This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Franklin U.S. Dollar Liquid Reserve Fund

Class A(acc)USD • ISIN LU0128526901

A sub-fund of Franklin Templeton Investment Funds

### Objectives and Investment Policy

Franklin U.S. Dollar Liquid Reserve Fund (the “Fund”) aims to invest in debt securities that pay income over the short term.

The Fund invests mainly in:

- higher-quality debt securities and money market securities issued by governments and corporations of any nation worldwide, especially those denominated in U.S. dollars

The Fund will seek to remove currency risk by hedging non-U.S. dollar investments to the U.S. dollar. The investment team seeks to anticipate changes that may affect bond prices and to buy and sell investments accordingly.

The Fund maintains a weighted average maturity of one year or less. You may request the sale of your shares on any Luxembourg business day.

For accumulation share class shown in this document, dividend income is reinvested in the Fund.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

#### Terms to Understand

**Debt securities:** Securities representing the issuer’s obligation to repay a loan at a specified date and to pay interest.

**Hedging:** A strategy for totally or partially offsetting particular risks such as those arising from fluctuations in share prices, currencies or interest rates.

**Money market securities:** Short-term loans (typically of less than 397 days) made to their issuers by the purchasers of the security.

**Weighted average maturity:** A measure of the average time needed for securities in a portfolio to mature, weighted in proportion to the respective investments in such portfolio.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

It may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

#### Why is the Fund in this specific category?

The Fund invests mainly in debt securities issued by governments or

corporations of any country worldwide. Such securities have historically been subject to limited price movements with minimum exposure to changes in interest rates. The fund has historically proven to be highly stable and conservative in nature.

#### Risks materially relevant not adequately captured by the indicator:

**Counterparty Risk:** the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

**Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, non-investment-grade securities.

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest
