality Education, SDG 5 - Gender Equality, SDG 8 - Decent Work and Economic Growth, SDG 10 - Reduced Inequalities, SDG 16 - Peace, Justice and Strong Institutions and/or SDG 17 - Partnership for the Goals.

The sustainable investments of the fund are identified through a proprietary model of Danske Bank A/S (the “SDG Model”). The SDG Model consists of a quantitative based methodology leveraging data from external vendors such as Util and Factset. The quantitative methodology may be supplemented by a qualitative assessment in cases of inadequate or insufficient data and/or where it otherwise possible to demonstrate that the criteria of the model are met. Also through this sustainable investment methodology an issuer is considered sustainable if the majority of activities measured through revenues (>50%) substantially contribute to an environmental objective under the EU Taxonomy and remaining pass or fail criteria are met. The fund is, however, not committed to make such taxonomy aligned investments.

The chart below demonstrates the allocation of the fund's sustainable investments to each of the applied methodology. The allocation is measured at the end of the reference period.

Where the taxonomy-related investments in the chart are investments considered fully sustainable based on >50% taxonomy-aligned activities, the weight of all taxonomy-aligned activities in the fund are reported in the section "To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy" below.

Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Sound sustainability practices through the inclusion of issuers aligned with the sustainability-profile of the fund as maintained through a minimum ESG score of 40 at portfolio level based on governance, social and environmental related KPIs.
2. Sound environmental stewardship through inclusion of issuers aligned with the carbon-risk-profile of the fund as maintained through a minimum carbon risk rating score of 40 at portfolio level based on climate-related KPIs.
3. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
4. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
5. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.
6. The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund did not apply a benchmark for the attainment of its sustainable investment objective.

How did the sustainability indicators perform?

The tables below demonstrate the measured performance of sustainability indicators applied for the attainment of the fund's sustainable investment objective and promotion of related environmental and/or social characteristics. Unless specifically stated, the reported performance is calculated as an annual average of quarterly values measured throughout the year.

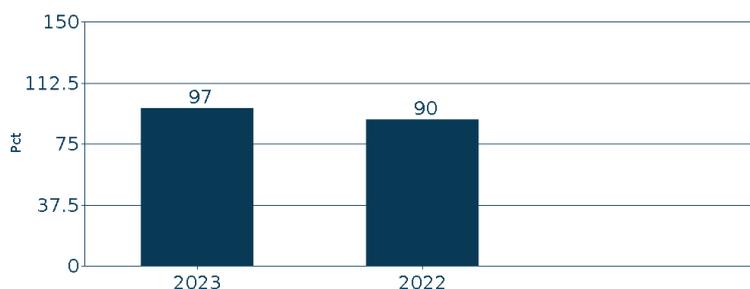

The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

Sustainable Investments

Indicator: The number of sustainable investments identified and measured through the criteria and underlying methodologies of and the SDG model, including the EU Taxonomy. The performance of the indicators applied through these methodologies is demonstrated below.

Binding element: For the attainment of its sustainable investment objective, the fund only invests in sustainable investments contributing to the environmental and/or social objectives of the fund. The fund is only allowed to make other investments if used for liquidity and/or hedging purposes.

SDG Model

The SDG Model is a proprietary model of Danske Bank A/S that measures an issuer's contribution to the SDGs. Throughout the year, certain refinements have been made to the model methodology, which were implemented in November 2023. The SDG Model measures contribution through services and products (Service & Product Contribution) and operations (Operational Contribution) of the issuer. Service & Product Contribution is measured against the revenues of business activities (SDG Aligned Revenues).

A business activity can either be assessed positive, partially positive, neutral or negative, which impacts the weight of the SDG Aligned Revenues in the Service & Product Contribution assessment. In order to qualify as a sustainable investment under the model, the aggregate Service & Contribution and Operation Assessment shall meet the thresholds indicated in the model description available through the sustainability-related disclosures of the fund available through https://www.danskeinvest.lu/page/responsible_investments_insight. Further, the investment shall not cause significant harm to a sustainable investment objective and must meet principles of good governance.

The table below shows the fund's top sustainable product exposures identified through the quantitative methodology of the model. The portfolio revenue figures are derived through multiplying the business activity revenue with the weight of the holding(s). The table also outlines which of the SDGs a given business activity is assessed as contributing positively to.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

Revenue - Service & Product Contribution	Business Activity	SDG Contribution
8.4%	Silicon-based IC	SDG 9
4.4%	Biopharmaceuticals	SDG 2,3
3.2%	Specialized Multimedia Semiconductors	SDG 3,4,9,11
2.5%	Telecommunications Wireless Services	SDG 3,4,9,11
2.1%	Photovoltaic and Solar Cells and Systems	SDG 1,2,3,4,6,7,9,11,12,13,14,15
1.9%	Universities and Colleges	SDG 1,2,3,4,6,9,11,13
1.8%	Heavy-Duty Electric Vehicle Batteries	SDG 7, 13
1.8%	Human Control Electric Vehicles	SDG 7,9,11,12,13
1.6%	Wholesale of Electricity generated by Solar power	SDG 1,2,3,4,6,7,9,11,12,13,14,15
1.6%	Electrical Systems and Equipment	SDG 7
1.5%	Life/Health Insurance	SDG 1,3,11,13
1.5%	Environmental Engineering	SDG 1,11,12,13,14,15
1.4%	Heavy-Duty, Military, Electric Vehicle Batteries	SDG 11,13
1.3%	Educational Services	SDG 1,2,3,4,6,9,11,13
1.3%	Railroad Operators	SDG 9,11,12,13
1.3%	Computer Hardware	SDG 4,9
1.2%	Wireless data communications	SDG 3,4,9,11
1.1%	Power Module	SDG 9

The SDG Model methodology equally includes an assessment on how the issuer through its operations has a positive or negative contribution to the SDGs (Operational Contribution). This assessment is among others based on the indicators for principal adverse impacts on sustainability factors.

By combining the Product & Service Contribution with the Operational Contribution the total contribution to the SDGs is aggregated through the model. The table below demonstrates the sum of contribution of all issuers that have been assessed sustainable through the quantitative component of the SDG Model as measured end of reference period.

Operational Contribution	Product & Service Contribution (revenues)				
	<0%	0-25%	25-50%	50-75%	>75%
Very positive	0%	0%	0%	3.2%	8.7%
Positive	0%	0%	0%	2.6%	23%
Neutral	0%	0%	0%	0%	36.8%
Harm	0%	0%	0%	0%	4.4%
Significant harm	0%	0%	0%	0%	0%

Qualitative assessments under the SDG Model

The table below lists issuers in the fund's portfolio end of reference period that have been identified as a sustainable investment in accordance with a qualitative assessment under the SDG Model.

Issuer	Reason
Tata Consumer Products	Company revenue data was not sufficiently granular for the assessment under the quantitative component of the SDG Model. A qualitative concluded that around 50% of the company's revenue as sustainable revenue under the model, and that the additional criteria under the operational assessment was met.
Tata Consultancy Services	Due to the lack of granularity in the revenue lines from the company an qualitative assessment for the company was undertaken. The revenue lines given from the company were consultancy lines, however, our assessment is that the consultancy's end product ultimately ends in software (supported and defined by the company in their 2023 financial annual report). If software line were applied to the SI revenue model, the company would have passed the SDG model. The conclusion is that the company is a sustainable investment.
Shenzhen Inovance	Operational assessment for management quality indicators was based on outdated data in the SDG Model. A qualitative assessment was undertaken on basis of updated data. With the updated data, the company was deemed to qualify as a sustainable investment.
Samsung Electronics	Incorrect assessment of sustainable investment revenues relating to RISC-Based Processors for Mobile Computing under the SDG Model. Through a qualitative assessment it was documented that the total revenue lines of the companies qualified the company as having positive contribution to the SDGs under the SDG Model. The assessment specifically focussed on revenue lines associated to RISC-Based Processors for Mobile Computing. This product line was not considered contributing to the SDGs per the quant model, but is part of product family "Processor Semiconductors" which is considered to sustainable revenue lines under the model, meaning that a reclassification of the RISC-Based Processors for Mobile Computing was required.
Integrated Diagnostics Holding	Integrated Diagnostics Holdings provides significant positive value in healthcare services in its operating areas directly contributing to the development of multiple SDG subtargets. Company has strong focus in providing accessibility to low-income and least developed regions. IDH has also significantly improved its ESG disclosure and published their first sustainability report in early 2022, which should support their inclusion to ESG rating coverage of main providers in the future.
Fibra Uno	Lack of ESG data as green building certifications are not covered by the scope of the Real Estate sector criteria in in the quantitative component of the SDG Model. Documented through a qualitative assessment that the sector criteria de facto was met for the given company, noting in that respect that the company has committed to reduce total emissions by 67% by 2030. Targets were submitted for SBTi's approval in October 2022.

Fibra Prologis	Fibra Prologis is a real estate investment trust. The REIT acquires, invests in, and develops properties used for manufacturing, logistics, infrastructure and urbanization in Mexico. As of 2022, Prologis had 54% of buildings green certified (LEED & BOMA), the largest percentage for any FIBRA in Mexico. The company is committed to obtaining sustainable building certifications for 100% of their property portfolio by 2025. Prologis has also made a commitment to achieve net-zero emissions across its operations by 2040, aligning with SBTi's Net-Zero Standard.
Coway	Lack of data/reporting to qualify for an assessment under the quantitative components of the SDG Model. Coway is mainly involved in water and air purifiers. Pursuant to the quantitative component of the SDG Model Coway has two business activities: Home appliance and tools, and wastewater treatment services. Neither of the two business activities are deemed as to have sustainable revenues. However, through a qualitative assessment it was demonstrated that exposure to water and air purifiers accounts for 65 – 70% of Coway revenue. Both water and air purifiers are seen to contribute to the SDGs and considered fully sustainable revenue in the model.
China Resources Land	Lack of data/reporting to qualify for an assessment under the quantitative components of the SDG Model. Based on analyst estimate and company disclosure of the amount of green certified space in 2022, it is estimated that 58% of buildings are green certified using local standards (Green Building Evaluation and Labeling (GBEL)).
Advanced Info Services	Lack of data/reporting to qualify for an assessment under the quantitative component of the SDG Model. Through a qualitative assessment process documented that the company meets the criteria of a sustainable investment under the SDG Model, having positive contribution to multiple SDG sub-targets through focused services on infrastructure development and increasing the proportion of population covered by mobile network

Investments with more than 50% activities aligned with the EU Taxonomy

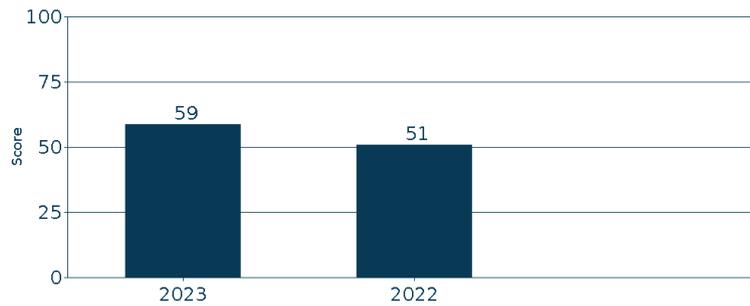

The table below lists the issuers in the fund end of reference that have been identified as sustainable investments by having a more than 50% overweight of activities substantially contributing to an environmental objective of the EU Taxonomy.

Issuer	Taxonomy aligned revenue	Objective
Terna Energy S.A.	79%	Climate change mitigation

Sound sustainability practices

Indicator: Weighted ESG score of the portfolio. The ESG score is based on an internally developed model. Data coverage for this indicator was 96%.

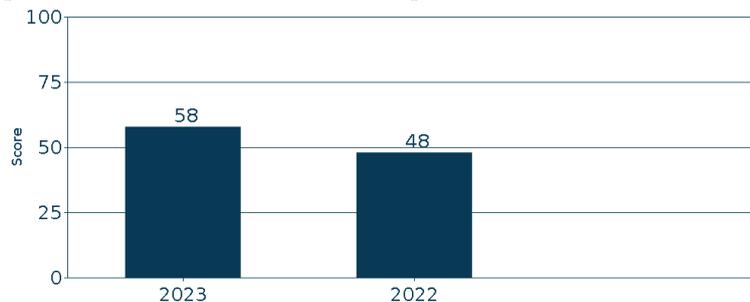

Binding element: Issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds an ESG score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Sound environmental stewardship

Indicator: Weighted Carbon Risk Rating score of the portfolio. The Carbon Risk Rating is based on an external rating from ISS ESG. Data coverage for this indicator was 87%

Binding element: issuers are selected to ensure that the fund at average has a profile that corresponds to or exceeds a Carbon-Risk-Rating score of 40. Individual companies may score below 40 as long as the total portfolio of fund scores 40 or above in respect to this score.

