Legg Mason Western Asset Structured Opportunities Fund

Class D US\$ Distributing (M)

ISIN: IE00BF3FPC39

A sub-fund of: Legg Mason Global Funds plc

Managed by: Franklin Templeton International Services S.à r.l., part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve income and growth of the fund's value.

Investment Policy

- The fund invests at least 65% of its assets in various types of mortgage- and asset-backed securities located anywhere in the world, which are not issued by governments or guaranteed by US government agencies.
- Mortgage- and asset-backed securities are bonds that provide the bondholder with regular payments dependent on the cash-flow arising from interest and capital from a pool of mortgages or loans.
- The fund may invest significantly in various types of financial contracts, specifically derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.
- The fund may also invest up to 35% of its assets in mortgage- and asset-backed securities that are issued or guaranteed by government agencies, and in various types of bonds that are issued or guaranteed by corporations.
- The fund may invest in higher rated, lower rated and unrated bonds.
- The fund's investments may be denominated in currencies other than the base currency (US Dollar) to a maximum of 50%, although the

investment manager will attempt to hedge all non-US Dollar positions back to the base currency.

Manager's Discretion: The fund is actively managed and the investment manager is not constrained by a benchmark index. The investment manager has discretion in selecting investments within the fund's objective and investment policies.

Fund's Base Currency: US Dollar

Share Class Currency: US Dollar

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on the first business day after the close of the initial offer period, and then on every Wednesday when the New York Stock Exchange is open for business. In the event that the New York Stock Exchange is not open for business on any such Wednesday, the next following business day will be a dealing day, with at least two dealing days per month.

Minimum Initial Investment: For this share class the minimum initial investment is USD 100,000.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid monthly to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the indicator is based on the internal risk limit adopted by the fund.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in mortgage- and asset-backed securities, along with the extensive use of derivatives, have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Bonds: There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

Derivatives: The Fund makes significant use of derivatives. The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Asset-backed securities: The timing and size of the cash-flow from asset-backed securities is not fully assured and could result in loss for the fund. These types of investments may also be difficult for the fund to sell quickly.

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Low rated bonds: The fund may invest in lower rated or unrated bonds of similar quality, which carry a higher degree of risk than higher rated bonds.

Hedging: The fund may use derivatives to reduce the risk of movements in exchange rates between the currency of the investments held by the fund and base currency of the fund itself (hedging). However, hedging transactions can also expose the fund to additional risks, such as the risk that the counterparty to the transaction may not be able to make its payments, which may result in loss to the fund.

Interest rates: Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

Fund counterparties: The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
