ISIN: LU0279509144

The Fund is managed by ETHENEA Independent Investors S.A., société anonyme.

Objectives and investment policy

The investment objective of Ethna-DEFENSIV is simultaneously to preserve investors' capital by means of active portfolio management and achieve sufficient long-term returns, while minimising the degree of fluctuation of the Fund price (low volatility). The investment focus is on bonds issued by borrowers from OECD countries. The Fund is actively managed. The composition of the portfolio is established, regularly reviewed and adjusted where appropriate by the Fund Manager in accordance with the criteria defined in the investment objectives / investment policy. The Fund is not managed using an index as a reference basis.

The Fund invests its assets in all kinds of securities, including shares, bonds, money market instruments, certificates, other funds and fixed-term deposits. Between 0% and 100% of the Fund's assets may be invested in any of the individual investment categories referred to above (except other funds and equities). Investments in certificates representing goods (e.g. precious metals, commodities) may not exceed 20% of the fund assets. Investments in other funds, as well as the proportion of shares, equity funds and equity-like securities, may not exceed 10% of the fund's assets. For hedging purposes or to increase its assets, the Fund may use financial instruments whose value depends on the future prices of other assets ("derivatives"). Detailed information regarding the aforementioned and, if applicable, other investment opportunities for the Fund can be found in the current Sales Prospectus.

In its investment decision-making process, the Fund takes into account not only financial aspects but also environmental and social aspects and the principles of good corporate governance (Environment, Social, Governance – ESG) in accordance with the ESG strategy of the Management Company. Risk and reward profile

The historical data used for calculating the synthetic indicator are not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

This share class has been placed in the aforementioned risk class because its unit price is subject to little to medium fluctuation, therefore the profit potential and loss exposure may be low to moderate.

Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus. The following risks have no direct influence on this categorisation, but may be significant for the Fund:

Credit risks:

The Fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.

Liquidity risks:

The Fund may invest part of its assets in securities that are not traded on a stock exchange or similar market. It may be difficult to find a buyer for such securities in the short term. As a result, the risk that share redemptions will be suspended may increase.

Counterparty risks:

The Fund may enter into various transactions with counterparties. If a counterparty becomes insolvent, that party will not be able to meet some or all of its open obligations to the Fund.

Risks relating to the use of derivatives:

The Fund may enter into derivative transactions for the purposes listed above in the section "Investment policy". This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the Fund.

Operating risks and custodial risks:

The Fund may fall victim to fraud or other criminal activities. It may suffer losses through misunderstandings or errors on the part of employees of the investment company or third parties or be hurt by external events, such as natural disasters. There is a risk of loss associated with holding assets in custody, especially abroad. This risk may result from insolvency, negligence or misconduct on the part of the Custodian or a sub-custodian.