Exclusions

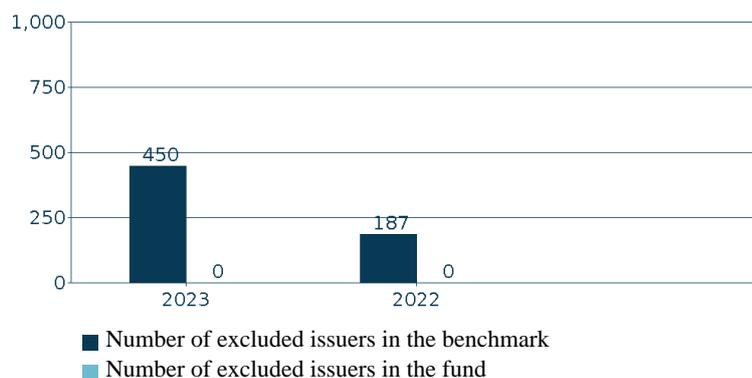

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. To the extent a reference benchmark exists such impact is demonstrated by the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	10	0.1%	0

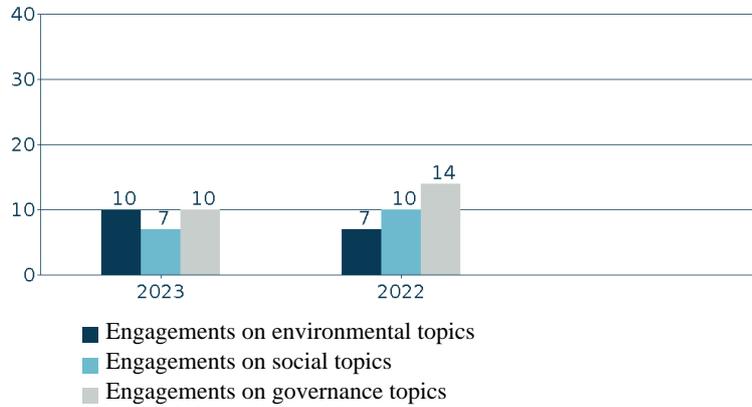

Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	57	3.6%	0
Activities and conduct deemed harmful to society	PAI	1189	124	3.6%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	48	1.3%	0
Significant negative impact on the climate	Fossil Fuel	1447	127	7.1%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	23	1.0%	0
Non-Ethical & controversial activities	Commercial gambling	307	4	0.4%	0
Non-Ethical & controversial activities	Controversial weapons	98	1	0.0%	0
Non-Ethical & controversial activities	Military equipment	341	11	0.1%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	46	3.3%	0
Non-Ethical & controversial activities	Tobacco	126	4	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

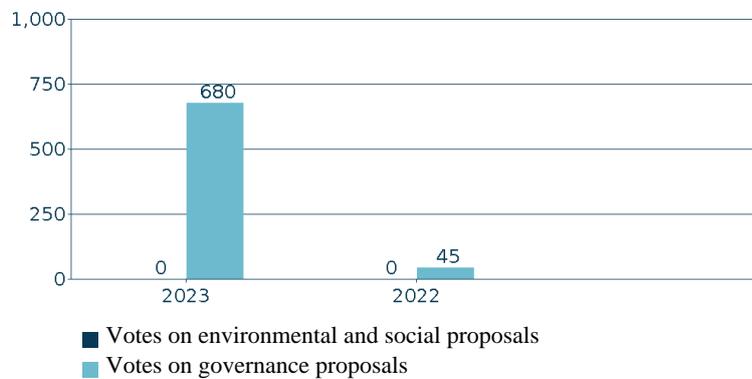

Binding element: The fund commits to engage with issuers on material sustainability topics.

Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund's exclusions and methods for identification of sustainable investments prevented the fund from investing in issuers causing significant negative harm on environmental and/or social objectives.

For further information on excluded issuers, please refer to the section "How did the sustainability indicators perform?".

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factors. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the "do no significant harm" assessment were overall addressed through the fund's exclusions, including exclusions based on quantitative thresholds on indicators linked to investee companies ("PAI thresholds"). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack of human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles' on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%.

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Greenhouse gas emissions (GHG)		2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,608	98.8%	2,807	91.1%
02	Scope 2 GHG Emissions (tons) Indirect emissions from the use of purchased energy	1,241	98.8%	1,014	91.1%

Actions taken in relation to indicators on investee companies

Greenhouse Gas Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 1,447 for fossil fuels, and 22 for tar sands. 7 engagement activities relating to the indicators have been logged for issuers in the fund. Approximately 900 issuers were covered by PAI-thresholds relating to these indicators.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 0 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by the PAI-thresholds applied in relation to this indicator, noting that the threshold equally tied to indicators on fossil fuel involvement and lack of carbon reduction initiatives.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 1 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by the PAI-thresholds.

Social and Employee Matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights,

etc. In addition, there were 98 on the exclusion list for controversial weapons.² engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by PAI-thresholds applied for these indicators.

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufactu	Information Technology	9.0%	TW
Samsung Electronics Co. Ltd.	Information Technology	6.4%	KR

Samsung Sdi Co. Ltd.	Information Technology	2.9%	KR

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 31 December 2023.

What was the proportion of sustainability-related investments

Within the reference year, the fund in average has in average invested 97% in sustainable investments against the total market value of the fund's investments. The fund has not invested in accordance with a minimum commitment to invest in environmentally sustainable economic activities. The actual proportion of investments in such activities within the reference year is reported in the sections and tables below.

What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental and socially sustainable investment objectives. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Other investments".

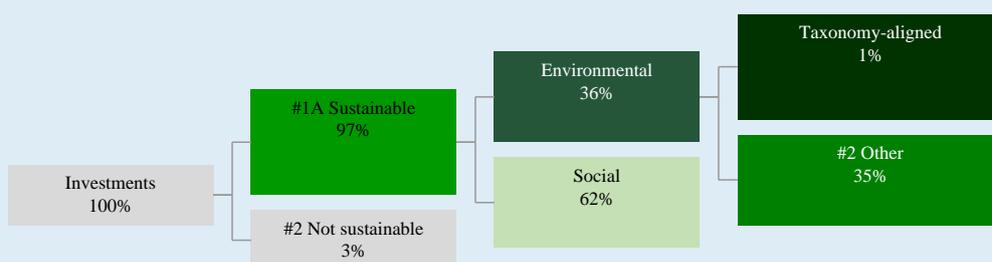

The actual allocation for the reference year was 97% sustainable investments split with 36% in support of an environmental objective and 62% in support of a social objective. 1% of the investments were aligned with the EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 1% has been invested into activities in support of a climate objective with:

- 0.7% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

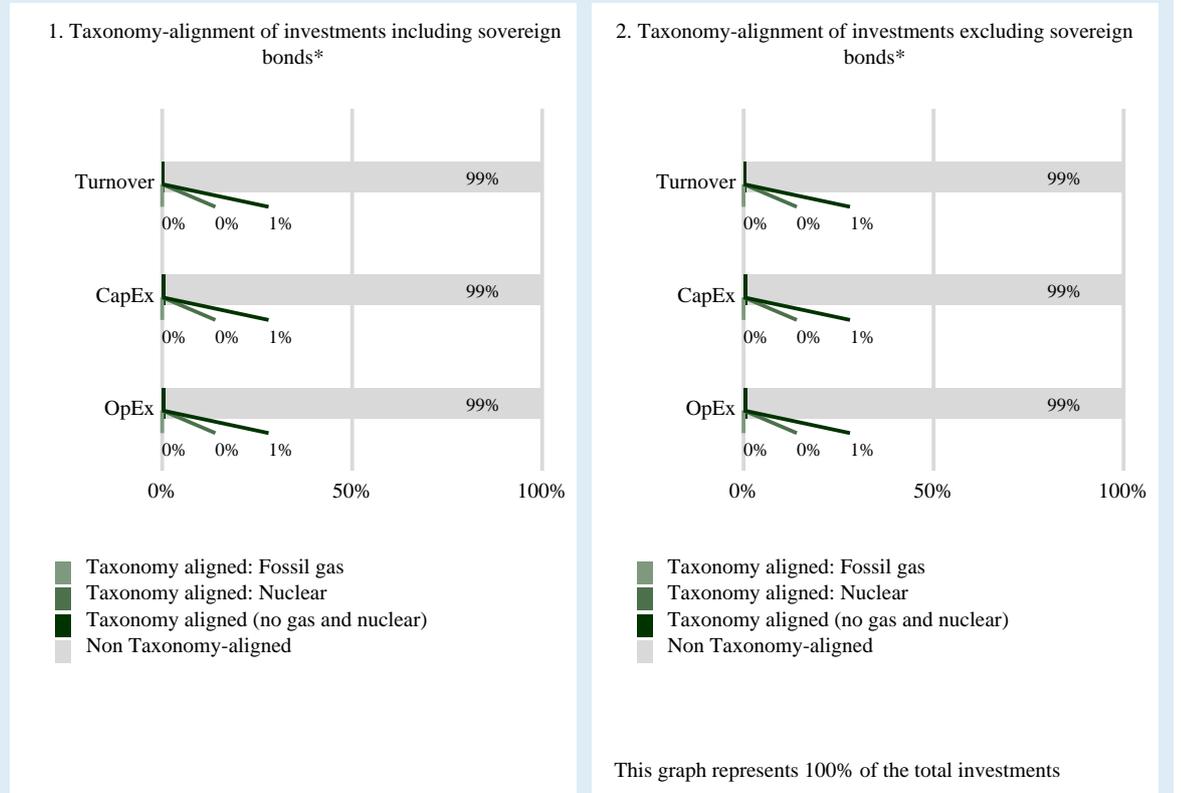

- Yes
 - In fossil gas
 - In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

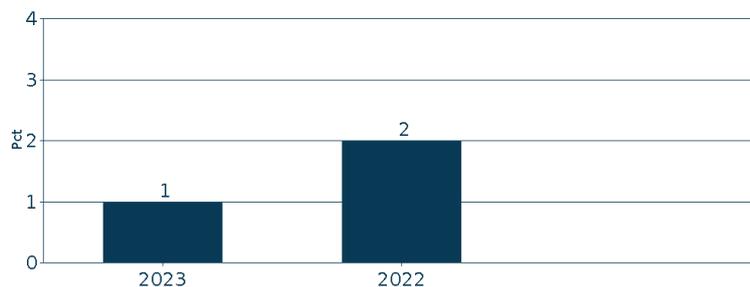

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	1%
Investments aligned with the EU taxonomy (enabling activities)	0%
Investments aligned with the EU taxonomy (transitional activities) - Fund	0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35%.

In 2022, the share of sustainable investments in the fund in support of an environmental objective not aligned with EU Taxonomy was 31%.

The reason why the fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 62%.

In 2022, the share of sustainable investments in the fund in support of a social objective was 57%.

What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund's underlying assets that did not contribute to the attainment of fund's sustainable investment objective were categorised in the "Not sustainable" investment bucket. The bucket included cash held as ancillary liquidity and derivatives used for hedging or risk management purposes.

By virtue of the nature of these investments, they lived up to minimum environmental or social safeguards.

The fund further held investments in three non-sustainable securities that cannot be traded as a result of suspension and sanctions restricting a sale. Two of these securities are valued as 0% and therefore not counted into the asset allocation. As soon as market conditions allow all relevant securities will be divested.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis of inclusion criteria and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 7 engagements have been logged on climate/GHG related topics, 0 for biodiversity, 1 on hazardous waste and water emissions, and 2 on social and employee matters.

How did this financial product perform compared to the reference sustainable benchmark?

The fund did not use a reference benchmark for the attainment of its sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

ANNEX V - Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Danske Invest SICAV Global Index Restricted
Legal entity identifier: 54930030765BBI8ZA803

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made sustainable investments with an environmental objective: 100%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made sustainable investments with a social objective: %

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent was the sustainable investment objective of this financial product met?

The fund had as its sustainable investment objective to reduce carbon emissions and by that contribute to the transition to a lower-carbon economy in alignment with the ambitions of the Paris Agreement.

The fund applied a designated reference benchmark, MSCI World Climate Paris Aligned Index, for the attainment of its sustainable investment objective. MSCI World Climate Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 (EU Benchmark Regulation).

The methodology is available at:

<https://www.msci.com/our-solutions/indexes/index-profile-tool/>

As a Paris Aligned benchmark, the methodology of the benchmark is constructed in accordance with the Paris Agreement with underlying assets selected, weighted or excluded in line with 10% "self-carbonization" rate year by year (based on base date calculations) and a minimum reduction in weighted average greenhouse gas

intensity/weighted average carbon intensity (WACI) relative to the broad market index (parent index) of 50%.

By tracking the benchmark, the WACI of the fund within the reference period was 75.2% lower than the broad market index.

The fund has also invested in certain issuers with activities substantially contributing to a climate objective(s) (climate change mitigation and/or climate change adaptation) of the EU Taxonomy.

Other environmental/social characteristics

As an integral part of attaining the sustainable investment objective, the fund promoted:

1. Adherence to UN Global Compact, principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant social safeguards through screenings on activities and conducts deemed harmful to society.
2. Environmental safeguards through exclusion criteria relating to certain activities deemed to have significant negative climate impact.
3. Ethical and social safeguards through exclusion criteria relating to certain activities deemed to be non-ethical or controversial.
4. The fund considered and addressed principal adverse impacts. This included a commitment to conduct active ownership, if prompted in accordance with relevant processes and policies, including through voting.

