Report of the Directors

The Board of Directors (the "Board" or the "Directors") submit their report together with the audited financial statements for the financial year ended 30 June 2023.

Principal Activities

GAM Star Fund p.l.c. (the "Company") was incorporated and registered in Ireland under the Companies Act 2014 as an investment company with variable capital on 20 February 1998 and is authorised by the Central Bank of Ireland ("the Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

It is an umbrella type company, in that shares may be issued in relation to different funds (the "Funds") from time to time. A separate portfolio of assets will be maintained for each Fund and will be invested in accordance with the investment objective and policies applicable to such a Fund as set out in "Investments Objectives". Segregated liability exists between Funds.

Certain Funds are authorised for sale in Austria, Bahrain, Belgium, Bulgaria, Chile, Denmark, Finland, France, Germany, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, the Netherlands, Norway, Portugal, Singapore, Spain, Switzerland, Sweden, Taiwan and the United Kingdom.

Risk Management Objectives

Details of risk management objectives are shown in note 3.

Results and Distributions

The results and distributions for the financial year are stated in the Profit and Loss Account.

Significant events during the financial year

Please refer note 21 for further details.

Review of the Business and Future Developments

Please refer to the commentary of each Fund on the following pages for a review of each Fund's activities during the financial year.

Events Since Financial Year End

Please refer note 22 for further details.

Directors

The Directors of the Company during the financial year ended 30 June 2023 were:

Andrew Bates Kaspar Boehni David Dillon Daniel O'Donovan Kishen Pattani Deborah Reidy

Kaspar Boehni resigned as a Director of the Company on 31 August 2022. Kishen Pattani was appointed as a Director of the Company on 4 November 2022. David Dillon resigned as a Director of the Company on 25 November 2022. Daniel O'Donovan resigned as a Director of the Company on 4 May 2023.

Directors' fees for the financial year are stated in note 9.

Directors' and Secretary's Interests

None of the Directors or Secretary or their families held any beneficial interest in the share capital of the Company during the financial year ended 30 June 2023.

Transactions Involving Directors

The Board are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest as defined in the Companies Act 2014 at any time during the financial year from 1 July 2022 to 30 June 2023, other than as disclosed in note 9.

Transactions with Connected Persons (for the purposes of Central Bank of Ireland UCITS Regulation 43(1))

The Board are satisfied:

- (i) that there are arrangements (evidenced by written procedures) in place to ensure that all transactions with connected persons (for the purposes of the Central Bank of Ireland UCITS Regulation 43(1)) are conducted at arm's length and in the best interest of shareholders and
- (ii) that any transactions with connected persons entered into during the financial year complied with the obligation of (i) above as attested by GAM Fund Management Limited (the "Manager") through regular updates to the Board.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year. The Directors have prepared the financial statements in accordance with Financial Reporting Standard ("FRS") 102 and the UCITS Regulations.

Under Irish law the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with FRS 102 and ensure that they contain the additional information required by the Companies Act 2014; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and

Statement of Directors' Responsibilities, continued

 enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors believe that they have complied with the requirement to maintain adequate accounting records through the Managers engagement of the services of an experienced Delegate Administrator for the purpose of maintaining adequate accounting records.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary pursuant to the terms of a Depositary Agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Corporate Governance

The Company is subject to and complies with Irish Statute comprising the Companies Act 2014, and the UCITS Regulations. The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

Financial Reporting Process – Description of Main Features

The Board has delegated to the Manager the responsibility for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process whilst maintaining effective oversight of this process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. This includes appointing the Manager to maintain the accounting records of the Company independently of each of the Co-Investment Managers, Delegate Investment Managers and State Street Custodial Services (Ireland). The Manager has delegated this responsibility to the Delegate Administrator.

The Manager is contractually obliged to maintain adequate accounting records as required by the Amendment and Restated Management Agreement dated 11 July 2017 as may be amended from time to time and in compliance with local laws. The Delegate Administrator is contractually obliged to maintain adequate accounting records as required by the Administration Agreement dated 6 March 2016 as may be amended from time to time and in compliance with local laws. To that end the Delegate Administrator performs regular reconciliations of its records to those of the Depositary. The Delegate Administrator is also contractually obliged to prepare for review and approval by the Board the annual report including financial statements intended to give a true and fair view.

The Board evaluates and discusses significant accounting and reporting issues as the need arises. The Board also assesses and evaluates the Delegate Administrator's financial accounting and reporting routines and further assesses and evaluates the external auditors' performance, qualifications and independence. The Manager has operating responsibility for internal control in relation to the financial reporting process and the Manager's report to the Board.

Risk Assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Board has also put in place processes to identify changes in accounting rules and to ensure that these changes are accurately reflected in the Company's financial statements.

The Management of the Company acknowledges the military actions engaged by Russia in Ukraine and its potential to negatively impact the markets in which the Company's assets are invested. The ultimate impact on the Company remains uncertain and can vary according to the countries, asset classes, industry sectors and securities they are invested in. For the sub-fund GAM Sustainable Emerging Equity, the value of two Russian securities have been written off to 0 (Nil) during the 2022 accounting period. These positions remained valued at nil during the 2023 accounting period. The decision has been taken as the securities were not listed on any regulated markets. This decision is in line with other market participants. The Manager and Co-Investment Managers are closely monitoring the impact on the Company including any impact on liquidity and liquidity management, fair valuation procedures and investment compliance breaches.

Control Activities

The Manager and Delegate Administrator is contractually obliged to design and maintain control structures to manage the risks which the Board judges to be significant for internal control over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Manager and Delegate Administrator include approval of transactions, analytical procedures, reconciliations and automatic controls in IT systems. In the event that prices are not available from external independent sources, the Board has approved the use of a pricing committee, comprised of certain Directors of the Manager and other members of GAM, to review and make decisions on the value of any securities that the Pricing department of the Delegate Administrator cannot determine. Any decisions are notified to the Board.

Information and Communication

The Company's policies and the Board's instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail correspondence and meetings to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Board receives regular presentations and review reports from the Depositary, each of the Co-Investment and Delegate Investment Managers, the Manager and the Delegate Administrator as appropriate. The Board also has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Given the contractual obligations on the Manager and the Delegate Administrator, the Board has concluded that there is currently no need for the Company to have a separate internal audit function or

GAM Star Fund p.l.c.

Monitoring, continued

an audit committee in order for the Board to perform effective monitoring and oversight of the internal control and risk management systems of the Company in relation to the financial reporting process.

Shareholder Meetings

The General Meetings of the Company are held in Ireland. Twenty one days notice is given in respect of each general meeting. A proxy may attend on behalf of any shareholder. An ordinary resolution is a resolution passed by a plurality of votes cast and a special resolution is a resolution passed by a majority of 75% or more of the votes cast.

Each of the shares entitles the holder to attend and vote at meetings of the Company. Matters may be determined by a meeting of shareholders on a show of hands unless a poll is requested. Each shareholder has one vote on a show of hands. Each share gives the holder one vote in relation to any matters relating to the Company which are submitted to shareholders for a vote by poll.

No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other share class or any voting rights in relation to matters relating solely to any other share class.

Any resolution to alter the class rights of the shares requires the approval of three quarters of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be such number of shareholders being two or more persons whose holdings comprise one third of the shares.

Each of the shares other than subscriber shares entitles the shareholder to participate equally on a pro-rata basis in the dividends and net assets of the fund in respect of which the shares have been issued, save in the case of dividends declared prior to becoming a shareholder.

Subscriber shares entitle the shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the dividends or net assets of the Company.

Composition and Operation of Board and Committees

There are currently three directors, all of whom are non-executive. None of the Directors have entered into an employment or service contract with the Company. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Companies Act 2014. Currently the Board meets at least quarterly. There are no standing sub-committees of the Board however sub committees of 2 Directors can convene on an ad hoc basis if required to do so.

Accounting Records

The measures taken by the Board to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. The Board have appointed the Manager for the purpose of maintaining accounting records. The Manager has delegated these responsibilities effective from

7 March 2016 to State Street Fund Services (Ireland) Limited as Delegate Administrator. Accordingly, the books of account are kept at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

The integrity of these financial statements published on www.gam.com remain the responsibility of the Board.

Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Relevant Audit Information

In accordance with section 330 and 332 of the Companies Act 2014, the Directors confirm that all audit information relating to the Company has been made available to PricewaterhouseCoopers.

In accordance with section 330 of the Companies Act 2014, the Directors have taken all steps that ought to have been taken by the Board in order to make themselves aware of any relevant audit information and to establish that PricewaterhouseCoopers are aware of that information.

Directors Compliance Statement

In accordance with Section 225 of the Companies Act 2014, the Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations, as defined by the Companies Act 2014; and
- (b) confirm that
 - a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the Company with its relevant obligations;
 - adequate structures are in place, that in the Directors' opinion, are designed to secure material compliance with the Company's relevant obligations; and
 - iii) an annual review procedure has been put in place to review the Company's relevant obligations and ensure a structure is in place to comply with these obligations.

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to remain in office in accordance with section 383(2) of the Companies Act 2014.

Approval of Financial Statements

These financial statements were approved by the Board of Directors on 25 October 2023.

Director: Deborah Reidy

Investment Objectives (unaudited)

The investment objectives of each Fund are set out below.

GAM Star Absolute Return Macro

(Terminated on 17 July 2019, and is no longer available for investment.) The investment objective of the Fund was to seek to achieve consistent positive returns over the long term while observing the principle of risk diversification. The Fund aimed to achieve this by blending discretionary and model driven investment strategies which may generate exposure (either directly or indirectly through the use of financial derivative instruments) principally to fund income instruments and currencies.

GAM Star Alpha Spectrum

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective by gaining exposure to equity, equity hedge, fixed income and trading strategies. Such exposure may be achieved directly and/or through financial derivative instruments and/or investment in open - ended collective investment schemes deploying equity long only, equity hedge, fixed income and trading strategies.

GAM Star Alpha Technology

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective by taking long and short positions primarily in equities or equity related derivative contracts of technology related companies. Such companies will be listed on or dealt in Recognised Markets globally (including in Emerging Markets as described in the Prospectus) and up to 10% of its Net Asset Value ("NAV") may be invested in unlisted equities of such companies.

GAM Star Asian Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted securities which are issued by public companies with principal offices or significant business activities in the Asian region, excluding Japan.

GAM Star Global Balanced

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. This investment objective may be achieved primarily through investment in open-ended collective investment schemes which gain exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the Prospectus.

GAM Star Capital Appreciation US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in equities and other equity related securities (including preferred shares, convertible bonds, American Depositary Receipts and exchange traded funds) which are issued by companies with principal offices in the United States of America, which exercise their primary economic activity in the United States of America, or which are listed on or dealt in a Recognised Market in the United States of America.

GAM Star Cat Bond

The investment objective of the Fund is to seek to generate returns through selective investment in a global portfolio of catastrophe bonds ("Cat Bonds"). Cat Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets.

GAM Star Global Cautious

The investment objective of the Fund is to seek to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes.

GAM Star China Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted equity securities listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

GAM Star Composite Global Equity

The investment objective of the Fund is to achieve long term capital appreciation with the aim of generating a capital return in excess of global equity markets over the medium to long term. The Fund intends to pursue its investment objective by gaining exposure principally to equity and equity related strategies. Such exposure may be achieved directly by investing in equities and equity related securities and/or indirectly through financial derivative instruments and/or investment in open ended collective investment schemes deploying equity long only and equity hedge strategies. The Fund may also invest in exchange traded funds which are listed or traded on Recognised Markets worldwide in order to gain exposure to such strategies. The Fund may also invest in unlisted collective investment schemes in accordance with the provisions of the UCITS Regulations.

GAM Star Continental European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity and equity related securities (including but not limited to warrants), listed on or dealt in Recognised Markets within the EU which are issued by companies with principal offices in Europe other than the United Kingdom.

GAM Star Credit Opportunities (EUR)

The investment objective of the Fund is to achieve long-term capital gain in Euro. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (GBP)

The investment objective of the Fund is to achieve long-term capital gain in Sterling. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Credit Opportunities (USD)

The investment objective of the Fund is to achieve long-term capital gain in US dollars. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

GAM Star Global Defensive

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes.

GAM Star Global Dynamic Growth

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the terms of the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Sustainable Emerging Equity

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

GAM Star Emerging Market Rates

The investment objective of the Fund is to achieve an attractive risk-adjusted return, whilst actively managing downside risk (such as bond market and currency risk), through investment in a portfolio of local and hard currency bonds and other fixed income securities from emerging markets (as hereinafter defined) worldwide.

GAM Star European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities issued by companies with principal offices in Europe, including Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. It will be the policy of the Fund to invest primarily in equities.

GAM Star Flexible Global Portfolio

The investment objective of the Fund is to achieve capital appreciation by gaining exposure to one or more of the following asset classes: financial indices, open-ended collective investment schemes, exchange traded funds, exchange traded commodities, property, fixed income securities, equities, equity related securities, derivative instruments, cash, cash equivalents, money market instruments and closed-ended funds. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes. The Fund need not be invested in any or all of the asset classes at any one time.

GAM Star GAMCO US Equity

(Merged into GAM Star Capital Appreciation US Equity on 12 December 2018, and is no longer available for investment.)

The investment objective of the Fund was to achieve long-term capital appreciation. It was the policy of the Fund to invest primarily in a diversified portfolio of equities (i) issued by companies with principal offices in the United States of America and/or (ii) which were listed on Recognised Markets in the United States of America. Whilst the Fund primarily invested in the equities described above, it could also invest in other equities listed on Recognised Markets worldwide.

GAM Star Global Rates

The investment objective of the Fund is to achieve absolute returns. The Fund employs a process of economic analysis to identify fundamental trends within both the fixed income and global currency markets. There are both medium term and short term based themes involved in the Fund's strategy.

GAM Star Global Selector

(Merged into GAM Star Worldwide Equity on 22 January 2020, and is no longer available for investment.)

The investment objective of the Fund was to achieve long term capital appreciation by investing primarily in a focused, concentrated portfolio of worldwide quoted equity and equity related securities (including, but not limited to warrants), listed on or dealt in Recognised Markets on a worldwide basis.

GAM Star Global Growth

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest in closed-ended collective investment schemes. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

GAM Star Interest Trend

The investment objective of the Fund is to achieve long-term capital appreciation in US dollars. The Fund aims to achieve its investment objective through investment principally in income bearing securities which are expected to generate fixed income payments and also selectively make capital gains from trends in interest rates. Such instruments include government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent convertible notes.

GAM Star Japan Leaders

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities in Japan issued by companies with principal office in Japan. It will be the policy of the Fund to invest primarily in equities.

GAM Star MBS Total Return

The Fund's primary investment objective is to seek to generate returns through selective investment in a diversified portfolio of mortgage-backed debt securities ("MBS") and asset-backed debt securities ("ABS"). The Fund may also invest to a lesser extent in debt securities (such as bonds and notes) issued by corporations and governments. Such debt securities may pay fixed, floating and inverse floating rates of interest and may include zero coupon obligations.

GAM Systematic Alternative Risk Premia

(Terminated 6 April 2023, and is no longer available for investment.) The investment objective of the Fund was to provide consistent above-average, risk-adjusted returns on capital with a low long term correlation with traditional asset classes such as equities and bonds. The investment objective was achieved by the Co-Investment Manager by gaining exposure directly or indirectly using financial derivatives instruments to the following four asset classes i.e. equities (which will be listed or traded worldwide), fixed income (i.e. fixed income securities), Currencies and Commodities.

GAM Star Tactical Opportunities

The investment objective of the Fund is to seek to achieve capital appreciation via unconstrained tactical asset allocation. The Fund aims to achieve this investment objective by gaining exposure either directly or indirectly through the use of derivatives to a range of asset classes including equities, fixed income securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

GAM Star Disruptive Growth

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a globally diversified portfolio of technology related companies. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within the broader technology sector or whose business models are driven by new technologies. The Fund may also seek to gain exposure to such companies through the use of financial derivative instruments described in the Prospectus.

GAM Star US All Cap Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted securities in the United States of America issued by companies with principal offices in the United States of America. The Fund will invest in a broad spread of equities, and may invest in fixed income securities and preferred stock listed on or dealt in a Recognised Market in the United States of America. It will be the policy of the Fund to invest primarily in equities.

GAM Star Worldwide Equity

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted securities on a worldwide basis. It will be the normal policy of the Fund to invest primarily in equities.

GAM Sustainable Climate Bond

The investment objective of the Fund is to achieve long-term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. Impact Bonds are bonds which have a specific environmental, social and governance ("ESG") purpose. The Fund will seek to achieve its investment objective through investment principally in such Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. The Fund may invest in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred Shares, convertible securities and contingent capital notes, provided such fulfil the definition of an Impact Bond.

GAM Star Fund p.l.c.

General

In addition, please note the following in relation to the investment objectives and policies of the Funds:

- (i) any Fund, the name of which contains a reference to a specific type of security, country or region will invest at least two thirds of its non-liquid assets in that specific type of security, country or region;
- (ii) any Fund, the name of which contains a specific reference to a specific currency, will invest at least two thirds of its non-liquid assets in securities denominated in that specific currency;
- (iii) where the investment policy of a Fund states that investments are made "primarily" in a specific type of security, country or region, that Fund will invest either directly or indirectly (through the use of financial derivative instruments) at least two thirds of its non-liquid assets in that specific type of security, country or region;
- (iv) where the investment policy of a Fund refers to investments in companies of a specific country or region, this means (in the absence of any other definition) that these companies will have their registered office in the specific country or region stated, notwithstanding their being listed on any stock exchange mentioned in the investment policy of the Fund.

Fund Manager: Julian Howard

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation share class) rose 7.4% over the year to 30 June 2023, compared to its benchmark, the Average EUR 1 Month Deposit Rate which rose 1.7% in EUR terms.

Global equities, as measured by the MSCI AC World Index, declined in the third quarter of 2022, falling -4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' which has characterised both the year to date as well as the third quarter, is at its heart a reflection of the on-going difficulty in determining a price for any asset at all, from stocks and bonds to gold and bitcoin.

Global equities, as measured by the MSCI AC World Index, fell nearly -16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy - and therefore investible assets - in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

Global equities as measured by the MSCI AC World Index rose 3.8% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of fast-rising interest rates, poor risk management and a social media-fuelled run-on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably even more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by arch-rival UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response, before recovering somewhat. Up to this point equities had in fact been enjoying a firm run dating back to October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and, while labour market data in the US suggested that the process was not going to be smoothly linear (an unrealistic assumption anyway), US headline CPI was generally heading in the right direction, falling from its mid-2022 peak of 9% to 6% at the latest reading. But this was not fast enough for the major central banks. In March alone, the US Federal Reserve, ECB and Bank of England raised rates by 25bps, 50bp, and 25bps respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. In the background, the growth outlook continued to quietly improve. At the beginning of the year Bloomberg's survey of economists' US GDP growth expectations for 2023 had started out at a fairly dismal 0.3%, but by the end March of those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% 2023 growth target set by the National People's Congress. The banking issues therefore only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable enough with the decisive actions taken by regulators to be able to focus on these slightly better fundamentals for the time being, even if broader questions about the economic and regulatory impact of the banking crisis and the continued inflation and rates conundrum remained outstanding.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets – and specifically US stocks which account for around two thirds of the world index – surged ahead on the back of euphoria around the latest breakthrough in artificial intelligence (Al). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Income class) fell 10.8% over the year to 30 June 2023, underperforming its benchmark, the Average USD 1 Month Deposit Rate which rose to 4.1% in USD terms.

July 2022 was a strong month, with the S&P rising 9.1%, the Nasdaq 12.6% and the MSCI World Growth Index also rising 11.5%. The rally was fuelled by fixed income markets repricing medium term Fed funds expectations downward which was positive for longer duration and growth assets, as well as a positive start to the Q2 earnings season. The fund fell due to profit taking on its Chinese holdings on the back of renewed fears of further Covid lockdowns as well as poor results from BT Group. On the positive side, crypto rallied sharply pushing Coinbase and Silvergate higher, while Digital 4.0 names also did well. The fund reduced its Chinese exposure to fund select software names, metaverse names and disruptive retail.

The positive sentiment continued into the first half of August 2022 but was quickly reversed by the Federal Reserve (Fed) Chair's hawkish comments at Jackson Hole. The fund rose in the month driven by significant positive stock selection in its short positions. Coinbase was also a significant positive contributor as were China names. Following the strong rally in July and early August, the fund rebalanced a number of holdings to account for price movements. It re-entered EPAM Systems and initiated positions in Visa and Mastercard and sold down its position in Zalando.

September saw the MSCI World Index fall 9.3% as it became apparent that central banks were focusing on combatting inflation rather than supporting growth. All sectors were in negative territory. The fund fell in the month. Netflix was the top contributor, with Alibaba, Cvent, Mastercard and Visa also contributing positively, as did the short book. Microsoft, Seagate Technology and Alphabet were the main detractors. Portfolio changes included adding to longer duration names such as AirBnB, Trimble and Roblox, while reducing more defensive names such as Mastercard and Visa. The fund also added selectively to its China exposure and rotated the short book more aggressively.

In October, the MSCI World Index rose 7.1% as equity markets reacted to more positive sentiment in bond markets amid the growing belief that the bulk of interest rate adjustments had happened. The fund fell in the month. Intuitive Surgical was the biggest positive on strong results, while Netflix, PTC and Plus500 also rose on good results. Li Auto was the biggest detractor, with Omnicell and Meta also detracting. The short book struggled, given the market rally. The fund added to duration names, increasing positions in Cloudflare, MongoDB and Roblox, and initiating positions in Peloton, Nvidia and Kahoot. The fund took profits in the storage space, IT services and semi manufacturing.

Markets continued October's recovery into November on softer than expected US inflation data and a generally positive earnings season, as well as news from China on an easing of Covid restrictions. The fund fell slightly in the month with Chinese holdings in Alibaba, Full Truck Alliance and Li Auto driving positive attribution, while Roblox, Omnicell and Cloudflare were the biggest detractors. The short book has a more challenging month. During November, the fund sold out of BT Group and Alphabet, while it made new positions in Adobe and Zalando. The short book was reduced.

December proved a disappointing end to a challenging year with the MSCI World Growth Index falling -6.1%. The growth to value rotation resurfaced. The fund lost -1.0% in December. The short book performed very well in the month, as did Zalando, while BYD and Alibaba were also positives. Expedia was the biggest drag, with Rivian and Marvell also dragging. In the short book, an automobile company and an electronics company were the main contributors to performance. Managing risk was a priority throughout 2022 and to this end, the fund increased its cash positions again in December, divesting Xometry, Meta and Adobe. The fund also rebalanced its positions in China.

Global markets recovered from December weakness and rose strongly in the first month of 2023. Markets were buoyed by a combination of a slowing pace of inflationary data in the developed world and the fast pace at which Covid restrictions were dismantled in China, as well as lower energy prices in Europe. Growth outperformed value reflected the improved outlook for growth. The laggards of 2022 performed most strongly in January 2023. The

fund fell in January. The long book was a big positive but was offset by the negative contribution of the short book. In the long book, Expedia, Netflix, and PTC contributed most, while Intuitive Surgical was the main detractor. January saw the fund deploy cash more aggressively for the first time in 12 months with new positions in Kainos, Infineon, Didi Global and Baycurrent, as well as adding to Datadog and Nvidia. The fund also trimmed its China exposure, bringing it back to under 10% by taking profits in some of the best performing

Markets stalled in the second half of February, giving back some of January's gains as data from the US pointed to continued inflationary pressures. The fund fell in the month with China acting as the largest detractor in both absolute and relative terms on lacklustre news flow and heightened geopolitical tensions. The short book contributed positively over the month with short positions in low quality retail platforms and financial technology names, as well as Chinese electric vehicles being the largest contributors. The duration of the portfolio was extended in February, reinitiating a new position in Coinbase, and adding to Atlassian, Block and Cloudflare.

April was a more positive month for global equities, but market sentiment was cautious with a notable outperformance of defensives over cyclicals. The fund fell in the month. The Q1 trend of large cap equities outperforming smaller caps and mega cap technology outpacing long duration technology continued into April, acting as a significant headwind for the long book. Intuitive Surgical rose sharply on better-than-expected results. The short book also contributed positively benefitting from shorts in the auto sector.

Sentiment for growth assets improved in May after a lacklustre April. The global backdrop was broadly stable with concerns over the US debt ceiling offset by rapidly falling implied future inflation expectations. Sector dispersion was significant with technology returning +8.3% driven by euphoria around Al following strong results from Nvidia. The fund rose with the long book seeing a positive contribution of over +800 bps. One of the fund's top overweight's, Marvell, rose +48% on strong results, with Cloudflare also rising +47%. The short book contributed negatively, detracting -530 bps from performance, driven mainly by shorts in the software sector. In May, the fund added several Al-related names including BESI, DELL, Fastly, SK Hynix and TSMC, funded from cash but also the reduction of Pegasystems, Block and Trimble.

The MSCI World Growth Index returned +6.1% in June. The fund also rose in the month. In the long book, MongoDB rose by over 30%, while the fund's overweight in Coinbase was another big positive on crypto strength. In the short book, the main positive contributions came from positions in an online retail company, a real estate services company and an automobiles company. Negative contributions came from an auto parts company, an electronics company, and a software company. As technical turned more positive, the fund initiated a new position in Snowflake, a longer duration name. Roblox was reduced and profits were taken in Marvell and Cloudflare.

Outlook

We retain our outlook thesis that growth equities are looking attractive on an intrinsic valuation basis. They are also increasingly looking attractive relative to other parts of the disruptive equities' spectrum.

We have been monitoring the relative performance of higher growth baskets of equities versus lower growth for signs of a sustainable turning point and while there are signs, we have reached this apex, we are also watching the development of high yielding corporate debt as a further sign of risk appetite. These two indicators need to turn more favourably for us to take a more 'all in' view on duration.

Fund Manager: Jian Shi Cortesi

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 7.5% over the year to 30 June 2023, compared to its benchmark, the MSCI AC Asia ex Japan Index which fell 1.2% in USD terms.

Over the third quarter of 2022 in July Asian equities fell with a positive tailwind from a recovery in developed markets offset by significant weakness in China following strength the prior month and renewed concerns of ongoing Covid lockdown disruption and stress in the property market. And in September 2022 Asia ex Japan equities (MXASJ) fell sharply by 13%, alongside world equities (MXWO) falling 10%, as ongoing central bank rate hikes continued (ex-China) into a weakening economic environment, raising fears of a more significant global recession next year.

The MSCI Asia ex-Japan Index returned rose in the fourth guarter of 2022. Macroeconomic and geopolitical concerns continued to dominate investor sentiment, but the Covid relaxation in China led to a strong rebound in China and northern Asian markets. China introduced more supportive property policies, which also boosted investor sentiment. Among major markets, previous laggard South Korea and the Philippines outperformed strongly in the guarter, while India and Indonesia underperformed. Among sectors, healthcare and communication services outperformed the most. Energy, utilities and consumer staples lagged the most in the rally. GAM Star Asia Equity also rose in the quarter, outperforming its benchmark. India was the largest positive contributor to performance in the quarter. Having been a beneficiary of China outflows during the year, this reversed in the fourth quarter and India underperformed the broader region. Here, our underweight was a positive, as was our stock selection. With China's strong performance, our overweight position was a positive contributor to relative performance, with strong stock selection most notably in Tencent, Pinduoduo and VipShop. Korea stock selection was also strong, with POSCO and Hana Financials providing positive attribution in the period. The change in portfolio manager intra-quarter led to substantive changes in the portfolio's positioning. The Fund's strategy is now focused on Asia's leading industries benefiting from big long-term trends in consumer and innovation.

January saw the index rally boosted by China's Covid re-opening. However, India lagged as the Adani Group's share price collapsed causing negative contagion across Indian equity markets. The Fund rose strongly. Country weightings had a positive impact on performance in the month, thanks to an overweight in China and an underweight in India. Sector weighting also positively contributed led by overweights in the information technology and consumer discretionary sectors. Holdings in the financial sector were reduced while the Fund added Guangshou Kingmed and Sino BioPharma. The market corrected in February following the strong rally over the prior three months as investor sentiment cooled and geopolitical noise heightened. China and Thailand led the underperformance while Indonesia, Taiwan and India outperformed. The Fund fell in the month with country weighting having a slightly negative impact on performance due to the overweight in China and underweight in India. The Fund's sector weighting also had a negative contribution, particularly the overweight in consumer discretionary.

