1. GENERAL INFORMATION

Eurizon Fund (hereafter referred to as the "Fund") was established in the Grand Duchy of Luxembourg on 27 July 1988 in accordance with the Law of 30 March 1988 regulating Undertakings for Collective Investment. The Fund is subject to part I of the Luxembourg Law of 17 December 2010 relating to Undertakings for Collective Investment, as amended.

The Fund is a joint ownership of transferable securities and other financial assets, administered for the exclusive benefit of its participants by Eurizon Capital S.A. (hereafter referred to as the "Management Company"), a limited company established on 27 July 1988 with its registered office in Luxembourg.

There is no maximum limit set on the amount of wealth or the number of Units of jointly owned property which comprise the assets of the Fund. The minimum net assets of the Fund are to be at least EUR 1 250 000,00.

In order to offer investments with different levels of risks, the Fund is an umbrella fund subdivided into a wide range of Sub-Funds (each "the Sub-Fund" and together "the Sub-Funds").

The Sub-Funds which are active as at 31 December 2023 are listed below:

⁽¹⁾ The Sub-Fund was launched on 15 December 2023.

⁽²⁾ The Sub-Fund was launched on 13 December 2023.

⁽³⁾ The Sub-Fund was launched on 5 December 2023.

⁽⁴⁾ The Sub-Fund was launched on 11 May 2023.

⁽⁵⁾ The Sub-Fund was launched on 22 May 2023.

The different Units which are available to investors for all Sub-Funds are detailed in the prospectus of the Fund.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Fund keeps the books of each Sub-Fund in its respective currency and the financial statements are prepared in Euro in accordance with the Luxembourg regulations relating to Undertakings for Collective Investment and in particular using the following valuation rules:

a) Valuation of investment securities

Investment securities, including zero-coupon bonds and money market instruments quoted on an official stock exchange or on another regulated market are valued according to the last known price at the time when the valuation is carried out, and, in the event of being quoted on several markets, according to the last known price of the principal market.

Valuation of investment securities, including zero-coupon bonds and money market instruments, not quoted on an official stock exchange or on another regulated market is fixed in a reasonable way on the basis of the sale prices anticipated cautiously and in good faith or, in the absence of a market value, according to the probable value in the reasonable estimation of the Board of Directors of the Management Company.

The value of each investment in open-ended funds is based on the last known Net Asset Value on the Valuation Day.

If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation is done in good faith by the Board of Directors of the Management Company.

Non-listed securities are valued on the basis of their probable sales price as determined in good faith by the Board of Directors of the Management Company.

b) Net realised profit / (loss) on sales of investments

Realised profits or losses made on the sales of investments are calculated according to the average weighted cost.

c) Option contracts

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the Management Company.

The market value of option contracts is recorded in the Statement of Net Assets.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting profits and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

The variation of unrealised profits and losses on option contracts is recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

d) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at forward foreign exchange rate for the remaining period to run until maturity at the date of valuation.

Unrealised profits and losses are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on forward foreign exchange contracts".

e) Future contracts

Commitments related to future contracts are recorded off balance sheet and future contracts are valued according to the last available contract price.

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

Guarantee deposits and margin calls are recorded under the Statement of Net Assets under the headings "Other banks and broker accounts" and "Amounts due to brokers".

f) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Unrealised profits and losses on swap contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on swap contracts".

All the Swap contracts are presented at clean price, except for Inflation Swap contracts which are presented at dirty price, therefore the interests related to Swap contracts are recorded under the heading "Interest received/paid on swap contracts" in the Statement of Changes in Net Assets.

g) Reverse repurchase agreements

Reverse repurchase agreements (reverse repos) consist in a purchase of securities with a simultaneous agreement to resell them at a specific future date and price. The sale price corresponds to the purchase price increased by an interest rate. These operations, if any, including accrued interest, are recorded in the Statement of Net Assets under the heading "Reverse repurchase agreements".

For reverse repurchase agreements, interest returns which consist in the difference between the purchase price and the sale price of the securities are accounted for on a pro rata temporis basis over the course of the operation and recorded in the accounts in the Statement of Changes in Net Assets under the heading "Net income from investments".

h) Combined statements of the Fund

The combined statements correspond to the sum of the statements of each Sub-Fund. Cross Sub-Funds investments (where one Sub-Fund has invested in another Sub-Fund of the Fund) and related inter-Fund accounts have not been eliminated for presentation purposes of the combined statements. Cross Sub-Funds investments represent 0,88% of the combined net assets with value of EUR 649 795 287,51 as at 31 December 2023. Excluding the cross Sub-Funds investments from the calculations, the combined net assets as at 31 December 2023 is EUR 73 224 171 531,19. Cross Sub-Funds investments are disclosed in the Portfolio as at 31 December 2023 for the respective Sub-Funds.

i) Cost of purchase of securities in portfolios

For securities in currencies other than the base currency of the Sub-Fund, the purchase price is converted in the base currency of the Sub-Fund based on the closing exchange rates of the day of purchase.

j) Income

Dividends are recognised on the date on which the shares/units concerned are quoted "ex-dividend", net of withholding tax. Interest is calculated on a pro rata temporis basis and recorded net of withholding tax.

Interest income from debt securities is recognised daily on an accruals basis and includes the amortisation of premiums and accretion of discounts on a straight line basis.

k) Swing Pricing

On business days when the net number of a Sub-Fund's units purchased or redeemed exceeds 2% of the Sub-Fund's total net assets, the Management Company may value that Sub-Fund's assets at offer price or bid price, respectively. This adjustment reflects an

assessment of the overall costs incurred in buying and selling investments to satisfy purchases or sales of units (understanding that a Sub-Fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

This mechanism was not activated during the year ended 31 December 2023.

l) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, assets receivable and liabilities payable denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Change in unrealised appreciation / (depreciation) on foreign currencies".

The exchange rates as at 31 December 2023 are the following:

n) Basis of preparation

These financial statements have been prepared on a going concern basis, using the last official/tradeable Net Asset Value of the financial year (29 December 2023).

o) Valuation of instruments in the Money Market Sub-Funds

As regards the valuation of the assets of the Sub-Funds authorised as money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, such assets are valued by using mark-to-market method (means the valuation of positions at readily available close out prices that are sourced independently, including exchange prices, screen prices, or quotes from several independent reputable brokers) whenever possible.

When using mark-to-market method:

- such assets are valued at the more prudent side of bid and offer unless the asset can be closed out at mid-market;
- only good quality market data are used; such data are assessed on the basis of all of the following factors:
 - the number and quality of the counterparties;
 - the volume and turnover in the market of the asset of the money market fund;
 - the issue size and the portion of the issue that the money market fund plans to buy or sell.

The Net Asset Value of any Unit Class in Sub-Funds authorised as money market funds shall be calculated at least daily and rounded to the nearest basis point or its equivalent when the Net Asset Value is published in a currency unit.

