What is this Product ?

Type

The Product is a sub-fund of EDMOND DE ROTHSCHILD FUND, a public limited liability company (société anonyme), incorporated as a "société d'investissement à capital variable" under Part I of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment and qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

The lifespan of this Product is not limited.

Objectives

Objective : The Product aims to provide a return of 4% p.a over the recommended investment period by investing in European equity and fixed income securities which offer attractive yields and sustainable dividend payments issued by companies that meet environmental, social and governance (ESG) criteria.

Benchmark: None.

The Product is actively managed and is not managed in reference to a benchmark index.

Investment policy : The Investment Manager will systematically include environmental, social and governance (ESG) factors in their financial analysis in order to select the highest-rated companies.

At least 90% of portfolio companies receive ESG rating. The selection process includes a positive screening by selecting through a best in universe approach and a negative screening, whereby the Investment Manager has established a formal exclusion policy that integrates the exclusion of controversial companies related to weapon, coal and tobacco. Further details on the responsible investing approach applied on the Sub Fund can be found on the Investment Manager website: <https://www.edmond-de-rothschild.com/en/Pages/Responsible-investment.aspx>.

The Product Classifies as Article 8(1) SFDR as it promotes a combination of ESG characteristics, although no reference benchmark has been designated for the purpose of attaining the environmental or social characteristics.

In view of its ESG strategy, the Product promotes environmental characteristics but does not invest in environmentally sustainable economic activities. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, in the context of the Taxonomy Regulation.

The Product will invest at least 50% of its net assets in corporate bonds denominated in euro.

Depending on the Investment Manager's expectations, the Product exposure to European equity markets will be maintained within a range of 0% to 50% of the Product's net assets.

The portfolio duration will be maintained within a range of 0 to 7.

Income allocation: Accumulation

Intended retail investor

The Product is intended for Institutional Investors, businesses and individuals likely to understand the specific risks related to an investment in the Product and who wish to increase the value of their savings through a vehicle that more particularly targets companies registered predominantly in emerging countries. This share is intended for institutional investors.

What are the risks and what could I get in return ?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (5 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

This Product is rated in category 3 in line with the type of securities and geographic regions detailed under the heading 'Objectives and investment policy', as well as the currency of the unit.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

Significant risks not taken into account in this indicator:

Credit risk : When a significant level of investment is made in debt securities.

Liquidity risk : The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Product, both in the realisation of the prices quoted and the execution of orders at desired prices.

Impact of techniques such as derivative contracts : The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk : Where a Product is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk : The Product may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress scenario	What you might get back after costs	EUR 4,100	EUR 7,420
	Average return each year	-59.0%	-5.8%
Unfavourable scenario	What you might get back after costs	EUR 9,440	EUR 9,380
	Average return each year	-5.6%	-1.3%

Favourable scenario	What you might get back after costs	EUR 11,040	EUR 13,370
	Average return each year	10.4%	6.0%

This table shows the money you could get back over the recommended holding period under different scenarios, assuming that you invest EUR 10,000.

What happens if the Manufacturer is unable to pay out ?

You may face a financial loss should the Product and/or the depository default. There is no compensation or guarantee scheme in place which may offset all or any of this loss.

What are the costs ?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the Product itself, for the following different holding periods. They include potential early exit penalties. The figures assume you are invest EUR 10,000. The figures are estimates and may change in the future.

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Investment EUR 10,000	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	EUR 140	EUR 770
Impact on return (RIY) per year	1.4%	1.4%
