Legg Mason Western Asset Multi-Asset Credit Fund

S Class CHF Distributing (A)

ISIN: IE0004XQPUI7

A sub-fund of: Legg Mason Global Funds plc

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve income and growth of the fund's value.

Investment Policy

- The fund is a multi-asset bond fund investing in global bonds and derivatives (financial instruments whose value is derived from the value of other assets).
- The fund may invest significantly in derivatives to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.
- The fund may invest in asset-backed securities, which are bonds that provide the bondholder with regular payments dependent on the cash-flow arising from a specified pool of assets such as interest and capital from mortgages or car loans.
- The fund may invest in companies located anywhere in the world, including emerging market countries.
- The fund may invest in higher rated, lower rated and unrated bonds.
- The fund holds investments issued in different currencies, the investment manager may or may not attempt to hedge currency exposure to try to profit from changes in the exchange rates between currencies or to reduce risk.

- The fund may invest up to 10% in contingent convertible bonds (bonds that can convert into equity upon a specified event taking place).

Share Class Policy

Manager's Discretion: The fund is actively managed and the investment manager is not constrained by a benchmark index. The investment manager has discretion in selecting investments within the fund's objective and investment policies.

Fund's Base Currency: US Dollar

Share Class Currency: Swiss Franc

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is CHF 50,000,000.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid annually to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the indicator is based on the internal risk limit adopted by the fund.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time.

Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in a diversified portfolio of bonds from various countries and sectors, along with the extensive use of derivatives, have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Derivatives: The Fund makes significant use of derivatives. The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the

markets, in which case the fund may not be able to minimise a loss on such investments.

Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Asset-backed securities: The timing and size of the cash-flow from asset-backed securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Convertible Securities: The value of convertible securities tends to decline as interest rates increase and increase as interest rates decline as well as be more volatile than non-convertible debt securities due to its relationship with the underlying equity. They are also generally not as senior as non-convertible debt securities and typically have lower ratings. Contingent convertible securities have additional risks to this due to more difficult valuation and discretionary coupon payments. There are no assurances of capital repayment.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.