The following Sub-Funds have been identified as falling under the scope of the Money Market Fund Regulation (EU) 2017/1131 (the "Regulation") and accordingly fulfill the requirements of the Regulation:

Sub-Fund	Type of MMF	Impact on the pricing policy
Eurizon Fund - Money Market EUR T1	Standard Variable NAV	No impact
Eurizon Fund - Money Market USD T1	Standard Variable NAV	No impact
Eurizon Fund - Cash EUR	Standard Variable NAV	No impact

3. BANKS, BANK OVERDRAFTS, OTHER BANKS AND BROKER ACCOUNTS

As at 31 December 2023, the counterparty for the "Banks" and "Bank overdrafts" accounts is State Street Bank International GmbH, Luxembourg Branch for all the Sub-Funds.

The amount of broker accounts disclosed in the Statement of Net Assets "Other banks and broker accounts" / "Amounts due to brokers" are presented net.

The following table shows the actual split between positive and negative broker accounts:

Sub-Fund	Positive Broker Cash	Negative Broker Cash	Net Broker Cash
Eurizon Fund - Bond EUR Short Term LTE	-	(534 544,07)	(534 544,07)

4. SUBSCRIPTION TAX

The Fund is governed by Luxembourg tax laws applicable to investment funds. It is up to prospective purchasers of Units of the Fund to inquire about the laws and rules applicable to the acquisition, holding and possibly sale of Units, taking into account their residence or nationality.

As legislation now stands, the Fund is subject to a Luxembourg tax at an annual rate of 0,05% calculated and payable quarterly on the Net Asset Value of each Sub-Fund at the end of each quarter in question. The rate of the annual subscription tax is fixed at 0,01% for the Sub-Funds or Classes of Units, if the Units in these Sub-Funds or Classes are reserved for one or more Institutional Investors, as well as for Sub-Funds whose exclusive aim is the collective investment in money market instruments and/or deposits with credit institutions.

The value of the assets represented by units/shares held in other Luxembourg UCIs shall be exempt from the subscription tax, provided such UCIs have already been subject to the subscription tax in Luxembourg.

5. OTHER CHARGES AND TAXES

The caption “Other charges and taxes” is mainly composed of interest expenses and securities lending fees.

The auditors fees, expenses involved in preparation, printing and filing of administrative documents and explanatory memoranda with any authorities and bodies, expenses related to preparation, distribution and publication of notices to Unitholders, including publication of Net Asset Value per Unit on newspapers distributed in countries in which the Units are offered or sold or on any other recognised and legally binding media, fees relative to registration with any institution or authority, and the fees relative to the Fund’s listing on a stock exchange are borne by the Management Company.

6. MANAGEMENT FEE

The Management Company, as remuneration for its services, is entitled to receive a management fee calculated according to the Net Asset Value of each Sub-Fund of the Fund. For the year ended 31 December 2023, the rates in force for each Sub-Fund are the following:

 (46) Class R was launched on 24 May 2023.
 (47) Class Z was launched on 22 May 2023.

Class M does not bear any management fees.

In each Sub-Fund of the Fund, this fee is payable monthly and calculated on the basis of the average Net Asset Value over the month.

Investments done by each Sub-Fund in units/shares of UCITS and/or other UCI may lead investors to support twice certain expenses such as subscriptions fees, redemptions fees, depositary fees, administrative fees and management fees.

The total amount of the management commissions applied on the "group-related" UCITS or UCI in which a Sub-Fund may invest as well as the total amount of any rebates of the management commissions applied on UCITS or UCI managed by third companies are transferred to the respective Sub-Fund on a quarterly basis and registered in the Statement of Changes in Net Assets under the heading "Other income" as follows (in EUR):

⁽¹⁾ The Sub-Fund was launched on 13 December 2023.

⁽²⁾ The Sub-Fund was launched on 15 December 2023.

For the below Sub-Funds there was no performance fees recorded during the year ended 31 December 2023 even if they are subject to a performance fee:

Eurizon Fund - Bond Corporate EUR, Eurizon Fund - European Union Bonds, Eurizon Fund - Global Bond Aggregate⁽¹⁾, Eurizon Fund - Global Bond Inflation Linked, Eurizon Fund - Bond Euro High Yield, Eurizon Fund - Euro Emerging Markets Bonds, Eurizon Fund - Italian Equity Opportunities, Eurizon Fund - Top European Research, Eurizon Fund - Equity Small Mid Cap Europe, Eurizon Fund - Equity USA, Eurizon Fund - Equity China A, Eurizon Fund - Asian Equity Opportunities, Eurizon Fund - Global Equity Infrastructure, Eurizon Fund - Sustainable Global Equity, Eurizon Fund - Equity Planet, Eurizon Fund - Equity People, Eurizon Fund - Equity Real Estate⁽²⁾, Eurizon Fund - Absolute Return Solution, Eurizon Fund - Active Allocation, Eurizon Fund - Asian Debt Opportunities⁽³⁾, Eurizon Fund - Bond Flexible, Eurizon Fund - China Credit Opportunities⁽⁴⁾, Eurizon Fund - Conservative Allocation, Eurizon Fund - Dynamic Asset Allocation, Eurizon Fund - Flexible Allocation, Eurizon Fund - Flexible Europe Strategy, Eurizon Fund - Flexible Multistrategy, Eurizon Fund - Global Multi Credit, Eurizon Fund - Inflation Strategy, Eurizon Fund - Securitized Bond Fund, Eurizon Fund - SLJ Flexible Global Macro and Eurizon Fund - Sustainable Multiasset.

⁽¹⁾ The Sub-Fund was launched on 15 December 2023.

⁽²⁾ The Sub-Fund was launched on 5 December 2023.

⁽³⁾ The Sub-Fund was launched on 11 May 2023.

⁽⁴⁾ The Sub-Fund was launched on 22 May 2023.

8. ADMINISTRATION FEE

The administration fee is paid to the Management Company as the main entity with responsibility for operational, compliance, accounting and legal activities of the Fund.

Out of this fee, the Management Company pays the services provided by the Administrative Agent, Depository Bank, Registrar and Transfer Agent and the Paying Agent.

This fee, which represents a percentage of the average Net Asset Value of each Sub-Fund, is accrued daily and is paid each month in arrears.

9. SWAP CONTRACTS

Swaps, comprising Interest Rate Swaps, Credit Default Swaps, Total Return Swaps, Index Swaps and Inflation Swaps, can be linked to any number of underlying investments and indexes, and swap terms can vary greatly. Cash flows are exchanged based on the underlying. Upfront payments, which represent a risk premium, are amortised straight-line over the contract term. Swap agreements are carried at market value and the value of the swap agreement is based on a counterparty independent provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract.

The open positions as at 31 December 2023 are disclosed in the "swap contracts" sections of the relevant Sub-Funds and detailed below:

Credit Default Swap contracts

Total	47 073 466,01

For the year ended 31 December 2023, no transaction costs have been recorded for the other Sub-Funds.

Furthermore, in accordance with the practices of the bond markets, a bid-offer spread is applied to securities purchase or sale transactions. According to this principle, the selling and buying prices applied by the broker to a given transaction are not identical and the difference between them constitutes the broker's remuneration.

13. CHANGES IN THE COMPOSITION OF PORTFOLIO

The list of movements in the portfolio composition for the financial year from 1 January 2023 to 31 December 2023 is available at the Management Company's registered office.

15. SECURITIES LENDING TRANSACTIONS

The Fund may lend securities but only under the conditions and procedures specified by recognised clearing systems or by another first-bank financial institution specialized in this kind of operations.

