What is this product?

Type

The product is a share of the sub-fund Franklin K2 Alternative Strategies Fund (the "Fund") which is part of Franklin Templeton Investment Funds, an open-ended investment company with variable capital (SICAV), qualifying as a UCITS.

Term

The Fund has no maturity date. The Fund could be closed under the conditions led down in the current prospectus of the Fund.

Objectives

Investment Objective

The Fund, which pursues an actively managed investment strategy, aims to increase the value of its investments over the medium to long term and to keep share price fluctuations lower than those for equity markets generally.

Investment Policy

The Fund can invest in any asset, and use any investment technique, that is permitted to a UCITS fund, including those that are generally considered to be high risk.

The Fund can invest in any kind of equity securities and debt securities from any country or type of issuer. It can invest directly or may gain exposure to investments indirectly, such as through derivatives, participatory notes, or by investing in other UCITS or UCIs. It can take direct or indirect long or short positions in securities, currencies, interest rates, and other investments or financial instruments. It may also take indirect long or short positions in commodities. The Fund may engage in derivative transactions that have the effect of magnifying investment gains or losses. The Fund uses high quantity of listed and unlisted derivatives for hedging, efficient portfolio management and/or investment purposes. The Fund may engage in active and frequent trading as part of its investment strategies. The Fund may also invest up to 10% of its net assets into risk-linked securities, generally catastrophe and natural disaster risks, that transfer a specified set of risks from an issuer to investors ("catastrophe bonds").

The lead manager assigns portions of the Fund's assets to multiple outside management teams (selected and monitored by the lead manager), each of which uses an alternative investment strategy to manage its portion. These strategies may seek to benefit from, for instance, global economic trends, corporate mergers or reorganizations, pricing variations between markets or securities, industries or geographic regions with above-average growth. The Fund's overall performance will be the result of the performance of the different strategies involved and the portion of the Fund's assets assigned to such strategies. The Fund may also invest up to 10% of its assets in securities issued by private companies and Private Investments in Public Equity and up to 5% in special purpose acquisition companies.

Benchmarks: ICE BofA US 3-Month Treasury Bill Index and HFRX Global Hedge Fund Index. The benchmarks are used solely as a reference for Investors to compare against the Fund's performance. The Fund is not obliged to hold any of the benchmarks constituents and may indeed invest up to 100% of its net assets outside these benchmarks.

Share Class Policy

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

Processing of subscription and redemption orders

You may request the sale of your shares on any Luxembourg business day.

Intended retail Investor

The Fund may appeal to investors looking to capital appreciation by obtaining exposure to a wide range of eligible securities and derivative instruments benefiting from several "alternative" strategies and willing to hold their investment over the medium to long term for a minimum period of 3 to 5 years. The Fund is suitable for investors who have some knowledge and/or experience of financial markets with the understanding that they may not get back the full amount invested in the Fund.

Depositary

J.P. Morgan SE, Luxembourg Branch

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will

lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. Due to the nature of the Fund's investments, the Fund's performance can fluctuate over time.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the PRIIP not included in the summary risk indicator:

- Derivative risk

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:

3 years

What happens if Franklin Templeton International Services S.à r.l. is unable to pay out?

Franklin Templeton International Services S.à r.l. ("FTIS") is the management company of the Fund. The assets of the Fund are held separately by the Fund's appointed depositary, i.e. J.P. Morgan SE, Luxembourg branch. The depositary is liable to the Fund or its shareholders for losses caused by its negligent or intentional failure to fulfill its safekeeping or record-keeping obligations. (Cash could however be lost in case of default of the depositary or its delegates).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	253 USD	844 USD
Annual cost impact (*)	2.5%	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.6% before costs and 4.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.
