What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Objectives

The investment objective of the East Capital Global Emerging Markets Sustainable is to provide long-term capital growth through exposure to companies in Emerging Markets.

Sustainable investing means recognising that, environmental, social and governance factors may directly influence the long-term business profitability of companies. The sub-fund intends to gain exposure to companies that manage sustainability risks and/or contribute to sustainable development in Emerging Markets. Environmental, social and governance factors are fully integrated into the investment process.

The sub-fund will invest at least 75% of its assets directly or indirectly in equity or equity-related securities (such as, but not limited to, ADRs and GDRs) of companies domiciled in Emerging Markets or that exercise a significant part of their economic activity there.

Indirect exposure to companies located in Emerging Markets will be achieved, inter alia, by investing in UCITS, other UCIs, as well as through UCITS eligible structured products such as participatory notes and/or equity-linked notes.

The sub-fund may invest directly up to 30% of its net assets in China A-Shares through the Shanghai-Hong Kong Stock Connect and/or through the Shenzhen-Hong Kong Stock Connect, or through any other eligible means providing PRC stock market access.

Benchmark: The portfolio is actively managed on a discretionary basis with reference to a benchmark. While the product compares its performance against the MSCI Emerging Markets Index (Total Return Net), it does not try to replicate

this benchmark and freely selects the securities that it invests in. The deviation with this benchmark can be significant.

What are the risks and what could I get in return?

Risk indicator

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Currency risk, emerging market risk, Risks associated with the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

What happens if East Capital is unable to pay out?

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 5 years	If you exit after 10 years
Total costs	2,300 SEK	15,390 SEK	44,342 SEK
Annual cost impact (*)	2.3 %	2.3 % each year	2.3 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.7% before costs and 6.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