The Fund has entered into a securities lending agreement with a specialized financial institution, authorizing the latter to carry out lending transactions of the Fund's securities. In relation to its lending transactions, the Fund must receive security of a value which, at the conclusion of the lending agreement, must be at least equal to the value of the global valuation of the securities lent.

This collateral must be given in the form of cash and/or of securities issued or guaranteed by member states of the OECD or by their local authorities or by supranational institutions and organizations with EU, regional and worldwide scope and blocked in favor of the Fund until termination of the lending contract.

All collateral received by the Fund under the securities lending agreement is transferred under a title transfer arrangement. The collateral is held in custody by a sub-custodian of the depository for the duration of the transaction.

The following summarises the value of securities lent analysed by borrowing counterparty as at 31 December 2023:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Market Value of Securities Lent as at 31-12-23 (in EUR)	% of Net Assets	% of the Sub-Fund's total lendable assets	Market Value of the collateral received for the securities lent
Eurizon Fund - Bond EUR Short Term LTE	EUR	Barclays Bank Plc	United Kingdom	98 987 657,55	4,34%	6,37%	103 808 098,72

The income earned from the securities lending is reflected gross of fees in the Statement of Changes in Net Assets under the heading "Other Income". State Street Bank International GmbH, Frankfurt Branch receives a 15% fee for its services recorded in the Statement of Changes in Net Assets under the heading "Other charges and taxes". As a result, the Fund receives 85% of the gross revenues generated from securities lending which was recorded by Sub-Fund as follows (in EUR):

16. RUSSIA UKRAINE CONFLICT

The direct exposure of the products established by the Fund to Russia, Belarus and Ukraine securities was relatively low at the beginning of Russia's invasion of Ukraine on 24 February 2022, with no Sub-Fund reporting an exposure in excess of 5% of its total net assets. Nevertheless, the Management Company closely monitors the evolution of international sanctions, operational restrictions and disruptions relating to the Russian securities and markets as they adversely impact, or could impact, the ability of these Sub-Funds to operate on such securities and/or related local cash accounts. Liquidity and valuation issues related to these securities are monitored on a continuous basis by the Management Company so as to ensure the interests of the investors are preserved. In particular, as at 31 December 2023, certain securities are valued on the basis of fair valuation procedures, which may result in such securities being deemed to have a near-zero or zero value.

17. EVENTS OCCURRED DURING THE YEAR

Effective from 1 January 2023:

The SFDR category changed from article 6 to article 8 for the following Sub-Funds: Eurizon Fund - Bond EUR 1-10 y LTE, Eurizon Fund - Bond EUR All Maturities LTE, Eurizon Fund - Bond EUR Long Term LTE, Eurizon Fund - Bond EUR Medium Term LTE, Eurizon Fund - Bond EUR Short Term LTE, Eurizon Fund - Cash EUR, Eurizon Fund - Bond Short Term EUR T1 and Eurizon Fund - Money Market EUR T1.

Eurizon Fund - Absolute Green Bonds: the performance fee hurdle rate increased from “Bloomberg Euro Treasury Bills + 1.30% p.a.” to “Bloomberg Euro Treasury Bills + 1.90% p.a.”.

Feeder Sub-Funds	Master Sub-Funds
Eurizon AM SICAV - Emerging Markets Equity	Eurizon Fund - Equity Emerging Markets
Eurizon AM SICAV - Asia Pacific Equity	Eurizon Fund - Asian Equity Opportunities
Eurizon AM SICAV - Italian Equity	Eurizon Fund - Italian Equity Opportunities
Eurizon AM SICAV - European Equity	Eurizon Fund - Top European Research
Eurizon AM SICAV - Clean Water (renamed Eurizon AM SICAV - Equity Planet)	Eurizon Fund - Equity Planet
Eurizon AM SICAV - Global Infrastructure	Eurizon Fund - Global Equity Infrastructure
Eurizon AM SICAV - Globo (Global Bond)	Eurizon Fund - Global Bond Aggregate

18. SUBSEQUENT EVENTS

Further to a favourable judgment rendered on 26 February 2024 by the Tax Court of Second Instance of Abruzzo (Italy), the reclaimed amounts related to unduly levied withholding taxes on dividends perceived from Italian companies for the period 2014 to 2020 have been recognised in the net asset value of the relevant Sub-Funds, as listed in Note 4, as this judgment significantly increased the chance of success of the reclaim procedure engaged by the Management Company.

The amounts recognised in the net asset value of the relevant Sub-Funds were as follows:

Sub-Funds	EUR
Eurizon Fund - Sustainable Global Equity	70 214,76
Eurizon Fund - Top European Research	426 834,73
Eurizon Fund - Azioni Strategia Flessibile	5 269 599,66
Eurizon Fund - Italian Equity Opportunities	5 702 146,56
Eurizon Fund - Equity World Smart Volatility	201 895,13
Eurizon Fund - Equity Europe LTE	1 158 865,68
Eurizon Fund - Equity Euro LTE	506 233,40
Eurizon Fund - Equity Italy Smart Volatility	1 667 293,57
Eurizon Fund - Equity Small Mid Cap Europe	190 750,77
Eurizon Fund - Conservative Allocation	109 747,95
Eurizon Fund - Active Allocation	4 686 365,02
Eurizon Fund - Flexible Europe Strategy	2 635,58
Eurizon Fund - Equity Europe ESG LTE	8 651,76
Eurizon Fund - Equity Innovation	19 616,00
Eurizon Fund - Equity People	3 472,26
Eurizon Fund - Absolute Prudent	3 113 468,62

Though, the Tax Court decision shall not be considered as final at the date of this report, as the judgment may still be appealed by Italian Revenue Agency before the Italian Supreme Court.

SECURITIES FINANCING TRANSACTIONS REGULATION

Securities Financing Transactions Regulation ("SFTR") introduced disclosure requirements in annual and semi-annual reports detailing use of securities financing transactions and total return swap contracts.

A security financing transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement,
- securities or commodities lending and securities or commodities borrowing,
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction.

Securities Lending

The following provides an analysis of the maturity tenor of securities on loan as at 31 December 2023 (the analysis is based on the contractual maturity date of the securities on loan):

Sub-Fund	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days	Open transactions (in EUR)	Total

Eurizon Fund - Equity USA	EUR	J.P. Morgan SE	Germany	1 167 596,21	0,03
Eurizon Fund - Equity USA	EUR	Société Générale S.A.	France	881 627,57	0,02
Eurizon Fund - Equity China A	EUR	Bank of America Securities Europe S.A.	France	8 248,13	0,01
Eurizon Fund - Equity China A	EUR	Morgan Stanley Europe SE	Germany	36 913,87	0,01
Eurizon Fund - Asian Equity Opportunities	EUR	Bank of America Securities Europe S.A.	France	55 120,23	0,05
Eurizon Fund - Conservative Allocation	EUR	BNP Paribas S.A.	France	44 712,35	0,00
Eurizon Fund - Dynamic Asset Allocation	EUR	BNP Paribas S.A.	France	436 839,75	0,11

The following table details provide an analysis of the maturity tenor of total return swaps transactions outstanding as at 31 December 2023:

Sub-Fund	Currency	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days	Total
(Absolute values)								
Eurizon Fund - Equity Emerging Markets LTE	EUR				150 197,38	84 114,31		234 311,69
Eurizon Fund - Equity China Smart Volatility	EUR					187 042,58		187 042,58
Eurizon Fund - Equity Emerging Markets Smart Volatility	EUR				102 134,22	52 030,72		154 164,94
Eurizon Fund - Equity USA	EUR				1 009 188,31	1 040 035,47		2 049 223,78
Eurizon Fund - Equity China A	EUR					8 248,13	36 913,87	45 162,00
Eurizon Fund - Asian Equity Opportunities	EUR				19 150,23	35 970,00		55 120,23
Eurizon Fund - Conservative Allocation	EUR				44 712,35			44 712,35
Eurizon Fund - Dynamic Asset Allocation	EUR				436 839,75			436 839,75

The above maturity tenor analysis has been based on the contractual maturity date of the relevant total return swap transaction as at 31 December 2023.

