### Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (EURO STOXX 50 (RI)). In order to achieve this, the fund invests primarily in equities of issuers with a high market capitalization and who have their headquarters in a member state of the European Economic and Monetary Union. In addition, the fund manager endeavors to manage a concentrated portfolio e.g. comprising 40 to 60 different securities. Depending on the market situation, the management may deviate from the above-mentioned diversification target. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Invest Top Euroland is EUR, the currency of the FC share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

### Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high.