The index fell 2.1% in April even as China published improving economic data underpinning the signs of recovery. However, investor sentiment remained subdued amid ongoing US-China tension. Indonesia and India outperformed while China, Taiwan and Thailand lagged the most. The Fund declined on the month with country weighting negatively impacting performance, due to the underweight in India and overweight in China. Sector weighting also had a negative contribution due to the overweight in information technology and communication services as well as the underweight in energy, industrials, and materials. Stock selection detracted, particularly in consumer discretionary, information technology and healthcare. During the month, consumer discretionary and information technology were reduced while industrials and financials were increased. May saw high return dispersion among individual markets with Taiwan, South Korea and India leading the rally while China lagged due to an uneven economic recovery and ongoing geopolitical concerns. Information technology was the only sector to post positive returns driven by semiconductor and semi-capex component companies on a wave of optimism over Al-led growth. The Fund fell with country weighting having a negative impact due to the underweight in India and overweight in China. The Fund's sector weighting had a positive contribution, thanks to the overweight

in information technology and underweight in real estate. Stock selection detracted with good stock selection in Indonesian financial and Chinese information technology detracted by poor stock selection in Indian financials, Taiwan e-commerce and Chinese consumer discretionary. The index rose in June led by northern Asia as expectations grew for further policy support in China to boost economic growth. China and India led the rally while Southeast Asian markets lagged the most. The Fund rose in the month. Country weighting had a slightly positive impact on performance, thanks to the overweight in China. The Fund's sector weighting had a neutral impact on performance. Stock selection added positive alpha in the month. Positive stock selection mainly came from China communication services, India healthcare and Korean consumer. Negative stock selection concentrated in Indian IT services and Taiwan technology hardware. During the month, financials were increased in the portfolio, while communication services were decreased.

Outlook

Emerging Asian equity trades at a considerable valuation discount to developed market, despite better economic growth and earnings growth outlook. We expect further Chinese stimulus to support economic recovery and stock price performance. Weak external demand remains a key risk, but the rise of Al is expected to boost demand for Asian technology hardware. The Fund is positioned in recovery names as well as beaten-down growth stocks in consumer and innovation.

Fund Manager: Charles Hepworth/James McDaid

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP II Accumulation class) rose 3.2% over the year to 30 June 2023, compared to its benchmark, Lipper Global Mixed Asset GBP Balanced which rose 0.9% in GBP terms.

Global equities, as measured by the MSCI AC World Index, declined in the third guarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' is, at its heart, a reflection of the ongoing difficulty in determining a price for any asset at all, from stocks and bonds to gold and property. Core US inflation disappointed markets by coming in at an elevated 6.3% for August, thus postponing any immediate prospect of easing by the US central bank. The Federal Reserve's monetary policy committee went on to raise rates by 75 bps in September, sending US equities down, especially rate-sensitive technology stocks. In the UK, the mini-budget of the new Truss government highlighted the near-impossible policy trade-offs of the current global economic backdrop: a slew of pro-growth policies were greeted by sharp sterling depreciation and a spike in gilt yields as markets appeared to balk at the prospect of unfunded stimulus. The UK central bank eventually intervened to restore calm but the market's price action over the quarter increasingly reflected pessimism that a high inflation, low growth outcome could be avoided. Within the strategy, equity exposure was decreased in the early stages of September as volatility markedly increased. This reduction across all regions reflects our more cautious tilt and we have redirected some of these monies to bond investments in the short-dated US Treasury market following the extreme price falls we have seen. However, the majority of the monies raised will remain in cash instruments as we expect volatility to increase - cash levels are at historically high levels within the strategy.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

The strategy remained tactically underweight equities during the last quarter of the year. Within this, we held underweights to UK and US equities and an overweight to Japanese equities. Equity volatility was relatively well contained at the portfolio level via our fixed income sleeve. Here we held exposure to very low volatility money market instruments and ultra-short Treasury securities, complemented by mortgage-backed securities and financial related credit. In

alternatives, we continue to have exposure to a gold ETF, as well as a global macro fund. While the fundamentals of the good news that lifted the final quarter of 2022 looked set to persist into 2023, investment trends rarely play out linearly and the economic backdrop remains challenging as consumers retrench. The OECD had predicted GDP growth of 2.2% for 2023, down from the 3.1% that seemed likely for 2022. Global inflation will suffer pauses and reversals as it decelerates, not least from a likely boost in Chinese energy demand. Furthermore, market expectations of a Fed pivot are unlikely to be met given the central bank will be acutely conscious of its own credibility as it responds slowly to peaking inflation. This mismatch is likely to explain why indices will probably not spike euphorically on softer inflation data in the coming months, however welcome it may seem to market commentators. Ukraine meanwhile faces a long haul to restoring its territorial integrity, with slow progress and rising costs the main risk to vital continued Western commitment. In China, the lifting of Covid restrictions is seeing hospitals overwhelmed and, in the absence of a successful vaccination programme, localised but economically disruptive lockdowns could yet be re-deployed. But, far from being a reason to be despondent, fundamentally better news flow with limited (initial) investor participation is arguably a formula for improved returns in the medium term. Persistent equity engagement will remain key to capitalising on these better conditions of course, but effective diversification and tactical asset allocation will be important for the inevitable soft patches and unexpected occurrences that await. We approached 2023 therefore a little wiser, but quietly optimistic too.

Global equities as measured by the MSCI AC World Index rose 7.2% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response. Up to this point, equities had been enjoying a strong run since October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and US headline CPI fell from its mid-2022 peak of 9% to 6% at the latest reading. While the moves are in the right direction, inflation remains well above target. In March, the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) raised rates by 25 bps, 50 bps, and 25 bps, respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. Away from inflation, the growth outlook continued to quietly improve. At the beginning of the year, a Bloomberg survey of economists' growth forecasts for the US had started out at a fairly dismal 0.3% for the year ahead, but by the end of March those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% growth target set by the National People's Congress. The banking issues, therefore, only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable with the decisive actions taken by regulators and focussed on the better fundamentals, even if broader questions surround the economic and regulatory impact of the banking crisis. Within the portfolio, the Loomis Sayles US Equity Leaders fund rose over 16% for the period as growth style investments outpaced value. The European equity funds also delivered strong gains of between 12% and 13% as worries of a deep eurozone recession faded.

At the time of writing, the full implications of the March banking difficulties and associated response are unclear. However, reasonable assumptions include increased supervision, a higher cost of capital for financial institutions and tighter lending standards. Regardless, it seems unlikely that the major central banks will reverse their current tightening cycles to deal with individual instances of poorly managed banks. So, barring a major contagion event, the bigger issue facing the global economy remains the pathway of inflation and the associated interest rate response into the rest of the year and beyond. In our view, disinflation is underway in the US, but we would note that the Fed

30 June 2023

Commentary (Unaudited)

remains institutionally traumatised by past instances of underestimation, not least that of 1980. In the spring of that year, inflation came down from high levels and the central bank eagerly cut interest rates only to tighten them again as prices unexpectedly spiked. Until the Fed declares the current disinflation sustainable and is prepared to start wrapping up the current monetary policy hiking cycle, it seems unlikely that stock markets will gain significant traction from here given the relatively modest additional earnings yield advantage they now offer over risk-free interest rates.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets - and specifically US stocks which account for around two thirds of the world index surged ahead on the back of euphoria around artificial intelligence (AI). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind. Market volatility, as measured by the VIX index, fell to under 13 in June, a level last seen just before the Covid-19 pandemic. Despite this, reasons for concern about the economy and markets were numerous and persuasive. The US debt ceiling deadline was only just met at the end of May as politics were set aside at the last minute to avoid the humiliation and chaos of a potential US default. More worryingly, inflation remains elevated across the major advanced economies. In the US, eurozone and UK, headline inflation was on a decelerating course but core inflation remained stubborn at 5.3%, 5.3% and 7.1%, respectively, by the end of the quarter. While the US Federal Reserve chose to 'skip' a hike in its latest decision, there was little question of ending the current tightening cycle, while the European Central Bank (ECB) and Bank of England both hiked rates at their latest meetings in a clear signal of intent. The uncertainty around the end-point of the inflation and interest rate saga that began in early 2022 shows no sign of lifting, a fact not lost on bond markets, whose own MOVE volatility index still remains elevated versus 2021. Other potential risks included the continued travails of the US regional banking system which saw the failure of First Republic in early May and whose impact on lending into the real economy is just now starting to reveal itself. Geopolitics remained fraught too amid Ukraine's counter-offensive, an attempted putsch by Russian mercenaries and simmering tensions between the US and China. The US Republican nomination process provided its own dramas as the leading candidate faced outright criminal charges. While the last few days of the quarter started to show a more consistent alignment as market volatility picked up amid all this, the review period as a whole was characterised by a marked divergence in markets

GAM Star Capital Appreciation US Equity

Fund Manager: Wellington Management Company LLP

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 16.1% over the year to 30 June 2023, compared to its benchmark, the S&P 500 Index, which rose 19.6% in USD terms.

In the third quarter of 2022, US equities (-4.9%) fell for the third consecutive quarter, ending September with a -23.9% loss year to date. Risk sentiment deteriorated on fears that aggressive interest-rate hikes and tighter financial conditions would constrict economic growth and drive the US into a recession. The GAM Star US Capital Appreciation Equity Fund outperformed the S&P 500 Index in the third quarter 2022. Security selection was the primary driver of outperformance as strong selection within financials and industrials was only partially offset by weaker selection in consumer staples and consumer discretionary. At the issuer level, overweight exposures to Charles Schwab and Humana contributed most to benchmark-relative performance; our decision to not own Apple and Tesla detracted most. Sector allocation, a residual of our bottom-up stock selection process, also contributed to results the positive effects of the Fund's overweight to financials and underweight to information technology were only partially offset by the negative effects of the Fund's underweights to energy and consumer discretionary. Sector exposure is an indication of where the team is finding compelling investment ideas, with quarter-to-quarter changes often modest. The Fund is most overweight financials and industrials and most underweight information technology and consumer discretionary.

In the fourth quarter of 2022, US equities (+7.6%) rallied following three straight quarterly declines, ending December with an 18.1% loss year to date. Equities were buoyed early in the quarter by optimism that the US Federal Reserve (Fed) would begin to scale back its pace of interest rate hikes. The GAM Star US Capital Appreciation Equity Fund outperformed the S&P 500 Index in the fourth quarter of 2022. Security selection was the primary driver of outperformance as strong selection within consumer discretionary and healthcare was only partially offset by weaker selection in communication services and industrials. At the issuer level, our underweight exposure to Tesla and our decision to not own Apple contributed most to benchmark-relative performance; our out of benchmark exposure to Entegris and decision to not own Exxon Mobile detracted most. Sector allocation, a residual of our bottom-up stock selection process, also contributed to results; in particular, the positive effects from the Fund's overweight to financials and industrials were only partially offset by the negative impact from the Fund's underweight to energy. Sector exposure is an indication of where the portfolio managers are finding compelling investment ideas with quarter-to-quarter changes often modest. The Fund was most overweight financials and industrials and most underweight information technology and energy.

US equities rallied +6.3% as the start of 2023 but by the end of the first quarter US equities (+3.7%) finished higher after a volatile month characterised by significant swings in the market's outlook and risk sentiment. The sudden collapse of two US regional banks drove bank stocks sharply lower, prompting swift policy actions by federal regulators to stabilise liquidity and to stem the potential for broader contagion. The turmoil renewed concerns of a US recession and sparked debate about the need for regulatory reform, as markets grappled to assess the health of the banking industry, the course of inflation and interest rates, and the impact of tightening credit standards on business and consumer spending. Strength in the job market and resilient consumer spending, complicated the Federal Reserve's (Fed) task of curtailing persistently high inflation. The core Consumer Price Index (CPI) in February softened slightly to 5.5% year over year, while the Fed's preferred inflation gauge — the Personal Consumption Expenditures Price Index climbed 4.6%, matching its smallest increase since October 2021. Furthermore, a sharp deceleration in the Producer Price Index provided hope that inflation will continue to trend lower. Despite considerable uncertainty about the impact of tighter credit conditions on the economy, the Fed opted to raise interest rates by 25 bps to a range between 4.75% - 5%, with the Fed's median forecast showing a 5.1% terminal rate. Fed Chair Jerome Powell pushed back on views of rate cuts in 2023, although fed Funds futures indicated that markets expect the Fed to lower rates by the end of the year.

In the second quarter of 2023 the US equities (+8.7%) advanced for the third straight quarter, largely driven by potent rally in a narrow group of mega-cap technology companies which benefited from investor optimism about their

earnings potential and growth prospects and exuberance surrounding generative artificial intelligence. The GAM Star US Capital Appreciation Equity Fund underperformed the S&P 500 Index in the second quarter of 2023. Security selection was the primary driver of underperformance as weak selection within information technology and financials was only partially offset by stronger selection in health care and communication services. At the issuer level, our decision to not own Apple and our underweight exposure to Microsoft detracted most from benchmark-relative performance; our overweight exposures to Oracle and Meta Platforms contributed most. Sector allocation, a residual of our bottom-up stock selection process, also detracted from results; in particular, the negative effects from the Fund's underweight to information technology and an overweight to health care were only partially offset by the positive impact from the Fund's underweight to energy. Sector exposure is an indication of where the portfolio managers are finding compelling investment ideas with guarter-to-guarter changes often modest. The Fund was most overweight industrials and financials, and most underweight information technology and consumer discretionary.

Fund Manager: Fermat Capital Management, LLC

30 June 2023

Commentary (Unaudited)

The Fund's NAV rose by 5.3% over the year to 30 June 2023 (as measured by the USD Accumulation Class) compared to a rise of 5.1% for its benchmark, the FTSE World Government Bond/Eurekahedge ILS Advisers Spliced index in USD.

The third guarter of 2022 was a guiet period for portfolio activity, with the changes in the risk numbers primarily due to the mark-to-market impact of Hurricane Ian (e.g. Florida Hurricane risk decreased because the value of many Florida Hurricane bonds decreased due to lan). The number of positions in the portfolio at the end of the quarter was 228 vs. 240 at the beginning of the quarter. The total number of catastrophe bond tranches at quarter-end decreased slightly to 243 from 246 at beginning of the guarter. The quarter saw no new issuances (as expected) against \$300 million in maturities, and the notional size of the insurance-linked securities (ILS) market ended the quarter at \$37.3 billion (an increase of \$2.3 billion over the previous 12 months). Hurricane lan interrupted what had been a very calm hurricane season. The market was still assessing lan's impact on the market, with most reports at the time settling somewhere around \$40 to \$60 billion in insured losses on a Property Claim Services (PCS) basis (so not including loss adjusted expenses (LAE) and National Flood Insurance Program (NFIP) losses). The cat bond market was factoring in losses along the higher end of that estimate, but much of the losses to the market and to the portfolio were seemingly driven by NFIP losses as they are a major issuer of catastrophe bonds. While there were some other moderate catastrophe events outside of lan during the quarter, none had any impact on the portfolio.

In the fourth quarter of 2022, trading activity was moderately active, but the changes in the portfolio's risk numbers were primarily due to the mark-to-market impacts on existing positions. The number of positions in the portfolio at the end of this quarter is unchanged at 228 from the beginning of the quarter. The fourth quarter was a healthy and positive quarter for the ILS market with solid price-discovery being achieved and achieved at record spread levels. The guarter had \$1.5 billion in new catastrophe bond issuances vs. \$1.5 billion in maturities, and the notional size of the ILS market ended the quarter at \$37.3 billion (an increase of \$1.9 billion over the previous 12 months). In the traditional / collateralized re side of the market, the January 1 renewal was more orderly than anticipated though there was still a lot of scrambling to push programs over the line. And, as with the catastrophe bond market, very few buyers of reinsurance or retro were able to purchase their desired amount of coverage, with most just able to renew lines in terms of notional amounts, albeit at much higher spreads and for more remote coverage than in 2022. ILS spreads widened to record high levels, with traditional reinsurance market spreads being at the widest levels in nearly 30 years. The closing of an impressive nine catastrophe bond deals in December and the relatively orderly January 1 renewals in the traditional reinsurance market bolstered the notion of what some in the market are calling "the Great Realignment" in reinsurance pricing. So, unlike the months after the Lehman bankruptcy where a large but relatively brief spike in spreads was more confined to the catastrophe bond market and did not fully reach the traditional reinsurance market, the spread levels witnessed during the quarter were both broadly market-wide and expected to persist for some time. There were no new catastrophes in this quarter that had any impact on the market.

In the first quarter of 2023, trading activity was again active, however, we did not seeing big shifts in the composition of investment opportunities (perils, risk levels, etc.), but the Florida renewals had yet to occur. The number of positions in the portfolio at the end of this quarter is 239 vs. 228 at the beginning of the quarter. This quarter was an active period with \$2.9 billion in new catastrophe bond issuances vs. \$2.1 billion in maturities, and the notional size of the ILS market ended the quarter at \$37.8 billion (an increase of \$1.2 billion over the previous 12 months). While there was some net growth over the quarter, it was not enough to meet demand. It was also a bit of a surprise to see many cedants effectively chose to downsize their deals to achieve pricing below initial guidance levels as opposed to obtaining larger amounts of coverage within their initial price guidance. We continued to see the most aggressive buying in new issuance index-triggered based deals. We continued to pass on most of these types of new issuance deals, which have been a much smaller share of the issuance than indemnity-triggered ones. There were no new

catastrophes in this quarter that had any impact on the market. The only relevant Hurricane lan development was a positive one, with the NFIP allowing some of their bonds to mature instead of extending them further.

The second quarter of 2023 portfolio activity was high but this slowed down considerably in July. Since most of the new investments we entered in June do not go on risk until July, it is always best to look at next month's risk numbers when comparing the portfolio to last year. If you did compare June '23 to June '22 numbers though, the portfolio showed to be less risky than last year. There were no significant catastrophes in the quarter that had any impact on the portfolio. However, June was an active convective storm month in the U.S., characterized by a mid-month system that caused an estimated insured industry loss of \$5 billion to \$9 billion. These convective storms are not large enough to cause loss to any positions themselves; but, like any notable catastrophe event, they will contribute to the loss tally for notes with an aggregate loss trigger. This quarter was another very active new issuance month, although the deals were smaller in size and more remote than the ones in April and May. Still, with \$1.8 billion of new issuance across eleven deal and \$1.6 billion of maturities in nine deals, there was net market growth. Investor capacity remained strong, and with the new issuance pipeline coming to an end for the hurricane season, some investors with cash on hand have been aggressive in the secondary markets.

Fund Manager: Charles Hepworth/James McDaid

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) rose 2.8% over the year to 30 June 2023, compared to its benchmark, Lipper Global Mixed Asset GBP Conservative which fell 0.6% in GBP terms.

Global equities, as measured by the MSCI AC World Index, declined in the third guarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' is, at its heart, a reflection of the ongoing difficulty in determining a price for any asset at all, from stocks and bonds to gold and property. Core US inflation disappointed markets by coming in at an elevated 6.3% for August, thus postponing any immediate prospect of easing by the US central bank. The Federal Reserve's monetary policy committee went on to raise rates by 75 bps in September, sending US equities down, especially rate-sensitive technology stocks. In the UK, the mini-budget of the new Truss government highlighted the near-impossible policy trade-offs of the current global economic backdrop: a slew of pro-growth policies were greeted by sharp sterling depreciation and a spike in gilt yields as markets appeared to balk at the prospect of unfunded stimulus. The UK central bank eventually intervened to restore calm but the market's price action over the quarter increasingly reflected pessimism that a high inflation, low growth outcome could be avoided. Within the strategy, equity exposure was decreased in the early stages of September as volatility markedly increased. This reduction across all regions reflects our more cautious tilt and we have redirected some of these monies to bond investments in the short-dated US Treasury market following the extreme price falls we have seen. However, the majority of the monies raised will remain in cash instruments as we expect volatility to increase - cash levels are at historically high levels within the strategy.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

The strategy remained tactically underweight equities during the last quarter of the year. Within this, we held underweights to UK and US equities and an overweight to Japanese equities. Equity volatility was relatively well contained at the portfolio level via our fixed income sleeve. Here we held exposure to very low volatility money market instruments and ultra-short Treasury securities, complemented by mortgage-backed securities and financial related credit. In

alternatives, we continue to have exposure to a gold ETF, as well as a global macro fund. While the fundamentals of the good news that lifted the final quarter of 2022 looked set to persist into 2023, investment trends rarely play out linearly and the economic backdrop remains challenging as consumers retrench. The OECD had predicted GDP growth of 2.2% for 2023, down from the 3.1% that seemed likely for 2022. Global inflation will suffer pauses and reversals as it decelerates, not least from a likely boost in Chinese energy demand. Furthermore, market expectations of a Fed pivot are unlikely to be met given the central bank will be acutely conscious of its own credibility as it responds slowly to peaking inflation. This mismatch is likely to explain why indices will probably not spike euphorically on softer inflation data in the coming months, however welcome it may seem to market commentators. Ukraine meanwhile faces a long haul to restoring its territorial integrity, with slow progress and rising costs the main risk to vital continued Western commitment. In China, the lifting of Covid restrictions is seeing hospitals overwhelmed and, in the absence of a successful vaccination programme, localised but economically disruptive lockdowns could yet be re-deployed. But, far from being a reason to be despondent, fundamentally better news flow with limited (initial) investor participation is arguably a formula for improved returns in the medium term. Persistent equity engagement will remain key to capitalising on these better conditions of course, but effective diversification and tactical asset allocation will be important for the inevitable soft patches and unexpected occurrences that await. We approached 2023 therefore a little wiser, but quietly optimistic too.

Global equities as measured by the MSCI AC World Index rose 7.2% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response. Up to this point, equities had been enjoying a strong run since October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and US headline CPI fell from its mid-2022 peak of 9% to 6% at the latest reading. While the moves are in the right direction, inflation remains well above target. In March, the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) raised rates by 25 bps, 50 bps, and 25 bps, respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. Away from inflation, the growth outlook continued to quietly improve. At the beginning of the year, a Bloomberg survey of economists' growth forecasts for the US had started out at a fairly dismal 0.3% for the year ahead, but by the end of March those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% growth target set by the National People's Congress. The banking issues, therefore, only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable with the decisive actions taken by regulators and focussed on the better fundamentals, even if broader questions surround the economic and regulatory impact of the banking crisis. Within the portfolio, the Loomis Sayles US Equity Leaders fund rose over 16% for the period as growth style investments outpaced value. The European equity funds also delivered strong gains of between 12% and 13% as worries of a deep eurozone recession faded.

At the time of writing, the full implications of the March banking difficulties and associated response are unclear. However, reasonable assumptions include increased supervision, a higher cost of capital for financial institutions and tighter lending standards. Regardless, it seems unlikely that the major central banks will reverse their current tightening cycles to deal with individual instances of poorly managed banks. So, barring a major contagion event, the bigger issue facing the global economy remains the pathway of inflation and the associated interest rate response into the rest of the year and beyond. In our view, disinflation is underway in the US, but we would note that the Fed

30 June 2023

Commentary (Unaudited)

remains institutionally traumatised by past instances of underestimation, not least that of 1980. In the spring of that year, inflation came down from high levels and the central bank eagerly cut interest rates only to tighten them again as prices unexpectedly spiked. Until the Fed declares the current disinflation sustainable and is prepared to start wrapping up the current monetary policy hiking cycle, it seems unlikely that stock markets will gain significant traction from here given the relatively modest additional earnings yield advantage they now offer over risk-free interest rates.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets - and specifically US stocks which account for around two thirds of the world index surged ahead on the back of euphoria around artificial intelligence (AI). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind. Market volatility, as measured by the VIX index, fell to under 13 in June, a level last seen just before the Covid-19 pandemic. Despite this, reasons for concern about the economy and markets were numerous and persuasive. The US debt ceiling deadline was only just met at the end of May as politics were set aside at the last minute to avoid the humiliation and chaos of a potential US default. More worryingly, inflation remains elevated across the major advanced economies. In the US, eurozone and UK, headline inflation was on a decelerating course but core inflation remained stubborn at 5.3%, 5.3% and 7.1%, respectively, by the end of the quarter. While the US Federal Reserve chose to 'skip' a hike in its latest decision, there was little question of ending the current tightening cycle, while the European Central Bank (ECB) and Bank of England both hiked rates at their latest meetings in a clear signal of intent. The uncertainty around the end-point of the inflation and interest rate saga that began in early 2022 shows no sign of lifting, a fact not lost on bond markets, whose own MOVE volatility index still remains elevated versus 2021. Other potential risks included the continued travails of the US regional banking system which saw the failure of First Republic in early May and whose impact on lending into the real economy is just now starting to reveal itself. Geopolitics remained fraught too amid Ukraine's counter-offensive, an attempted putsch by Russian mercenaries and simmering tensions between the US and China. The US Republican nomination process provided its own dramas as the leading candidate faced outright criminal charges. While the last few days of the quarter started to show a more consistent alignment as market volatility picked up amid all this, the review period as a whole was characterised by a marked divergence in markets

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 25.8% in the year to 30 June 2022, compared to the benchmark, the MSCI China 10/40 index in USD terms, which fell to 17.1%.

In the third quarter of 2022, July saw China equities pulled back sharply due to concerns regarding the property market and disappointment over the lack of new initiatives in the quarterly Politburo meeting at month end. Headlines regarding mortgage holders refusing to pay mortgages on pre-sold property stopping construction led the real estate index and the financial sector down and continues to dampen broader sentiment. Both consumer discretionary and communication services sectors also had outsized losses due to ongoing localised Covid lockdown disruptions and in some cases disappointing second quarter results despite low expectations. Then in September 2022 China equities (MSCI China 10/40) were very weak, falling 14.4%, with world equities (MXWO) falling 10% as ongoing central bank rate hikes continued (ex-China) into a weakening economic environment, raising fears of a more significant global recession next year. While domestic weakness continues due to Covid disruptions and property stress, it was primarily overseas risk which dragged the market lower. The onshore China index (CSI300) was down 10% over the month while overseas listed China shares (MX0CN) pulled back from last month's gains finishing -15%. The brunt of the weakness came in information technology (-19.3%), communication services (-19%) and healthcare (-18.8%) due to: additional US restrictions affecting some segments, pressure on higher rated stocks from higher international discount rates and a weaker third quarter growth outlook. Consumer discretionary was also weak (-16.1%) across most key segments on the weaker third quarter prospects. Outperformance unsurprisingly came from consumer staples (-7%) as defensives and also from some segment beneficiaries of weaker soft commodity price trends which can be margin supportive. Over September the Fund fell in the month, largely in line with the index. Good performance came from the industrials underweight, financials and positioning in communication services. Consumer discretionary was the key drag with weakness seen across autos, platform retail and apparel retail. Healthcare was a negative contributor as the contract development and manufacturing organisation (CDMO) sector was weak around the announcement of a US domestic healthcare support plan.

The MSCI China Index rose in the fourth quarter of 2022. Chinese stocks fell in October following the 20th Party Congress as investors were disappointed that there was no immediate Covid loosening. The market then rallied strongly in November after China introduced more supportive property policies and started loosening Covid restrictions faster than expected. Among sectors, healthcare and communication services outperformed the most. Energy and consumer staples lagged the most in the rally. GAM Star China Equity rose in the quarter, but underperformed its benchmark. The real estate sector performed strongly over the period, with our holdings in A Living and China Vanke delivering strong positive attribution. Given the easing of China's zero-Covid policy, consumer discretionary names in China outperformed the index. Here, despite a relatively weak stock selection in the sector, VIPshop, Pinduoduo and TRIP.com were significant relative contributors to portfolio performance in the quarter. Financials dragged the most over the period as our insurance holding PICC Property and online broker Futu Holdings both underperformed. The change in portfolio manager intra-quarter led to substantive changes in the portfolio's positioning. The Fund's strategy is now focused on industries that benefit disproportionately from China's evolution towards a consumer and innovation driven economy. Consistent with the investment focus and based on the bottom-up opportunities we find, the portfolio started 2023 with an overweight in information technology, communication services and consumer discretionary at the expense of sectors such as industrials, consumer staples and energy.