Total return swaps and more specifically OTC derivative transactions are entered into by the parties under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Sub-Fund and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

All returns from OTC derivative transactions will accrue to the Sub-Fund and are not subject to any returns sharing arrangements with the Investment Manager or any other third parties.

As at the balance sheet date all of the cash collateral received in respect of OTC derivatives transactions (including total return swaps), is not part of any reinvestment program.

Non-cash collateral received in respect of securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the amounts of non-cash collateral received by the Fund in respect of securities lending transactions held by a custodian, as at the balance sheet date.

Custodian	Market Value of Non-cash collateral received Securities lending
State Street International GmbH, Luxembourg Branch	2 413 719 249,00
Total (EUR)	2 413 719 249,00

Non-cash collateral received from the counterparty by way of a security collateral arrangement in relation to OTC derivatives (including total return swaps) is kept in a segregated account.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (SFDR)

For each Sub-Fund that has (E) environmental and (S) social characteristics and promotes investment into assets which follow good governance (G) practices in accordance with articles 8 and 9 of the Sustainable Finance Disclosure Regulation ("SFDR"), this part of the Annual Report gathers the periodic information set out according to the template provided in the SFDR regulatory technical standards.

For the rest of the sub-funds, Eurizon integrates sustainability risk analysis into its investment process pursuant to Article 6 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of November 27, 2019 (the "SFDR Regulation") on sustainability reporting in the financial services industry.

Without prejudice to the integration of sustainability risk analysis into the investment process, the sub-funds do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020 (the "Taxonomy Regulation") on the establishment of a framework to encourage sustainable investment and amending Regulation (EU) 2019/2088. In this context, it should be noted that the investments underlying these Sub-Funds do not take into account the European Union's criteria for environmentally sustainable economic activities.

As at 31 December 2023, the following Sub-Funds are categorised article 8 under SFDR:

Eurizon Fund - Azioni Strategia Flessibile, Eurizon Fund - Italian Equity Opportunities, Eurizon Fund - Global Multi Credit, Eurizon Fund - SLJ Local Emerging Markets Debt, Eurizon Fund - Active Allocation, Eurizon Fund - Conservative Allocation, Eurizon Fund - Bond Flexible, Eurizon Fund - Bond Corporate Smart ESG, Eurizon Fund - Equity USA, Eurizon Fund - Equity China A, Eurizon Fund - Equity China Smart Volatility, Eurizon Fund - Equity Emerging Markets Smart Volatility, Eurizon Fund - Equity World Smart Volatility, Eurizon Fund - Bond Inflation Linked, Eurizon Fund - Sustainable Japan Equity, Eurizon Fund - Equity High Dividend, Eurizon Fund - Absolute Return Solution, Eurizon Fund - Equity Circular Economy, Eurizon Fund - Bond Euro High Yield, Eurizon Fund - Bond Emerging Markets in Local Currencies ESG, Eurizon Fund - Flexible Europe Strategy, Eurizon Fund - Flexible US Strategy, Eurizon Fund - Equity USA ESG Leaders LTE, Eurizon Fund - Equity World ESG Leaders LTE, Eurizon Fund - Equity USA ESG LTE, Eurizon Fund - Equity Europe ESG LTE, Eurizon Fund - Equity Planet, Eurizon Fund - Equity Innovation, Eurizon Fund - Equity People, Eurizon Fund - Asian Equity Opportunities, Eurizon Fund - China Opportunity, Eurizon Fund - Euro Emerging Markets Bonds, Eurizon Fund - Flexible Allocation, Eurizon Fund - Sustainable Multiasset, Eurizon Fund - Global Bond Inflation Linked, Eurizon Fund - Global Equity Infrastructure, Eurizon Fund - European Union Bonds, Eurizon Fund - Bond Corporate EUR, Eurizon Fund - Top European Research, Eurizon Fund - Equity North America LTE, Eurizon Fund - Equity Europe LTE, Eurizon Fund - Equity Euro LTE, Eurizon Fund - Equity Japan LTE, Eurizon Fund - Equity Emerging Markets LTE, Eurizon Fund - Equity Pacific ex-Japan LTE, Eurizon Fund - Equity Italy Smart Volatility, Eurizon Fund - Global Bond, Eurizon Fund - Absolute High Yield, Eurizon Fund - Sustainable Global Equity, Eurizon Fund - Bond Aggregate EUR, Eurizon Fund - Bond Corporate EUR Short Term, Eurizon Fund - Bond High Yield, Eurizon Fund - Bond Emerging Markets, Eurizon Fund - Equity Small Mid Cap Europe, Eurizon Fund - Absolute Prudent, Eurizon Fund - Absolute Active, Eurizon Fund - Bond Aggregate EUR Short Term, Eurizon Fund - Bond EUR Long Term LTE, Eurizon Fund - Bond EUR Short Term LTE, Eurizon Fund - Bond EUR All Maturities LTE, Eurizon Fund - Bond EUR 1-10 y LTE, Eurizon Fund - Cash EUR, Eurizon Fund - Bond Short Term EUR T1, Eurizon Fund - Money Market EUR T1, Eurizon Fund - Bond EUR Medium Term LTE, Eurizon Fund - Global Bond Aggregate, Eurizon Fund - Equity Emerging Markets, Eurizon Fund - Equity Real Estate, Eurizon Fund - Global Cautious Allocation, Eurizon Fund - Global Allocation.

As at 31 December 2023, the following Sub-Funds have sustainable investments as their objective as per Article 9 of the SFDR:

Eurizon Fund - Absolute Green Bonds, Eurizon Fund - Green Euro Credit.

Product name: Eurizon Fund - Bond EUR Short Term LTE

Legal entity identifier: 549300N1TOHD2XCCBD19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.67% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 87.91%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 0.32% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.35% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.94% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.49% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 5.65% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 83.82%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 5.07% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.58% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1.45% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 86.73%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.45% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investment

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Bond EUR All Maturities LTE**

Legal entity identifier: **549300XLYE9ECP2TRS22**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **3.26%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

- 85.94%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 3.26% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investment

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

● How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the broad market index?**

Legal entity identifier: **549300GXZQ1AUR953E73**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.12% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.48

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Benchmark: 7.32

The ESG score is calculated on a scale of 0 to 10

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.19

- Benchmark: 7.15

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 21.86% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 27.26% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.71% of total investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 28.37% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 98.38%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 1.29%</p>	<p><input type="checkbox"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent was the sustainable investment objective of this financial product met?