The fund's own exclusions overlap and supplement those applied for the designated reference benchmark. For further information on the exclusions applied by the benchmark.

How did the sustainability indicators perform?

The tables below demonstrate the measured performance of sustainability indicators applied for the attainment of the fund's sustainable investment objective and promotion of related environmental and/or social characteristics. Unless specifically stated, the reported performance is calculated as an annual average of quarterly values measured throughout the year.

The sustainability indicators are not and have not in preceding reference periods been subject to assurance provided by an auditor or review by a third party.

For supplementing information, please refer to the SFDR Reading Guide in this Annual Report.

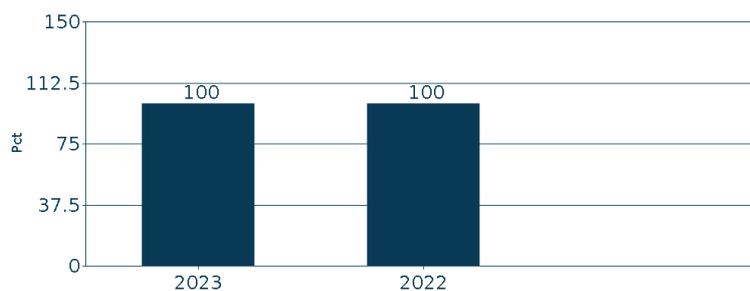

Sustainable Investments

Indicator: Reduction of CO₂-emissions compared to the reference benchmark (as measured on basis of weighted average carbon intensity "WACI")

Binding element: The fund follows MSCI World Climate Paris Aligned Index as a binding element (pass or fail) of the investment strategy to attain the sustainable investment objective.

The graph below demonstrates the weighted average of the fund's investments tracking the reference benchmark. For further information on the performance of the fund and the reference benchmark, please see "How did this financial product perform compared to the reference sustainable benchmark?".

Sustainability indicators measure how the sustainable objectives of this financial product are attained

Exclusions

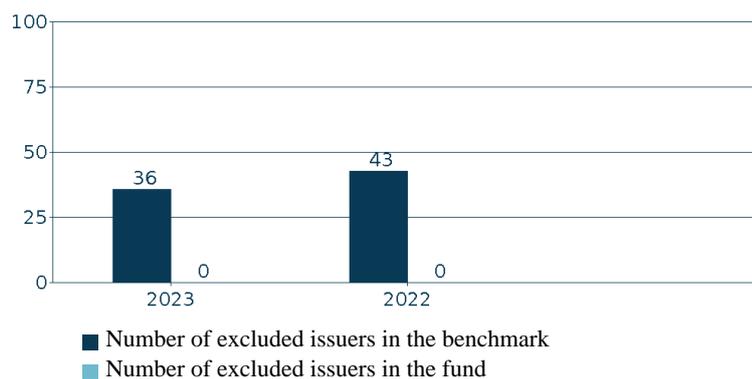

Indicator: The number of excluded investments in the fund's portfolio and the number of investments on the exclusion lists as a result of the exclusion criteria.

The selected indicators demonstrate whether the fund has adhered to its commitment of not investing into issuers covered by the applied exclusions, but do not provide an indication on impact that the exclusion category has had on the fund. Impact is demonstrated through a comparison to the reference benchmark and the number of excluded investments in the benchmark as the benchmark is considered representative for the investment universe of the fund. Exclusions applied for the reference benchmark is not reported through this table.

Binding element: The fund does not select investments that are excluded on the basis of the exclusion criteria and thresholds used as sustainability indicators to define such adverse activities.

Exclusion category	Exclusion	Issuers on Danske Bank's exclusion list	Excluded issuers in BM	Weight of BM excluded	Total number of excluded companies in portfolio
Activities and conduct deemed harmful to society	Good governance	34	0	0.0%	0
Activities and conduct deemed harmful to society	Enhanced Sustainability Standards	511	3	0.7%	0
Activities and conduct deemed harmful to society	PAI	1189	10	0.6%	0
Activities and conduct deemed harmful to society	Restricted Countries	25	0	0.0%	0
Significant negative impact on the climate	Thermal coal	362	1	0.1%	0
Significant negative impact on the climate	Fossil Fuel	1447	5	1.3%	0
Significant negative impact on the climate	Peat-fired power generation	0	0	0.0%	0
Significant negative impact on the climate	Tar sands	22	0	0.0%	0
Non-Ethical & controversial activities	Alcohol	399	10	0.9%	0
Non-Ethical & controversial activities	Commercial gambling	307	4	0.1%	0

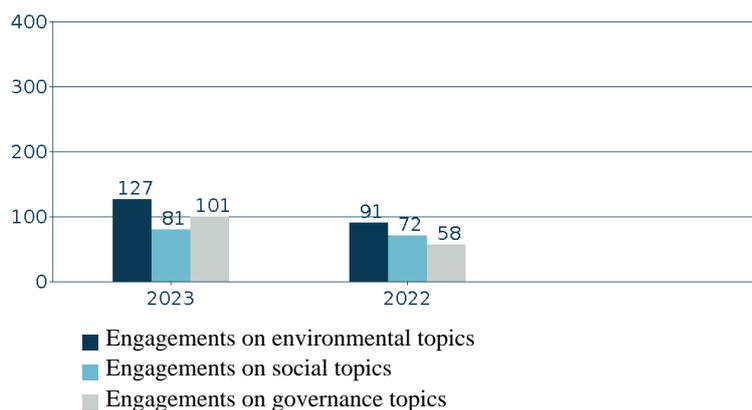

Non-Ethical & controversial activities	Controversial weapons	98	4	0.4%	0
Non-Ethical & controversial activities	Military equipment	341	7	1.0%	0
Non-Ethical & controversial activities	Pornography	11	0	0.0%	0
Non-Ethical & controversial activities	Statens pensjonsfond utland	167	0	0.0%	0
Non-Ethical & controversial activities	Tobacco	126	0	0.0%	0

Engagements

Indicator: Number of engagement activities applied for issuers in the fund. The reported engagements reflect all engagements logged in respect to issuers held by the fund and have not necessarily been performed in the direct management of the fund.