The year began strongly with the Index rising 11.6% in January on the long-awaited exit from China's zero Covid policy. The Fund gained in the month with sector weighting contributing positively, namely the overweight in communication services and underweight in consumer staples and utilities. This offset the negative impact from the underweight in materials. The best performing stock positions were mainly in information technology and consumer discretionary, including network security company Sangfor Technologies, software company China National Software and select internet names such as Alibaba and Netease. Laggards included Weimob and Sino

Biopharmaceutical. The Fund reduced the weighting of financials and added to healthcare positions. The market corrected in February as investor sentiment cooled and heightened geopolitical noise. The Fund declined in the month. Sector weighting contributed negatively due to the overweight in consumer discretionary and the underweight in better performing consumer staples, energy, materials and utilities sectors. The best performing stock positions in the month included Digital China, Baidu and Guangzhou Kingmed. Laggards included Country Garden Service, Douyu International, Koolearn Technology and e-commerce names.

The index fell in April even as economic data in China showed signs of recovery. Investor sentiment was subdued amid ongoing US-China tension. The Fund fell in the month with sector weighting negatively impacting performance, mainly due to the underweight in energy and the overweight in communication services. The best performing stock positions included healthcare names such as Hansoh Pharmaceutical and CSPC Pharmaceutical as well as insurance companies such as China Pacific Insurance and Ping An Insurance. The largest laggards were in technology and internet, including Baidu, Alibaba, Digital China and China National Software. During the month, information technology was reduced while healthcare and financials were increased. In May, the index fell 8.4% as investor sentiment was dampened by an uneven economic recovery along with continued geopolitical concerns. Evidence of sustainable longer-term growth will be required to clear investors' doubts. The Fund declined in the month. Sector weighting had a positive impact on performance due to the underweight in real estate and materials and the overweight in financials. The best performing stock positions included Livzon Pharmaceutical and IT security company Sangfor Technology. Baidu and 37 Interactive also outperformed thanks to the Al theme. Laggards were mostly in technology and internet names despite many reporting better than expected earnings including Iqiyi, JOYY Inc, Alibaba Health and China Literature. The index rose 3.9% in June on expectations of more supportive government policies amid softening growth momentum in the economy. The Fund rose in the month. Sector weighting had a slightly negative impact while stock selection contributed positively. China internet names were among the top performers. The best performing positions included those stocks that rebounded after the previous correction such as Iqiyi, JOYY Inc and China Literature. Major laggards included Sangfor Technology, Sino Biopharmaceutical and clean energy companies Longyuan Power and Xinjiang Goldwind. During the month, consumer discretionary was increased in the portfolio, while healthcare was decreased.

Outlook

Low valuations remain positive to Chinese equity. In the second quarter, corporate earnings recovery started to pick up. We expect further government stimulus to support economic recovery and stock price performance. The Fund is positioned in recovery names as well as beaten-down growth stocks in consumer and innovation.

Fund Manager: Julian Howard/GAM's Multi Asset Solutions Team

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 14.6% in the year to 30 June 2023, versus the MSCI AC World index, which rose 17.1% in USD terms.

Global equities, as measured by the MSCI AC World Index, declined in the third quarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' which has characterised both the year to date as well as the third quarter, is at its heart a reflection of the on-going difficulty in determining a price for any asset at all, from stocks and bonds to gold and bitcoin.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy - and therefore investible assets - in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market guage of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

Global equities as measured by the MSCI AC World Index rose 3.8% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of fast-rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably even more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by arch-rival UBS as confidence started to drain on both sides of the the Atlantic and investors and depositors looked to exit weaker institutions. Stockmarkets and bond yields both fell sharply in response, before recovering somewhat. Up to this point equities had in fact been enjoying a firm run dating back to October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and, while labour market data in the US suggested that the process was not going to be smoothly linear (an unrealistic assumption anyway), US headline CPI was generally heading in the right direction, falling from its mid-2022 peak of 9% to 6% at the latest reading. But this was not fast enough for the major central banks. In March alone, the US Federal Reserve, ECB and Bank of England raised rates by 25bps, 50bp, and 25bps respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. In the background, the growth outlook continued to quietly improve. At the beginning of the year Bloomberg's survey of economists' US GDP growth expectations for 2023 had started out at a fairly dismal 0.3%, but by the end March of those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% 2023 growth target set by the National People's Congress. The banking issues therefore only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable enough with the decisive actions taken by regulators to be able to focus on these slightly better fundamentals for the time being, even if broader questions about the economic and regulatory impact of the banking crisis and the continued inflation and rates conundrum remained outstanding.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets – and specifically US stocks which account for around two thirds of the world index – surged ahead on the back of euphoria around the latest breakthrough in artificial intelligence (Al). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) rose 20.6% in the year to 30 June 2023, compared to its benchmark, the MSCI Europe ex UK Net index in EUR terms, which rose 19.4%.

July was a much stronger month for equity markets with falling bond yields and decent earnings prints providing a positive spur to European markets. Looking at factor returns, it would appear that falling bond yields, in the anticipation of peaking inflation, had a larger impact with the quality factor outperforming and the value factor underperforming. To be clear, we do not think inflationary pressures have gone away and we still find many quality stocks to be excessively valued (and many value stocks to be excessively undervalued) so we would not be surprised to see a mean reversion of this factor performance towards the end of the year. Whether this leads to further market falls remains to be seen but we would point out that European equity markets - in aggregate - are undervalued on 12x earnings and earnings overall are surprisingly robust. The second quarter results – as per July – were in general very good. Netcompany was an exception after a series of one-offs led to a significant miss but management were confident in trading for the rest of the year. September was a dizzying month: here in the UK, we had a change of Prime Minister and a change in sovereign, 10 days of national mourning, a meltdown in the gilts market, disarray in government and the continued reverberations of the energy crisis across the body politic. More broadly, global equity markets declined significantly - the MSCI Europe index was down -6.28% - interest rates rose, short rates and bond yields rose considerably and developed market (DM) currencies fell heavily against the USD. Interest rate expectations have moved significantly this year with a significant spike in September, especially in GBP swap rates. As well as indicating the change in rate expectations, there are real world consequences of this: in the UK most mortgages price off 2-year swap rates with significant amounts of aggregate refinancing each month, implying that a large chunk of the 30% of UK households that have a mortgage will experience a large hit to discretionary income, on top of the hit from higher energy costs.

October was less dizzying than September, but only marginally less so for those of us living in the UK with the appointment of our fifth Prime Minister in six years, Rishi Sunak. His appointment seems to have positively impacted sterling, gilt yields and the risk premium attached to UK assets. November was another strong month for European equities, with the MSCI Europe ex-UK (net) index up by 7.1% in Euro currency. A reversal in Euro currency weakness boosted returns in USD to 11.5%. Reasons for this strong performance included better than expected (or less bad) economic data, the continuation of strong quarter three earnings for European companies and more benign inflation data bringing down bond yields, boosting the valuation of 'growth' companies. European equity markets gave back some of their strong prior month(s) gains in December but still managed to end the year down by less than 10%, as measured by the MSCI Europe ex-UK net index. This might seem surprising (to some), given macro events over the course of the year, but it is worth thinking back to where we were 12 months ago: at that time we (and consensus) were bullish on the prospects for European equities, the reasons for this being: relatively attractive equity valuations; rising earnings expectations combined with strong earnings growth; and an underlying bullishness on global economies momentum following the stop/start economies of the 2020/21 pandemic years. We were expecting a continued pickup in inflation, had a view that this would be more persistent than most economists imagined and that this would lead to rising interest rates and the end of the 'free money era'. But we also believed that the underlying economic conditions were such that higher rates and yields would be absorbed by equity markets (overall) with the downward pressure on growth/quality equity valuations more than compensated by the higher earnings growth across the market resulting from high nominal GDP growth.

A very strong start to 2023 for European equities, with the MSCI Europe index up almost 7% in January in EUR and higher at 8.4% in USD, given the Euro gains against the dollar. The reason for the very strong market start is perhaps a reaction to the excessive level of pessimism that existed in the second half of 2022 and a growing view that the economic and earnings outlook for Europe is not as 'dark' as previously assumed; lower than feared natural gas prices due to a warm winter, an accelerated reopening in China and continued evidence in company earnings that the sky is not falling down all helped to shift the narrative with a sharp upward movement in markets, perhaps accentuated by

short covering. Outflows into the European equity asset class turned positive although it is important to note that active equities remain in outflow and the inflows were generated by strong passive inflow, which is more likely to be macro Fund allocations rather than 'real money' buyers. Nonetheless the turnaround in sentiment is welcome as we believed that the excessive pessimism that existed for much of last year was not consistent with what was being reported by the European companies, we are invested in. February was another positive month in European equities driven by a continuation of strong earnings results relative to somewhat 'reluctant' expectations; it seems very hard for the market to shake off the muscle memory of bearishness in respect to the European equity asset class, with this also reflected in valuations that remain cheap in absolute terms and relative to other asset classes. The areas of strongest earnings growth were banks, driven predictably - although not by those who forecast bank earnings - by rising rates/yields and energy stocks, driven by higher realised oil and gas prices. March represented a very volatile month as concerns over US regional banks spread across the Atlantic, exacerbated by stresses over the resolution of Credit Suisse. We have written at length about why we believe issues related to US regional banks do not apply to European banks and how Credit Suisse was an idiosyncratic event, but this did not stop the share prices of European banks hitting an 'air pocket' with markets taking a defensive/quality tilt. Somewhat miraculously, markets ended the month only slightly down (or even up, depending on the index) but there was a lot of intra-market dispersion by sector, with energy and industrials also down significantly and IT, healthcare and consumer staples all up. We believe much of the market actions and a lot of the commentary (especially in the financial press) represented a high level of 'headless chicken-ism' and we expect share prices in the banking and energy sectors to revert to prior levels and to continue their upward ascent - once calm and common sense has returned. Our February update highlighted the extreme levels of banking and energy sector valuations (PE relatives) and these have become even more extreme in March despite reassuring fundamentals, high levels of free cash flow and continued share buybacks.

April was a more positive month for European equities with the MSCI Europe net index up by 2.5% in euro currency but with a much more defensive flavour that did not suit our positioning at all. This is evident in considering the performance of the MS European Cyclicals versus Defensives basket (which has been on a downwards lurch since March) as well as sector performance, with healthcare, consumer staples and utilities all outperforming while IT, banks and consumer discretionary all underperformed. The GAM Star Continental European Equity Fund (EUR, Inst) fell in value in May, but outperformed the MSCI Europe ex-UK net index. The key driver of outperformance for the Fund was our exposure to semiconductor capex through our holdings in BE Semiconductor, ASM International and Atlas Copco. A positive first quarter announcement from Nvidia with very positive comments on the growth outlook for GPU chips added to the growing 'Al hype' and drove outperformance for those stocks exposed to the Nvidia supply chain and semiconductor capex in general (as well as Nvidia itself). All three of our exposures saw material share price appreciation with Atlas Copco further benefitting from excitement around the energy transition following the large order beat in its compressor business (announced at the first quarter results). The Fund also benefitted from strong results from Ryanair indicating a strong summer 2023 season and a new order for 300 planes from Boeing, increasing confidence in the longer-term growth of the company, and a slightly better performance from banking sector stocks. The Fund rose in value by 2.9% in June versus a rise of 2.7% for the MSCI Europe ex-UK net index, representing an outperformance of +27 bps. June was a strong month for European equities with the MSCI Europe ex-UK index up 2.7% for the month.

GAM Star Credit Opportunities (EUR)

Fund Manager: Anthony Smouha, Gregoire Mivelaz and Patrick Smouha, ATLANTICOMNIUM SA

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) fell 1.7% in the year to 30 June 2023, versus the Bloomberg Euro Aggregate Corporate Total Return index in EUR terms, which rose 0.1%.

The third quarter of 2022 was once again a weak quarter for risk assets, despite a more positive first half. The macroeconomic backdrop remains complicated, with inflation remaining high, the Russia-Ukraine war, as well as the energy crisis within Europe. On the positive side, valuations have become attractive in our view, as spreads have widened significantly year-to-date. This is despite the fact we believe credit fundamentals of financials remain strong, as asset quality is currently the strongest we have seen over the last 15 years and capital ratios remain high with common equity tier 1 (CET1) ratios of European banks still well above 15%, which is close to the all-time highs. Financials are well positioned to benefit within the context of higher interest rates. Moreover, as stated above, valuations are getting very close to the wides of Covid, despite the strong credit fundamentals. With a yield to maturity close to 7.5% and a yield to next call of more than 9%, we believe the Fund will capture high income going forward on top of potential price recovery.

The fourth quarter was stronger for risk assets. We started seeing the beginning of a recovery in prices, as inflation numbers seem to be stabilising, with US CPI data for October and November coming in at lower levels than expected. Spreads on subordinated debt tightened quite significantly during the quarter. However, spreads remain extremely wide. For most subordinated debt, spreads widened by more than 200 bps during the year. This is despite the fact that credit fundamentals of financials remain strong. Non-performing loans (NPLs) for European and UK banks are currently at all-time lows, and capital ratios remain close to all-time highs for both banks and insurances. Moreover, higher interest rates mean higher net interest income (NII) for banks, which will likely translate into higher profitability and return on equity. This should outweigh any increase in NPLs resulting from the macroeconomic uncertainty. As such, we believe we are well positioned to recover the downward moves of 2022. As we have seen in the past, the Fund has tended to recover within the following 12 months. We believe the strong income the Fund is generating should help us going forward.

The first quarter of 2023 began strongly for risk assets, and we saw strong performances until the beginning of February. However, since then we saw some weakness and the month of March was all about banks, following the events regarding US regional banks and Credit Suisse. We believe that these were two very different situations. Moreover, these were two idiosyncratic situations and we do not believe there is any read across to European banks and financials. Due to the structure of the Credit Suisse takeover, it created volatility of prices within Additional Tier 1 (AT1) contingent convertibles (CoCos), which initially fell significantly. However, we have started seeing some recovery, notably due to the fact European and UK regulators have commented that AT1 bondholders are always senior to equity holders. Due to all of these factors we have seen spreads widen during the quarter, especially within AT1 CoCos. This is even though earnings for European financials excluding Credit Suisse were strong. Higher rates have translated into higher net interest income (NII) which should mean higher profitability. As such we believe that as the situation normalises, we should see some strong price recovery, which coupled with the high income the Fund is generating should help us going forward.

We started seeing some recovery in the second quarter, notably as spreads tightened. However, this recovery was partially derailed in June, when we started seeing the 'higher interest rates for longer' theme guiding market sentiment. This led to strong volatility and a move upwards in interest rates. As such, we saw some weakness in the second part of June. Despite that, we have seen some very positive news across subordinated debt of financials during the quarter. Following a number of Tier 2 bonds being issued, we saw the first Additional Tier 1 (AT1) debt issued by a major European bank since the Crédit Suisse event. The issuer was BBVA, which issued EUR 1 billion of an AT1 with a coupon of 8.375%. Moreover, there was strong demand for the new issue. This demonstrates that the subordinated debt market is normalising. Additionally, Q1 results demonstrated that European banks are in good shape. Their Common Equity Tier 1 (CET1) ratios remain at very high levels and profitability remains strong. In terms of bank deposit flows, in aggregate these have been very stable, and we have not seen any European national

champions experience large deposit outflows, with some even experiencing inflows. Despite all these positive factors, spreads remain at extremely wide levels. As such we believe that we should see strong price recovery, which, coupled with the high income that the Fund is generating, should help us going forward.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) fell 3.9% in the year to 30 June 2023, versus the Bloomberg Sterling Aggregate Corporate Total Return index, which fell 6.9% in GBP terms.

The third quarter of 2022 was once again a weak quarter for risk assets, despite a better first half. The macroeconomic backdrop remains complicated, with inflation remaining high, the Russia-Ukraine war, as well as the energy crisis within Europe. On top of that, for GBP denominated assets, there was the added volatility following the appointment of the new prime minister. On the positive side, valuations have become attractive in our view, as spreads have widened significantly year-to-date. This is despite the fact we believe credit fundamentals of financials remain strong, as asset quality is currently the strongest we have seen over the last 15 years and capital ratios remain high with common equity tier 1 (CET1) ratios of European banks still well above 15%, which is close to all-time highs. Financials are well positioned to benefit within the context of higher interest rates. Moreover, as stated above valuations are getting very close to the wides of Covid, despite the strong credit fundamentals. With a yield to maturity close to 8% and a yield to next call of almost 10%, we believe the Fund will capture high income going forward on top of potential price.

The fourth quarter was stronger for risk assets. We started seeing the beginning of a recovery in prices, as inflation numbers seem to be stabilising, with US CPI data for October and November coming in at lower levels than expected. Spreads on subordinated debt tightened guite significantly during the quarter. However, spreads remain extremely wide. For most subordinated debt, spreads widened by more than 200 bps during the year. This is despite the fact that credit fundamentals of financials remain strong. Non-performing loans (NPLs) for European and UK banks are currently at all-time lows, and capital ratios remain close to all-time highs for both banks and insurances. Moreover, higher interest rates mean higher net interest income (NII) for banks, which will likely translate into higher profitability and return on equity. This should outweigh any increase in NPLs resulting from the macroeconomic uncertainty. As such, we believe we are well positioned to recover the downward moves of 2022. As we have seen in the past, the Fund has tended to recover within the following 12 months. We believe the strong income the Fund is generating should help us going forward.

The first quarter of 2023 began strongly for risk assets, and we saw strong performances until the beginning of February. However, since then we saw some weakness and the month of March was all about banks, following the events regarding US regional banks and Credit Suisse. We believe that these were two very different situations. Moreover, these were two idiosyncratic situations and we do not believe there is any read across to European banks and financials. Due to the structure of the Credit Suisse takeover, it created volatility of prices within Additional Tier 1 (AT1) contingent convertibles (CoCos), which initially fell significantly. However, we have started seeing some recovery, notably due to the fact European and UK regulators have commented that AT1 bondholders are always senior to equity holders. Due to all of these factors we have seen spreads widen during the quarter, especially within AT1 CoCos. This is even though earnings for European financials excluding Credit Suisse were very strong. Higher rates have translated into higher net interest income (NII) which should mean higher profitability. As such we believe that as the situation normalises, we should see some strong price recovery, which coupled with the high income the Fund is generating should help us going forward.

We started seeing some recovery in the second quarter, notably as spreads tightened. However, this recovery was partially derailed in June, when we started seeing the 'higher interest rates for longer' theme guiding market sentiment. This led to strong volatility and a move upwards in interest rates. As such, we saw some weakness in the second part of June. Despite that, we have seen some very positive news across subordinated debt of financials during the quarter. Following a number of Tier 2 bonds being issued, we saw the first Additional Tier 1 (AT1) debt issued by a major European bank since the Crédit Suisse event. The issuer was BBVA, which issued EUR 1 billion of an AT1 with a coupon of 8.375%. Moreover, there was strong demand for the new issue. This demonstrates that the subordinated debt market is normalising. Additionally, Q1 results demonstrated that European banks are in good shape. Their Common Equity Tier 1 (CET1) ratios remain at very high levels

and profitability remains strong. In terms of bank deposit flows, in aggregate these have been very stable, and we have not seen any European national champions experience large deposit outflows, with some even experiencing inflows. Despite all these positive factors, spreads remain at extremely wide levels. As such we believe that we should see strong price recovery, which, coupled with the high income that the Fund is generating, should help us going forward.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) fell 0.9% over the year to 30 June 2023, versus the Bloomberg US Aggregate Corporate Total Return index, which rose 1.6% in USD terms.

The third quarter of 2022 was once again a weak quarter for risk assets, despite a more positive first half. The macroeconomic backdrop remains complicated, with inflation remaining high, the Russia-Ukraine war, as well as the energy crisis within Europe. On the positive side, valuations have become attractive in our view, as spreads have widened significantly year-to-date. This is despite the fact we believe credit fundamentals of financials remain strong, as asset quality is currently the strongest we have seen over the last 15 years and capital ratios remain high with common equity tier 1 (CET1) ratios of European banks still well above 15%, which is close to the all-time highs. Financials are well positioned to benefit within the context of higher interest rates. Moreover, as stated above, valuations are getting very close to the wides of Covid, despite the strong credit fundamentals. With a yield to maturity close to 7.5% and a yield to next call of more than 9%, we believe the Fund will capture high income going forward on top of potential price recovery.

The fourth quarter was stronger for risk assets. We started seeing the beginning of a recovery in prices, as inflation numbers seem to be stabilising, with US CPI data for October and November coming in at lower levels than expected. Spreads on subordinated debt tightened quite significantly during the quarter. However, spreads remain extremely wide. For most subordinated debt, spreads widened by more than 200 bps during the year. This is despite the fact that credit fundamentals of financials remain strong. Non-performing loans (NPLs) for European and UK banks are currently at all-time lows, and capital ratios remain close to all-time highs for both banks and insurances. Moreover, higher interest rates mean higher net interest income (NII) for banks, which will likely translate into higher profitability and return on equity. This should outweigh any increase in NPLs resulting from the macroeconomic uncertainty. As such, we believe we are well positioned to recover the downward moves of 2022. As we have seen in the past, the Fund has tended to recover within the following 12 months. We believe the strong income the Fund is generating should help us going forward.

The first quarter of 2023 began strongly for risk assets, and we saw strong performances until the beginning of February. However, since then we saw some weakness and the month of March was all about banks, following the events regarding US regional banks and Credit Suisse. We believe that these were two very different situations. Moreover, these were two idiosyncratic situations and we do not believe there is any read across to European banks and financials. Due to the structure of the Credit Suisse takeover, it created volatility of prices within Additional Tier 1 (AT1) contingent convertibles (CoCos), which initially fell significantly. However, we have started seeing some recovery, notably due to the fact European and UK regulators have commented that AT1 bondholders are always senior to equity holders. Due to all of these factors we have seen spreads widen during the quarter, especially within AT1 CoCos. This is even though earnings for European financials excluding Credit Suisse were very strong. Higher rates have translated into higher net interest income (NII) which should mean higher profitability. As such we believe that as the situation normalises, we should see some strong price recovery, which coupled with the high income the Fund is generating should help us going forward.

We started seeing some recovery in the second quarter, notably as spreads tightened. However, this recovery was partially derailed in June, when we started seeing the 'higher interest rates for longer' theme guiding market sentiment. This led to strong volatility and a move upwards in interest rates. As such, we saw some weakness in the second part of June. Despite that, we have seen some very positive news across subordinated debt of financials during the quarter. Following a number of Tier 2 bonds being issued, we saw the first Additional Tier 1 (AT1) debt issued by a major European bank since the Crédit Suisse event. The issuer was BBVA, which issued EUR 1 billion of an AT1 with a coupon of 8.375%. Moreover, there was strong demand for the new issue. This demonstrates that the subordinated debt market is normalising. Additionally, Q1 results demonstrated that European banks are in good shape. Their Common Equity Tier 1 (CET1) ratios remain at very high levels and profitability remains strong. In terms of bank deposit flows, in aggregate these have been very stable, and we have not seen any European national

champions experience large deposit outflows, with some even experiencing inflows. Despite all these positive factors, spreads remain at extremely wide levels. As such we believe that we should see strong price recovery, which, coupled with the high income that the Fund is generating, should help us going forward.

Fund Manager: Charles Hepworth/James McDaid

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP Accumulation class) rose 0.8% over the year to 30 June 2023, compared to its benchmark, the Lipper Global Mixed Asset GBP Conservative, which fell 0.6% in GBP terms.

Global equities, as measured by the MSCI AC World Index, declined in the third guarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' is, at its heart, a reflection of the ongoing difficulty in determining a price for any asset at all, from stocks and bonds to gold and property. Core US inflation disappointed markets by coming in at an elevated 6.3% for August, thus postponing any immediate prospect of easing by the US central bank. The Federal Reserve's monetary policy committee went on to raise rates by 75 bps in September, sending US equities down, especially rate-sensitive technology stocks. In the UK, the mini-budget of the new Truss government highlighted the near-impossible policy trade-offs of the current global economic backdrop: a slew of pro-growth policies were greeted by sharp sterling depreciation and a spike in gilt yields as markets appeared to balk at the prospect of unfunded stimulus. The UK central bank eventually intervened to restore calm but the market's price action over the quarter increasingly reflected pessimism that a high inflation, low growth outcome could be avoided. Within the strategy, equity exposure was decreased in the early stages of September as volatility markedly increased. This reduction across all regions reflects our more cautious tilt and we have redirected some of these monies to bond investments in the short-dated US Treasury market following the extreme price falls we have seen. However, the majority of the monies raised will remain in cash instruments as we expect volatility to increase - cash levels are at historically high levels within the strategy.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate.From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

The strategy remained tactically underweight equities during the last quarter of the year. Within this, we held underweights to UK and US equities and an overweight to Japanese equities. Equity volatility was relatively well contained at the portfolio level via our fixed income sleeve. Here we held exposure to very low volatility money market instruments and ultra-short Treasury securities, complemented by mortgage-backed securities and financial related credit. In

alternatives, we continue to have exposure to a gold ETF, as well as a global macro fund. While the fundamentals of the good news that lifted the final quarter of 2022 looked set to persist into 2023, investment trends rarely play out linearly and the economic backdrop remains challenging as consumers retrench. The OECD had predicted GDP growth of 2.2% for 2023, down from the 3.1% that seemed likely for 2022.Global inflation will suffer pauses and reversals as it decelerates, not least from a likely boost in Chinese energy demand. Furthermore, market expectations of a Fed pivot are unlikely to be met given the central bank will be acutely conscious of its own credibility as it responds slowly to peaking inflation. This mismatch is likely to explain why indices will probably not spike euphorically on softer inflation data in the coming months, however welcome it may seem to market commentators. Ukraine meanwhile faces a long haul to restoring its territorial integrity, with slow progress and rising costs the main risk to vital continued Western commitment. In China, the lifting of Covid restrictions is seeing hospitals overwhelmed and, in the absence of a successful vaccination programme, localised but economically disruptive lockdowns could yet be re-deployed. But, far from being a reason to be despondent, fundamentally better news flow with limited (initial) investor participation is arguably a formula for improved returns in the medium term. Persistent equity engagement will remain key to capitalising on these better conditions of course, but effective diversification and tactical asset allocation will be important for the inevitable soft patches and unexpected occurrences that await. We approached 2023 therefore a little wiser, but quietly optimistic too.

Global equities as measured by the MSCI AC World Index rose 7.2% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response. Up to this point, equities had been enjoying a strong run since October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and US headline CPI fell from its mid-2022 peak of 9% to 6% at the latest reading. While the moves are in the right direction, inflation remains well above target. In March, the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) raised rates by 25 bps, 50 bps, and 25 bps, respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation.