Eurizon Capital S.A. has adopted a sustainable investment selection methodology based on the 17 Sustainable Development Goals (so called "Sustainable Development Goals" or "SDGs") promoted by the United Nations. This methodology, in accordance with good governance practices, aims to propose to select securities issued by companies whose products/services and processes contribute to one or more of the SDGs, provided that said investments do not cause any significant harm to any of the environmental or social objectives set forth in Regulation (EU) 2019/2088.

In addition, Eurizon Capital S.A. considers as sustainable investments, financial instruments of a bond/monetary nature aimed at financing projects that are environmentally friendly and have a positive social impact (green/sustainable bonds).

Therefore, during the reporting period, Eurizon monitored investments that are sustainable in accordance with Regulation (EU) 2019/2088 and investments in bond issues whose proceeds are intended to finance environmental and/or social projects.

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Impact Investing: The fund adopts investment selection methodologies aimed at generating a social or environmental impact along with a measurable financial return.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Impact investing: weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).

- 98.48%

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

Impact investing:

- 97.92%

● How did the sustainable investments not cause significant harm to any sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Share of consumption of non-renewable energy
- Share of production of non-renewable energy
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Investee countries subject to social violations

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

● **In which economic sectors were the investments made?**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In fossil gas
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: : 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU taxonomy and is 98.38% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund had a socially sustainable investment share of 1.29% of total investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Not sustainable”: (i) any other assets according to the fund's investment policy, (ii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, (iii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure according to its investment policy and its sustainable investment objective; (iv) instruments and techniques only used for efficient fund management as detailed in the fund's prospectus.

However “#2 Not sustainable” investments do not prevent the attainment of the sustainable investment objective. Given the nature of these investments, minimum environmental or social safeguards are not applicable

What actions have been taken to attain the sustainable investment objective during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of the sustainable investment objective is ensured through specific investment limits.

How did this financial product perform compared to the reference sustainable benchmark?

The specific index designated as a reference benchmark to meet the sustainable investment objective of the fund is the following: 100% Bloomberg MSCI Euro Corporate Green Bond 5% Capped Index

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

● How did the reference benchmark differ from a broad market index?

The Bloomberg MSCI Euro Corporate Green Bond 5% Capped Index is based on Bloomberg Euro Corporate Aggregate Index and it is designed for investors who are looking to generate positive social impact through their investments.

The index includes green bonds that are fixed-income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds. Use of proceeds and project bonds are considered eligible if the use of proceeds falls within at least one of seven eligible environmental categories defined by MSCI ESG Research (alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building, climate adaption, and other).

The index offer investors an objective and robust measure of the market for fixed income securities issued to fund projects with direct environmental benefits.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (

<https://www.msci.com/our-solutions/indexes/bloomberg-msci-esg-fixed-income-indexes>).

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 25.21% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 39.29% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund’s benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI EMU ESG Universal Index.

- **How does the reference benchmark differ from a broad market index?**

The MSCI EMU ESG Universal Index is based on the MSCI EMU Index, its parent index, and includes large and mid-cap securities across 10 Developed Markets (DM) in the EMU*. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI EMU index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

*DM countries in the EMU include: Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

ESG Index integration: 99.51%

- **How did this financial product perform compared with the reference benchmark?**

Sustainability indicators performance with reference to the benchmark:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

ESG Index integration: Not Applicable

- **How did this financial product perform compared with the broad market index?**

Sustainability indicators performance with reference to the broad market index:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

Product name: **Eurizon Fund - Equity Europe LTE**

Legal entity identifier: **549300NIVJZIDZQHY759**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.69% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Index integration: percentage of assets invested in issuers present in the benchmark.

- 97.85%.

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Index integration:

- 98.99%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

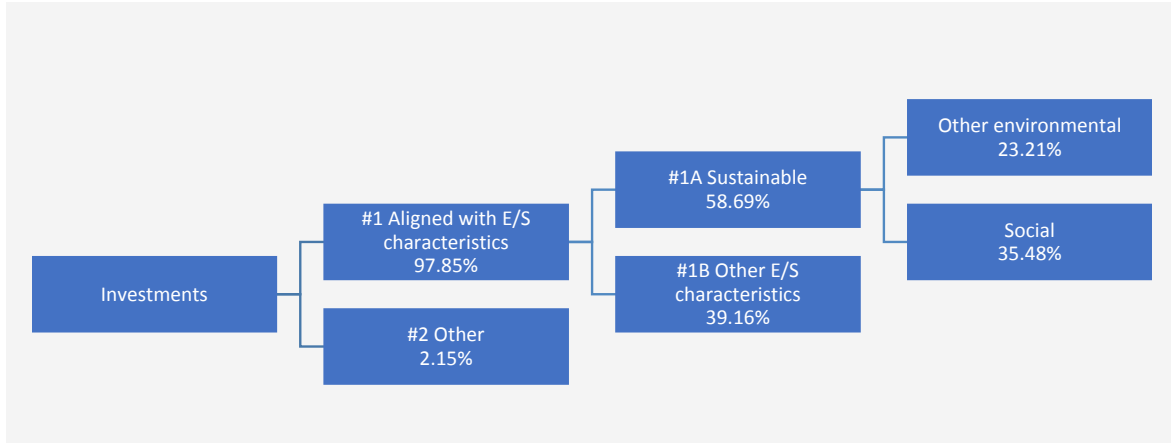

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.21% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 35.48% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund’s benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Europe ESG Universal Index.

- **How does the reference benchmark differ from a broad market index?**

The MSCI Europe ESG Universal Index is based on the MSCI Europe Index, its parent index, and includes large and mid-cap securities across 15 Developed Markets (DM) in Europe*. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Europe index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

* DM countries include: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the UK

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.67% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 8.07
- Benchmark: 7.89

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.88
- Benchmark: 7.70

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 22.88% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 35.79% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Equity USA ESG Leaders LTE**

Legal entity identifier: **549300GJB82FY5QSQF28**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes		<input type="checkbox"/> <input checked="" type="radio"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.97% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Index integration: percentage of assets invested in issuers present in the benchmark.

- 99.41%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Index integration:

- 99.21%

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

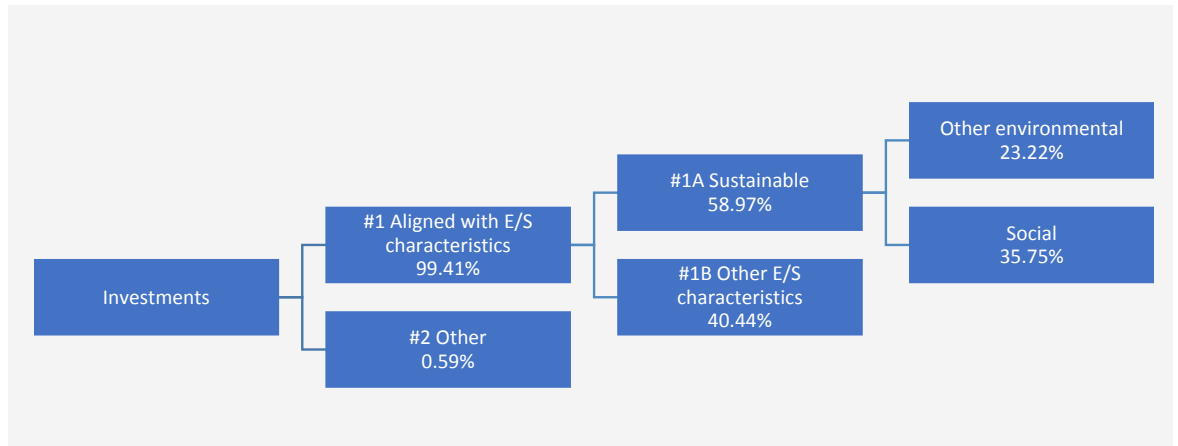

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP COMMON STOCK USD.00000625	COMPUTING AND IT	9.37	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.22% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 35.75% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund’s benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI USA ESG Leaders Index.