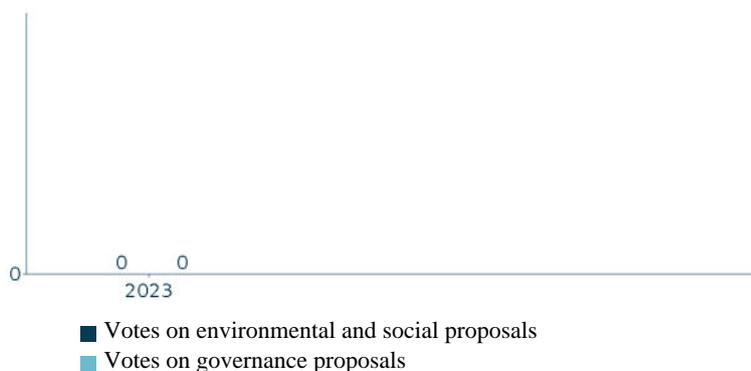

Binding element: The fund commits to engage with issuers on material sustainability topics.

Votings

Indicator: Number of voted proposals.

Binding element: The fund commits to vote on environmental and/or social proposals in accordance with the Voting Guidelines.

...and compared to previous periods?

The tables above provide a historical comparison against previous reference periods.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

This consideration was managed through criteria of the reference benchmark, including in particular exclusions, and own exclusions of the fund supplementing and overlapping those of benchmark.

For further information on excluded issuers, see the section "How did the sustainability indicators perform?" above.

The fund further applied thresholds for indicators on principal adverse impacts on sustainability factor. See the section "How were the indicators for adverse impacts on sustainability factors taken into account?". For minimum social safeguards, reference is made to the section "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?".

"Do no significant harm" assessments made in respect of sustainable investments classified as taxonomy-aligned were based on screening criteria defined in the EU Taxonomy and associated delegated acts.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts in the “do no significant harm” assessment were overall addressed through the fund's exclusions, including exclusions based on quantitative thresholds on indicators linked to investee companies (“PAI thresholds”). The PAI thresholds are defined for all 14 mandatory indicators on investee companies and the voluntary indicators on companies without carbon emission reduction initiatives, insufficient whistleblower protection and lack human rights policy. The indicators are set on basis of assessments of when an exposure to either of these indicators is of such impact that it should always be conceived as causing a significant harm to an environmental or social objective. Investments exceeding the PAI-thresholds do not qualify as a sustainable investment for the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments of the fund were aligned with the OECD Guidelines for Multinational Enterprises and UN Guiding Principles’ on Business and Human Rights. These principles were safeguarded through the exclusions of the fund relating to conduct and activities harmful to society, which is based on the enhanced sustainability standards screening of Danske Bank.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has monitored and measured the principal adverse impacts on sustainability factors throughout the year on basis of indicators defined in the Commission Delegated Regulation (EU) 2022/1288.

The average performance of these indicators is outlined in the table below. The measurements rely on data from one external vendor, ISS ESG. The data coverage from ISS ESG varies greatly depending on the indicator. For the same reason, impacts reported are supplemented with information on the coverage per indicator.

Principal adverse impacts for data coverage have been recalculated for 2022 to ensure alignment with calculations performed for 2023.

Coverage measures the coverage within eligible assets for the specific indicator in question. Where data coverage is not 100%, the average impacts for assets with data coverage is applied as a proxy for the remaining assets eligible for that indicator. This means as an example that for a portfolio containing 50 percent equities and 50 percent sovereign bonds, the weighted average for an investee company indicator will be representative to the 50%.

For further information on the actions taken in respect to the relevant indicators, please see the outline below the table.

	Greenhouse gas emissions (GHG)	2023	Data coverage	2022	Data coverage
01	Scope 1 GHG Emissions (tons) Direct emissions from sources that are owned or controlled by the company	2,096	99.8%	2,367	99.9%

Actions taken in relation to indicators on investee companies

Greenhouse Gas Emissions

Indicator 1-11 were prioritised through the fund's exclusions for issuers with significant negative impact on the climate. In 2023, 362 issuers were on the exclusion list for thermal coal, 0 for peat fired power generation, 1,447 for fossil fuels, and 22 for tar sands. 84 engagement activities relating to the indicators have been logged for issuers in the fund. Approximately 900 issuers were covered by PAI-thresholds relating to these indicators.

Biodiversity

Material matters regarding indicator 12 for biodiversity were partly covered by the Enhanced Sustainability Standards Screening with 48 issuers on the exclusion list at the end of the reference period. 1 engagement activities relating to the indicator have been logged for issuers in the fund. 4 issuers were covered by the PAI-thresholds applied in relation to this indicator, noting that the threshold equally tied to indicators on fossil fuel involvement and lack of carbon reduction initiatives.

Water and Waste

Indicator 13 and 14 concern Emissions to Water and Hazardous Waste. Under the Enhanced Sustainability Standards Screening, 17 issuers have been on the exclusion list in 2023 in relation to these themes. 8 engagement activities relating to the indicators have been logged for issuers in the fund. 27 issuers were covered by the PAI-thresholds.

Social and Employee Matters

For indicator 15-21, there were more than 200 issuers on the exclusion list in 2023 related to OECD/UNGC-related topics and additional exclusions for specific violations of human rights, employee rights, etc. In addition, there were 98 on the exclusion list for controversial weapons. 11 engagement activities relating to the indicators have been logged for issuers in the fund. More than 250 issuers were covered by PAI-thresholds applied for these indicators.

Indicators applicable to sovereigns and supranationals

The fund did not invest in sovereigns and supranationals.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
Apple Inc.	Information Technology	5.9%	US
Microsoft Corp.	Information Technology	5.1%	US
Nvidia Corp.	Information Technology	2.5%	US
Amazon.Com Inc.	Consumer Discretionary	2.3%	US
Alphabet Inc. C	Communication Services	1.9%	US
Tesla Inc.	Consumer Discretionary	1.6%	US
Meta Platforms Inc. A	Communication Services	1.4%	US
Eli Lilly & Co.	Health Care	1.2%	US
Schneider Electric Se	Industrials	1.1%	FR
Unitedhealth Group Inc.	Health Care	1.1%	US
Alphabet Inc. A	Communication Services	1.0%	US
Broadcom Inc.	Information Technology	1.0%	US
Abb Ltd.	Industrials	1.0%	CH
Johnson & Johnson	Health Care	1.0%	US
Edison International	Utilities	1.0%	US

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is 1 January 2023 - 31 December 2023.

What was the proportion of sustainability-related investments

Within the reference year, the fund in average has in average invested 100% in sustainable investments against the total market value of the fund's investments. The fund has not invested in accordance with a minimum commitment to invest in environmentally sustainable economic activities. The actual proportion of investments in such activities within the reference year is reported in the sections and tables below.

What was the asset allocation?

The fund has invested in sustainable investments in support of its environmental sustainable investment objective. From an allocation perspective, the minimum share of sustainable investments in the fund was 80% with 20% reserved for "Other investments".

