What is this product?

Type

The product is a share class of the sub-fund Franklin Euro Short Duration Bond Fund (the "Fund") which is part of Franklin Templeton Investment Funds, an open-ended investment company with variable capital (SICAV), qualifying as a UCITS.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The Fund is classified as Article 8 under EU Sustainable Finance Disclosure Regulation and aims to preserve capital and liquidity while seeking to maximize its investment return over the medium to long term.

Investment Policy

The Fund pursues an actively managed investment strategy and invests mainly in:

- short-term high quality debt securities denominated in Euro issued by European sovereign issuers and European and/or non-European corporations

The Fund can invest to a lesser extent in:

- lower-quality debt securities such as non-investment grade securities or securities in default (limited to 10% of the Fund's assets)
- debt securities denominated in non-Euro currencies (limited to 10% of the Fund's assets)
- credit-linked securities and structured products
- derivatives for hedging, efficient portfolio management and investment purposes
- convertible securities and up to 5% of the Fund's assets in contingent convertible securities

In making investment decisions, the Fund's investment team refers to detailed analyses of economic trends in various countries and individual companies.

The Fund employs a proprietary environmental, social and governance (ESG) rating methodology with the aim to avoid investment in issuers that

are lagging in the transition to support a low-carbon economy. The Fund excludes from its portfolio issuers that score in the bottom 20% of its investable universe. The Fund also applies specific exclusions and will not invest, inter alia, in issuers that repeatedly and seriously violate the United Nations Global Compact, manufacture controversial weapons or tobacco, or exceed certain thresholds on the use of fossil fuels.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

The benchmark of the Fund is the Bloomberg Euro Aggregate (1-3Yr) Index. The benchmark is used solely as a reference for Investors to compare against the Fund's performance, and the benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The Fund can deviate from the benchmark.

Share Class Policy

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

Processing of subscription and redemption orders

You may request the sale of your shares on any Dealing Day (as defined in the current prospectus of the Fund).

Intended retail investor

The Fund may appeal to investors looking to maintain a degree of capital preservation and liquidity, whilst maximising returns and income by obtaining exposure to short-term high quality debt securities of European sovereign and corporate issuers and willing to hold their investment over the medium term for a period of 3 to 5 years. The Fund is suitable for investors who do not need to have specific knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

	If you exit after 1 year	If you exit after 3 years

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