As of September 11, 2023, the fund adopted the MSCI USA ESG Leaders 10/40 version of the parent MSCI USA ESG Leaders index

- **How does the reference benchmark differ from a broad market index?**

The MSCI USA ESG Leaders Index is based on MSCI USA Index.

The MSCI USA ESG Leaders Index is a capitalization weighted index that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers. MSCI USA ESG Leaders Index consists of large and mid cap companies in the US market. The Index is designed for investors

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market. The index is a member of the MSCI ESG Leaders Index series. Constituent selection is based on data from MSCI ESG Research.

As from September 11, 2023, the fund adopted the MSCI USA ESG Leaders 10/40 version of the parent MSCI USA ESG Leaders index according to which the weight of a single issuer cannot exceed 10% of the index and the total of the issuers than are weighted more than 5% cannot be greater than 40% of the index.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-leaders-indexes>).

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 45.65% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.27%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.79
- Benchmark: 6.60

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.56
- Benchmark: 6.35

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 16.27% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 29.38% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Equity North America LTE**

Legal entity identifier: **549300VRUVDGNC6X5K46**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.49% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.04%

ESG Index integration: percentage of assets invested in issuers present in the benchmark.

- 97.92%.

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Index integration:

- 95.37%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 18.27% of total investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 32.22% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the “Stewardship Report”, the “Report on participation at shareholder meetings of companies with securities under portfolios” and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI North America ESG Universal Index.

● How does the reference benchmark differ from a broad market index?

The MSCI North America ESG Universal Index is based on the MSCI North America Index, its parent index, and includes large and mid-cap securities of the US and Canada markets. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI North America Index.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.80% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 45.03% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Japan ESG Universal Index.

● How does the reference benchmark differ from a broad market index?

The MSCI Japan ESG Universal Index is based on the MSCI Japan Index, its parent index, and includes large and mid-cap securities of the Japanese equity markets. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Japan Index.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72.82% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Index integration: percentage of assets invested in issuers present in the benchmark.

- 99.10%.

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Index integration:

- 94.80%

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 24.10% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 48.72% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Pacific ex Japan ESG Universal Index.

● How does the reference benchmark differ from a broad market index?

The MSCI Pacific ex Japan ESG Universal Index is based on the MSCI Pacific ex Japan Index, its parent index, and includes large and mid-cap companies across 4 of 5 developed markets countries in the Pacific region (excluding Japan)*. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Pacific ex Japan Index.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

*DM countries in the MSCI Pacific ex Japan Index include: Australia, Hong Kong, New Zealand and Singapore.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.62% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.53% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Emerging Markets ESG Universal Index.

● How does the reference benchmark differ from a broad market index?

The MSCI Emerging Markets ESG Universal Index is based on the MSCI Emerging Markets Index, its parent index, and includes large and mid-cap securities across 25 Emerging Markets (EM) countries*. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Emerging Markets index.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-universal-indexes>).

* EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.05%

Issuer exclusion: 0.05%

Issuer exclusion: 0.88%

ESG Index integration: Not Applicable

- **How did this financial product perform compared with the broad market index?**

Sustainability indicators performance with reference to the broad market index:

Sector exclusion: 2.00%

Issuer exclusion: 2.14%

ESG Index integration: Not Applicable

Product name: **Eurizon Fund - Equity World ESG Leaders LTE**

Legal entity identifier: **549300IKJ33RCTJXWG19**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes		<input type="checkbox"/> <input checked="" type="radio"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 60.81% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Index integration: percentage of assets invested in issuers present in the benchmark.

- 98.97%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Index integration:

- 99.06%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios.

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.76% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.05% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers not included in the fund’s benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the “Stewardship Report”, the “Report on participation at shareholder meetings of companies with securities under portfolios” and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI World ESG Leaders Index.

- **How does the reference benchmark differ from a broad market index?**

The MSCI World ESG Leaders Index is based on MSCI World Index.

The MSCI World ESG Leaders Index is a capitalization weighted index that provides exposure to companies with high Environmental, Social and Governance (ESG) performance relative to their sector peers. MSCI World ESG Leaders Index is constructed by aggregating the following regional Index MSCI Pacific ESG Leaders Index, MSCI Europe & Middle East ESG Leaders Index, MSCI Canada ESG Leaders Index and MSCI USA ESG Leaders Index. The parent index is MSCI World Index, which consists of large and mid-cap companies in 23 Developed Markets

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Countries*. The Index is designed for investors seeking a broad, diversified sustainability benchmark with relatively low tracking error to the underlying equity market. The index is a member of the MSCI ESG Leaders Index series. Constituent selection is based on data from MSCI ESG Research.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (<https://www.msci.com/msci-esg-leaders-indexes>).

* Developed Markets countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.30% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.47

- Benchmark: 7.35

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.42

- Benchmark: 7.13

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 26.09% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 33.21% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

● How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Equity Italy Smart Volatility**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.10% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.09
- Benchmark: 6.98

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. ● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.85
- Benchmark: 6.77

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

- Fund: 5.28
- Benchmark: 4.62

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 12.90% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 25.06% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.38% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.02%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 5.87
- Benchmark: 5.55

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.56% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 33.82% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproversiders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproversiders.

- 0.10%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.14
- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.20
- Benchmark: 6.67

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 20.98% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 36.13% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.84% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 81.79%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.96% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 1.88% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 4.11% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer's country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer's country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Sovereign ESG Integration: percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 93.07%

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 2.06% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 2.05% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.94% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 1.78% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1.34% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.40

- Benchmark: 6.30

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.39

- Benchmark: 6.34

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.32% of total investments.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.02% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 7.25% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 8.15% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Legal entity identifier: **549300YLU5Z1JQP8CC18**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.64% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.12

- Benchmark: 6.84

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.92

- Benchmark: 6.82

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 24.39% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 14.25% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.

