What is this product?

Type

This product is a Class of Unit of the sub-fund Bond Aggregate RMB (the "Fund") which is part of Eurizon Fund, an open-ended common fund in transferable securities ("FCP") qualifying as a UCITS.

Term

There is no maturity date for this product. The product could be unilaterally closed or merged following notice to investors in the conditions led down in the Prospectus.

Objectives

Investment objective To increase the value of your investment over time and to outperform renminbi (RMB) bond markets (as measured by the benchmark).

Benchmark(s) Bloomberg China Aggregate Bond Index® (total return). For designing the portfolio, measuring performance and calculating performance fee.

Investment policies The fund mainly invests in a wide range of corporate and government bonds that are issued in People's Republic of China and Hong Kong. The fund generally favours direct investment but may at times invest through derivatives.

Specifically, the fund normally invests at least 80% of total net assets in debt and debt-related instruments, including convertible and covered bonds, and money market instruments, denominated in onshore or offshore renminbi, that are traded on any regulated market in People's Republic of China, including Hong Kong. The fund may invest directly, or indirectly through the Bond Connect programme, in the China Interbank Bond Market (CIBM).

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- below investment grade debt instruments with a minimum rating of B-/B3: 49%
- unrated debt instruments: 40%
- asset-backed securities and contingent convertible bonds (coco bonds): 10%

The fund does not invest directly in asset-backed securities, only indirect exposure to them is allowed.

Derivatives and techniques The fund may use derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure.

Strategy In actively managing the fund, the investment manager uses quantitative analysis to build a portfolio that has similar, though

improved, characteristics to the benchmark, and uses discretionary views on macroeconomic factors such as interest rates, currency exchanges and credit spreads to seek additional performance (top-down discretionary macro approach). The fund's exposure to securities, and thus its performance, are likely to differ slightly from those of the benchmark.

Derivatives and techniques This Class of Unit protects you against the fluctuations between the investment currencies and Euro.

Distribution Policy This Unit Class is not distributing dividends. Income from investments is reinvested.

Intended retail investor

The fund is not available to retail investors.

The fund is intended to investors who understand the risks of the fund and plan to invest over the medium term.

The fund may appeal to investors who:

- are looking for an investment combining income and growth
- are interested in exposure to emerging bond markets, either for a core investment or for diversification purposes

What are the risks and what could I get in return?

Risks

will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of Eurizon Capital S.A. to pay you.

This fund does not offer any form of capital protection against future negative market conditions and, as a consequence, you may lose part of or the entire amount originally invested.

If the fund is not able to pay you out what is due, you may lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Eurizon Capital S.A. is unable to pay out?

If the fund is not able to pay you out what is due, you may lose your entire investment. No investor guarantee nor compensation scheme is foreseen in that eventuality. The fund is treated as a separate entity having its own assets which are distinct in all aspects from the assets of the Management company and the assets of each of the other investors in the fund, as well as from the assets of any other products managed by the Management Company. For obligations contracted on behalf of a specific product, the Management Company shall be liable exclusively for the assets of the concerned product. On the fund's assets, no actions of creditors of the Management Company or creditors acting on its interest, nor actions of creditors of the depositary or sub-depositary or creditors acting in the depositary or sub-depositary's interest, should be allowed. Actions of creditors of an investor in the fund are limited to the positions held in the fund by the concerned investor. The Management Company cannot, in any circumstances, use the assets of the fund for its own interests or those of third parties.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 4 years (recommended holding period)
Total Costs	114 EUR	462 EUR
Annual cost impact*	1.1%	1.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.40% before costs and 0.19% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
