

## Key investor information for investors in Switzerland

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Deutsche  
Asset Management

## Deutsche Nomura Japan Growth

Share class LC Security code: 849095 ISIN: DE0008490954

Management Company: Deutsche Asset Management Investment GmbH, a member of the Deutsche Bank Group.

## Objectives and investment policy

The objective of the investment policy is to generate a return in euro. In order to achieve this, the fund invests at least 85% of its assets in shares of the MFCH share class of Deutsche Invest I Nomura Japan Growth (the master fund). The objective of the investment policy of Deutsche Invest I Nomura Japan Growth is to achieve sustained capital appreciation that exceeds the benchmark (TOPIX). In order to achieve this, the fund mainly invests in equities of large and medium-sized companies having their registered office in Japan and that benefit from the structural changes in Japan. In this context, the selection of individual investments is the responsibility of the fund management. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The currency of the fund is EUR, the currency of the master fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

## Risk and reward profile

The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund. These risks can impair the performance of the fund and thus impact negatively on the net asset value per unit and on the capital invested by the investor. The unit value may at any time fall below the purchase price paid by the client.

The fund invests a large proportion of its assets in another fund, the master fund. Nonetheless, the performance of the two funds can vary as the fund itself can invest up to 15% in cash at bank. The fund can return shares in the master fund on each valuation date and thereby create sufficient liquidity to also redeem its own shares on each valuation date and to pay the investors. The master fund can, however, suspend redemption under exceptional circumstances where this appears necessary in the interests of the investors. The fund may then also be forced to suspend redemption.

The master fund invests its assets in selected regions or sectors. This increases the risk that the master fund may be negatively influenced by the economic and political conditions in the respective regions or sectors. The master fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases. A more detailed description of risks and other general information can be found under "Risks" in the sales prospectus.

## Charges

The costs and fees borne by you are used for the management, administration and custody of the fund, as well as for its distribution and marketing. These costs restrict the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	4,00 %. This is the maximum amount that will be deducted from your investment prior to investment.
<b>Exit charge</b>	No redemption fee
Charges taken from the fund over a year	
<b>Ongoing charge</b>	1,60 %
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None

The front-end load specified here is a maximum amount. It may be lower in individual cases. To find out the amount that is currently applicable for you, please request it from the office responsible for you or from your financial advisor. The current costs specified here were incurred in the fiscal year of the fund, which ended on 31.12.2015. They may change from year to year. The current costs do not include the performance-based fee and the transaction costs. Additional information on costs can be found under "Costs" in the sales prospectus.

## Past performance

Past performance is not a reliable indicator of future performance. All costs and fees that were withdrawn from the LC share class of Deutsche Nomura Japan Growth were deducted during the calculation. Initial sales charges and redemption fees were not taken into account. The LC share class of Deutsche Nomura Japan Growth was launched in 1999. The performance was calculated in EUR.