Away from inflation, the growth outlook continued to quietly improve. At the beginning of the year, a Bloomberg survey of economists' growth forecasts for the US had started out at a fairly dismal 0.3% for the year ahead, but by the end of March those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% growth target set by the National People's Congress. The banking issues, therefore, only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable with the decisive actions taken by regulators and focussed on the better fundamentals, even if broader questions surround the economic and regulatory impact of the banking crisis. Within the portfolio, the Loomis Sayles US Equity Leaders fund rose over 16% for the period as growth style investments outpaced value. The European equity funds also delivered strong gains of between 12% and 13% as worries of a deep

At the time of writing, the full implications of the March banking difficulties and associated response are unclear. However, reasonable assumptions include increased supervision, a higher cost of capital for financial institutions and tighter lending standards. Regardless, it seems unlikely that the major cental banks will reverse their current tightening cycles to deal with individual instances of poorly managed banks. So, barring a major contagion event, the bigger issue facing the global economy remains the pathway of inflation and

30 June 2023

Commentary (Unaudited)

the associated interest rate response into the rest of the year and beyond. In our view, disinflation is underway in the US, but we would note that the Fed remains institutionally traumatised by past instances of underestimation, not least that of 1980. In the spring of that year, inflation came down from high levels and the central bank eagerly cut interest rates only to tighten them again as prices unexpectedly spiked. Until the Fed declares the current disinflation sustainable and is prepared to start wrapping up the current monetary policy hiking cycle, it seems unlikely that stock markets will gain significant traction from here given the relatively modest additional earnings yield advantage they now offer over risk-free interest rates.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets - and specifically US stocks which account for around two thirds of the world index surged ahead on the back of euphoria around artificial intelligence (AI). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether AI will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind. Market volatility, as measured by the VIX index, fell to under 13 in June, a level last seen just before the Covid-19 pandemic. Despite this, reasons for concern about the economy and markets were numerous and persuasive. The US debt ceiling deadline was only just met at the end of May as politics were set aside at the last minute to avoid the humiliation and chaos of a potential US default. More worryingly, inflation remains elevated across the major advanced economies. In the US, eurozone and UK, headline inflation was on a decelerating course but core inflation remained stubborn at 5.3%, 5.3% and 7.1%, respectively, by the end of the quarter. While the US Federal Reserve chose to 'skip' a hike in its latest decision, there was little question of ending the current tightening cycle, while the European Central Bank (ECB) and Bank of England both hiked rates at their latest meetings in a clear signal of intent. The uncertainty around the end-point of the inflation and interest rate saga that began in early 2022 shows no sign of lifting, a fact not lost on bond markets, whose own MOVE volatility index still remains elevated versus 2021. Other potential risks included the continued travails of the US regional banking system which saw the failure of First Republic in early May and whose impact on lending into the real economy is just now starting to reveal itself. Geopolitics remained fraught too amid Ukraine's counter-offensive, an attempted putsch by Russian mercenaries and simmering tensions between the US and China. The US Republican nomination process provided its own dramas as the leading candidate faced outright criminal charges. While the last few days of the guarter started to show a more consistent alignment as market volatility picked up amid all this, the review period as a whole was characterised by a marked divergence in

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP Institutional Accumulation class) rose 5.2% over the year to 30 June 2023, compared to its benchmark, the Lipper Global Mixed Asset GBP Aggressive, which rose 3.9% in GBP terms.

Global equities, as measured by the MSCI AC World Index, declined in the third guarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' is, at its heart, a reflection of the ongoing difficulty in determining a price for any asset at all, from stocks and bonds to gold and property. Core US inflation disappointed markets by coming in at an elevated 6.3% for August, thus postponing any immediate prospect of easing by the US central bank. The Federal Reserve's monetary policy committee went on to raise rates by 75 bps in September, sending US equities down, especially rate-sensitive technology stocks. In the UK, the mini-budget of the new Truss government highlighted the near-impossible policy trade-offs of the current global economic backdrop: a slew of pro-growth policies were greeted by sharp sterling depreciation and a spike in gilt yields as markets appeared to balk at the prospect of unfunded stimulus. The UK central bank eventually intervened to restore calm but the market's price action over the quarter increasingly reflected pessimism that a high inflation, low growth outcome could be avoided. Within the strategy, equity exposure was decreased in the early stages of September as volatility markedly increased. This reduction across all regions reflects our more cautious tilt and we have redirected some of these monies to bond investments in the short-dated US Treasury market following the extreme price falls we have seen. However, the majority of the monies raised will remain in cash instruments as we expect volatility to increase - cash levels are at historically high levels within the strategy.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

The strategy remained tactically underweight equities during the last quarter of the year. Within this, we held underweights to UK and US equities and an overweight to Japanese equities. Equity volatility was relatively well contained at the portfolio level via our fixed income sleeve. Here we held exposure to very low volatility money market instruments and ultra-short Treasury securities, complemented by mortgage-backed securities and financial related credit. In

alternatives, we continue to have exposure to a gold ETF, as well as a global macro fund. While the fundamentals of the good news that lifted the final quarter of 2022 looked set to persist into 2023, investment trends rarely play out linearly and the economic backdrop remains challenging as consumers retrench. The OECD had predicted GDP growth of 2.2% for 2023, down from the 3.1% that seemed likely for 2022. Global inflation will suffer pauses and reversals as it decelerates, not least from a likely boost in Chinese energy demand. Furthermore, market expectations of a Fed pivot are unlikely to be met given the central bank will be acutely conscious of its own credibility as it responds slowly to peaking inflation. This mismatch is likely to explain why indices will probably not spike euphorically on softer inflation data in the coming months, however welcome it may seem to market commentators. Ukraine meanwhile faces a long haul to restoring its territorial integrity, with slow progress and rising costs the main risk to vital continued Western commitment. In China, the lifting of Covid restrictions is seeing hospitals overwhelmed and, in the absence of a successful vaccination programme, localised but economically disruptive lockdowns could yet be re-deployed. But, far from being a reason to be despondent, fundamentally better news flow with limited (initial) investor participation is arguably a formula for improved returns in the medium term. Persistent equity engagement will remain key to capitalising on these better conditions of course, but effective diversification and tactical asset allocation will be important for the inevitable soft patches and unexpected occurrences that await. We approached 2023 therefore a little wiser, but quietly optimistic too.

Global equities as measured by the MSCI AC World Index rose 7.2% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response. Up to this point, equities had been enjoying a strong run since October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and US headline CPI fell from its mid-2022 peak of 9% to 6% at the latest reading. While the moves are in the right direction, inflation remains well above target. In March, the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) raised rates by 25 bps, 50 bps, and 25 bps, respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. Away from inflation, the growth outlook continued to quietly improve. At the beginning of the year, a Bloomberg survey of economists' growth forecasts for the US had started out at a fairly dismal 0.3% for the year ahead, but by the end of March those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% growth target set by the National People's Congress. The banking issues, therefore, only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable with the decisive actions taken by regulators and focussed on the better fundamentals, even if broader questions surround the economic and regulatory impact of the banking crisis. Within the portfolio, the Loomis Sayles US Equity Leaders fund rose over 16% for the period as growth style investments outpaced value. The European equity funds also delivered strong gains of between 12% and 13% as worries of a deep eurozone recession faded.

At the time of writing, the full implications of the March banking difficulties and associated response are unclear. However, reasonable assumptions include increased supervision, a higher cost of capital for financial institutions and tighter lending standards. Regardless, it seems unlikely that the major central banks will reverse their current tightening cycles to deal with individual instances of poorly managed banks. So, barring a major contagion event, the bigger issue facing the global economy remains the pathway of inflation and the associated interest rate response into the rest of the year and beyond. In our view, disinflation is underway in the US, but we would note that the Fed

30 June 2023

Commentary (Unaudited)

remains institutionally traumatised by past instances of underestimation, not least that of 1980. In the spring of that year, inflation came down from high levels and the central bank eagerly cut interest rates only to tighten them again as prices unexpectedly spiked. Until the Fed declares the current disinflation sustainable and is prepared to start wrapping up the current monetary policy hiking cycle, it seems unlikely that stock markets will gain significant traction from here given the relatively modest additional earnings yield advantage they now offer over risk-free interest rates.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets - and specifically US stocks which account for around two thirds of the world index surged ahead on the back of euphoria around artificial intelligence (AI). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind. Market volatility, as measured by the VIX index, fell to under 13 in June, a level last seen just before the Covid-19 pandemic. Despite this, reasons for concern about the economy and markets were numerous and persuasive. The US debt ceiling deadline was only just met at the end of May as politics were set aside at the last minute to avoid the humiliation and chaos of a potential US default. More worryingly, inflation remains elevated across the major advanced economies. In the US, eurozone and UK, headline inflation was on a decelerating course but core inflation remained stubborn at 5.3%, 5.3% and 7.1%, respectively, by the end of the quarter. While the US Federal Reserve chose to 'skip' a hike in its latest decision, there was little question of ending the current tightening cycle, while the European Central Bank (ECB) and Bank of England both hiked rates at their latest meetings in a clear signal of intent. The uncertainty around the end-point of the inflation and interest rate saga that began in early 2022 shows no sign of lifting, a fact not lost on bond markets, whose own MOVE volatility index still remains elevated versus 2021. Other potential risks included the continued travails of the US regional banking system which saw the failure of First Republic in early May and whose impact on lending into the real economy is just now starting to reveal itself. Geopolitics remained fraught too amid Ukraine's counter-offensive, an attempted putsch by Russian mercenaries and simmering tensions between the US and China. The US Republican nomination process provided its own dramas as the leading candidate faced outright criminal charges. While the last few days of the quarter started to show a more consistent alignment as market volatility picked up amid all this, the review period as a whole was characterised by a marked divergence in markets

Fund Manager: Tim Love/Joaquim Nogueira

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 4.8% over the year to 30 June 2023, compared to its benchmark, the MSCI Emerging Markets index which rose 1.8% in USD terms.

Our third quarter 2022 expectations of two positive triggers to the MSCI EM asset class, are coming to fruition. The first trigger is we believe we are close to a USD peak and the second is post Covid normalisation in China. This is driving MSCI EM earnings per share (EPS) to more normalised prospective levels and hence this will also drive MSCI EM Index valuations on strongly positive 2023/2022 H2 EPS expectations. Markets had a lacklustre finish to 2022 with EM (MSCI EM Index in USD) closing down for both December and the year. The EM December performance was better than the MSCI World Index and S&P 500 Index supported by a stronger performance from China and domestic focused South Asian markets. China performance improved as despite the end to its zero Covid strategy causing a surge in Covid cases and disruption to services and supply chains, there is anticipation it will be relatively short-lived and in the meantime, policymakers are expected to continue to add further economic stimulus. Underperforming markets were the more developed, world-sensitive markets (Mexico, South Korea and Taiwan) as fears of slower developed growth emerged following a surprise rise in the Bank of Japan yield curve control (YCC) band which led to a rise in global yields and weakness in the USD. Higher sovereign yields put pressure on developed world credit though commodities remained more resilient with base metals up and oil flat, likely on the prospect of an eventual recovery in China demand. Sector shifts broadly followed a risk-off pattern though were more nuanced in EM due to China's stronger performance. Information technology was the weakest sector due to developed world demand weakness and production interference in China leading to difficult operating conditions and forecasts for exceptionally weak Q4 results from the technology majors. EM commercial services and consumer discretionary were the strongest sectors driven by China large caps (Tencent, Alibaba, and Meituan over December). Economic data was mixed with encouraging signs on inflation, including India reporting November wholesale prices up just +5.9% versus forecasts of +6.3% and the previous month +8.4%, while China reported November PPI -1.3% versus forecasts of -1.6% and prior month 1.6%. The weakening developed world demand was reflected in trade numbers with Taiwan November exports down -23.4% year-on-year versus forecasts of -12.8% and the prior month's -6.3%.

Despite a firmly up last quarter of 2022, the EM equity outlook soured heavily into December, with global growth engines (Taiwan/South Korea and Mexico) all succumbing to the expectation of lower global growth and hence a lower export outlook for 2023/2022. Purer commodity currencies/export-orientated nations such as Brazil and South Africa also were under pressure, albeit it less so, as they had already suffered considerable multiple contraction and currency weakness earlier in the year. Idiosyncratic moves were present and helped the Fund considerably: namely, buying China into its November 2022 lows and also hedging this with adding back to Vietnam after its considerable year-to-date falls to November 2022 lows as well, albeit for different reasons. The Fund performed as expected in the fourth quarter of 2022. This offset some of the abnormal underperformance accrued in the past four/five quarters. We would have wished for greater outperformance to the index in this impetuous fourth quarter up period, but it seems that any outperformance in this period seems to have at least been a strong positive differentiator to competition. We feel there is way more to go on 2023/4 EPS / multiple expansion, as China and Asia normalise, post China supply chain

At the end of 2022, our portfolio is presently more cyclically biased than competition, both on EM currency exposure, sector orientation and stock selection. This is not due to a portfolio manager bias to second guess the end of the global growth slow down, or peak in USD real effective exchange rate (REER), but it is because our models (at top down and bottom up levels), both agree that EM valuations already discount a hard landing for global growth. Especially so in materials, Brazil/South Africa and TIP currencies. As such, we believe that prospective risk return is to the upside for EM equities at this juncture. Furthermore, we believe that first in, first out plays a part: EM equities started this sell off in early February 2021, nearly a full year before the S&P 500 Index peaked in end December 2021. Multiple compression in EM Equities had fallen down to 10.7 times price-to-earnings ratio (PER) and down

to a 1 times price to sales (P/Sales) by November 2022, a 10 year low. This compares to a more modest S&P 500 Index consolidation only down to Q1 2020 levels. Our 2022 underperformance was due to the abnormal degree of USD REER strength (a 25 year high) and abnormal length of the period of de-rating for EM: (a 21-month period of consistent EM versus DM de-rating). These are exceptional, in our view. Historically, they are followed by re-rating moves, as long as EPS growth resumes to normalisation. We believe that will likely be the case in the revamped, future facing EPS streamlined MSCI EM Index into 2023/4.

We envisage EM equities benefitting from the trifactor of: bottoming/turning currencies, growth at a reasonable price (GARP) and deep value valuation supports, as well as more positive sentiment/liquidity flows and prospective AA positioning changes. As we keep to our philosophy of buying high quality at attractive valuations, and ever increasing the bar to ESG quality inputs, we view the present valuation as a strong entry with regards to a reversion to mean in many key EM sectors and countries. We note the ESG "A" rating and 50% reduction in CO2 footprint, which is not by design, but by virtue of investing in highly quality corporates at ESG levels to enhance risk return, not to be a dedicated ESG Fund. We also note the Fund's continued highly liquid positioning. We may have been early in our support for EM equities this cycle (buying H1 2022), but valuations for EM equities have been attractively valued for a while now, albeit it lacking in a positive risk on catalyst. That is changing, in our view. The bulk of the returns in an impetuous rally are normally made in the initial asset class move.

As such, we had entered 2023 with an optimistic outlook for EM equities. Traditionally, the Fund has a strong 10-year upside/downside risk capture record, as well as positive relative recoveries post these extreme pullback periods such as in Q3 2012 and Q2 2016.

GAM Star Emerging Market Rates

Fund Manager: Paul McNamara/Michael Biggs/Markus Heider

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation class) rose 0.2% over the year to 30 June 2023, compared to its benchmark, the SOFR Compounded Index in USD, which returned 3.9%.

June's sharp sell-off extended into July, but a mid-month turnaround left the JPMorgan GBI Emerging Market (EM) Global Diversified (GD) Index up on the month. Despite a stronger US dollar, sharply lower developed bond market yields - reflecting growing concerns about recession in the wake of higher interest rates to tackle inflation, and a perceived dovish "pivot" by the US Federal Reserve - supported duration. Notable underperformers included Hungary, Colombia and Peru; Egypt also weakened on mounting fears of a currency devaluation. These large declines obscure the fact that key markets like Brazil, Mexico, South Africa, Indonesia and Malaysia were all up. JPMorgan's GBI Emerging Markets (EM) Global Diversified Index marginally fell in August. Central and Eastern European countries underperformed given the euro's drop against the US dollar and the sell-off in developed market (DM) rates: 10-year Treasury yields ended the month at 3.2%, up from 2.65% at the end of July, after the chairman of the Federal Reserve, Jerome Powell, struck a hawkish note at the Jackson Hole symposium for the world's central bankers; similarly, German bund yields rose to 1.54% from 0.82%. Perhaps surprisingly, given weak equity markets amid persistent concerns about growth in Europe and China, EM outperformers included Turkey, Peru and Brazil. The strategy declined in August, lagging our target to contain losses on the month but remaining significantly ahead of it year-to-date. One of our largest EM FX longs, the South African rand, was the biggest detractor, while our biggest EM FX short, in the Hungarian forint, was the top contributor over the month. Funding long EM FX positions out of the euro was also positive. Our long-standing outright short in the Turkish lira detracted, however, and during the month we fully closed the position, which is costly to run given high carry. Rates positions were also mixed: though long positions in South Africa, Brazil and Indonesia were positive, as yields declined, in Mexico these were more vulnerable to higher yields in the US. During the month we increased our exposure to Brazilian rates, where we believe interest rates are close to peaking. We also established a new position in Chile, where the central bank has also hiked aggressively and growth has begun to slow, as well as one anticipating a flatter yield curve in Israel, where inflation momentum remains strong. JPMorgan's GBI Emerging Markets (EM) Global Diversified Index tumbled in September. A 0.75% hike by the US Federal Reserve (Fed) was accompanied by hawkish language by Chairman Jerome Powell, who said he was prepared to weather higher unemployment and economic recession to achieve the Fed's inflation goal. This helped drive up the US dollar DXY index to a two-decade high, while ten-year US Treasuries ended the month at 3.8%compared to 3.2% at the end of August. Concerns about the UK's new government's fiscal plans, which precipitated a sharp decline in the British pound and surging gilt yields, also weighed on risk assets towards the end of the month. Within emerging markets (EM), Brazil and Turkey were among the better performers, helped by lower local bond yields: Brazil's central bank, encouraged by improving inflation data, appears to have ended its aggressive tightening cycle, while Turkey remains on an eccentric (and likely unsustainable) effort to cut interest rates and support growth. Underperformers included Chile, where the peso plummeted as central bank intervention tailed off, and central and eastern European countries more vulnerable to a weaker euro and developed (DM) bond markets.

JPMorgan's GBI Emerging Markets (EM) Global Diversified Index fell in October, though there was a decidedly mixed performance by index constituents against a global backdrop of higher yields and a seesawing US dollar. JPMorgan's GBI Emerging Market (EM) Global Diversified Index surged in November, its third-strongest month on record, as expectations that the Federal Reserve (Fed) could slow interest rate hikes combined with signs China could be moving away from its zero-Covid approach. JPMorgan's GBI Emerging Market Global Diversified Index rose in December, extending November's strong gains. China's sudden capitulation on its zero-Covid approach helped lift investor sentiment, while a broadly weaker US dollar (DXY -2.3%) underpinned a rally in EM FX. The month's outperformer was Chile, a commodity-exporting beneficiary of China's reopening; CEE countries also fared well, piggybacking on the euro's gains and notwithstanding higher yields (and lower bond prices) in both Hungary and Czech Republic. Brazil

and South Africa lagged due to political concerns, while Egypt sank as demand for US dollars persisted unabated. Liquidity thinned out into the traditional holiday season.

At the start of 2023, JPMorgan's GBI Emerging Market Global Diversified Index fell in February as stronger than expected economic data out of the US - huge payrolls, strong retail sales and sticky core consumer prices - rekindled concerns that the Federal Reserve will need to hike interest rates more aggressively to bring inflation under control. JPMorgan's GBI Emerging Market (EM) Global Diversified Index rose 4.1% in March, despite an uncertain global economic backdrop and market jitters caused by the collapse of Silicon Valley Bank in the US and Credit Suisse in Switzerland, Investors aggressively pared back expectations for further rate hikes by the Federal Reserve two-year Treasury yields collapsed by over 100 bps from their early-March peak, to 4.0% - and this contributed to a weaker US dollar (DXY index -2.3%). Among the best performers were Chile and Colombia, beneficiaries on the FX side of China's economic reopening and higher commodity prices and on the duration side of expectations that central banks are nearing the end of their hiking cycles. Just two countries (which together make up barely 2% of the index) registered negative returns: Egypt (-1.1%) and Turkey (-10.3%), perennial strugglers due to the inadequate policy responses to challenging economic circumstances

JPMorgan's GBI Emerging Market Global Diversified Index rose 0.9% in April, with both lower bond yields (higher prices) and stronger currencies contributing to returns. EM outperformed on the back of a stronger euro (+1.7% versus the dollar), with Hungary up +6.8%, Poland +4.6% and the Czech Republic +2.7%. Turkey slumped -13.2%, largely due to sharply higher bond yields as the central bank continued to intervene in the FX market to contain lira weakening in the run-up to May's election. Most polls show that Recep Tayyip Erdogan, who has ruled the country since 2003, is trailing the opposition coalition candidate by a small margin; whoever wins, however, will be forced to reckon with the country's significant macroeconomic imbalances. Local emerging market (EM) debt returned -4.6% in May, as a strong US dollar (DXY index +2.6%) weighed on FX returns. High-yielding Latin American countries outperformed, with Colombia surging +10.0%. South Africa was the month's notable laggard, slumping -12.0% on concerns about poor growth prospects amid severe electricity rationing. Turkey rallied 5.7%, all thanks to stronger bond prices, after President Recep Tayyip Erdogan was comfortably re-elected; the lira remained under pressure from his government's unorthodox economic policies. Local emerging debt enjoyed a strong June, with JPMorgan's GBI Emerging Market Global Diversified Index rising despite a stronger USD and an increase in US treasury yields. Notable outperformers were the high yielders like South Africa, Brazil and Colombia. The main underperformer was Turkey, with the re-election of Erdogan triggering a 23% decline in the bonds in USD terms. Despite the asset class strength, the strategy declined in the month. Emerging market (EM) FX did well, and the strategy benefitted from long FX positions in Brazil, Mexico, Czechia and Hungary. However, these gains were more than offset by losses incurred in short FX positions in ZAR and AUD. Both currencies struggled in May but rallied sharply in the first half of June on a stronger China PMI and hopes of a China stimulus. These hopes faded a little in the second half of the month, but this was not sufficient to recoup the early losses. Interest rates performed well in EM, and the fund benefitted from rates and bond positions in Mexico, Czechia and Indonesia. Unfortunately, G10 yields performed less well, and the increase in bund yields weighed on returns. The fund has retained a modestly positive exposure to EM FX, but with the USD risks fully hedged by shorts in non-USD G10 FX. The fund is long duration, and these positions are held across EM and developed markets (DM), and across all EM regions.

We expect G10 growth to slow further, labour market pressures to ease, and for the inflation outlook to improve. At the same time, we expect a sharp fall in EM inflation due to moderating food prices. The slowing growth outlook makes us cautious on EM FX, but we will become more positively positioned if Chinese policymakers suggest a stronger stimulus in the second half of the year. The improving inflation outlook should benefit both DM and EM duration, and we will increase these positions if we see signs of further US labour market weakness.

30 June 2023

Commentary (Unaudited)

Risks to the outlook stem from more resilient G10 growth than we anticipate, sticky inflation, and further move upwards in G10 yields.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) rose 19.3% over the year to 30 June 2023, compared to its benchmark, the MSCI Europe Index Net in EUR ex-DEM, which rose 16.7% in EUR terms.

July was a much stronger month for equity markets with falling bond yields and decent earnings prints providing a positive spur to European markets. Looking at factor returns, it would appear that falling bond yields, in the anticipation of peaking inflation, had a larger impact with the quality factor outperforming and the value factor underperforming. To be clear, we do not think inflationary pressures have gone away and we still find many quality stocks to be excessively valued (and many value stocks to be excessively undervalued) so we would not be surprised to see a mean reversion of this factor performance towards the end of the year. Whether this leads to further market falls remains to be seen but we would point out that European equity markets - in aggregate - are undervalued on 12x earnings and earnings overall are surprisingly robust. The quarter two results - as per July - were in general very good. Netcompany was an exception after a series of one-offs led to a significant miss but management were confident in trading for the rest of the year. September was a dizzying month: here in the UK, we had a change of Prime Minister and a change in sovereign, 10 days of national mourning, a meltdown in the gilts market, disarray in government and the continued reverberations of the energy crisis across the body politic. More broadly, global equity markets declined significantly - the MSCI Europe index was down -6.28% - interest rates rose, short rates and bond yields rose considerably and developed market (DM) currencies fell heavily against the USD. Interest rate expectations have moved significantly this year with a significant spike in September, especially in GBP swap rates. As well as indicating the change in rate expectations, there are real world consequences of this: in the UK most mortgages price off 2-year swap rates with significant amounts of aggregate refinancing each month, implying that a large chunk of the 30% of UK households that have a mortgage will experience a large hit to discretionary income, on top of the hit from higher energy costs.

October was less dizzying than September, but only marginally less so for those of us living in the UK with the appointment of our fifth Prime Minister in six years, Rishi Sunak. His appointment seems to have positively impacted sterling, gilt yields and the risk premium attached to UK assets. November was another strong month for European equities, with the MSCI Europe (net) index up by 6.9% in Euro currency. A reversal in Euro currency weakness boosted returns in USD to 11.5%. Reasons for this strong performance included better than expected (or less bad) economic data, the continuation of strong third quarter earnings for European companies and more benign inflation data bringing down bond yields, boosting the valuation of 'growth' companies. European equity markets gave back some of their strong prior month(s) gains in December but still managed to end the year down by less than 10%, as measured by the MSCI Europe net index. This might seem surprising (to some), given macro events over the course of the year, but it is worth thinking back to where we were 12 months ago: at that time we (and consensus) were bullish on the prospects for European equities, the reasons for this being: relatively attractive equity valuations; rising earnings expectations combined with strong earnings growth; and an underlying bullishness on global economies momentum following the stop/start economies of the 2020/21 pandemic years. We were expecting a continued pick-up in inflation, had a view that this would be more persistent than most economists imagined and that this would lead to rising interest rates and the end of the 'free money era'. But we also believed that the underlying economic conditions were such that higher rates and yields would be absorbed by equity markets (overall) with the downward pressure on growth/quality equity valuations more than compensated by the higher earnings growth across the market resulting from high nominal GDP growth...

A very strong start to 2023 for European equities, with the MSCI Europe index up almost 7% in January in EUR and higher at 8.4% in USD, given the Euro gains against the dollar. The reason for the very strong market start is perhaps a reaction to the excessive level of pessimism that existed in the second half of 2022 and a growing view that the economic and earnings outlook for Europe is not as 'dark' as previously assumed; lower than feared natural gas prices due to a warm winter, an accelerated reopening in China and continued evidence in company earnings that the sky is not falling down all helped to shift the narrative with a sharp upward movement in markets. perhaps accentuated by

short covering. Outflows into the European equity asset class turned positive although it is important to note that active equities remain in outflow and the inflows were generated by strong passive inflow, which is more likely to be macro fund allocations rather than 'real money' buyers. Nonetheless the turnaround in sentiment is welcome as we believed that the excessive pessimism that existed for much of last year was not consistent with what was being reported by the European companies we are invested in. February was another positive month in European equities driven by a continuation of strong earnings results relative to somewhat 'reluctant' expectations; it seems very hard for the market to shake off the muscle memory of bearishness in respect to the European equity asset class, with this also reflected in valuations that remain cheap in absolute terms and relative to other asset classes. The areas of strongest earnings growth were banks, driven predictably - although not by those who forecast bank earnings - by rising rates/yields and energy stocks, driven by higher realised oil and gas prices. March represented a very volatile month as concerns over US regional banks spread across the Atlantic, exacerbated by stresses over the resolution of Credit Suisse. We have written at length about why we believe issues related to US regional banks do not apply to European banks and how Credit Suisse was an idiosyncratic event, but this did not stop the share prices of European banks hitting an 'air pocket' with markets taking a defensive/quality tilt. Somewhat miraculously, markets ended the month only slightly down (or even up, depending on the index) but there was a lot of intra-market dispersion by sector, with energy and industrials also down significantly and IT, healthcare and consumer staples all up. We believe much of the market actions and a lot of the commentary (especially in the financial press) represented a high level of 'headless chicken-ism' and we expect share prices in the banking and energy sectors to revert to prior levels and to continue their upward ascent - once calm and common sense has returned. Our February update highlighted the extreme levels of banking and energy sector valuations (PE relatives) and these have become even more extreme in March despite reassuring fundamentals, high levels of free cash flow and continued share buybacks.

April was a more positive month for European equities with the MSCI Europe net index up by 2.5% in euro currency but with a much more defensive flavour that did not suit our positioning at all. This is evident in considering the performance of the MS European Cyclicals versus Defensives basket (which has been on a downwards lurch since March) as well as sector performance, with healthcare, consumer staples and utilities all outperforming while IT, banks and consumer discretionary all underperformed. The GAM Star European Equity fund fell in value in May, but outperformed the MSCI Europe net index. The key driver of outperformance for the fund was our exposure to semiconductor capex through our holdings in BE Semiconductor, ASM International and Atlas Copco. A positive first quarter announcement from Nvidia with very positive comments on the growth outlook for GPU chips added to the growing 'Al hype' and drove outperformance for those stocks exposed to the Nvidia supply chain and semiconductor capex in general (as well as Nvidia itself). All three of our exposures saw material share price appreciation with Atlas Copco further benefitting from excitement around the energy transition following the large order beat in its compressor business (announced at the first quarter results). The fund also benefitted from strong results from Ryanair indicating a strong summer 2023 season and a new order for 300 planes from Boeing, increasing confidence in the longer-term growth of the company, and a slightly better performance from banking sector stocks. The Fund rose in value by 2.2% in June versus a rise of 2.7% for the MSCI Europe ex-UK net index, representing an outperformance of +27 bps. June was a strong month for European equities with the MSCI Europe ex-UK index up 2.7% for the month.