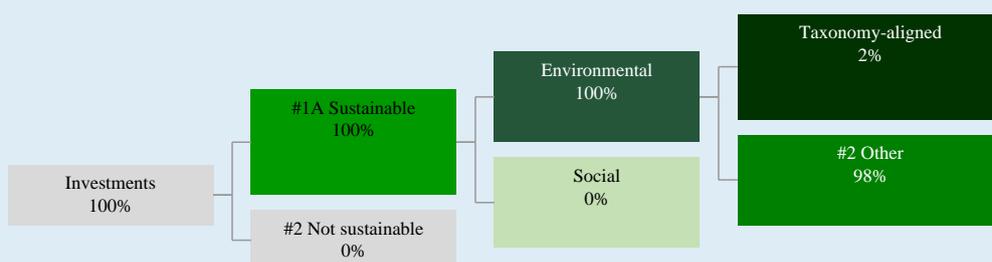

The actual allocation for the reference year was 100% sustainable investments split with 100% in support of an environmental objective and 0% in support of a social objective. 2% of the investments were aligned with the EU Taxonomy.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Sustainable covers sustainable investments with environmental or social objective

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

The graph is based on holdings with data coverage in respect to sector-allocation. The share of holdings where such data does not exist is outlined in the bar headed "No sector data". Weights for cash and derivatives are not reported meaning that the exposure weights not necessarily add to 100% in total.

The table reports also the fund's exposures to sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil. These sub-sectors are reported through the sub-sector classifications of: Oil & Gas Drilling, Oil & Gas Equipment & Services, Integrated Oil & Gas, Oil & Gas Exploration & Production, Oil & Gas Refining & Marketing, Oil & Gas Storage & Transportation, and Coal & Consumable Fuels.

Sector	Sub-sector	Pct.
Health Care	Pharmaceuticals	6.41%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy-aligned investments are calculated on basis of the market value of the share of environmentally sustainable economic activities relative to the total market value of the fund's investments. The weights are reported on the basis of company reported data of activities with a significant contribution per the criteria defined in EU-Taxonomy Regulation and underlying delegated acts. The compliance of these reported figures has not been subject to assurance by auditors or any third party for the reference year or any preceeding reference years.

No estimations are applied for year 2023 reporting. By that the report for this year 2023 differs from year 2022, where conservative estimations were used in the best attempt to report taxonomy-aligned activities pending company reporting under the EU Taxonomy.

As can be seen from the table below, the fund has invested in accordance with the EU Taxonomy in the reference period of year 2023. The reported taxonomy alignment of 2% has been invested into activities in support of a climate objective with:

- 1.2% company reported revenues in support of the climate change mitigation objective; and
- 0.0% in support of the climate change adaption objective.

As certain reported taxonomy-aligned activities have not been attributed to one specific climate objective, the reported exposures to these objectives do not sum up to the total reported taxonomy-aligned exposure of the fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy*?

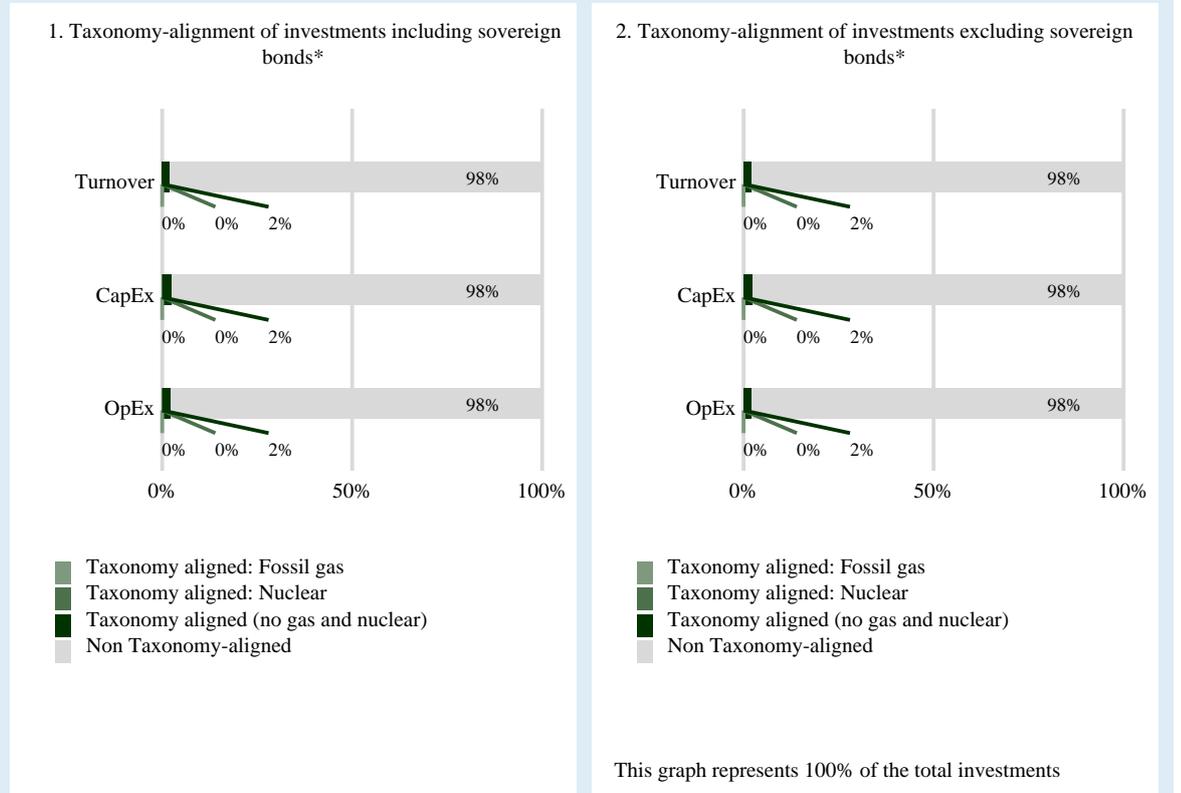

- Yes
 - In fossil gas
 - In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly any EU Taxonomy objective – see explanatory note in the hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

Taxonomy-aligned activities are expressed as a share of

- Turnover reflects the 'greenness' of investee companies today.
- Capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- Operational expenditure (OpEx) reflects the green operational activities of investee

The graph below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment of the financial product other that sovereign bonds.

