

## Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## DWS Invest Global Infrastructure, a sub-fund of the SICAV DWS Invest

Share class A2 Security code: DWS0Q5 ISIN: LU0329761661

Management Company: DWS Investment S.A., a member of the Deutsche Bank Group.

### Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (UBS Developed Infrastructure & Utilities). In order to achieve this, the fund invests primarily in equities of issuers whose activities are focused on the global infrastructure segment. The infrastructure segment includes transport, energy, water and communication, in addition to social infrastructure. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Invest Global Infrastructure is EUR, the currency of the A2 share class is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

### Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 7 because its share price may fluctuate very strongly and the likelihood of both losses and gains may therefore be very high.

### Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.