Fund Manager: Julian Howard/GAM's Multi Asset Solutions Team

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation class) rose 3.5% over the year to 30 June 2023, compared to its benchmark, the Lipper Mixed Asset Flexible Global, which returned 0.9% in EUR terms.

Global equities, as measured by the MSCI AC World Index, declined in the third quarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' which has characterised both the year to date as well as the third quarter, is at its heart a reflection of the on-going difficulty in determining a price for any asset at all, from stocks and bonds to gold and bitcoin.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy - and therefore investible assets - in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market guage of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

Global equities as measured by the MSCI AC World Index rose 3.8% in local currency terms in the first quarter of 2023. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of fast-rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably even more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by arch-rival UBS as confidence started to drain on both sides of the the Atlantic and investors and depositors looked to exit weaker institutions. Stockmarkets and bond yields both fell sharply in response, before recovering somewhat. Up to this point equities had in fact been enjoying a firm run dating back to October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and, while labour market data in the US suggested that the process was not going to be smoothly linear (an unrealistic assumption anyway), US headline CPI was generally heading in the right direction, falling from its mid-2022 peak of 9% to 6% at the latest reading. But this was not fast enough for the major central banks. In March alone, the US Federal Reserve, ECB and Bank of England raised rates by 25bps, 50bp, and 25bps respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. In the background, the growth outlook continued to quietly improve. At the beginning of the year Bloomberg's survey of economists' US GDP growth expectations for 2023 had started out at a fairly dismal 0.3%, but by the end March of those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% 2023 growth target set by the National People's Congress. The banking issues therefore only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable enough with the decisive actions taken by regulators to be able to focus on these slightly better fundamentals for the time being, even if broader questions about the economic and regulatory impact of the banking crisis and the continued inflation and rates conundrum remained outstanding.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets – and specifically US stocks which account for around two thirds of the world index – surged ahead on the back of euphoria around the latest breakthrough in artificial intelligence (Al). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Institutional Accumulation class) rose 18.5% over the year to 30 June 2023, compared to its benchmark, the SOFR Compounded Index in USD, which rose 3.9%.

In July a stream of weaker economic data led investors to scale back their expectations of tightening from the major central banks. Tentative signs that inflation may be peaking, as growth weakened and commodity prices fell, saw investors start to price US interest rate cuts within six months. The US Federal Reserve (Fed) acknowledged the growth slowdown at its last meeting but confirmed that getting inflation under control remained its priority. In the Euro area the European Central Bank (ECB), at last, hiked rates - and by 50 basis points (bps) rather than the 25 bps it had been signalling for months - in a clear sign that it is playing catch up. It also announced its new anti-fragmentation tool (The Transmission Protection Instrument, TPI) that would be used to limit peripheral bond spread widening. During the month, investors were also focused on European natural gas prices as developments with gas through the Nord Stream 1 pipeline remained centre stage. With flows, following the maintenance shut down, resuming at 20% of capacity, European natural gas prices rose a further 28% (after a 50% rise in June). European bond markets were down over 5% in August. UK gilts lost over 8% and US treasuries were down close to 3%. Equities in the US and Europe were down between 4% and 5%. Credit was similarly down sharply with the UK non-financial index losing almost 7%. Global Rates, idiosyncratic, relative value focused and uncorrelated with traditional asset classes, was positive for the month. Just as in 2008 during the financial crises and even 2018, when 90% of all asset classes lost money, Global Rates has highlighted the benefits of doing things differently. The Eurozone, Germany, the UK (core inflation) and the US all saw worse inflation outcomes than expected during September. This prompted the Federal Reserve and the European Central Bank (ECB) to increase their rhetoric on restrictive policy guidance. Not helping the outlook for inflation were renewed concerns over energy as leaks occurred in the Nord Stream pipeline. Meanwhile labour markets in the more developed economies remain robust with reports of labour shortages a reoccurring theme. Such a backdrop was never going to be supportive of financial markets but then the UK government released a budget littered with unfunded tax cuts. Given that the UK has a bigger inflation issue than most (if not all) of the more developed economies (and a central bank more reluctant to raise rates), such action was always likely to invoke a negative market response. Despite Bank of England intervention to support the long end of the gilt market and a promise to delay quantitative tightening (QT), UK gilts lost 8.8% in September, bringing their losses for the quarter to 14%. In September US treasuries were down 3.5% and Euro area sovereign bonds down 3.9%. In terms of currency the UK pound also weakened and saw a pickup in volatility but ended the month down only around 1.5% versus the euro. It was much weaker versus the US dollar but so were most currencies as the US dollar index (DXY) rallied 3.1%. Only two asset classes out of 38 tracked by Deutsche Bank were up in September, with just one positive for the whole of the third quarter.

During 2022, higher and more persistent inflation than widely expected led to central banks embarking on their most aggressive tightening cycle in a generation. In response, 10-year treasuries and the S&P 500 lost 17% and 18.1%, respectively, over the year. This was the worst combined performance since records began in 1872. Against such a backdrop few asset classes, commodities being the main exception, ended the year in positive territory. Of the 38 major asset classes covered by Deutsche Bank only nine were positive in local currency terms and just six in USD terms. After a difficult year for markets more generally, December offered some hope and a little more stability as the October and November US CPI readings came in lower than expected. Similar outcomes were seen in Europe. As a result, investor confidence that we may have seen the peak in inflation rose. Given the tightening to date and the fact that inflation may have peaked, the Fed and ECB stepped down their rate hikes to 50 bps in December, though their rhetoric remained relatively hawkish. The one exception, was the Bank of England which continued to hike rates with great reluctance despite having arguably a worse inflation problem than the Fed and ECB. Indeed, two members of the UK committee even argued for no change in rates at the last meeting - a decision that would have been an effective easing given market pricing. It was however the Bank of Japan who stole the show during the month as it adjusted its yield curve control policy, with 10-year JGB yields now able to rise to 50 bps from a previous 25 bps. This is seen as a significant policy change and one that had an immediate impact on the yen which rallied 5.3% versus the USD and bond yields which saw the 10-year JGB yield move from 25 bps to 42 bps. Developed market bonds had a difficult December, despite a modest improvement in the inflation outlook as central bank rhetoric reinforced the point that further tightening was needed to tame inflation. As a result, Euro area sovereign bonds were down 4.6%, UK gilts weren't far behind (down 4.4%) and US treasuries were the best performer, losing just 0.7%. In currency markets, the US dollar continued to lose ground (DXY down 2.3%) as the Bank of Japan shifted policy and ECB rhetoric was more hawkish than expected.

Recession fears in the US were given a further boost by generally weaker than expected economic data. The manufacturing and services PMI data for December were of particular note with both pointing to economic contraction. While troubling from a growth perspective, the data did encourage investors to look towards the end of the Federal Reserve (Fed) interest rate hiking cycle. Lower interest rates helped support risk assets which got a further boost from continued falls in natural gas prices (European natural gas futures were down 24.8% in January) and China's ongoing reopening. In many respects, a lot of the themes in January 2023 were the mirror image of 2022. Equities were higher, led by tech and bonds yields moved lower. Though gas prices were lower and oil was marginally down, industrial metals continued to rally sharply (copper was up 10.9% in January) supported by China's reopening. US data released at the start of February challenged the recession narrative which had gathered momentum since the end of 2022. The January employment report highlighted the strength of the US labour market, with nonfarm job gains almost double the December out-turn and nearly three times greater than expectations. A recovery in the workweek completely reversed the fourth quarter's slide in hours worked. Concerns over depressed service sector readings at the end of 2022 were alleviated by a sharp bounce in the ISM Services Activity Index above 60. Economic data pointed to resilient growth and persistent inflation, with real consumer spending in January better than expected and inflation measures continuing to run well above the Federal Reserve's (Fed) 2% target. Similarly, European composite, manufacturing and services PMIs moved back into expansionary territory. In China, high-frequency data indicated that the economy is on track for a solid, consumption-led recovery at the start of 2023, with notable improvements in passenger traffic, freight flow and surging loan growth.

As fears over US regional banks receded, central bank communications throughout April provided further insight into policymakers' sensitivities to the interaction between financial stability and stubbornly elevated inflation. Having raised the fed funds rate by 25 bps in March, the Federal Open Market Committee (FOMC) minutes released in April revealed that the Federal Reserve (Fed) staff lowered their core PCE inflation forecast to 2% for 2024 and now project a mild recession starting later this year. Although markets were quick to price in rate cuts for the second half of this year, the FOMC's median projection for policy rates, which was determined after the failure of Silicon Valley Bank, implies that there are still another c.50 bps of cuts to unwind for market pricing to align with the Fed's dot plot for the end of this year. US data released at the start of February challenged the recession narrative which had gathered momentum since the end of 2022. The January employment report highlighted the strength of the US labour market, with nonfarm job gains almost double the December out-turn and nearly three times greater than expectations. A recovery in the workweek completely reversed the fourth quarter's slide in hours worked. Concerns over depressed service sector readings at the end of 2022 were alleviated by a sharp bounce in the ISM Services Activity Index above 60. Economic data pointed to resilient growth and persistent inflation, with real consumer spending in January better than expected and inflation measures continuing to run well above the Federal Reserve's (Fed) 2% target. Similarly, European composite, manufacturing and services PMIs moved back into expansionary territory. In China, high-frequency data indicated that the economy is on track for a solid, consumption-led recovery at the start of 2023, with notable improvements in passenger traffic, freight flow and surging loan growth. Having raised policy rates in March, the case for additional policy tightening by the European Central Bank (ECB) and Bank of England was reinforced by further signs of inflation persistence and robust activity data throughout April. Elsewhere, the central banks of Canada, Australia, Japan, India, Indonesia, Korea and Singapore left rates on hold in April. Ongoing concerns over regional US

30 June 2023

Commentary (Unaudited)

banks and the US debt ceiling were not enough to stop the US Federal Reserve (Fed) from hiking rates by 25 bps at the start of May. Though the Fed did drop the phrase from their statement that "some additional policy firming may be appropriate". With core inflation generally remaining stubborn the Fed move was matched by similar 25 bps increases in the euro area, the UK, Norway, Australia and New Zealand. US data were mixed in June. Employment trends remained solid and housing showed further signs of recovery. The theme of more robust services activity continued, with the services ISM pointing to modest expansion, in contrast to weak manufacturing reports pointing to a fairly sharp contraction. The ISM Manufacturing New Orders Index fell to just 42.6. In terms of inflation, headline rates moderated further and growth in unit labour costs eased. However, core inflation, buoyed by the strong labour market, remained stubbornly high and has barely moved lower during the second quarter. In Europe, despite unemployment still close to record lows, inflation showed further signs of moderating. Core inflation continued to ease, falling to 5.4% in June (having reached a high of 5.7% in

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the GBP Institutional Accumulation class) rose 4.9% over the year to 30 June 2023, compared to its benchmark, the Lipper Global Mixed Asset GBP Flexible, which rose 0.5% in GBP terms.

Global equities, as measured by the MSCI AC World Index, declined in the third guarter of 2022, falling 4.0% in local currency terms. But this masked an even more volatile journey, with a benign summer period in which the market regained its poise from earlier volatility giving way to fresh panic about inflation and interest rates. Perhaps the more telling picture could be gleaned from the action in the 10-year US Treasury yield, which rose from 3.0% to 3.7% over the review period. The inflation and rates story continued to dominate markets for the simple reason that efficient asset price discovery cannot happen without certainty about the likely trajectory of the cost of capital. The 'everything sell-off' is, at its heart, a reflection of the ongoing difficulty in determining a price for any asset at all, from stocks and bonds to gold and property. Core US inflation disappointed markets by coming in at an elevated 6.3% for August, thus postponing any immediate prospect of easing by the US central bank. The Federal Reserve's monetary policy committee went on to raise rates by 75 bps in September, sending US equities down, especially rate-sensitive technology stocks. In the UK, the mini-budget of the new Truss government highlighted the near-impossible policy trade-offs of the current global economic backdrop: a slew of pro-growth policies were greeted by sharp sterling depreciation and a spike in gilt yields as markets appeared to balk at the prospect of unfunded stimulus. The UK central bank eventually intervened to restore calm but the market's price action over the quarter increasingly reflected pessimism that a high inflation, low growth outcome could be avoided. Within the strategy, equity exposure was decreased in the early stages of September as volatility markedly increased. This reduction across all regions reflects our more cautious tilt and we have redirected some of these monies to bond investments in the short-dated US Treasury market following the extreme price falls we have seen. However, the majority of the monies raised will remain in cash instruments as we expect volatility to increase - cash levels are at historically high levels within the strategy.

Global equities, as measured by the MSCI AC World Index, fell nearly 16% in local currency terms in 2022, the worst full calendar year since the global financial crisis (GFC) of 2008. The immediate drivers of this decline were high inflation, higher interest rates, war in Ukraine and China's zero-Covid policy. The inflation component was especially important as the one factor that prevented the US Federal Reserve (Fed) and other central banks around the world from riding to the rescue of the global economy in the way that they have consistently done since the GFC. The Fed 'put' was reluctantly set aside in 2022 as the central bank belatedly attempted to control inflation by tightening monetary policy and, in so doing, slowing down economic activity. However, to characterise the entirety of 2022 as an unremitting 'polycrisis' would be inaccurate. From 12 October to 31 December the MSCI AC World gained nearly 8% as relief came through on three key fronts: US headline inflation decelerated from its June peak of 9.1% to the 7.1% posted in November, with 10-year US Treasury yields - the market gauge of growth and inflation - falling from 4.3% in late October to 3.9% by the end of the year. In Ukraine, Russia's war strategy was dealt a severe blow by the re-taking of Kherson, giving the Ukrainians the strategic initiative. Finally, China abandoned its zero-Covid strategy under the weight of a widespread popular backlash. Caseloads inevitably spiked but the message was clear: the priority was once again the economy. Taken together, this allows 2022 to be compartmentalised into a lengthy 'inflation and rates' phase book-ended by a period of meaningful reassessment. It is however worth noting that price action during the latter segment, while positive overall, was not one of consistent euphoria. The cryptocurrency meltdown, along with unrealistic expectations of a complete Fed U-turn on rates that did not materialise, meant that investors were relatively guarded in their response. Nonetheless, it was becoming apparent that the relentless onslaught of bad news that had gripped markets was starting to loosen.

The strategy remained tactically underweight equities during the last quarter of the year. Within this, we held underweights to UK and US equities and an overweight to Japanese equities. Equity volatility was relatively well contained at the portfolio level via our fixed income sleeve. Here we held exposure to very low volatility money market instruments and ultra-short Treasury securities, complemented by mortgage-backed securities and financial related credit. In

alternatives, we continue to have exposure to a gold ETF, as well as a global macro fund. While the fundamentals of the good news that lifted the final quarter of 2022 looked set to persist into 2023, investment trends rarely play out linearly and the economic backdrop remains challenging as consumers retrench. The OECD had predicted GDP growth of 2.2% for 2023, down from the 3.1% that seemed likely for 2022. Global inflation will suffer pauses and reversals as it decelerates, not least from a likely boost in Chinese energy demand. Furthermore, market expectations of a Fed pivot are unlikely to be met given the central bank will be acutely conscious of its own credibility as it responds slowly to peaking inflation. This mismatch is likely to explain why indices will probably not spike euphorically on softer inflation data in the coming months, however welcome it may seem to market commentators. Ukraine meanwhile faces a long haul to restoring its territorial integrity, with slow progress and rising costs the main risk to vital continued Western commitment. In China, the lifting of Covid restrictions is seeing hospitals overwhelmed and, in the absence of a successful vaccination programme, localised but economically disruptive lockdowns could yet be re-deployed. But, far from being a reason to be despondent, fundamentally better news flow with limited (initial) investor participation is arguably a formula for improved returns in the medium term. Persistent equity engagement will remain key to capitalising on these better conditions of course, but effective diversification and tactical asset allocation will be important for the inevitable soft patches and unexpected occurrences that await. We approached 2023 therefore a little wiser, but quietly optimistic too.

Global equities as measured by the MSCI AC World Index rose 7.2% in local currency terms in the first quarter. That such an outcome was achieved was surprising given the banking problems that unfolded in March. A combination of rising interest rates, poor risk management and a social media-fuelled run on deposits sealed the fates of Silicon Valley Bank and Signature Bank, while raising questions about the integrity of the US regional banking industry. Arguably more dramatic was the hastily arranged takeover of Swiss banking stalwart Credit Suisse by UBS as confidence started to drain on both sides of the Atlantic and investors and depositors looked to exit weaker institutions. Stock markets and bond yields both fell sharply in response. Up to this point, equities had been enjoying a strong run since October 2022 when elevated US inflation first started to decelerate. Easing global supply pressures and pronounced disinflation in goods prices around the world continued into the first quarter and US headline CPI fell from its mid-2022 peak of 9% to 6% at the latest reading. While the moves are in the right direction, inflation remains well above target. In March, the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) raised rates by 25 bps, 50 bps, and 25 bps, respectively, citing confidence in the post-2008 supervisory framework to deal with systemic banking risks while they focused on inflation. Away from inflation, the growth outlook continued to quietly improve. At the beginning of the year, a Bloomberg survey of economists' growth forecasts for the US had started out at a fairly dismal 0.3% for the year ahead, but by the end of March those estimates had risen to 1% thanks in large part to a resilient consumer. China's re-opening also helped vanquish the recession demons despite some bemoaning the apparently unambitious 5% growth target set by the National People's Congress. The banking issues, therefore, only partly clouded the relatively benign conditions of firmer growth and gradual disinflation (in the US at least) that underpinned the first quarter. Equity investors appeared comfortable with the decisive actions taken by regulators and focussed on the better fundamentals, even if broader questions surround the economic and regulatory impact of the banking crisis. Within the portfolio, the Loomis Sayles US Equity Leaders fund rose over 16% for the period as growth style investments outpaced value. The European equity funds also delivered strong gains of between 12% and 13% as worries of a deep eurozone recession

At the time of writing, the full implications of the March banking difficulties and associated response are unclear. However, reasonable assumptions include increased supervision, a higher cost of capital for financial institutions and tighter lending standards. Regardless, it seems unlikely that the major central banks will reverse their current tightening cycles to deal with individual instances of poorly managed banks. So, barring a major contagion event, the bigger issue facing the global economy remains the pathway of inflation and the associated interest rate response into the rest of the year and beyond. In our view, disinflation is underway in the US, but we would note that the Fed

30 June 2023

Commentary (Unaudited)

remains institutionally traumatised by past instances of underestimation, not least that of 1980. In the spring of that year, inflation came down from high levels and the central bank eagerly cut interest rates only to tighten them again as prices unexpectedly spiked. Until the Fed declares the current disinflation sustainable and is prepared to start wrapping up the current monetary policy hiking cycle, it seems unlikely that stock markets will gain significant traction from here given the relatively modest additional earnings yield advantage they now offer over risk-free interest rates.

Global equities as measured by the MSCI AC World Index rose 6.6% in local currency terms in the second quarter of the year. Stock markets - and specifically US stocks which account for around two thirds of the world index surged ahead on the back of euphoria around artificial intelligence (AI). Seven stocks accounted for most of the positive gains, namely Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia and Tesla, revealing a distinct lack of breadth in the market. Whether Al will live up to its promise was highly contested but the stock market, at least until the final few days of the quarter, appeared to have made up its mind. Market volatility, as measured by the VIX index, fell to under 13 in June, a level last seen just before the Covid-19 pandemic. Despite this, reasons for concern about the economy and markets were numerous and persuasive. The US debt ceiling deadline was only just met at the end of May as politics were set aside at the last minute to avoid the humiliation and chaos of a potential US default. More worryingly, inflation remains elevated across the major advanced economies. In the US, eurozone and UK, headline inflation was on a decelerating course but core inflation remained stubborn at 5.3%, 5.3% and 7.1%, respectively, by the end of the quarter. While the US Federal Reserve chose to 'skip' a hike in its latest decision, there was little question of ending the current tightening cycle, while the European Central Bank (ECB) and Bank of England both hiked rates at their latest meetings in a clear signal of intent. The uncertainty around the end-point of the inflation and interest rate saga that began in early 2022 shows no sign of lifting, a fact not lost on bond markets, whose own MOVE volatility index still remains elevated versus 2021. Other potential risks included the continued travails of the US regional banking system which saw the failure of First Republic in early May and whose impact on lending into the real economy is just now starting to reveal itself. Geopolitics remained fraught too amid Ukraine's counter-offensive, an attempted putsch by Russian mercenaries and simmering tensions between the US and China. The US Republican nomination process provided its own dramas as the leading candidate faced outright criminal charges. While the last few days of the quarter started to show a more consistent alignment as market volatility picked up amid all this, the review period as a whole was characterised by a marked divergence in markets

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the Non UK RFS USD Accumulation Class) fell 0.2% over the year to 30 June 2023, compared to its benchmark Barclays US Aggregate Corporate Total Return Index in USD which rose 1.6%.

The third quarter of 2022 was once again a weak quarter for risk assets, despite a more positive first half. The macroeconomic backdrop remains complicated, with inflation remaining high, the Russia-Ukraine war, as well as the energy crisis within Europe. On the positive side, valuations have become attractive in our view, as spreads have widened significantly year-to-date. This is despite the fact we believe credit fundamentals of financials remain strong, as asset quality is currently the strongest we have seen over the last 15 years and capital ratios remain high with common equity tier 1 (CET1) ratios of European banks still well above 15%, which is close to the all-time highs. Financials are well positioned to benefit within the context of higher interest rates. Moreover, as stated above, valuations are getting very close to the wides of Covid, despite the strong credit fundamentals. With a yield to maturity close to 7.5% and a yield to next call of more than 9%, we believe the Fund will capture high income going forward on top of potential price recovery.

The fourth quarter was stronger for risk assets. We started seeing the beginning of a recovery in prices, as inflation numbers seem to be stabilising, with US CPI data for October and November coming in at lower levels than expected. Spreads on subordinated debt tightened quite significantly during the quarter. However, spreads remain extremely wide. For most subordinated debt, spreads widened by more than 200 bps during the year. This is despite the fact that credit fundamentals of financials remain strong. Non-performing loans (NPLs) for European and UK banks are currently at all-time lows, and capital ratios remain close to all-time highs for both banks and insurances. Moreover, higher interest rates mean higher net interest income (NII) for banks, which will likely translate into higher profitability and return on equity. This should outweigh any increase in NPLs resulting from the macroeconomic uncertainty. As such, we believe we are well positioned to recover the downward moves of 2022. As we have seen in the past, the Fund has tended to recover within the following 12 months. We believe the strong income the Fund is generating should help us going forward.

The first quarter of 2023 began strongly for risk assets, and we saw strong performances until the beginning of February. However, since then we saw some weakness and the month of March was all about banks, following the events regarding US regional banks and Credit Suisse. We believe that these were two very different situations. Moreover, these were two idiosyncratic situations and we do not believe there is any read across to European banks and financials. Due to the structure of the Credit Suisse takeover, it created volatility of prices within Additional Tier 1 (AT1) contingent convertibles (CoCos), which initially fell significantly. However, we have started seeing some recovery, notably due to the fact European and UK regulators have commented that AT1 bondholders are always senior to equity holders. Due to all of these factors we have seen spreads widen during the quarter, especially within AT1 CoCos. This is even though earnings for European financials excluding Credit Suisse were very strong. Higher rates have translated into higher net interest income (NII) which should mean higher profitability. As such we believe that as the situation normalises, we should see some strong price recovery, which coupled with the high income the Fund is generating should help us going forward.

We started seeing some recovery in the second quarter, notably as spreads tightened. However, this recovery was partially derailed in June, when we started seeing the 'higher interest rates for longer' theme guiding market sentiment. This led to strong volatility and a move upwards in interest rates. As such, we saw some weakness in the second part of June. Despite that, we have seen some very positive news across subordinated debt of financials during the quarter. Following a number of Tier 2 bonds being issued, we saw the first Additional Tier 1 (AT1) debt issued by a major European bank since the Crédit Suisse event. The issuer was BBVA, which issued EUR 1 billion of an AT1 with a coupon of 8.375%. Moreover, there was strong demand for the new issue. This demonstrates that the subordinated debt market is normalising. Additionally, Q1 results demonstrated that European banks are in good shape. Their Common Equity Tier 1 (CET1) ratios remain at very high levels and profitability remains strong. In terms of bank deposit flows, in aggregate these have been very stable, and we have not seen any European national

champions experience large deposit outflows, with some even experiencing inflows. Despite all these positive factors, spreads remain at extremely wide levels. As such we believe that we should see strong price recovery, which, coupled with the high income that the Fund is generating, should help us going forward.

GAM Star Japan Leaders

Fund Manager: Ernst Glanzmann/Lukas Knueppel/Goro Takahashi

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the JPY Accumulation Class) rose 18.7% over the year to 30 June 2023, compared to its benchmark, the Tokyo Stock Exchange (TOPIX) 1st Section index which rose 25.7%.

The third quarter of 2022 began positively with the Topix rising +3.5% in July, heavily influenced by the global macro environment. A softening in tone in rhetoric from the Federal Reserve and a more balanced trade balance following the decline in the oil price led to a stabilisation in the yen. The Fund rose +7.6% in July with the largest relative contribution to performance coming from holdings in industrials, healthcare and consumer discretionary. Financials, real estate and communication services detracted. At a stock level, M3 Inc performed strongly, as did Nidec Corp while the largest drag came from a non-exposure to Softbank Group. The market rose again in August, based on softer US consumer price inflation data, however positive sentiment was tempered by Federal Reserve Chair Jerome Powell's hawkish tone at Jackson Hole. The Fund rose +0.6% with the largest relative contributions coming from holdings in consumer discretionary, real estate and utilities. Healthcare, communication services and materials detracted from performance. At a stock specific level, Suzuki Motor and Shimano both reported strong results. Meanwhile, Z Holdings and Sysmex's results were weaker than expected. September saw a continuation of US interest rate rises, leading stock markets worldwide to fall. The Topix fell -5.5% over the month The Fund lost -9%. On a sector level, all areas lagged with holdings in industrials and healthcare acting as the main drags. Regarding stock specifics, holdings in Unicharm, Kao and Sumitumo Mitsui were the main contributors to relative performance, while Makita, Honda and Bridgestone were the main drags to relative performance.

