

Templeton Global Total Return Fund

Class C (Mdis) USD • ISIN LU0229943799 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Templeton Global Total Return Fund (the “Fund”) aims to maximise total investment return by achieving an increase in the value of its investments, earning income and realising currency gains over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- debt securities of any quality (including lower quality debt such as non-investment grade securities) issued by governments, government-related or corporate entities in any developed or emerging markets

The Fund can invest to a lesser extent in:

- mortgage- and asset-backed securities
- debt securities of supranational entities, such as the European Investment Bank
- Mainland China through the Bond Connect or directly (less than 30% of assets)
- securities in default (limited to 10% of assets)

The Fund can use derivatives for hedging, efficient portfolio management and/or investment purposes which are used as an active investment management instrument to gain exposure to markets. The flexible and opportunistic nature of the strategy allows the investment team to take advantage of different market environments. By using in-depth economic, country and security research including detailed risk analysis, Franklin Templeton’s large team of fixed income specialists seek to take advantage of

these differences by identifying and investing in fixed income securities with the strongest potential for income, capital growth and currency gain around the world. In making investment decisions, the investment team uses in-depth research about various factors that may affect bond prices and currency values. The Fund employs a proprietary Environmental, Social and Governance (ESG) rating methodology to assess government bond issuers and takes these ratings into consideration when building its investment portfolio.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

You may request the sale of your shares on any Luxembourg business day.

For the distribution share class shown in this document, dividend income is distributed to shareholders.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

The benchmark of the Fund is the Bloomberg Barclays Multiverse Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The portfolio’s assets and investment instruments have historically been subject to price movements due to market or instrument specific factors. As a result, the performance of the Fund can fluctuate over time.

Risks materially relevant not adequately captured by the indicator:

Credit risk: the risk of loss arising from default that may occur if an issuer fails

to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Derivative Instruments risk: the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Chinese Market risk: In addition to typical risks linked to Emerging Markets, investments in China are subject to economic, political, tax and operational risks specific to the Chinese Market. Please also refer to the prospectus for China QFII risk, Bond Connect risk and Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
