DNCA Invest - Eurose - Class A - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU0284394235

This fund is managed by DNCA FINANCE

Objectives and Investment Policy

Essential management characteristics:

Multi-Asset Fund

The Sub-Fund seeks to outperform the 20% Eurostoxx 50 + 80% FTSE MTS Global composite index calculated with dividends reinvested, over the recommended investment period. Investors' attention is drawn to the fact that the management style is discretionary and integrates environmental, social / societal and governance (ESG) criteria.

The overall investment strategy of the Sub-Fund is to seek to enhance the return on a wealth investment through active management of the portfolio of Euro denominated equities and fixed income products. It aims to provide an alternative to investments in bonds and convertibles bonds (directly or through mutual funds) as well as an alternative to Euro denominated funds benefitting from a capital guarantee. The Sub-Fund however does not benefit from a guarantee on capital invested. The Sub-Fund is also managed taking into consideration Responsible and Sustainable principles and promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR. In this way, the investment process and resulting stock and bond picking take into account internal scoring with respect to the corporate responsibility broken down in four aspects: (i) shareholders responsibility, (ii) environmental responsibility, (iii) responsibility towards workers (iv) and society responsibility, and sustainability of the companies. In line with socially responsible investing ("SRI") management, issuers are also selected according to ESG criteria which involves to exclude at least 20% of the worst issuers of shares from its investment universe and therefore not investing in these issuers. The Management Company uses a proprietary ESG analysis approach with the "best in universe" method. There is a risk that this data is incorrect, insufficient or missing. There may be a sector bias. Additional information on SRI strategy may be obtained in the prospectus of the Sub-Fund. The investment process is based on the following three stages: (i) selection of the investment universe combining a financial and extra-financial approach, (ii) asset classes' allocation depending on the analysis of the investment environment and the risk appetite of the management team and (iii) selection of securities based on a fundamental analysis from the point of view of the minority shareholders/bondholders, taking into account ESG criteria and the valuation of instruments.

The following limits apply:

- For up to 100% of its net assets, the Sub-Fund may be exposed to fixed income securities. Within the limit the fixed income securities may mostly be denominated in Euro, composed of securities issued by public or private sector-issuers, and be incorporated in a country which is an OECD member state, without any rating constraint including non-rated issues.

- For up to 50% of its net assets the Sub-Fund may be exposed to securities belonging to the "speculative grade" category (i.e. which have a rating below a Standard & Poor's minimum A-3 short term or BBB- long term rating or equivalent) or non-rated. The Management Company shall not solely base its investment decisions on ratings assigned by independent rating agencies and can proceed to its own credit risk assessment.

- For up to 35% of its net assets, the Sub-Fund may be exposed to equities. Within this limit, the equities may mostly be issued by issuers incorporated in OECD members states, belonging to all market capitalisations categories, and denominated in Euro. Investment in equities issued by issuers which capitalisation is under 1 billion Euros may not exceed 5% of the net assets of the Sub-Fund.

- Up to 5% of its net assets, the Sub-Fund may be exposed to securities which may qualify as distressed securities (i.e. which have a Standard & Poor's rating below CCC long-term rating or equivalent).

- The Sub-Fund may invest up to 15% of its net assets in Asset backed securities (ABS) inter alia mortgage backed securities (MBS) invested into shall consist of securities that are rated at least B- by Standard & Poor's for example or that are considered of a comparable credit quality by the Management Company.

The aggregate exposure to equities incorporated in non-OECD members states and/or (ii) fixed income securities issued by issuers incorporated in a non-OECD member state and/or guaranteed by a non-OECD member state, may not exceed 10% of the net asset of the Sub-Fund.

- Up to 10% of its net assets in contingent convertibles bonds. The duration of the Sub-Fund's portfolio will be limited to 7 years. The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or other UCIs including ETFs.

In order to achieve the investment objective, the Sub-Fund may invest in equities or related financial derivative instruments for the purpose of hedging or increasing equity or interest rate risk without seeking overexposure. The Sub-Fund may also be exposed up to 100% of its net assets to financial derivative instruments or OTC derivatives such as, but not limited to, futures, options, CDS, CDS on indices, negotiated on regulated or OTC markets, for hedging or investment purposes (e.g. increasing equity exposure, interest rate risk, credit risk, without seeking overexposure).

Benchmark Information : The Sub-Fund is actively managed and uses the benchmark for performance comparison purposes. This means the Management Company is taking investment decisions with the intention of achieving the Sub-Fund's investment objective; this may include decisions regarding asset selection and overall level of exposure to the market. The Management Company is not in any way constrained by the benchmark in its portfolio positioning. The deviation from the benchmark may be complete or significant.

Risk and Reward Profile

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to equity and/or fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

Counterparty risk: the use of CFD may expose the investor to the risk of default by the counterparty.

Risk of using derivative products: the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

Liquidity risk: on certain markets and in given market situations, the manager may find it difficult to sell certain financial assets.

The occurrence of one of these risks may lead to a reduction in the net asset value.

Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.