The Japanese stock market recovered somewhat in the fourth guarter after losing value in each of the first three guarters. Stocks rose in October and November on expectations for slower US rate hikes as US consumer price inflation data came in softer than expected. Yet in December concerns about recession risks and prolonged high rates policy in Europe and the US and consequential earnings revisions weighed on investor sentiment. The Japanese yen recovered significantly in value versus the US dollar, not the least due to the Bank of Japan's decision to relax its yield curve control policy slightly, which some market participants interpreted as an effective rate hike and a first step towards tighter monetary policy in 2023. In terms of investment style, value stocks were clearly preferred versus growth stocks and small cap stocks marginally underperformed large cap stocks. Over the quarter, the largest relative contribution to portfolio performance came from our holdings in consumer discretionary, consumer staples and materials. The sectors where stock selection was less rewarding were industrials, financials and healthcare. At the stock level, Nitori Holdings contributed most to relative performance. The stock recovered significantly, supported by the rise in the yen versus the dollar as the company sources its products outside Japan and procures most of its materials in dollars. The shares of Shiseido advanced from the ongoing recovery in inbound consumption demand from foreign travellers. The company has a significant exposure towards Chinese consumers and is benefitting from the softening of Covid restrictions in mainland China. Among the detractors, shares in M3 weakened as the company pointed towards a slight reduction in advertisement budgets from foreign-affiliated pharmaceutical companies which could lead to a slowdown in the third quarter in M3's medical platform business. Japan could be a place of relative stability in 2023. As the global economic momentum is slowing going into the new year, we expect the external environment to weigh on Japan's exporting sector somewhat in the first half of the year. Still the domestic side of the economy should stay resilient following the recovery in private consumption after the pandemic. We also expect to see a pronounced recovery in inbound demand from tourism and business travel and are watchful of Chinese consumers returning to Japan. Corporate earnings should grow again towards the end of 2023 and into 2024, supported by lower raw material and freights costs, a rebounding global economy and a stronger

In the first month of 2023, Japanese equities rallied with the Topix gaining 4.4%. Investor sentiment brightened considerably based on lower inflation expectations, incoming economic data pointing to a more robust global economy than expected and the realisation that the Federal Reserve is already well advanced in its rate hiking cycle. The Fund gained +7.4% in January. On

a sector level, the largest relative contribution to performance came from holdings in industrials, IT and communication services, while consumer staples detracted. On a stock level, Suzuki and SMC Corp performed well, while Unicharm underperformed. Our non-holding in Sony also detracted from relative performance. Japanese equities rose slightly in February as US inflation failed to slow as expected, leading to rising bond yields and a rebound in the dollar. Economic data in Japan was mostly on the weaker side, however, solid retail sales began to reflect rising tourism. Market speculation began to build that the yield curve control policy would start to unwind in the not-too-distant future. The Fund returned -0.3% in February, with holdings in communication services and financials making the largest relative contribution to portfolio performance, while consumer discretionary and consumer staples holdings detracted the most. At a stock level, Honda Motor and Sumitomo Mitsui Trust Holdings performed well, while Nitori shares fell. In mid-March, Japanese equities fell sharply due to global concerns about rising risks to financial institutions. However, stocks recovered quickly thanks to effective interventions by governments and central banks around the world. The Fund rose +2.1% with allocations towards financials, real estate and communication services contributing the most to relative performance while industrials, healthcare and IT detracted the most.

The Japanese stock market reached a 33-year high in the second guarter by virtue of earnings growth surpassing expectations, record buybacks announced by listed firms and strong momentum in corporate governance reforms pushed by the Tokyo Stock Exchange. At the same time, interest rates in the US rose significantly, which led the yen to weaken due to the growing gap between Japan's easy monetary policy and the hawkish stance of peers like the Federal Reserve. During the quarter, index performance was mostly informed by the largest index weights. In fact, the Topix Core 30 Index outperformed the Topix Small Index nearly by 2x. In terms of investment styles, value stocks were clearly preferred versus growth stocks. Our holdings in materials, healthcare and energy contributed to portfolio returns in relative terms, while industrials, consumer discretionary and consumer staples ended at the bottom of the table. At the stock specific level, our holdings in Asahi Intecc contributed most to relative performance. The company released very solid earnings pointing to market share gains in the US and a recovery in China. The overshoot led the company to achieve 94% of its full year operating profit forecast in its third quarter. Daikin held an analyst briefing on its mid-term plan goals that left investors reassured. Daikin expects Europe heat pump revenues to become a key growth driver in the coming years as it plans to increase its market share in Europe to 30%. On the negative side, the Misumi shares detracted from relative performance as recent data pointed towards a weak recovery in China and a decline in Asia. The shares of Z Holdings moved only sideways as demand expectations for online advertisement customers and e-commerce transaction value was soft. In addition, cost savings or synergies from the integration of LINE are realised on a slow schedule. The most recent Tankan Manufacturing Survey showed sentiment among large Japanese manufacturers has improved for the first time since the first quarter of 2021 on the back of falling raw material prices, along with the strong capex investment plans of Japanese corporates. Hence, for the second half of 2023 we expect a recovery in order momentum in the manufacturing sector led by the semiconductor industry after inventories have normalised in many sectors in line with global supply chains after the pandemic. Consumption is supported by record high pay rises in decades and a boom in tourism, with more visitors arriving to Japan from increasingly wealthy Asian neighbouring countries

Fund Manager: Gary Singleterry/Tom Mansley/Chen Chien-Chung

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Ordinary share class) rose 0.2% over the year to 30 June 2023, compared to its benchmark, the ICE BOFA US Mortgage Backed Securities index which fell 1.5%.

The third quarter of 2022 saw the continued meltdown of financial assets which has persisted all year in the wake of high inflation, along with continued central bank rate hikes. Equities finished lower and credit spreads widened in anticipation that the central banks' fight against inflation will worsen the current economic recession. Against that background, sovereign bonds suffered. The US 10-year Treasury rate finished 81 basis points (bps) higher to end the guarter at 3.83%. The S&P 500 Index finished the guarter with a loss of -4.9%, putting its year-to-date loss at -23.9%, Major US fixed income sectors were negative for the quarter. The Bloomberg US Aggregate Bond Index was down -4.8%, putting its year-to-date loss at -14.6%. The US housing market, which is a major contributor to the inflation measure, slowed its meteoric rise, as house prices in the US decreased by -0.3% in July from June, resulting in an increase of +15.8% from the year prior, according to Case-Shiller. Meanwhile, mortgage underwriting standards are still high, and the mortgage foreclosure rate is at multi-decade lows. Mortgage rates rose again, finishing the quarter at approximately +6.7%. This rise in mortgage rates, coupled with recent price increases, has put substantial pressure on the affordability of

The Fund had a slightly positive net performance for the quarter ended 30 September, 2022 and was down year-to-date, outperforming major US fixed income indices. The main contributor to the performance during the quarter was the interest income generated by the Fund, which has now become a more significant contributor to overall performance. The main detractors to the performance of the Fund in the third quarter were the widening of credit spreads and the continued rise in rates. The Fund's low duration and conservative credit positioning have mitigated to a large extent the impact of rising rates and the deteriorating macro environment. In the residential mortgage market, we continue to favour senior legacy non-agency bonds. In the commercial sector, the securities in the Fund are concentrated in apartment complexes that are currently benefiting from vacancy rates that are near all-time lows, and diversified small balance commercial loans. The period of rapid house price appreciation in the US appears to be over. Decreased housing affordability due to higher mortgage rates is putting downward pressure on prices at the same time that the supply/demand imbalance continues to support prices. We expect to see relatively stable home prices on a national level and house price declines in some of the areas that have experienced above average price increases in the last three years. New home construction is still strong, but is still not at a level required to meet current demand - evidenced by the fact that the inventory of houses for sale is still below historical levels, at less than four months' supply. Additionally, homeowner vacancy rates are still at historically low levels.

After a shaky start, the fourth quarter of 2022 finished with a reprieve to what was the worst year for most financial markets since 2008. Equities finished higher and credit spreads tightened as central banks continued to raise rates. The world's economies continued to struggle to recover from the Covid lockdowns and the Russian invasion of Ukraine with its accompanying sanctions. Sovereign bonds finished the quarter slightly down. The US 10 year Treasury rate finished 5 basis points (bps) higher to end the quarter at 3.88%. The Bloomberg US Aggregate Bond Index was up 1.9% in the quarter, putting its yearly loss at 13.0%. The S&P 500 Index finished the guarter with a gain. The US housing market continued to adjust prices downward in light of the highest mortgage rates in several years. According to Case-Shiller, house prices fell in October by 0.5% from the previous month, the fourth consecutive month that house prices have dropped. It is important to place that in context however, noting that while prices are down 3% from their historic highs in June, over the last full year prices are still up 9.2%. Mortgage rates declined slightly, finishing the quarter at approximately 6.4%. Meanwhile, mortgage underwriting standards are still high by historic standards, and the mortgage foreclosure rate is at multi-decade lows.

GAM Star MBS Total Return fell during the quarter ended 31 December, 2022 and fell for the year, but outperformed major US fixed income indices. The main contributor to the performance during the quarter was the interest income generated by the Fund. With a portfolio yield of approximately 7%, the

interest income has now become a more significant contributor to overall performance. The main detractor to the performance of the Fund in the fourth quarter was the continued rise in rates. The Fund's low duration and conservative credit positioning have mitigated to a large extent the impact of rising rates and the deteriorating macro environment.

In the residential mortgage market, we continue to favour very seasoned senior non-agency bonds, whose underlying loans have low loan to value ratios. In the commercial sector, the securities in the Fund are concentrated in apartment complexes that are currently benefiting from vacancy rates that are near all-time lows, and diversified small balance commercial loans. House prices in the US are still adjusting to the rapid increase in mortgage rates and the resultant drop in affordability. We expect to see house prices continue to decline from current levels, but only modestly, as the supply of homes for sale is still not sufficient to meet expected demand. New home construction has slowed recently and builders are having to drop prices on some newly-built houses. But the supply of housing is still not at a level required to meet current demand as evidenced by the fact that the inventory of existing houses for sale is still below historical levels, at less than four months' supply. Homeowner vacancy rates are still at historically low levels. As we consider the likelihood of a recession in the near future, the US homeowner is in a relatively strong financial position. Household debt service as a percentage of income is still below pre-Covid levels and household debt to income is back to levels that were in place in the early 2000s. Unemployment is at 50 year lows. The low unemployment and the low monthly debt payments have resulted in very low levels of delinquency. As the Federal Reserve (Fed) raises interest rates, we believe that any increases in delinquency will be very modest since a majority of household debt is fixed rate. There is considerable difference of opinion regarding the likely rate of inflation going forward, as well as the duration of the current inflationary cycle. The monetisation of recent large transfer payments from governments to households and businesses contributes greatly to the current inflation, and, in our view, is not likely to be contained any time soon. Much of the transfer payments in the US resulted in a spike in the personal savings rate, and much of that excess savings is still in liquid assets, according to estimates by the Fed. Excess savings of USD 1.7 trillion since the beginning of Covid provides significant support for consumer credit.

Given the economic uncertainty, and the possibility of a recession in 2023, we continue to remain conservative. The portfolio has a significant allocation to senior bonds backed by seasoned mortgages with low loan to value ratios that we feel will be protected from any increase in unemployment or decrease in home prices that might occur due to the recession. Given the low risk profile of the portfolio, wide credit spreads, and a loss-adjusted yield of approximately 7%, we feel that the expected returns relative to the risk are attractive.

Most financial markets finished the first quarter surprisingly well, given the rapid series of central bank rate hikes, the collapse of Silicon Valley Bank, and the acquisition of Credit Suisse by UBS with guarantees from the Swiss government. Sovereign bonds and equities all posted positive performance for the guarter. The US 10 year Treasury rate finished 41 basis points (bps) lower to end the quarter at 3.47%. The S&P 500 Index gained in the quarter. The US housing market continued to see modest price declines on average. According to Case-Shiller, house prices fell in January by 0.5% from the previous month, the seventh consecutive month that house prices have dropped. While this puts the aggregate price decline at 5% from their historic highs in June, the broader context is that home prices are still over 20% higher than they were only two years ago. Mortgage rates changed little, finishing the quarter at approximately 6.3%. Meanwhile, mortgage underwriting standards are still high by historic standards. Although the mortgage foreclosure rate increased in 2022 after the expiration of the federal foreclosure moratorium that went into effect in March 2020 as part of the CARES Act, it was still lower than any year prior to 2020.

GAM Star MBS Total Return fell in the first quarter of 2023. The main contributor to the performance during the quarter was the interest income generated by the Fund. With a portfolio yield of approximately 7%, the interest income has now become a more significant contributor to overall performance. The main detractor to the performance of the Fund in the first quarter was the widening of credit spreads. In the residential mortgage market, we continue to favour very seasoned senior non-agency bonds, whose underlying loans have low

Commentary (Unaudited)

loan to value ratios. In the commercial sector, the securities in the Fund are concentrated in apartment complexes that are currently benefiting from vacancy rates that are near all-time lows, and diversified small balance commercial loans. We continue to avoid large retail shopping malls and office buildings. House prices in the US are still adjusting to the rapid increase in mortgage rates and the resultant drop in affordability. We expect to see house prices continue to decline from current levels, but we expect the drop to continue to be modest, as the supply of homes for sale is still not sufficient to meet expected demand. We estimate that the shortage of housing in the US is about 2 million units. Construction of new apartments remains strong, but construction of new homes has declined recently, even as the inventory of existing houses for sale is still below historical levels, at less than four months' supply. The housing market has undergone a substantial deleveraging since 2009. The aggregate loan to value of all single-family mortgages is now at a multi-decade low. The monetisation of recent large transfer payments from governments to households and businesses contributes greatly to the current inflation, which, in our view, is not likely to be contained any time soon. We believe that the rate of inflation will decline slowly and that the Federal Reserve will keep rates at relatively high levels, perhaps for longer than the forward market expects, in order to break the cycle. However, the excess savings held by households is likely to last for a while and will be a cushion for many households during economic disturbance. The low unemployment and the low monthly debt payments have resulted in very low levels of delinquency. If the Fed continues to raise rates, we believe that any increases in delinquency will be very modest since a majority of household debt is fixed rate, insulating households from rising interest rates. We expect a recession, and continue to remain conservative. A majority of the portfolio consists of senior bonds backed by very seasoned mortgages (over 15 years old) with low loan to value ratios that we feel will be protected from any increase in unemployment or decrease in home prices that might occur due to the recession. Given the low risk profile of the portfolio, wide credit spreads that are near to the Covid peaks, and a loss-adjusted yield of approximately 7%, we feel that the expected returns relative to the risk is attractive.

Financial markets had mixed performances during the second quarter. Sticky core inflation and rate increases from central banks caused sovereign bonds to lose ground. Equities, however, got a boost from excitement over Al.The US 10-year Treasury rate finished 37 basis points (bps) higher to end the quarter at 3.84%. The S&P 500 Index finished the quarter with a gain. Prices in the US housing market bottomed out in January and have increased each month since then. According to Case Shiller, home prices in April rose 1.3% from the previous month, putting prices approximately where they were 12 months before. This puts the aggregate price decline at only 2% from their historic highs in June 2022.Mortgage rates rose approximately 50 bps, finishing the quarter at approximately 7%. Meanwhile, mortgage underwriting standards are still high by historic standards. The mortgage foreclosure rate is still lower than any year prior to 2020.

GAM Star MBS Total Return (USD, Inst) rose in the guarter ended 30 June, 2023. The main contributor to the performance during the quarter was the interest income generated by the Fund. With a portfolio yield of over 7%, the interest income has become a more significant contributor to overall performance. There were no significant detractors to the performance during the quarter. In the residential mortgage market, we continue to favour very seasoned senior non-agency bonds, whose underlying loans have low loan to value ratios. In the commercial sector, the securities in the Fund are concentrated in apartment complexes that are currently benefiting from vacancy rates that are near all-time lows. We continue to avoid large retail shopping malls and office buildings. House prices in the US have stabilised after a mild decrease caused by the recent rapid increase in mortgage rates and the resultant drop in affordability. We expect prices to remain stable for the foreseeable future, as the supply of homes for sale is still not sufficient to meet expected demand. We estimate that the shortage of housing in the US is about 2 million units. Construction of new apartments remains strong, but construction of new homes has declined recently, even as the inventory of existing houses for sale is still below historical levels, at only three months' supply. The housing market has undergone a substantial deleveraging since 2009. The aggregate loan to value of all single-family mortgages is now at a multi-decade low. Core inflation rates have proven to be stubborn and the Federal Reserve (Fed) has promised to raise rates again if necessary to contain inflation. We believe that there are major contributors to inflation that will persist, and that the Fed is likely to keep rates at higher levels than the forward market expects, in order to break the cycle.

Although we expect rates to remain high, we believe that any increases in delinquency will be very modest since a majority of household debt is fixed rate, insulating households from rising interest rates. We are prepared for a recession, as we continue to remain conservative. A majority of the portfolio consists of senior bonds backed by very seasoned mortgages (over 15 years old) with low loan to value ratios that we feel will be protected from any increase in unemployment or decrease in home prices that might occur due to the recession. Furthermore, household savings of financial assets remains at significant levels and should provide a meaningful cushion in the event of an economic downturn. Given the low risk profile of the portfolio, wide credit spreads, and a loss-adjusted yield of approximately 7%, we feel that the expected returns relative to the risk is very attractive.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Institutional Accumulation Class) rose 2.4% over the year to 30 June 2023 and its benchmark, the SOFR Compounded Index in USD, which rose 3.9%.

The Fund delivered a positive return in eleven of the twelve months under review, with positive performance coming mostly from engagement in short-dated US Treasury instruments which took advantage of the Fed's monetary policy tightening. Losses were limited to 0.10% over the review period.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 1.3% over the year to 30 June 2023, compared to its benchmark, the MSCI World Growth index which rose 26.7% in USD terms.

Overall indices rose in July of 2022, with the S&P 500 Index, Nasdaq 100 Index, MSCI World Growth Index and ARK Innovation ETF (ARKK) up. This rally was fuelled by fixed income markets repricing medium-term Federal Reserve funds expectations downward, which was particularly positive for longer duration and growth assets. Investors were also reassured by the start of the Q2 earnings season; the Nasdaq 100 Index was up, driven by mega cap earnings. Earnings were not plain sailing though. Notable ARKK names Teladoc Health and Roku both fell on Q2 earnings reports, proving that an earnings disappointment is still being punished heavily by the markets in this environment. Positive sentiment in July triggered by a better-than-expected US June inflation print continued into the first two weeks of August with global indices rising in sympathy with the US. This was quickly reversed by Federal Reserve (Fed) Chairman Jerome Powell's hawkish comments mid-month following the Jackson Hole symposium with a clear message that inflation, and not growth, is the primary concern of the Fed, leading to bond yields hitting year highs. The S&P 500 Index and Nasdaq proceeded to fall. At the same time, extraordinary turmoil in European energy markets that materially increased the risk of a recession added to negative sentiment globally. Over September, the MSCI World Growth Index suffered another month of poor returns. Any optimism of a pivot in Federal Reserve (Fed) policy was firmly removed by poor economic data - higher CPI, higher employment, lower manufacturing orders and lower retail data - and by the Fed's continued hawkish commentary. All sectors were in negative territory over the month, with both long duration growth and defensive growth getting hurt by the uncertain economic environment. At the end of the third quarter, the portfolio was some 30% of the way through the restoration of duration exposure that we would aim to have in a more benign environment.

The MSCI World Growth Index rose in October of 2022, as equity markets reacted to more positive sentiment in bond markets amid the growing belief that the bulk of the global interest rate adjustment may now have happened. Value outperformed growth, with the MSCI World Value Index rising +6.4% in the same period. The world growth energy sector performed strongly in the month as energy companies reported strong earnings. While IT also performed well, consumer discretionary and communication services both underperformed. The MSCI World Growth Index recovered strongly in November as markets continued to recover from October lows as positive sentiment was further reinforced by softer than expected US inflation data, sending yields tighter and the dollar lower. This was underpinned by a generally positive earnings season as well as news from China that the government was easing Covid restrictions, potentially reducing the risk of supply shocks and the feed through to inflation that these restrictions have caused. December proved a disappointing end to a challenging year as the MSCI World Growth Index fell. Despite reported US CPI coming in slightly below expectations in November and December, positive sentiment was muted by stronger than expected US labour conditions, leaving the markets still uncertain about the timing of any Federal Reserve pivot in the current tightening cycle. As we have said previously, while uncertainty remains over the future path of interest rates, equity markets are likely to remain volatile. The pace of China's recovery from the lows in October slowed in December; positive sentiment over the removal of zero Covid policies and increased support for the beleaguered property sector was tempered by the sharp

Global markets recovered from December weakness and rose strongly in the first month of 2023. Markets were buoyed by a combination of a slowing pace of inflationary data in the developed world offering optimism that the end of rate hiking may be imminent, the fast pace at which Covid-era restrictions are being dismantled in China and lower energy prices in Europe. Markets stalled in in the second half of February, giving back some of the January gains as new economic data from the US pointed to continued inflationary pressures reversing the optimistic sentiment at the start of the year and suggesting that rates could move higher for longer. The MSCI World Growth Index fell against this backdrop. The technology sector proved resilient despite the market's risk aversion, rising in the month. Energy and materials lagged the most as global commodities weakened on revised downward global growth expectations.

March represented a very volatile month as concerns over US regional banks spread globally, exacerbated by stresses over the resolution of Credit Suisse in Europe. Against this backdrop, growth assets performed strongly with the MSCI World Growth Index rising over the month as bond yields fell on the growing expectation that the financial sector woes would put a cap on the Federal Reserve's (Fed) current tightening cycle. Intra-market dispersion by size was notable in the first quarter of 2023 with the Russell 2000 Index, representing mid caps, having its worst quarter of performance versus the SOX (Philadelphia Semi-conductor Index) in over 20 years and the worst performance versus the MSCI World Growth Index in the same period bar one which was Q1 2020 when Covid broke out. Flight to safety via the large caps was also a feature, with the FANG+ Index (large cap technology) outperforming the MSCI World Growth Index by a huge +24% and the Russell 2000 by an even larger +36%.

The second quarter of 2023 was positive for global equities with the MSCI World Growth Index rising. Consumer discretionary and energy were the best performing sectors, with communication services and utilities the weakest. However, there were no sectors in negative territory. GAM Disruptive Growth Equity rose in June, but underperformed the benchmark. One of the fund's significant overweights, MongoDB, rose nearly +40% in June as the company announced several new product launches, the most notable being a new Al initiative with Google Cloud to help developers build Al powered applications. Our overweight in Coinbase was another big positive versus the benchmark, as the company benefitted from crypto strength over the month. Our non-holdings in Tesla. Apple and Affiniti (with no price change) continued to be sources of negative alpha. As technicals turned more positive over the last month, the fund initiated a new position in the software solutions company, Snowflake. Snowflake is a longer duration name and reflects the shift in outlook for this part of the market. Roblox was reduced in the month as the outlook suggests a slower maturation. We will revisit it later in the year. We also took some profits in Marvell and Cloudflare following strong performance.

We retain our outlook thesis that growth equities are looking cheap on an intrinsic valuation basis. They are also increasingly looking cheap relative to other parts of the disruptive equities spectrum. We have been monitoring the relative performance of higher growth baskets of equities versus lower growth for signs of a sustainable turning point and while there are signs we have reached this apex. We are also watching the development of high yielding corporate debt as a further sign of risk appetite. These two indicators need to turn more favourably for us to take a more 'all in' view on duration.

Fund Manager: Kevin Kruczynski

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 6.6% over the year to 30 June 2023, compared to its benchmark, the S&P 500 in USD which rose 19.6%.

The third quarter of 2022 started well and the Fund was up in July, underperforming its benchmark. Markets rebounded strongly over the month, as the focus continued to shift away from the current inflationary environment towards deceleration and the potential for the rate rise trajectory to change. The Fund kept pace with the recovery until the last week of the month - a series of strong earnings reports from mega cap tech companies, of which we are underweight, pushed the market further ahead. The Fund fell in August, underperforming its benchmark. August encapsulated the tone and characteristics we have seen in markets all year, as strong underlying fundamentals reported by companies were eventually overridden by concerns about inflation. Markets started the month strongly, following a series of positive earnings reports, but focus shifted towards the increasingly hawkish tone coming from central banks as we approached the annual Jackson Hole Economic Symposium - where several prominent bankers and politicians underlined that their primary focus was on taming inflation regardless of the economic consequences. The Fund fell in September, underperforming the MSCI World Index which also fell. September was a difficult month for global equity markets as we saw a continuation of the increasingly hawkish comments from central banks feed through to expectations of higher terminal interest rates, increasing the likelihood of a weaker environment next year when the full impact of monetary policy will feed through to the economy. Sentiment was also impacted by the unique circumstances in the UK, where the Government's unfunded tax cuts caused bond vields to rise sharply and led to a situation where pension Funds following leveraged liability-driven investment strategies were forced sellers of assets to meet margin calls.

The Fund rose at the start of the final quarter of 2022 but underperformed the S&P 500 Index. October saw a strong rebound in markets with value sectors such as energy and industrials leading the way, on hopes that the likely recession will be less severe than the scenario that was baked into valuations up to the previous month. The Fund was underweight in economically sensitive sectors and lagged the recovery. The Fund rose in November, trailing the S&P 500 Index. November saw a continuation in the rebound in markets on hopes that we are passing the peak in inflation and could see a softening of the hawkish rhetoric from leading central bankers. Sectors such as financials and healthcare led the way and our longer duration holdings continued to lag the market. The Fund fell at the end of the quarter in December, trailing the S&P 500 Index. December proved to be a microcosm for the year as a whole, as the markets gave up the previous month's gains following hawkish comments from central bank officials reaffirming their commitment to tame inflation at all costs. In this environment, sectors such as consumer staples. financials and healthcare led the way and our longer duration holdings in technology, consumer discretionary and communication services continued to lag the market.

It was an upbeat start to 2023 as several factors combined to boost sentiment. Firstly, and most importantly, inflation continues to moderate. Many data points now indicate we could be through the worst. The warm winter in Europe allayed fears of an energy squeeze and anchored energy prices at more reasonable levels. While the US employment data has remained robust, which could help contribute to a softer landing for the US economy, indeed many economists are now suggesting that a broad-based recession is no longer inevitable. This shift in sentiment was positive for the Fund, which has a leaning towards longer duration growth companies. Sentiment towards this part of the market will benefit substantially from a calmer and more certain inflationary environment. Markets retreated somewhat in February, giving back some of January's gains as economic data came in stronger than expected, prompting several Federal Reserve officials to suggest that they could take a more hawkish stance if economic activity does not continue to show signs of easing. This impacted sentiment towards growth assets which fell by more than the market. The Fund rose in March, outperforming the S&P 500 Index (USD) which rose by 3.7%. Despite the doubts emerging from the banking industry due to Silicon Valley Bank's collapse and Credit Suisse's acquisition, stock markets maintained their robust performance throughout the month. The ongoing debate surrounding inflation and interest rate trends

remains a powerful force in shaping markets. During the month, high-quality growth stocks thrived, anticipating that tighter credit conditions would result in a more advantageous interest rate climate.

The Fund fell in April, underperforming the S&P 500 Index which rose. US markets ended the month higher, driven by strong performance from the mega cap companies that benefited from a flight to safety. The more defensive parts of the market outperformed, as economic data continues to be subdued and concerns about the US debt ceiling debate starts to dominate headlines. The Fund rose in May, outperforming the S&P 500 Index. Despite concerns around the US debt ceiling discussions, growth equities benefited from the rapidly falling inflation expectations and the view that the Federal Reserve is at. or near to, peak rates. While the mega cap cohort continued to perform strongly, there were signs that market breadth is beginning to improve. We particularly saw this in the technology sector, which benefited from the enthusiasm around Al. This was triggered by an exceptionally strong forecast from Nvidia; its powerful Graphics Processing Units (GPUs) are vital for parallel processing, which speeds up the training and execution of Al models. The Fund rose in June but underperformed the S&P 500 Index. Markets continued their strong trajectory in June, as the US debt ceiling discussions were concluded and while the inflation debate continues to influence events, there are clear signs in many markets that inflationary pressures are easing. The mega cap cohort continues to lead the market, but there are signs that market breadth is beginning to improve as a broader range of companies are starting to participate in the rally.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the USD Accumulation Class) rose 4.7% over the year to 30 June 2023, compared to its benchmark, the MSCI World index in USD which rose 19.1%.

The third quarter of 2022 started well and the Fund was up in July, underperforming its benchmark. Markets rebounded strongly over the month, as the focus continued to shift away from the current inflationary environment towards deceleration and the potential for the rate rise trajectory to change. The Fund kept pace with the recovery until the last week of the month - a series of strong earnings reports from mega cap tech companies, of which we are underweight, pushed the market further ahead. The Fund fell in August, underperforming its benchmark. August encapsulated the tone and characteristics we have seen in markets all year, as strong underlying fundamentals reported by companies were eventually overridden by concerns about inflation. Markets started the month strongly, following a series of positive earnings reports, but focus shifted towards the increasingly hawkish tone coming from central banks as we approached the annual Jackson Hole Economic Symposium - where several prominent bankers and politicians underlined that their primary focus was on taming inflation regardless of the economic consequences. The Fund fell in September, underperforming the MSCI World Index which also fell. September was a difficult month for global equity markets as we saw a continuation of the increasingly hawkish comments from central banks feed through to expectations of higher terminal interest rates, increasing the likelihood of a weaker environment next year when the full impact of monetary policy will feed through to the economy. Sentiment was also impacted by the unique circumstances in the UK, where the Government's unfunded tax cuts caused bond yields to rise sharply and led to a situation where pension Funds following leveraged liability-driven investment strategies were forced sellers of assets to meet margin calls.

