

Franklin Global Fundamental Strategies Fund

Class A (Ydis) EUR • ISIN LU0343523998 • A sub-fund of Franklin Templeton Investment Funds

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Global Fundamental Strategies Fund (the "Fund") aims to increase the value of its investments and, secondarily, to earn income over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity securities issued by companies of any size that are leaders in innovation, take advantage of new technologies, have superior management and benefit from new industry conditions in the dynamically changing global economy, located in any country, including emerging markets
- debt securities of any quality (including low rated or sub-investment grade securities) issued by governments, government-related entities and corporations located in any country

The Fund can invest to a lesser extent in:

- convertible securities and up to 5% of the Fund's assets in contingent convertible securities
- derivatives for hedging, efficient portfolio management and investment purposes
- units of other mutual funds (limited to 10% of assets)
- mortgage- and asset-backed securities (limited to 10% of assets)
- Mainland China through the Bond Connect or directly (limited to 30% of assets)

The investment team aims to divide the Fund's assets among four different investment strategies: two that look for equity securities worldwide (representing approximately 60% of assets) and two that focus on debt securities worldwide (representing approximately 40% of assets).

The Fund is not managed in reference to a benchmark.

You may request the sale of your shares on any Luxembourg business day.

For the distribution share class shown in this document, dividend income is distributed to shareholders.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

Terms to Understand

Asset-backed securities: Debt securities whose value and income payments are derived from a pool of underlying assets.

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity and debt securities of companies around the world, including emerging markets. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate considerably over time.

Risks materially relevant not adequately captured by the indicator:

Chinese Market risk: In addition to typical risks linked to Emerging Markets,

investments in China are subject to economic, political, tax and operational risks specific to the Chinese Market. Please also refer to the prospectus for China QFII risk, Bond Connect risk and Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk.

Credit risk: the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.