 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 12.97% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 52.02% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.01% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.18

- Benchmark: 5.94

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.29

- Benchmark: 6.07

The ESG score is calculated on a scale of 0 to 10

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 1.34% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 1.67% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.40% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.41

- Benchmark: 6.22

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Not Applicable

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 8.47% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 8.93% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes		<input type="radio"/> <input checked="" type="checkbox"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.90% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.29

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Benchmark: 6.18

The ESG score is calculated on a scale of 0 to 10

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.43

- Benchmark: 6.41

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 0.89% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.01% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 19.69% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 25.69% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

● How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Bond High Yield**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.80% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.42

- Benchmark: 6.08

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.05%

ESG Score integration:

- Fund: 6.01

- Benchmark: 5.92

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 18.52% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 24.28% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The ESG score is calculated on a scale of 0 to 10

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 2.17% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 1.88% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

● How did this financial product perform compared with the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes		<input checked="" type="radio"/> <input type="checkbox"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.32% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 5.66

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Benchmark: 5.51

The ESG score is calculated on a scale of 0 to 10

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 5.80

- Benchmark: 5.65

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 3.00% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.32% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.20%

ESG Score integration:

- Fund: 5.50

- Benchmark: 5.35

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 5.31% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 2.74% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes		<input type="checkbox"/> <input checked="" type="radio"/> No	
<input type="checkbox"/>	It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/>	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 2.76% of sustainable investments
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/>	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/>	<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/>		<input type="checkbox"/>	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 5.64

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Benchmark: 5.44

The ESG score is calculated on a scale of 0 to 10

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 5.97

- Benchmark: 5.55

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 0.80% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 1.96% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.44
- Benchmark: 6.39

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: December 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 3.77% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 5.78% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.10% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.65
- Benchmark: 6.60

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.48% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.64
- Benchmark: 6.56

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.50
- Benchmark: 6.36

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 19.26% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.22% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 54.45% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective

Product name: **Eurizon Fund - Equity Small Mid Cap Europe**

Legal entity identifier: **549300Y48WIIWTP5Z179**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72.20% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.86
- Benchmark: 7.74

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.71
- Benchmark: 7.66

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.37% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 44.83% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.45% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.06%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.69
- Benchmark: 6.60

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. Product name: **Eurizon Fund - Sustainable Japan Equity**

Legal entity identifier: **5493004XOURTUGX04P73**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.40% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.27
- Benchmark: 6.97

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.67
- Benchmark: 6.38

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 20.67% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 41.73% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 9.47% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 25.51% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53.08% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.01
- Benchmark: 5.76

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.13%

ESG Score integration:

- Fund: 5.75
- Benchmark: 5.62

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 18.57% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.51% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 12.24% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 24.47% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Product name: **Eurizon Fund - Global Equity Infrastructure**

Legal entity identifier: **549300SYG2YH766FGV02**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.74% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.41

- Benchmark: 7.02

The ESG score is calculated on a scale of 0 to 10

Carbon footprint: direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO₂) generated by the investee issuers expressed as weighted average of the CO₂ intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio

- Fund: 827.75

- Benchmark: 1079.48

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.52

- Benchmark: 7.00

The ESG score is calculated on a scale of 0 to 10

Carbon footprint:

- Fund: 861.34

- Benchmark: 1149.56

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 13.74% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 36.00% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Eurizon Fund - Sustainable Global Equity**

Legal entity identifier: **549300RNJ0W1IVOBL073**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.92% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
--	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.80

- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

Carbon footprint: direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO₂) generated by the investee issuers expressed as weighted average of the CO₂ intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio

- Fund: 56.38

- Benchmark: 121.23

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.47

- Benchmark: 6.67

The ESG score is calculated on a scale of 0 to 10

Carbon footprint:

- Fund: 83.32

- Benchmark: 150.21

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

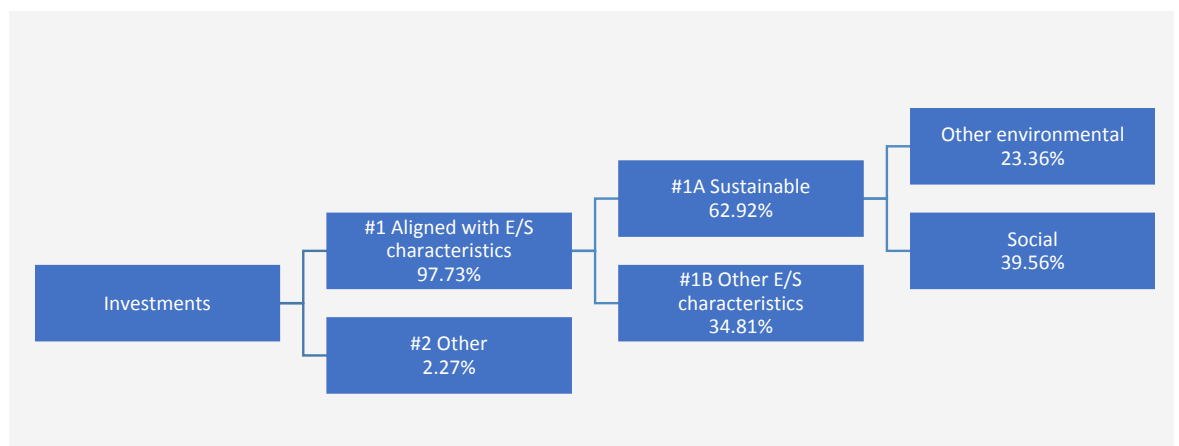

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

● To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.36% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 39.56% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Eurizon Fund - Equity Planet**

Legal entity identifier: **549300IKPFWCH028ZQ26**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ____%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ____%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.27% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.38

- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

Carbon footprint: direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO₂) generated by the investee issuers expressed as weighted average of the CO₂ intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio

- Fund: 89.90

- Benchmark: 121.22

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.43

- Benchmark: 6.67

The ESG score is calculated on a scale of 0 to 10

Carbon footprint:

- Fund: 111.15

- Benchmark: 150.21

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

● To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 29.30% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 31.97% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.15% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.13%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.12
- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 26.43% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 28.72% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.35% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.13%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.23
- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.11
- Benchmark: 6.67

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.03% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.67

- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

Carbon footprint: direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO₂) generated by the investee issuers expressed as weighted average of the CO₂ intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio

- Fund: 71.16

- Benchmark: 121.20

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

The ESG score is calculated on a scale of 0 to 10

Carbon footprint:

- Fund: 91.95

- Benchmark: 154.76

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

● To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.02% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 38.01% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Eurizon Fund - Equity High Dividend**

Legal entity identifier: **54930019VNMHY4HB4P36**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.68% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.22
- Benchmark: 6.93

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.07
- Benchmark: 6.73

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **91.58%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.07
- Benchmark: 5.87

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● **...and compared to previous periods?**

Not Applicable

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: December 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In nuclear energy
 No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 29.12% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 62.46% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 31.97% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.96

- Investment Universe: 6.67

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

--	--

To what extent was the sustainable investment objective of this financial product met?

Eurizon Capital S.A. has adopted a sustainable investment selection methodology based on the 17 Sustainable Development Goals (so called "Sustainable Development Goals" or "SDGs") promoted by the United Nations. This methodology, in accordance with good governance practices, aims to propose to select securities issued by companies whose products/services and processes contribute to one or more of the SDGs, provided that said investments do not cause any significant harm to any of the environmental or social objectives set forth in Regulation (EU) 2019/2088.

In addition, Eurizon Capital S.A. considers as sustainable investments, financial instruments of a bond/monetary nature aimed at financing projects that are environmentally friendly and have a positive social impact (green/sustainable bonds).