The Fund rose at the start of the final quarter of 2022 but underperformed the MSCI World Index. October saw a strong rebound in markets with value sectors such as energy and industrials leading the way, on hopes that the likely recession will be less severe than the scenario that was baked into valuations up to the previous month. The Fund was underweight in economically sensitive sectors and lagged the recovery. November saw a continuation in the rebound in markets on hopes that we are passing the peak in inflation and could see a softening of the hawkish rhetoric from leading central bankers. The volte-face by China on its zero Covid stance also drove some optimism. Sectors such as financials and healthcare led the way and our longer duration holdings continued to lag the market. The Fund fell at the end of the quarter in December, underperforming the MSCI World Index. December proved to be a microcosm for the year as a whole, as the markets gave up the previous month's gains following hawkish comments from central bank officials reaffirming their commitment to tame inflation at all costs. In this environment, sectors such as consumer staples, financials and healthcare led the way and our longer duration holdings in technology, consumer discretionary and communication services continued to lag the market.

It was an upbeat start to the year as several factors combined to boost sentiment. Firstly, and most importantly, inflation continues to moderate. Many data points now indicate we could be through the worst. The warm winter in Europe allayed fears of an energy squeeze and anchored energy prices at more reasonable levels. While the US employment data has remained robust, which could help contribute to a softer landing for the US economy, indeed many economists are now suggesting that a broad-based recession is no longer inevitable. This shift in sentiment was positive for the Fund, which has a leaning towards longer duration growth companies. Sentiment towards this part of the market will benefit substantially from a calmer and more certain inflationary environment. Markets retreated somewhat in February, giving back some of January's gains as economic data came in stronger than expected, prompting several Federal Reserve officials to suggest that they could take a more hawkish stance if economic activity does not continue to show signs of easing. This impacted sentiment towards growth assets which fell by more than the market. The Fund rose again in March, outperforming the MSCI World Index (USD), which rose by 3.2%. Despite the doubts emerging from the banking industry due to Silicon Valley Bank's collapse and Credit Suisse's acquisition, stock markets maintained their robust performance throughout the month. The ongoing debate surrounding inflation and interest

rate trends remains a powerful force in shaping markets. During the month, high-quality growth stocks thrived, anticipating that tighter credit conditions would result in a more advantageous interest rate climate.

The Fund fell in April, underperforming the MSCI World Index which rose. Global markets ended the month higher, driven by strong performance from the mega cap companies that benefited from a flight to safety. The more defensive parts of the market outperformed, as economic data continues to be subdued and concerns about the US debt ceiling debate starts to dominate headlines. The Fund rose in May, outperforming the MSCI World Index. Despite concerns around the US debt ceiling discussions, growth equities benefited from the rapidly falling inflation expectations and the view that the Federal Reserve is at, or near to, peak rates. While the mega cap cohort continued to perform strongly, there were signs that market breadth is beginning to improve. We particularly saw this in the technology sector, which benefited from the enthusiasm around Al. This was triggered by an exceptionally strong forecast from Nvidia; its powerful Graphics Processing Units (GPUs) are vital for parallel processing, which speeds up the training and execution of AI models. The Fund rose in June, underperforming the MSCI World Index which also rose. Markets continued their strong trajectory in June, as the US debt ceiling discussions were concluded and while the inflation debate continues to influence events, there are clear signs in many markets that inflationary pressures are easing. The mega cap cohort continues to lead the market, but there are signs that market breadth is beginning to improve as a broader range of companies are starting to participate in the rally.

30 June 2023

Commentary (Unaudited)

The Fund (as measured by the EUR Accumulation Class) rose 0.2% over the year to 30 June 2023.

The third quarter of 2022 was truly a quarter of two halves, as we saw strong sentiment during the first half reverse in late August and September. Spreads on EUR investment grade (IG) corporates widened by a marginal 7 bps during the quarter - masking 40 bps of tightening followed by close to 50 bps of widening from mid-August, EUR IG spreads ended the quarter at year-to-date wides at 225 bps, approaching Covid-19 peak levels of 237 bps. The tone from central banks continued to be hawkish, as major central banks delivered large rate hikes combined with a firm commitment to tackle elevated inflation. The last week of September was eventful, with negative headlines on gas supply in Europe and unexpected large fiscal stimulus in the UK, with the latter resulting in high volatility in UK and sterling assets. Interest rates continued their march higher, as the 10-year Bund yield rose by more than 75 bps on the guarter to 2.1% - the highest level in the past 10 years. Total returns were in the red over the quarter as EUR IG returned -3.1% in the quarter, bringing year-to-date total returns to -14.6%. To illustrate the magnitude of the bond sell-off, the trailing 12-month total return of -15% as of September-end is by far the worst on record and compares to -6.7% at the worst of the global financial crisis (GFC).

Market sentiment was strong in the fourth quarter, leading to a significant tightening in EUR investment grade (IG) corporate spreads by close to 60 bps. This was mainly driven by expectations of a pivot in central banks' monetary policy following better than expected CPI prints and more dovish rhetoric in October and November. Despite another beat in US CPI prints in December, central banks delivered a surprisingly hawkish message, leading to a surge in rates in December. Credit was relatively immune to the shift in tone of central banks, and spreads kept their path tighter over the quarter, outperforming other risk assets such as equities. Rates ended the quarter higher, with the 10-year bund close to +0.5% to year-to-date highs of 2.57%, offsetting some of the positive impact from spread tightening. Subordinated debt outperformed on the guarter, with spreads on EUR IG-denominated Tier 2s around 100 bps tighter, and EUR Additional Tier 1 (AT1) contingent convertibles (CoCos) 175 bps tighter. Despite a positive performance in the quarter, 2022 has been extremely challenging for credit markets. EUR IG credit ended the year with an unprecedented -13.7% total return, exceeding the second worst year over the past two decades by a wide margin (-5% in 2008).

Fixed income markets started on a strong footing in January, with EUR investment grade (IG) corporates up 2.2% on a combination of tighter spreads and lower rates. Sentiment was strong over the month, with spreads on EUR IG 15 bps tighter, mainly reflecting expectations of softer monetary policy from major central banks and lower tail risks from the energy crisis in Europe. In the US, a lower-than expected CPI print combined with stronger GDP growth was supportive for risk assets. In Europe, despite hawkish commentary from the European Central Bank (ECB) and a higher-than-expected inflation print in Spain, alleviating concerns around the energy crisis (German power prices 1m futures down 26% and back to September 2021 levels) and recession or a hard landing drove the rally in credit. Issuers took advantage of strong sentiment to flood European IG markets with fresh supply, leading to the busiest January over the last decade. Supply was extremely well received, as books were largely oversubscribed with very strong demand for new issues. Rates (10-year bund yield) were close to 30 bps lower on the month on expectations of a slowdown in rate hikes on both sides of the pond. After a very strong start to the month, fixed income markets gradually crept lower during the month as rates rose significantly in February, with EUR investment grade (IG) corporates ending the month -1.4% in terms of total return. Sentiment remained resilient nevertheless, as spreads were slightly tighter over the month - by 4 bps to 148 bps. Rising rates were the key driver of returns over the month, as the 10-year Bund yield was up close to 40 bps on the month, with the shorter end of the curve seeing even sharper moves. Inflation and central banks remained in focus, as investors reassessed expectations of terminal rates on the back of inflation data and hawkish rhetoric from central banks. Higher rates volatility and weaker sentiment have been offset by continued inflows in IG credit over the month, supporting spreads that were tighter on the month. Sentiment was particularly weak in March driven by fears around the banking sector in Europe and the US. Spreads on EUR investment grade (IG) widened by more than 20 bps to 170 bps after peaking at circa 200 bps during the month. Rates rallied on a combination of more dovish (at least as interpreted by the market) rhetoric from central banks as well as risk-off seen in markets. 10-year bund yields were 36 bps lower in March, which more than offset the impact of wider spreads as EUR IG corporates were +1% total return over the month. With concerns around the banking sector, financials underperformed materially, as spreads on EUR IG financials widened by 36 bps (non-financials +11bps).

Market sentiment improved in the second quarter of 2023, leading to moderate tightening of EUR investment grade (IG) corporate spreads by 7 bps. Better sentiment was partly derailed by the 'higher for longer' interest rate theme that led to a rise in interest rates and significant rates volatility. Interest rates rose, particularly the shorter-end of the curve, with the 2-year German bund yield up 0.5%, and in the UK and US where 5-year yields were up 1.3% and 0.6%. EUR IG financials outperformed non-financials, as spreads on financials tightened by 13 bps over the quarter, compared to 2 bps on non-financials. Subordinated debt of insurers was the notable outperformer, as spreads tightened by 26 bps over the quarter. Bank Tier 2s underperformed over the quarter, as spreads tightened by only 3bps.Despite the impact from higher rates, total returns were positive over the quarter, +0.43% on EUR IG corporates for example, driven by tighter spreads. Longer dated-bonds outperformed as the yield curve inverted further and hence were less impacted by the move in rates. Spreads on IG-rated Tier 2 subordinated debt of banks and insurers remain at very wide levels, with an option-adjusted spread (OAS) to government bonds of 262 bps on average, in the 80th percentile over the past decade.

The Company is an umbrella fund with segregated liability between Funds. Accordingly any liability incurred on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

2. Accounting policies

The significant accounting policies and estimations techniques adopted by the Company are as follows:

(a) Basis of preparation of financial statements

These financial statements have been prepared in accordance with FRS 102: the Financial Reporting Standard applicable in the Republic of Ireland, Irish Statute comprising the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The Companies Act 2014 prescribed formats for financial statements have been adapted to make them more applicable to investment funds. The Company has availed of the exemption available to open ended investment funds that hold a substantial proportion of highly liquid and fair valued investments under FRS 102 and is not presenting cash flow statement. The information required by FRS 102 to be included in a statement of comprehensive income, is in the opinion of the Directors, contained in the Profit and Loss Account of each Fund.

On initial application of FRS 102, in accounting for its financial instruments, a reporting entity is required to apply either a) the full requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments Issues, b) the recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments or c) the recognition and measurement provisions of IFRS 9 Financial Instruments and only the disclosure requirements of FRS 102 relating to Basic Financial Instruments and Other Financial Instruments.

The Company has elected to apply the recognition and measurement provisions of IAS 39 and only the disclosure requirements of FRS 102.

In arriving at the results for the financial year, all amounts in the Profit and Loss Account related to continuing activities for all open Funds. The open Funds noted within note 1 are prepared on a going concern basis with the exception of GAM Systematic Alternative Risk Premia, which terminated during the financial year.

In arriving at this conclusion the Board has considered the future operating plans for the Funds and the developments outlined below:

Following the announcement by Liontrust Asset Management Plc ("Liontrust") on 29 August 2023 that its tender for the equity share capital of GAM Holding AG had been unsuccessful, the GAM Holding AG Board entered into constructive and productive discussions with representatives of the investor group "NewGAMe", including Rock Investment SAS ("Rock"), NewGAMe SA and Bruellan SA. This resulted in the announcement on 29 August 2023 of short term bridge financing of CHF 20 million being provided by Rock to GAM Holding AG, to facilitate the repayment of the

2. Accounting policies, continued

(a) Basis of preparation of financial statements, continued

amounts drawndown under the loan facility provided by Liontrust, and to meet ongoing liquidity requirements. This CHF 20 million has been received by GAM Holding AG in September 2023.

On 26 September 2023, NewGAMe confirmed its commitment to securing the necessary financial resources to fund GAM's operations and ensure stability for clients, employees and other stakeholders. It announced that, in addition to the CHF 20 million already provided to cover GAM's immediate liquidity needs, Rock is prepared to provide GAM with a mix of short- and long-term funding up to an increased total of CHF 100million. The commitment to additional support was subject to NewGAMe's proposed directors being elected at GAM's EGM on 27 September 2023, a condition that has now been met.

On 18 October 2023 GAM Holding AG and GAM (Switzerland) Holding AG signed a facility agreement with Rock which amended and restated the original agreement dated 29 August 2023 confirming the availability of funding of a total CHF 100 million (which includes the CHF 20 million that had been provided in September 2023). The facility agreement has a repayment date of 30 June 2025 with the option to extend for an additional 12 months, secured on business asset and interest bearing and has a fixed interest rate of currently 7% until June 2024.

In the opinion of the Directors, the financial statements disclose the information required by the Companies Act 2014.

The financial statements have been prepared for all open Funds under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Investments at fair value

Classification

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not designate any derivatives as hedges in a hedging relationship.

Recognition/Derecognition

Purchases and sales are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Measurement

Financial assets and liabilities are initially recognised at fair value, and transaction costs for all financial assets/liabilities carried at fair value through profit or loss are expensed as incurred. Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value.

The computation of realised gains and losses on sales of financial assets and liabilities at fair value through profit or loss is made on the basis of average cost and accounted for in the Profit and Loss

Gains and losses arising from changes in the fair value of the 'financial assets and financial liabilities at fair value through profit or

loss' category are included in the Profit and Loss Account in the financial period in which they arise.

Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Company is the last traded price. GAM Star Cat Bond fund positions are fair valued using average of multiple broker quotes or single broker quote.

In the case of any security not listed, quoted or dealt with on a regulated market or for which no quotation or value is readily available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined by the Directors or other competent person appointed by the Directors and approved for the purpose by the Depositary, using the market approach which consists of estimating the fair value of these securities using a comparable multiple of revenue for similar guideline public companies.

Shares or units in any collective investment scheme which provides for those shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited NAV per share.

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over the counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Any such securities are disclosed in the portfolio statements.

Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition seldom equal the actual related results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial year are Debt securities as noted below and Level 3 positions as disclosed in note 4 Fair value hierarchy.

Debt securities

Debt securities are valued on the basis of dealer supplied quotations or by using a pricing service selected by the Manager. The fair value of the instrument is estimated using valuation techniques if a quoted market price is not available from a broker/dealer or a third party pricing service. Valuation methods include the use of recent unaffiliated market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Financial derivatives

Funds may hold derivatives for investment purposes and/or efficient portfolio management purposes as described in the relevant Supplement to the Prospectus.

2. Accounting policies, continued

(b) Investments at fair value, continued

Financial derivatives, continued

(i) Forward foreign currency exchange contract

When entering into a forward foreign currency exchange contract, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Balance Sheet. The unrealised gain/(loss) on open forward exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract. Realised and changes in unrealised gains and losses are included in the Profit and Loss Account.

(ii) Futures contract

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price on an agreed future date. Initial margin deposits made with respect to futures contacts are recognised as assets due from the Fund's broker agent in acquiring the futures position. Subsequent changes in the daily valuation of open contacts are recognised as changes in unrealised gains and losses. Variation margin payments are made or received on traded futures as appreciation or depreciation occurs. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. Realised gains or losses are recorded when a contract is closed and are included in the Profit and Loss Account. Futures contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(iii) Credit default swaps

In a credit default swap contract, one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g., default or similar event) occurs with respect to a reference entity or entities. A seller of credit default protection receives periodic payments in return for its obligation to pay the principal amount of a debt security (or other agreed-upon value) to the other party upon the occurrence of a credit event. If no credit event occurs, the seller has no payment obligations so long as there is no early termination. Credit default swap agreements are fair valued on the valuation date using either market vendors or central counterparty clearing house prices. The change in fair value, if any, is recorded as changes in unrealised gains and losses in the Profit and Loss Account. Realised gains and losses on maturity or termination are recorded in the Profit and Loss Account. Credit default swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the credit default swap contracts are centrally cleared positions. Centrally cleared credit default contracts provide the same rights to the protection buyer and seller except the payments between parties, including upfront premiums, are settled through a central clearing agent through variation margin payments. An upfront payment made by a Fund is recorded as an asset on the Funds' books. Upfront and periodic payments received or paid by the Funds for centrally cleared credit default swap contracts are recorded as realised gains or losses at the reset date or close of the contract. Upon the occurrence of a credit event, the difference between the par value and market value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as a realised gain or loss.

There were no credit default swaps held at 30 June 2023.

(iv) Contracts for difference

Contracts for difference are Over the Counter ("OTC") derivatives which take advantage of the economical benefits which are not afforded through investing directly in certain securities markets. Funds may purchase equity contracts for difference as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for difference is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Fund may buy or sell depending on the fund manager's view of a company's share price. Contracts for difference are highly leveraged instruments and for a small deposit it is possible for Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the balance sheet date. Contracts for difference are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

The fair value of contracts for differences is the difference between the opening price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

(v) Interest rate swaps

Interest rate swaps may be used as a substitute for a physical security or a less expensive or more liquid way of obtaining desired exposures. These are valued on the valuation date using either market vendors or central counterparty clearing house prices and any realised and changes in unrealised gains and losses are included in the Profit and Loss Account. Interest rate swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the interest rate swaps are centrally cleared positions. In a centrally cleared swap, immediately following execution of the swap agreement, the swap contract is novated to a clearing counterparty and the Funds faces the clearing counterparty through a broker. Upon entering into a centrally cleared swap the Funds are required to deposit initial margin with the broker in the form of cash in an amount that varies depending on the size and risk profile of the swap.

2. Accounting policies, continued

(b) Investments at fair value, continued

Financial derivatives, continued

(vi) Total return swaps

Total return swaps may be used as a substitute for investing in standardised exchange traded funds, futures or options contracts. Total return swaps involve the exchange of the right to receive the total return, dividends or coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. Any assets to be received by the Funds will be consistent with the investment policies of the Funds. Where the Funds enter into a total return swap on a net basis, the two payment streams are netted out, with the Funds receiving or paying, as the case may be, only the net amount of the two payments. These are valued daily using the price of underlying equity/index. Total return swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

There were no total return swaps held at 30 June 2023.

(vii) Options contract

An option contract gives the buyer the right, but not the obligation, to buy (call) or sell (put) a financial instrument. Options held by the Funds which are dealt on a recognised market are valued using a settlement price as determined by the recognised market in question. Where a settlement price is not available, the value is the probable realisation value estimated with care and good faith by the Manager. Exchange traded options are valued at the settlement price determined by the relevant exchange. These are valued daily. Options contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

(c) Income from Investments

Dividend income is recognised on the ex-dividend date. All dividends on investments quoted ex dividend up to the Balance Sheet date are included in the Profit and Loss Account.

Bank and other interest receivable is accrued up to this date. Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Profit and Loss Account, and net of attributable tax credits.

Bond interest income on investments on debt securities is recognised when earned using the effective interest method and is shown in the Profit and Loss Account. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or liability.

Cash inflows relating to interest payments on swaps are treated as swap income and are shown in the Net gains/(losses) on investments at fair value in the Profit and Loss Account.

(d) Gains and losses on financial assets and financial liabilities

The net gains and losses from trading in financial assets and financial liabilities shown in the Profit and Loss Account are analysed in note 11 to the financial statements

(e) Foreign Currency Translation – Functional currency and Presentation currency

The financial statements of the individual Funds are prepared in the functional currency of the respective Fund which is also the presentation currency. The functional currency of each Fund is listed in note 1. The functional currency of the Company is US dollar as this reflects the global exposure of the Funds, their shareholders and the markets in which the Funds are available.

The aggregated financial statements of the Company are prepared in the presentation currency of the Company, the US dollar. Amounts of the individual Funds in overseas currencies are translated for the purpose of the aggregation as follows:

- (i) Using average exchange rates (as an approximation of actual) for the financial year for the Profit and Loss Account.
- (ii) Using average exchange rates (as an approximation of actual) for the financial year for the proceeds and cost of issue and redemption of shares for the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders.
- (iii) Using financial year end exchange rates for the Balance Sheet.

For the purposes of producing the aggregated financial statements, the notional currency gain or loss on the re-translation of the opening net assets attributable to redeemable participating shareholders into US dollar, the presentation currency of the Company, is included in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This figure also includes the notional gain or loss from use of average rates as noted above compared to the financial year end exchange rates for the Balance Sheet.

Transactions and balances

Foreign currency transactions are translated into the functional currency of the individual Funds using the average exchange rates (as an approximation of actual). Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year end rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Profit and Loss Account. Translation differences on non-monetary assets and liabilities are recognised in the Profit and Loss Account within net gains/(losses) on investments at fair value line.

(f) Fees and expenses

Fees and expenses are accounted for on an accruals basis and are charged against income and used in determining the distribution.

(g) Allocation of income

All the income of the Funds after deduction of expenses, will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(h) Equalisation

An equalisation account is maintained by each Fund so that the amount distributed is the same for all shares of the same type notwithstanding different dates of issue. A sum equal to that part of the price of a share which reflects the net income at the date of issue or redemption is booked to the equalisation account and added or deducted to/from the first dividend or accumulation in the same accounting period as that in which the shares are issued or redeemed.

2. Accounting policies, continued

(i) Redeemable participating shares

The issued redeemable participating share capital is at all times equal to the NAV of the Company. Redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. Redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's NAV. The redeemable share is carried at the redemption amount that is payable at the balance sheet date if the holder exercises the right to put the share back to the Company. The movement in the number of participating shares is set out in note 15. Each Fund's NAV per share is calculated by dividing the NAV of each Fund being the value of its assets less its liabilities by the numbers of shares of each Fund then in issue.

(j) Distributions

Dividend distributions to redeemable participating shareholders are classified as finance costs in the Profit and Loss Account in the financial year in which they are declared. Where both Income Shares and Accumulation Shares in a Fund are in issue, all income of a Fund after deduction of expenses will be allocated between holders of Accumulation Shares and holders of Income Shares in accordance with their respective interests.

(k) Sundry income

Sundry income includes amounts received by the Company in respect of litigation payments, fee rebates received and in respect of securities lending income. These amounts are recorded on an accruals basis.

(I) Taxes

Liabilities relating to uncertain tax positions are accrued only when such liabilities are probable and can be estimated with reasonable accuracy. This figures are recognised in the Balance Sheet within capital gains tax payable line.

(m) Bank interest expense

Bank interest expenses relate to a bank overdraft which is repayable on demand. These figures are recognised in the Profit and Loss Accounts within bank interest.

(n) Amounts receivable for subscriptions and payable for redemptions

Amounts receivable for subscriptions and payable for redemptions relates to subscription in the Company which are not yet paid by the investors and redemptions from the Company that are still to be paid by the Company to the investors.

(o) Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities

Amounts receivable from brokers for sales of securities and payable to brokers for purchases of securities represent amounts receivable and payable respectively, for transactions contracted for but not yet delivered at the end of the financial year. These amounts are included in the Balance Sheet.

3. Financial risk management

The investment objectives of the Funds may expose the Company to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk (including cash flow risk) both directly through its own assets and liabilities and indirectly through the assets and liabilities of the funds ("investee funds") that some of the Funds invest in.

As outlined in the Prospectus, the Funds are subject to certain investment restrictions and may also use certain derivative financial instruments for both investment purposes and also in an attempt to moderate certain risk exposures. Further, the Board of Directors of the Company have the power to borrow on a temporary basis. Such borrowing will not exceed 10 per cent of a respective Fund's net assets.

Financial risk management of the Company has been delegated by the Board of Directors (which however remains ultimately responsible) to the Manager. The Board of Directors review the performance of the Company on a quarterly basis and can confirm that there have been no significant changes to risk management procedures since the prior financial year.

(a) Market price risk

The Funds' investments are susceptible to market price risk arising from uncertainties about future prices. It represents the potential loss the Company might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market

For those Funds, which do not use the Value at Risk ("VaR") approach, the Co-Investment, and Delegate Investment Managers use the analysis of the Funds Investments by Strategy, Sector and Asset Type which show the concentrations of risk and are disclosed in the relevant Portfolio Statement of each Fund.

The Co-Investment Manager and Delegate Investment Managers manage market risk on an ongoing basis by implementing a set of procedures and controls, for those Funds which use the VaR approach, the purpose of which is to manage risk within defined parameters. The Co-Investment Manager regularly review and evaluate each Fund's VaR to assess exposure to market risk. Risk can be calculated using either the commitment approach or VaR method.

Notes to the Financial Statements

^{*} Formerly called GAM Star Emerging Equity.

(b) Currency risks

The Funds may hold assets and liabilities denominated in currencies other than their respective functional currency. Therefore they may be exposed to currency risk, as the value of the assets and liabilities denominated in other currencies may fluctuate due to changes in exchange rates.

The Co-Investment Managers and Delegate Investment Managers monitor the currency exposure each dealing day whether used for hedging or investment purposes in accordance with the Prospectus. Currency exposure used for hedging techniques is normally done in order to remove or reduce currency risks within the relevant Fund where appropriate.

Currency risk sensitivity analysis

At 30 June 2023 and 30 June 2022, had the exchange rate between the functional currency and the non functional currencies arising from changes in the value of monetary assets/(liabilities) and hedging positions of the Funds changed by 5%, with all other variables held constant, the impact on net assets attributable to holders of redeemable shares would be as per the below table. Other Funds may not be listed below as they did not hold monetary assets/(liabilities) in non functional currencies at 30 June 2023 and 30 June 2022.

	30 June 2023	30 June 2022
GAM Star Alpha Spectrum	€1,516	€1,894
GAM Star Alpha Technology	US\$15,510	US\$52,221

(c) Net currency hedging

The tables overleaf sets out the Funds' exposure to foreign currency risk, the notional value of the forward foreign currency exchange contracts designed to hedge this exposure and the resulting net unhedged amounts invested in assets denominated in foreign currency.

In addition to currency risk on a Funds' assets, a class of shares of a Fund may be designated in a currency other than the functional currency of the Fund. Changes in the exchange rate between the functional currency and such designated currency may lead to a depreciation of the value of such shares as expressed in the designated currency. Depreciation of that nature may also occur as a result of changes in the exchange rate between the designated currency of a particular class and the currency of denomination of the assets of the Fund attributable to that class.

The Fund's Co-Investment Manager and Delegate Investment Manager may or may not try to mitigate these risks by using financial instruments such as forward foreign currency exchange contracts. Although hedging strategies may not necessarily be used in relation to each class of share within a Fund, the financial instruments used to implement such strategies shall be assets/liabilities of the Fund as a whole. However the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant class of shares of the Fund.

For those Funds not shown below, all assets/liabilities are in the functional currency of the Fund and are therefore not subject to foreign currency risk.

As at 30 June 2023	Non-monetary assets/(liabilities)	Monetary assets/(liabilities)	Forward foreign exchange	Net exposure
GAM Star Alpha Spectrum	€	€	€	€
Japanese yen	-	19,961	-	19,961

^{**} Fund launched during the financial year ended 30 June 2022.

(d) Interest rate risk

At 30 June 2023 and 30 June 2022, if the interest rates had changed by +/- 0.75%, with all other variables held constant, the impact on net asset attributable to holders of redeemable shares would amount to +/- 0.75% of the total interest rate sensitivity gap figures presented in the following tables.

The Funds not included in the following tables did not hold interest bearing securities in their porfolios as at 30 June 2023 and therefore were not exposed to material interest rate risk at the financial year end.

3. Financial risk management, continued

(d) Interest rate risk, continued

^{**} Fund launched during the financial year ended 30 June 2022.

The majority of the assets of the other Funds are equity shares and other investments which neither pay interest nor have a maturity date. As a result, these Funds are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates.

The majority of the cash positions of the Company were held with State Street Bank and Trust, earning interest rates which are based on current, most appropriate rates, less a spread as determined by the Depositary. This interest rate risk is not actively managed.

(e) Credit risk

The Company may be exposed to credit risk, which is the risk that a counterparty to a financial transaction with the Company will be unable to pay amounts in full when due.

For Funds which hold equities, transactions are in exchange traded securities and are settled/paid for upon delivery (DVP Trades) and the risk of default is considered minimal, as security delivery and payment are simultaneous. The trade will fail if either party fails to meet its obligation.

The Company, through the investment in investee funds, may also be exposed to any credit risk which these investee funds have at any point in time. The maximum credit risk which the Company may have in relation to these investments is the value of its investment in the Funds.

Investments in bonds and debt income securities are subject to risk (generally lower where securities are rated above investment grade) that payments may not be made by issuers on due dates or at all.

The Co-Investment Managers and Delegate Investment Managers manage credit risk for cash and derivatives by only using approved counterparties that belong to an internationally recognised financial services firm or alternatively command a high market share in a given market segment. The Company's intention would be to net its liabilities due to any counterparty against any asset due from the same counterparty. Details of investments and cash held with various brokers are disclosed in the relevant Portfolio Statement of each Fund and in note 13.