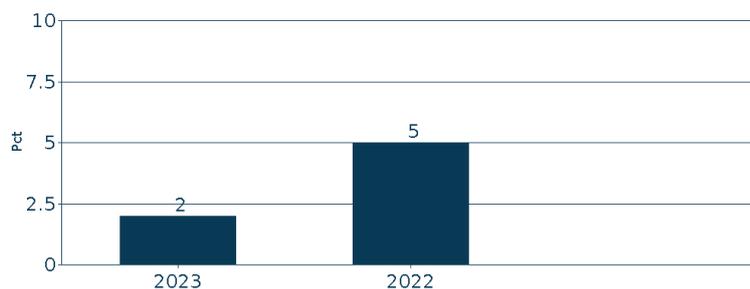

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Taxonomy alignment	2023
Investments aligned with the EU taxonomy	2%
Investments aligned with the EU taxonomy (enabling activities)	2%
Investments aligned with the EU taxonomy (transitional activities) - Fund	0%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 98%.

In 2022, the share of sustainable investments in the fund in support of an environmental objective not aligned with EU Taxonomy was 94%

The reason why the fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was low availability of company data and disclosures allowing the fund to determine Taxonomy alignment and due to the scope of objectives targeting by the fund going beyond the scope of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 0%.

In 2022, the share of investments in support of a social objective was 0%

What investments were included under "Not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The fund did not make any investments not aligned to those of the reference benchmark, which are considered sustainable investments in accordance with the methodology and approach applied by the fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the fund has managed the strategy in accordance with the binding elements ensuring the attainment of the sustainable investment objective. This means among others that issuers have been screened and, as relevant excluded by the fund, that issuers have been included on basis and criteria for sustainable investments, and that assessments were made in respect to needs of active ownership activities for issuers in the fund's portfolio.

For investee companies in the portfolio 84 engagements have been logged on climate/GHG related topics, 1 for biodiversity, 8 on hazardous waste and water emissions, and 11 on social and employee matters.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

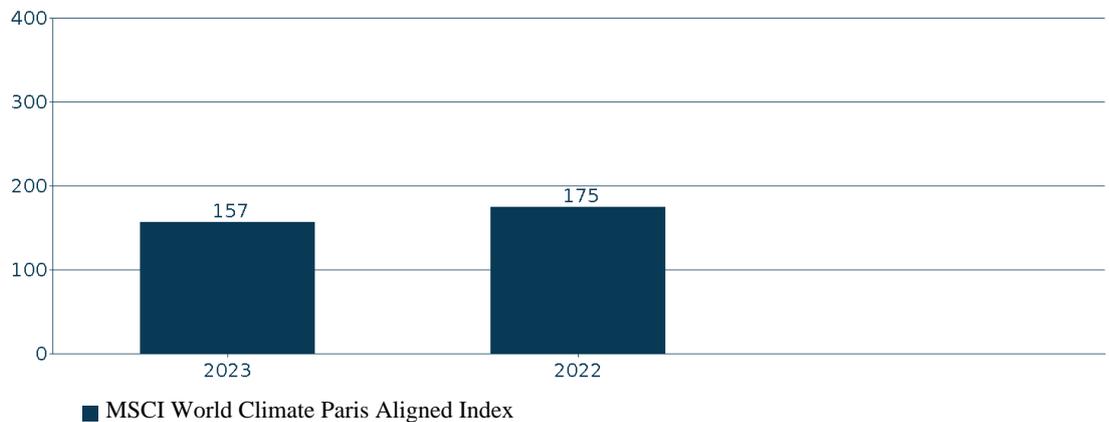

The reference benchmark is a EU Paris Aligned Benchmark that meets the minimum requirements of Delegated Regulation (EU) 2020/1818 to the Benchmark Regulation. Paris-aligned benchmarks are indices whose total emission levels are aligned with the Paris Agreement, which sees to limit the rise in global temperatures to well below 2°C above pre-industrial levels, and to pursue efforts to keep the rise to 1.5°C.

For further information on the methodology of the reference benchmark, please see:

<https://www.msci.com/our-solutions/indexes/index-profile-tool/>

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

The graph below demonstrates how the reference benchmark was aligned with the sustainable investment objective by indicating the weighted average carbon intensity (WACI) of the reference benchmark compared to the previous year.

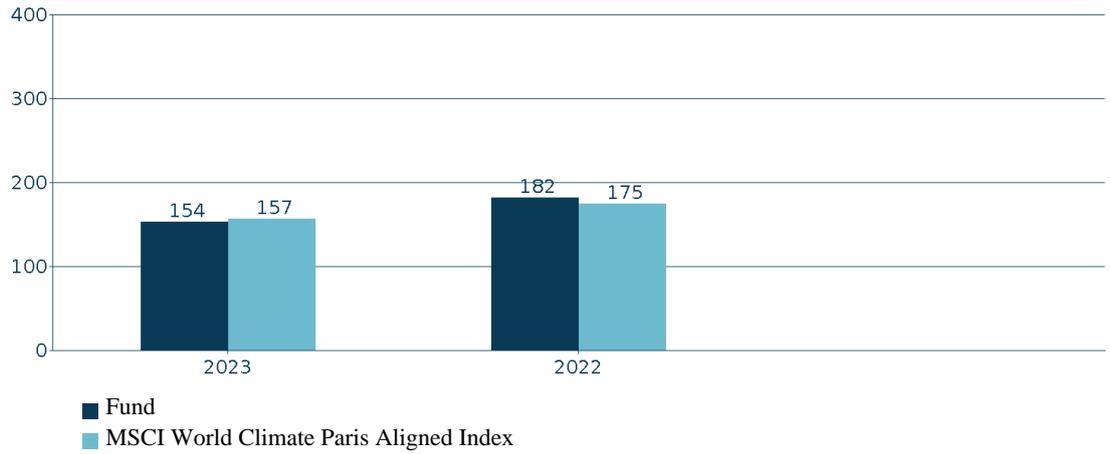

How did this financial product perform compared with the reference benchmark?

The graph below demonstrates how the fund performed compared to the reference benchmark as measured by the weighted average carbon intensity (WACI) of the reference benchmark within the reference period and the previous year.

As the fund applies exclusions in supplement to those of the benchmark certain investments of the reference benchmark have not been replicated for the fund. As a result, the weights of remaining investments in the fund to a certain extent deviate from those of the benchmark. An optimisation has been implemented in the reference year through a constraint applied in the bi-annual rebalancing of the fund, which ensures that any reweighting of investments in the fund does not negatively impact the GHG emission profile of the fund by having a higher WACI than that of the reference benchmark. This constraint implies that the fund from time to time outperforms the reference benchmark with a lower WACI, which can also be seen from the graph below.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective

How did this financial product perform compared with the broad market index?

Below graph demonstrates how the fund performed compared to the broad market index as measured on basis of the weighed average carbon intensity in the referenceperiod and the previous year.
