Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (iBoxx Sovereign Eurozone Overall). In order to achieve this, the fund invests in bonds of governments and government institutions denominated in or hedged against the euro. Government institutions include central banks, government authorities, regional authorities and supra-national institutions. The selection of individual investments is at the discretion of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of DWS Invest Euro-Gov Bonds is EUR, the currency of the LC share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of default is continuously present and can cause your investment to suffer a loss.
