Investment Policy

- The fund invests in global bond markets, including in developed countries and emerging market countries.
- The fund invests significantly in various types of financial contracts, specifically derivatives (financial instruments whose value is derived from the value of other assets) to help achieve the fund's objective as well as to reduce risk, cost or to generate additional growth or income for the fund.

- The fund may invest in asset-backed securities and mortgage-backed securities, which are bonds that provide the bondholder with regular payments dependent on the cash-flow arising from a specified pool of assets such as interest and capital from mortgages or car loans. The fund will only invest in higher rated asset-backed securities. The fund may

purchase unsecured participations in or assignments of floating rate mortgages or other commercial loans that are liquid.

- The fund's assets may be exposed to currencies other than the US dollar, although a minimum of 50% of the fund will be denominated in, or hedged to, US dollar.
