

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Franklin MENA Fund

Class I(acc)USD<sup>1</sup> • ISIN LU0352133093

A sub-fund of Franklin Templeton Investment Funds

### Objectives and Investment Policy

Franklin MENA Fund (the "Fund") aims to increase the value of its investments over the medium to long term.

The Fund invests mainly in:

- equity securities issued by companies of any size located in, or doing significant business in, the Middle East and North Africa (MENA) region, including the region's emerging and frontier markets
- equity-related securities to gain access to countries within the MENA region

The Fund can invest to a lesser extent in:

- equity securities issued by governments and corporations of any size located in any country
- derivatives for hedging and investment purposes

The investment team evaluates each company, visiting regularly on-site to consider factors such as management quality, and aims to select securities with the potential to perform better than the equity market in the MENA region as a whole.

You may request the sale of your shares on any Luxembourg business day.

For accumulation share class shown in this document, dividend income is reinvested in the Fund.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information, Objectives and Investment Policies" of the current prospectus of Franklin Templeton Investment Funds.

#### Terms to Understand

**Derivatives:** Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

**Emerging markets:** Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

**Equity securities:** Securities that represent an ownership stake in a company.

**Frontier markets:** Typically, countries whose economies and securities markets are smaller, less accessible and/or at a very early stage of development even compared to emerging markets.

**Hedging:** A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

It may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in equity and equity-related securities of companies located in or doing significant business in the MENA (Middle East and North Africa) region. Such emerging markets have historically been subject to

significant price movements, frequently to a greater extent than equity markets globally. As a result, the performance of the Fund can fluctuate very significantly over relatively short time periods.

#### Risks materially relevant not adequately captured by the indicator:

**Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

**Currency Risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

**Operational Risk:** the risk of losses resulting from errors or failures arising from the people, systems, service providers or processes upon which the Fund depends.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton Investment Funds.

<sup>1</sup>This specific share class is only available to institutional investors.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	Not applicable
Exit charge	Not applicable

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the Fund over a year

Ongoing charges	1,58%
-----------------	-------

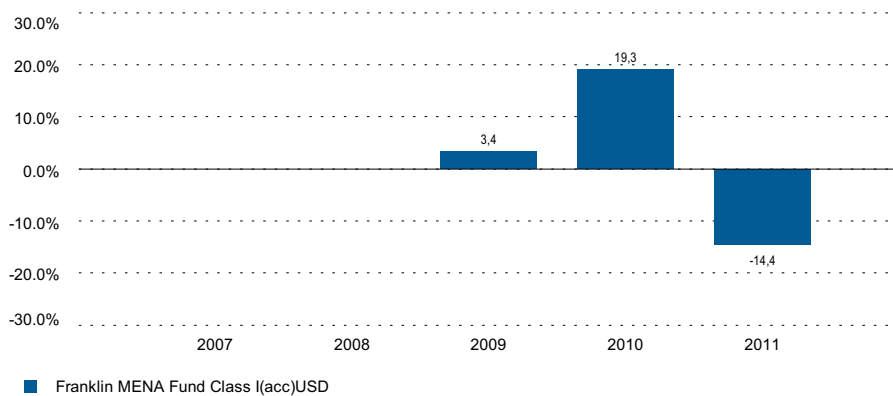

### Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
-----------------	----------------

The ongoing charges are based on the expenses for the year ending December 31, 2011. This figure may vary from year to year.

For detailed information about charges, please refer to the section "Share Classes" as well as Appendix E of the current prospectus of Franklin Templeton Investment Funds.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in the currency of the present share class.
- The Fund was launched in 2008.
