### Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

### Objectives

#### Investment Objective

The Fund aims to increase the value of its investments and, secondarily, to earn income over the medium to long term.

#### Investment Policy

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity and equity-related securities issued by companies of any size and in any country, including emerging markets, that are involved in the mining, processing or trading of gold and other precious metals

The Fund can invest to a lesser extent in:

- securities issued by private companies and Private Investments in Public Equity (limited to 10% of assets) and special purpose acquisition companies (limited to 5% of assets)

The investment team looks for equity securities that it believes will benefit from rising gold and other precious metals prices over the long term.

The benchmark of the Fund is the FTSE Gold Mines Index. The benchmark is used solely as a reference for Investors to compare against the Fund's performance, and the benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The Fund can deviate from the benchmark.

#### Share Class Policy

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

#### Processing of subscription and redemption orders

You may request the sale of your shares on any Dealing Day (as defined in the current prospectus of the Fund).

#### Intended retail Investor

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- SGD 20,000 is invested

	<b>If you exit after 1 year</b>	<b>If you exit after 5 years</b>
<b>Total costs</b>	1,521 SGD	4,093 SGD
<b>Annual cost impact (*)</b>	7.6%	3.1% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.6% before costs and 5.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