Therefore, during the reporting period, Eurizon monitored investments that are sustainable in accordance with Regulation (EU) 2019/2088 and investments in bond issues whose proceeds are intended to finance environmental and/or social projects.

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

Impact Investing: The fund adopts investment selection methodologies aimed at generating a social or environmental impact along with a measurable financial return.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

Impact investing: weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).

- 96.72%

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

- 0.00%

Issuer exclusion:

- 0.00%

Impact investing:

- 95.20%

● How did the sustainable investments not cause significant harm to any sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Share of consumption of non-renewable energy
- Share of production of non-renewable energy
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Investee countries subject to social violations

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

● **In which economic sectors were the investments made?**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
 In fossil gas In fossil gas
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: : 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU taxonomy and is 97.07% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund had a socially sustainable investment share of 0.94% of total investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Not sustainable”: (i) any other assets according to the fund's investment policy, (ii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, (iii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure according to its investment policy and its sustainable investment objective; (iv) instruments and techniques only used for efficient fund management as detailed in the fund's prospectus.

However “#2 Not sustainable” investments do not prevent the attainment of the sustainable investment objective. Given the nature of these investments, minimum environmental or social safeguards are not applicable

What actions have been taken to attain the sustainable investment objective during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of the sustainable investment objective is ensured through specific investment limits.

How did this financial product perform compared to the reference sustainable benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.02% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.62

- Investment Universe: 6.29

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.01%

ESG Score integration:

- Fund: 6.20

- Investment Universe: 5.96

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 11.93% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 19.43% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

● How did this financial product perform compared with the reference benchmark?

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Absolute Return Solution**

Legal entity identifier: **549300TTPCTVI8G4LP50**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.51% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.02%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.95
- Investment Universe: 6.51

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.02%

ESG Score integration:

- Fund: 6.90
- Investment Universe: 6.53

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 10.03% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 13.48% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.88% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.78
- Investment Universe: 6.72

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.54
- Investment Universe: 6.52

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 12.64% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 15.24% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Product name: **Eurizon Fund - Azioni Strategia Flessibile**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.03% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its investment universe, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 7.13

- Investment Universe: 6.92

The ESG score is calculated on a scale of 0 to 10

Carbon footprint: direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO₂) generated by the investee issuers expressed as weighted average of the CO₂ intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio

- Fund: 79.30

- Investment Universe: 113.05

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.05

- Investment Universe: 6.76

The ESG score is calculated on a scale of 0 to 10

Carbon footprint:

- Fund: 64.04

- Investment Universe: 140.40

Value represents tons of carbon dioxide (CO₂) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO₂ emissions generated by issuers

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

● To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 15.26% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 23.77% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Eurizon Fund - Bond Flexible**

Legal entity identifier: **549300ZVWJDYNGILI089**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 26.76% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.96

- Investment Universe: 6.17

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.81

- Investment Universe: 6.07

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 20.59% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 6.17% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 20.82% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 4.33
- Investment Universe: 2.65

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.07%

ESG Score integration:

- Fund: 4.45
- Investment Universe: 2.78

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

No

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 7.39% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 13.43% of total investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under "#2 Other", there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.27% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 6.92
- Investment Universe: 6.52

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.60
- Investment Universe: 6.41

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 21.65% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 15.62% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **21.00%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.20
- Investment Universe: 6.55

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.51
- Investment Universe: 6.48

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by Eurizon Capital S.A.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

● In which economic sectors were the investments made?

● To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

- Yes:
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

However, the fund has invested in activities considered environmentally sustainable, which are entirely not aligned with the EU Taxonomy, to the extent of 9.66% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 11.34% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **Eurizon Fund - Flexible Europe Strategy**

Legal entity identifier: **5493001D7WLFSLQ8C47**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.11% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Fund: 7.30
- Investment Universe: 7.23

The ESG score is calculated on a scale of 0 to 10

The fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to <https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

● ...and compared to previous periods?

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 7.34
- Investment Universe: 7.15

The ESG score is calculated on a scale of 0 to 10

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sectoral exposure

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 14.26% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 25.57% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

<https://www.eurizoncapital.com/en/sustainability/stewardship-policy>

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.10% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not socially and environmentally responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in "critical" issuers (i.e. companies with the highest exposure to environmental, social and corporate governance risks, i.e. having a lower ESG sustainability rating level with a lower ESG sustainability rating level in the equity and bond investment universe) for which an escalation process is activated.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund's ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund's portfolio.

● How did the sustainability indicators perform?

Sector exclusion: weight in the fund of issuers operating in sectors deemed not to be "socially and environmentally responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.

- 0.00%

Issuer exclusion: weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.

- 0.00%

ESG Score integration: "ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies

- Fund: 6.39

- Investment Universe: 5.99

The ESG score is calculated on a scale of 0 to 10

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **...and compared to previous periods?**

Sustainability indicators performance reported in previous reference period (December 31, 2022):

Sector exclusion:

- 0.00%

Issuer exclusion:

- 0.00%

ESG Score integration:

- Fund: 6.43

- Investment Universe: 5.86

The ESG score is calculated on a scale of 0 to 10

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Eurizon Capital S.A. has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

● *How were the indicators for adverse impacts on sustainability factors taken into account?*

On the basis of controls it has defined, Eurizon Capital S.A. has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, Eurizon Capital S.A. believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

● *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by Eurizon Capital S.A. considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, Eurizon Capital S.A. assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The identification of the main negative effects of investment choices on sustainability factors and the definition of the related mitigation actions are an integral part of Eurizon Capital S.A.'s approach to sustainability. Eurizon has adopted a specific framework which provides for specific environmental, social and governance indicators for the assessment of the negative effects on the sustainability deriving from investments according to the characteristics and objectives of the individual financial products, which provide for the use of:

- negative screening of SRI and ESG factors, with the aim of mitigating the risks of exposure to companies operating in sectors considered as not "socially responsible" (including, in particular, the exposure to the fossil fuels sector and to the unconventional weapons sector) or characterized by critical environmental, social or corporate governance;
- positive integration of ESG factors in the analysis, selection and composition of financial portfolios (Score ESG).

In the best interest of its own financial products, Eurizon Capital S.A. commits (i) to continue to develop its own Sustainability Policies and (ii) to activate specific engagement actions with regard to the issuers that show significant deviations from specific environmental, social and governance indicators or that show significant negative effects on several indicators, with the aim of directing them towards improving their sustainability practices, evaluating, only as a last resort, the disposal of their investments.

On the basis of controls it defined, Eurizon Capital S.A. considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund, as here below indicated:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Year 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

- **What was the asset allocation?**

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments made in transitional and enabling activities?**

Transitional activities: 0.00%
 Enabling activities: 0.00%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period (December 31, 2022), the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 29.68% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 21.40% of total investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under “#2 Other”: (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Eurizon Capital S.A monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of environmental and/or social characteristics is monitored through specific investment limits. The fund also promoted proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information please refer to the "Stewardship Report", the "Report on participation at shareholder meetings of companies with securities under portfolios" and the Proxy Voting Dashboard available at

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

● How does the reference benchmark differ from a broad market index?

Not Applicable

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the reference benchmark?**

Not Applicable

- **How did this financial product perform compared with the broad market index?**
