What is this product?

Type

The product is a share class of FTGF Royce US Smaller Companies Fund (the "Fund") which is part of the Franklin Templeton Global Funds plc, an investment company with variable capital incorporated with limited liability in Ireland and established as an umbrella fund with segregated liability between sub-funds.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The Fund seeks to achieve long-term capital appreciation.

Investment Policy

• The Fund invests at least two-thirds of its net asset value in equity securities issued by US companies that are listed or traded on regulated markets as set out in Prospectus with stock market capitalisations, measured at the time of investment, not greater than that of the largest company (based on market capitalisation) in the Russell 2000 Index at the time of its most recent reconstitution. Up to one-third of the Fund's net asset value may be invested in (i) equity securities of companies that are listed or traded on regulated markets with stock market capitalisations exceeding, measured at the time of investment, that of the largest company (based on market capitalisation) in the Russell 2000 Index at the time of its most recent reconstitution, (ii) debt securities issued or guaranteed by national governments and their agencies, instrumentalities and political subdivisions, (iii) corporate debt securities of issuers located in or whose securities are listed or traded on regulated markets and (iv) cash for efficient portfolio management purposes. The investment manager uses a value method in managing the Fund's assets. No more than 5% of the Fund's net asset value may be invested in debt securities rated below investment grade at the time of purchase.

• The Fund will invest in stocks that the portfolio managers believe are undervalued. No more than 10% of the Fund's assets will be invested in shares of issuers outside of the US.

• **Benchmark:** Russell 2000 Index

• **Manager's Discretion:** The Fund is actively managed and the investment manager is not constrained by the benchmark. The Fund uses the benchmark for performance comparison purposes and for the purpose of defining the market capitalisation of companies whose securities are eligible for investment by the Fund. While many of the Fund's investments will be components of the benchmark, the weightings of the Fund's holdings may differ materially from the weightings in the benchmark.

• **Transaction Costs:** The Fund bears costs in buying and selling investments, which may have a material impact on the Fund's performance.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Concentration risk
- Liquidity risk

For the other risks applicable to this Fund, please refer to the Primary Risks section of the Fund supplement contained within the prospectus of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	540 USD	2,172 USD
Annual cost impact (*)	5.4%	3.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.8% before costs and 4.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.
