What is this product?

Type

Shares of a sub-fund of Fidelity Funds SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term

This fund is open-ended.

Objectives

Objective: The fund aims to achieve capital growth over time and provide a high level of income.

Investment Policy: The fund invests at least 70% of its assets, in high-yielding below investment grade debt securities of issuers, or in high-yielding debt securities of below investment grade issuers, that do most of their business in the Asian region, including emerging markets. These securities will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate).

hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

Investment Process: In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager takes into account

Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Benchmark: J.P. Morgan Asia Credit Non-Investment Grade Index.

Used for: investment selection, risk monitoring and performance comparison.

Base Currency: USD

Risk Management Method: Commitment.

Additional Information: You may sell (redeem) some or all of your Shares on any Valuation Day. Income earned by the fund is reinvested in additional shares or paid to shareholders on request. This key information document describes a sub-fund of Fidelity Funds. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Funds.

The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the prospectus and latest reports and accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.A.

These documents and details of the Remuneration Policy are available via <https://www.fil.com>.

The Net Asset Value of the funds is available at the registered office of FIL Investment Management (Luxembourg) S.A., and at www.fidelityinternational.com.

Depository: Brown Brothers Harriman (Luxembourg) S.C.A.

Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds; who plan to hold their investment for a recommended holding period of at least 5 years; who seek capital growth and provide income over the recommended holding period; and who understand the risk of losing some or all of the capital invested.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at the early stage and you may get back less.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Additional risks: credit, emerging markets, interest rate, liquidity.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years Example investment : SGD 10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	5,190 SGD	4,490 SGD
	Average return each year	-48.1%	-14.8%
Unfavourable	What you might get back after costs	5,500 SGD	5,610 SGD
	Average return each year	-45.0%	-10.9%
Moderate	What you might get back after costs	10,190 SGD	11,730 SGD
	Average return each year	1.9%	3.2%
Favourable	What you might get back after costs	12,730 SGD	13,810 SGD
	Average return each year	27.3%	6.7%

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 10/2017 and 10/2022.

The moderate scenario occurred for an investment between 09/2016 and 09/2021.

The favourable scenario occurred for an investment between 02/2016 and 02/2021.

This product does not participate in an investor compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- SGD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	160 SGD	882 SGD
Annual cost impact (*)	1.6%	1.7% each year

(*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.9% before costs and 3.2% after costs.