3. Financial risk management, continued

(e) Credit risk, continued

The Company participated in securities lending as disclosed in note 5. The Company ensures that collateral received in respect of securities lent must equal or exceed, in value, at all times, the value of the securities loaned.

The majority of the investments and cash held by each Fund are with the Depositary. Cash and bank balances and margin cash balances are unsecured balances held with the Depositary and counterparties as set out in note 13. Bankruptcy or insolvency of the Depositary or brokers it uses may cause the Company's rights with respect to its cash and investments held by the Depositary or brokers to be delayed or limited. Please refer to note 5 for amounts held as collateral for stock lending as 30 June 2023 and 30 June 2022.

The Company's investments held with the Depositary are held within segregated accounts. Any profit (net of margin held by the Company) on over the counter derivatives due from counterparties is unsecured. At 30 June 2023 and 30 June 2022, the credit rating of the Depositary was equal to A according to Standard & Poor's.

(f) Liquidity risk

The majority of Funds are exposed to daily cash redemptions of redeemable shares and therefore may be exposed to liquidity risk and cash flow risk which is the risk that they will encounter difficulty in liquidating assets to fund redemptions. However, as the Funds invest the majority of their assets in investments that are traded in active markets and can be readily disposed of, liquidity risk and cash flow risk is considered low. The Co-Investment Managers and Delegate Investment Managers manage liquidity risk and cash flow risk through the diversification of investments and investment strategies and through their overall investment approach.

The Directors are entitled to limit the number of Shares of a Fund redeemed on any Dealing Day to 10% of the total number of Shares of that Fund in issue or equal to 10% or more of the Net Asset Value of a particular Fund. In this event, the limitation will apply pro rata so that all Shareholders wishing to have their Shares of that Fund redeemed on that Dealing Day will realise the same proportion of such Shares for which a redemption request has been accepted by the Manager and any Shares not redeemed, but which would otherwise have been redeemed, will be carried forward to be redeemed on the next Dealing Day. If requests for the redemption of Shares are so carried forward, the Directors will inform the Shareholders affected.

The Articles contain special provisions where redemption requests received from any one Shareholder would result in more than 5% of the Net Asset Value of Shares of the relevant Fund being redeemed by the Shareholders of the Company on any Dealing Day. In such a case, the Company may, without the consent of the Shareholder, satisfy the redemption request by a distribution of investments in specie and may, elect by notice in writing to the Shareholder to appropriate and transfer to him such assets in satisfaction or part satisfaction of the redemption price or any part of the said redemption price, provided that any such distribution will cause no material prejudice to the interests of remaining Shareholders. Where a notice of election is served on a Shareholder, the Shareholder may, by a further notice served on the Company, require the Company instead of transferring the assets in question to arrange for a sale of

the assets on behalf of the Applicant after the repurchase has been effected in a method and at a price to be chosen at the Company's sole discretion and for payment to the Shareholder of the net proceeds of sale.

Termination of a Fund or Share Class

The Manager may close or terminate a Fund or a Share class of a Fund or a Series of Shares at its absolute discretion through the return of capital to the Shareholders in the circumstances set out in the Articles of Association which includes inter alia, where after the date of first issue of Shares in the Fund, Share class or Series, the Net Asset Value of the Fund or Share Class or Series is less than US\$ 50,000,000 (or its foreign currency equivalent).

Suspension of Determination of NAV and or issue, redemption and switching

The Directors may at any time declare a temporary suspension of the calculation of the Net Asset Value of any Fund and the issue/redemption of Shares of any Fund and the switching of Shares in one Fund for those of another or between classes or Series in the one Fund

Any such suspension of the determination of the NAV of any Fund and/or issue, redemption and/or switching of the Shares shall be notified immediately (without delay) to the Central Bank and to the competent authorities in the Member States in which the relevant class of Shares or Series is marketed. It shall also be notified if applicable to Euronext Dublin and to Shareholders requesting the issue or redemption of Shares of the relevant class or Series by the Directors at the time of application or the making of the irrevocable request to redeem. Any such redemption request which is not withdrawn shall be dealt with on the first Dealing Day after the suspension is lifted at the relevant redemption price prevailing on that day.

Any such suspension of switching of Shares shall be notified to the Shareholders requesting such a switch and, where the relevant switch notice is not withdrawn, any such switch shall be dealt with on the first Dealing Day after such suspension is lifted.

Where the Directors declare a temporary suspension of the determination of the NAV of the Fund, no Shares will be issued (except where an application for Shares was previously received), redeemed or switched on any Dealing Day during the financial period of suspension. Where the Directors only declare a temporary suspension of the issue, redemption and/or switching of Shares, the determination of the NAV of the relevant Fund, class of Shares and Series and the NAV per Share shall continue to be calculated.

The Company may from time to time invest in derivative contracts traded over the counter and certain other investments, which are not traded in an organised market and may be illiquid. As a result, the Company may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. Details of open derivative contracts are disclosed in the relevant Portfolio Statement of each Fund.

The tables overleaf analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows.

Notes to the Financial Statements

^{*} Fund launched during the financial year ended 30 June 2022.

In the event of liquidity issues, the Company may borrow to meet redemptions. The Directors are also entitled to limit the number of shares of a Fund redeemed on any dealing day to 10% of the total number of shares of that Fund in issue.

4. Fair value hierarchy

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;

Level 2: Inputs other than quoted prices from active markets that are observable for the asset or liability either directly or indirectly, including inputs from markets that are not considered to be active;

Level 3: Inputs that are unobservable and are significant to the valuation.

The Company uses the "market approach" valuation technique to value its investments. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the

determination of what constitutes "observable" may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

Investments typically classified within level 1 include active listed equities, exchange traded derivatives and certain government bonds. Investments typically classified within level 2 include investments in corporate bonds, certain government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the financial year and there were no restrictions preventing redemptions at the financial year end. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information.

Notes to the Financial Statements

4. Fair value hierarchy, continued

Investments typically classified within level 3 include positions priced by single broker quote, certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions.

 $^{^{\}star\star}$ Fund launched during the year ended 30 June 2022.

5. Securities lending

During the financial years ended 30 June 2023 and 30 June 2022, the Company participated in securities lending with State Street Custodial Services (Ireland) Limited (the "Securities Lending Agent"). The Company and the Securities Lending Agent receive 80 per cent and 20 per cent, respectively, of the securities lending income.

The Company earned securities lending income of:

	CCY	30 June 2023	30 June 2022
GAM Star Alpha Spectrum	€	45,916	644
GAM Star Alpha Technology	US\$	6,887	7,153
GAM Star Asian Equity	US\$	6,378	10,762
GAM Star China Equity	US\$	86,658	60,536
GAM Star Composite Global Equity	US\$	27,227	241
GAM Star Flexible Global Portfolio	€	51,171	2,634
GAM Star Japan Leaders	¥	9,599,188	6,487,317
GAM Star Disruptive Growth	US\$	16,358	51,231

State Street Custodial Services (Ireland) Limited also received securities lending income of:

	CCY	30 June 2023	30 June 2022
GAM Star Alpha Spectrum	€	11,479	161
GAM Star Alpha Technology	US\$	1,721	1,789
GAM Star Asian Equity	US\$	1,597	2,692

GAM Star Disruptive Growth	US\$	4,461,837	4,573,356	14,033,958	15,688,260

The collateral noted above, consisted of sovereign bonds issued by the governments of the following countries: Belgium, Canada, France, Germany, Sweden, Switzerland, the Netherlands, the United Kingdom and the United States of America.

6. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). It is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any distribution payments to shareholders or any encashment, cancellation, redemption or transfer of shares.

No Irish tax will arise on the Company in respect of Chargeable Events in respect of a shareholder who is not an Irish Resident and not Ordinarily Resident for tax purposes in Ireland at the time of the Chargeable Event provided that the appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997, (as amended), are held by the Company; and certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations. Following changes introduced by Finance Act 2010, investment undertakings will no longer be required to obtain relevant declarations from shareholders who are neither Irish Resident nor Ordinarily Resident in Ireland where the investment undertaking is not actively marketed to Irish investors and the Irish Revenue have given the investment undertaking the appropriate approval. With effect from 3 April 2010 a chargeable event will not arise if at the time of the chargeable event appropriate equivalent measures have been put in place by the Company to ensure that shareholders in the Company are neither Irish Resident nor Ordinarily Resident in Ireland and the Company has received approval from the Irish Revenue Commissioners to this effect and the approval has not been withdrawn.

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of the investments are located and such taxes may not be recoverable by the Company or its shareholders.

7. Exchange rates

The average exchange rates used to convert the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Share into US dollars were:

	30 June 2023	30 June 2022
Euro	0.9552	0.8883

8. Use of derivatives for Efficient Portfolio Management

Subject to the conditions and within the limits from time to time laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of a Fund, the

8. Use of derivatives for Efficient Portfolio Management, continued

Co-Investment Managers and/or Delegate Investment Managers may employ, for certain Funds, investment techniques and instruments such as futures, options, forward foreign currency exchange contracts and other derivatives for investment purposes or efficient portfolio management. Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

For UCITS which have engaged in efficient portfolio management techniques, disclosures are required under the Central Bank UCITS Regulations. The Co-Investment Managers and/or Delegate Investment Managers of the Funds have identified that all financial derivative instruments are transactions designed to deliver additional returns through efficient portfolio management.

Details of all open transactions at the financial year end are disclosed in the Portfolio of Investments.

Securities lending transactions

Certain Funds may also utilise stock lending agreements for efficient portfolio management purposes as described above. All revenues from these arrangements entered into by a Fund, net of direct and indirect operational costs, will be returned to the relevant Fund. In such transactions the Fund may temporarily transfer its securities to a borrower, with agreement by the borrower to return equivalent securities to the Fund at a pre-agreed time. The identities of the entities to which any direct and indirect costs and fees are paid are disclosed in note 5. For further information on securities lending please refer to note 5.

9. Significant agreements and transactions with related parties

The Company and the Directors

Andrew Bates who was up until 31 January 2023 a consultant with Dillon Eustace, legal advisers to the Company could be regarded as having an interest in the following transactions and balances between Dillon Eustace and the Company.

 The Company paid US\$277,202 (2022: US\$149,872) to Dillon Eustace for legal fees and secretarial services during the year ended 30 June 2023.

The Company's secretarial services are provided through Dillon Eustace's secretarial company, Tudor Trust Limited, included within the amount paid to Dillon Eustace is US\$36,833 (2022: US\$35,599) for secretarial services for the year ended 30 June 2023.

Deborah Reidy and Andrew Bates each received a fee at the annual rate of €30,000 (2022: €30,000) gross subject to income tax deductions for their services as Directors to the Company for the year ended 30 June 2023. Kaspar Boehni and Kishen Pattani both waived their fee for acting as a Director of the Company. David Dillon

and Daniel O'Donovan both received a fee at the annual rate of €30,000 until they resigned as a Director on 25 November 2022 and 4 May 2023 respectively.

See note 12(b) for legal fees and directors fees incurred by the Company.

The Company and the Manager, the Global Distributor and the Investment Managers

At the financial year end, accrued expenses included amounts owing to the Manager, the Global Distributor and the Co-Investment Managers of US\$6,115,885 (2022: US\$7,281,894).

See note 12(b) for the Manager, the Global Distributor and the Investment Manager fees incurred by the Company.

Between 1 July 2022 and 24 February 2023, the Company purchased and sold securities from another entity managed by the Delegate Investment Manager with a cost of approximately US\$6 million and sales proceeds of approximately US\$94 million respectively. The sale of securities gave rise to realised loss of US\$2.8 million.

On 28 February 2023, securities with a fair value of US\$98,171,638 were transferred inspecie from another entity managed by the Delegate Investment Manager to GAM Star Cat Bond. A further amount of US\$4,941,573 in cash was also transferred.

See note 10 for performance fees incurred by the Company.

See note 14 for holdings in other GAM Star Funds.

The Directors are not aware of any other related party transactions except for those disclosed in these financial statements.

The Company invests in other funds that are also managed by the Co-Investment Managers of the Company. There are no management fees charged on these investments at the Company level.

10. Performance fee

The Co-Investment Managers may be entitled to receive an annual performance fee on certain classes of some Funds. Any performance fee is accrued on each valuation day and paid annually in arrears at the end of June each financial year and is based on net realised and net unrealised gains and losses of the relevant classes subject to a high water mark only or a combination of high water mark and a benchmark where relevant. The performance fee rates applied to the Funds may differ within the range of 10% to 20%. Dividend distributions paid out shall not be deemed to impact the performance of the share classes within the Funds. Therefore the amount outstanding for the performance fee at the end of each financial year is the same as the amount expensed for that financial year.

10. Performance fee, continued

The following table discloses the list of Funds entitled to an annual performance fee. Details of Performance fees per share class are shown in Additional Information and Regulatory Requirements (Unaudited) Section of these Financial Statements.

Calculation Basis

15. Share capital

As at 30 June 2023

Authorised

The authorised share capital of the Company is €60,000 divided into 30,000 subscriber shares of €2.00 each and 10,000,000,000 shares of no par value initially designated as unclassified shares.

Subscriber shares

The issued share capital of the Company as at 30 June 2023 is €60,000 divided into 30,000 subscriber shares of €2.00 each, of which €9,529.70 has been paid up and which are beneficially owned by the Manager. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only.

In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

Redeemable participating shares

603,241,211 (2022: 720,783,209) redeemable participating shares of no par value designated in different classes in different Funds have been issued as shares at the discretion of the Manager. The issue price is payable in full on acceptance. The shares carry no preferential or pre-emptive rights.

The movement in the number of redeemable shares for the financial years ended 30 June 2023 and 30 June 2022 are as follow:

17. Dividend distribution

The tables below include Dividend distribution detail of each share class in each Fund as at 30 June 2023 and 30 June 2022. The declared dividend distributions with a record date of 30 June 2023 are accounted for within the Annual Report. The columns "Gross Amount", "Income received", "Income deducted" and "Net Distribution" presented in the below tables disclose these amounts in each Fund's base currency.

At 30 June 2023

18. Contingent liabilities

The Directors are not aware of any contingent liabilities.

19. Auditors remuneration

The fees charged by the auditors for the financial year ended 30 June 2023 and the financial year ended 30 June 2022 are as follows:

Auditors remuneration*	30 June 2023 US\$	30 June 2022 US\$
Statutory audit	468,901	517,771
Tax advisory services	139,761	151,638
	608,662	669,409

^{*}Figures are shown before Value Added Tax.

There were no other non audit services provided to the Company.

20. Soft commissions

There were no soft commissions agreement during the year.

21. Significant events during the financial year

A new Prospectus was issued on 1 July 2022.

- Addition of Performance fee calculation examples under the "Performance Fee" section of the GAM Star Fund Plc Prospectus.
 - o Example 1 Performance Fee Worked Example based on Outperforming a High Water Mark.
 - o Example 2 Performance Fee Worked Example based on lower of High Water Mark and Benchmark outperformance.
- Additional Performance fee wording in the sub-fund supplement of the GAM Star Fund Plc Prospectus for:
 - GAM Star Alpha Technology,
 - GAM Star Emerging Market Rates,
 - GAM Star Global Rates,
 - GAM Star MBS Total Return,
 - GAM Star Disruptive Growth.

⁻ Performance fee to be paid annually in arrears to the Co-Investment Manager as soon as practicable after the end of the Calculation Period and in any event within "30 days of the end of the Calculation Period" and mention that "crystallisation frequency at which any accrued Performance Fee becomes payable to the Co-Investment Manager is annually".

21. Significant events during the financial year, continued

- Additional Performance fee wording in the sub-fund supplement of the GAM Star Fund Plc Prospectus for:
 GAM Star Cat Bond
- Performance fee to be paid annually in arrears to the Co-Investment Manager as soon as practicable after the end of the Calculation Period and in any event within "45 days of the end of the Calculation Period" and mention that "crystallisation frequency at which any accrued Performance Fee becomes payable to the Co-Investment Manager is annually".

On 31 August 2022, Kaspar Boehni resigned as director of the Company.

On 24 October 2022, the Investment Manager was informed that the Company has received proceeds for two securities held on GAM Sustainable Emerging Equity which were valued at zero at 30 June 2022, namely Renaissance Financial Holdings and Renaissance Financial Holdings regs. The proceeds received by the Investment Manager have a cash value of US\$798,879.92.

On 4 November 2022, Kishen Pattani has been appointed as non-executive director for the Company.

On 25 November 2022, David Dillon resigned as director of the Company.

A new Prospectus was issued on 1 December 2022.

- Update to the Disclosure under SFDR Appendix to the supplement of each sub fund disclosing under Article 8 and 9 this will increase the level of details and clarify certain processes but no material change is envisaged from the way the strategies are currently run.
- New disclosure under Article 8 of SFDR for the first time for the following sub funds:
 - GAM Star MBS Total Return,
 - GAM Star China Equity,
 - GAM Star Asian Equity.

With effect from 6 March 2023, there has been a first addendum to the Prospectus issued on 1 December 2022.

In the Directory of the prospectus the list of directors set out under the sub-section "Directors of the Manager" has been updated. Amendments to the supplements in the Section entitled "Investment Objectives and Policies" in respect to the below Sub-funds of the Company have been updated:

- GAM Star MBS Total Return,
- GAM Star Cat Bond.

On 4 May 2023, Daniel O'Donovan resigned as director of the Company.

On 4 May 2023, the Company's Co-Investment Manager ultimate parent company, GAM Holding AG, agreed with Liontrust to enter into a transaction agreement ("Agreement") for a public share exchange offer by Liontrust for 100% of the equity share capital of GAM Holding AG. The Agreement is contingent on the conditions of the GAM shareholder tender process, Liontrust shareholder approval, regulatory approvals and the GAM Group's exit from its third party Fund Management Services ("FMS") business.

There were no other events affecting the Company during the financial year.

22. Events since financial year end

With effect from 11 August 2023, there has been a second addendum to the Prospectus issued on 1 December 2022.

- In the Directory of the Prospectus the list of directors set out under the sub-section "Directors of the Manager" has been updated.
- In the Directory GAM Japan has been added under the sub section 'Co-Investment Manager'.
- Some changes/removal of name under the sub-section of Manager/Management of the company.
- Additional wording to the sections 'Emerging Market Risk section 'Risk Factors'.
- Removal of the following revoked Sub-Funds of the Company:
 - GAM Star China A Equity,
 - GAM Star UK Equity Income,
 - GAM Systematic Dynamic Multi Asset,
 - GAM Systematic Core Macro,
 - GAM Systematic Dynamic Credit.
- Changes to the list of funds GAM International Management Limited co-manages.
- Changes to GAM Hong Kong in the sub manager section.
- GAM Japan Limited to be appointed under Delegate Investment Manager.

Notes to the Financial Statements

22. Events since financial year end, continued

- Changes to Risk wording for GAM Star Japan Leaders.

With effect from 29 August 2023, the share class M USD Acc of GAM Star Disruptive Growth has been renamed to N USD Acc and the N USD Acc share class has been renamed M USD Acc.

On 29 August 2023, Liontrust officially declared the offer as unsuccessful.

Following the announcement by Liontrust on 29 August 2023 that its tender for the equity share capital of GAM Holding AG had been unsuccessful, the GAM Holding AG Board entered into constructive and productive discussions with representatives of the investor group "NewGAMe", including Rock, NewGAMe SA and Bruellan SA. This resulted in the announcement on 29 August 2023 of short term bridge financing of CHF 20 million being provided by Rock to GAM Holding AG, to facilitate the repayment of the amounts drawndown under the loan facility provided by Liontrust, and to meet ongoing liquidity requirements. This CHF 20 million has been received by GAM Holding AG in September 2023.

On 26 September 2023, NewGAMe confirmed its commitment to securing the necessary financial resources to fund GAM's operations and ensure stability for clients, employees and other stakeholders. It announced that, in addition to the CHF 20 million already provided to cover GAM's immediate liquidity needs, Rock is prepared to provide GAM with a mix of short- and long-term funding up to an increased total of CHF 100 million. The commitment to additional support was subject to NewGAMe's proposed directors being elected at GAM's EGM on 27 September 2023, a condition that has now been met.

On 18 October 2023 GAM Holding AG and GAM (Switzerland) Holding AG signed a facility agreement with Rock which amended and restated the original agreement dated 29 August 2023 confirming the availability of funding of a total CHF 100 million (which includes the CHF 20 million that had been provided in September 2023). The facility agreement has a repayment date of 30 June 2025 with the option to extend for an additional 12 months, secured on business asset and interest bearing and has a fixed interest rate of currently 7% until June 2024.

There have been no other events affecting the Company since the financial year end.

23. Approval of Financial Statements

The financial statements were approved by the Board on 25 October 2023.

Statement of Depositary Responsibilities

The Depositary is required under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations and the Central Bank UCITS Regulations") to:

- 1. ensure that the sale, issue, repurchase, redemption and cancellation of shares effected by or on behalf of the Company are carried out in accordance with the UCITS Regulations and Central Bank UCITS Regulations and in accordance with Constitution (the "Constitution").
- 2. ensure that the value of shares is calculated in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 3. carry out the instructions of the Company unless they conflict with the UCITS Regulations and Central Bank UCITS Regulations or the Constitution.
- 4. ensure that in transactions involving the Company's assets, any consideration is remitted to it within time limits which are acceptable market practice in the context of a particular transaction.
- ensure that the Company's income is applied in accordance with the UCITS Regulations and Central Bank UCITS Regulations and the Constitution.
- 6. enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders. The Depositary's report shall be delivered to the Company in good time to enable the Company to include a copy of the report in its Annual Report. The Depositary's Report shall state whether in the Depositary's opinion the Company has been managed in that financial period:
 - (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution and the UCITS Regulations and Central Bank UCITS Regulations; and
 - (ii) otherwise in accordance with the provisions of the Constitution and the UCITS Regulations and Central Bank UCITS Regulations.
 - If the Company does not comply with (i) or (ii) above, the Depositary must state why this is the case and outline the steps which the Depositary has taken to rectify the situation.
- 7. notify the Central Bank of Ireland promptly of any material breach of the UCITS Regulations and Central Bank UCITS Regulations, conditions imposed by the Central Bank of Ireland or provisions of the prospectus with regard to the Company.

The duties provided for above may not be delegated by the Depositary to a third party. These duties must be carried out in the State.

The Depositary also takes into its custody or under its control all the assets of the Company and holds them in safekeeping for the shareholders.

Report of the Depositary to the Shareholders for the financial year ended 30 June 2023.

We have enquired into the conduct of GAM Star Fund p.l.c. ('the Company') for the financial year ended 30 June 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial period in accordance with the provisions of the Company's Memorandum and Articles of Association (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

State Street Custodial Services (Ireland) Limited

78 Sir John Rogerson's Quay

Dublin 2 Ireland

Date: 25 October 2023

Independent auditors' report to the members of GAM Star Fund p.l.c.

Report on the audit of the financial statements

Opinion

In our opinion, GAM Star Fund p.l.c.'s financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 June 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Balance Sheet as at 30 June 2023;
- the Profit and Loss Account for the year then ended;
- the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders for the year then ended;
- the Portfolio Statement for each of the Funds as at 30 June 2023; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2(a) to the financial statements which describes the reasons why the financial statements of GAM Systematic Alternative Risk Premia have been prepared on a basis other than going concern.

Our audit approach

Overview

Materiality

- Overall materiality: 50 basis points (2022: 50 basis points) of Net Assets Value ("NAV") at 30 June 2023 (2022: 30 June 2022) for each of the Company's Funds.
- Performance materiality: 75% of overall materiality.

Audit scope

• The Company is an open-ended investment Company with variable capital and engages GAM Fund Management Limited (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the Funds, the involvement of the third parties referred to overleaf, the accounting processes and controls, and the industry in which the Company operates. We look at each of the Funds at an individual level.

Key audit matters

- Valuation of financial assets at fair value and financial liabilities at fair value.
- Existence of financial assets at fair value and financial liabilities at fair value.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter

Valuation of financial assets at fair value and financial liabilities at fair value

Refer to the Portfolio Statement for each of the Funds, the significant accounting policies set out in note 2 and the Fair Value hierarchy set out in note 4.

The financial assets at fair value and financial liabilities at fair value included in the Balance Sheet of the Funds as at 30 June 2023 are valued at fair value in line with Generally Accepted Accounting Practice in Ireland.

We considered the valuation of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.

How our audit addressed the key audit matter

We tested the valuation of the financial assets at fair value and financial liabilities at fair value as at 30 June 2023 to third party vendor sources where available.

In the absence of third party vendor sources being available, we tested the valuation by obtaining broker quotes as at the year end date.

For level 3 positions where a third party vendor source was not available, we tested the valuation by obtaining a broker quote or through the use of our internal valuation expert, review of valuation committee minutes or alternative audit procedures.

For Funds with investments in other underlying funds where a third party vendor price was not available, we compared the net asset value per share used by the Fund to the independently obtained audit confirmation from the underlying funds' transfer agents. Furthermore, we obtained the latest available audited financial statements for these underlying funds and read the underlying

Key audit matter	How our audit addressed the key audit matter
	independent auditors' report within the audited financial statements. No modifications to these auditors' reports were noted.
	We tested the valuation of financial derivative instruments by obtaining vendor prices, independent counterparty confirmations or through the use of our internal valuation experts.
	No material unresolved matters were noted upon completion of these procedures.
Key audit matter	How our audit addressed the key audit matter
Existence of financial assets at fair value and financial liabilities at fair value	We obtained independent confirmations of the existence of the investments from the Depositary, the underlying

We considered the existence of financial assets at fair value and financial liabilities at fair value to be a key audit matter as it represents the principal element of the financial statements.	bank statements. No material misstatements were noted from the performance of these procedures.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

As at 30 June 2023 there are 29 Funds operating. The Company's Balance sheet, Profit and Loss Account and Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders are an aggregation of the positions and results of the Funds.

The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager has delegated certain responsibilities to the Co- Investment Managers and Delegate Investment Managers (the "Investment Manager") and to State Street Fund Services (Ireland) Limited (the "Delegate Administrator"). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Delegate Administrator. The Company has appointed State Street Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a Fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Delegate Administrator, and we assessed the control environment in place at the Delegate Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the Company's Funds as follows:

Overall materiality and how we determined it	50 basis points (2022: 50 basis points) of Net Assets Value ("NAV") at 30 June 2023 (2022: 30 June 2022) for each of the Company's Funds.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the Company and Funds is to provide investors with a total return taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each Fund's NAV, for NAV per share impacting differences (2022: 5 basis points of each Fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

With the exception of GAM Systematic Alternative Risk Premia where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the Company's and Funds' ability to continue to adopt the going concern basis of accounting included:

Obtaining an understanding of the key indicators that are monitored with respect to the going concern assumption and management's future plans for the Company and its Funds over the going concern period (being 12 months from the date of approval of the financial statements);

- Reviewing available board minutes during the period under audit and those available up to the date of this report;
- Considering post year end capital activity as recorded in the underlying accounting records;
- Making enquiries of management with respect to any planned significant redemptions of which they have been informed of;
- Considering the liquidity risk management techniques which are available to the Company and Funds; and
- Considering the impact of the funding provided to GAM Holding AG and GAM (Switzerland) Holding AG by way of a facility agreement and its impact on the Company's and Funds' going concern assessments, and reviewing the disclosures in note 2, note 21 and note 22 to the audited financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company or Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate with the exception of GAM Systematic Alternative Risk Premia where the financials are prepared on a basis other than going concern.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Report of the Directors, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Report of the Directors for the year ended 30 June 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Report of the Directors.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on pages 2 and 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and it's Funds and the industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Central Bank of Ireland regulations applicable to the Company and its Funds and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to risk of management override of control.

Audit procedures performed by the engagement team included:

• Enquiry of management to identify any instances of non-compliance with laws and regulations;

- Identifying and testing journal entries that met our specific risk based criteria;
- Testing accounting estimates and judgements and considered potential for management bias;
- · Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing; and
- Reviewing minutes of the meetings of the Board of Directors.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Jonathan O'Connell

Feth O'Comell.

Decision-making process to determine remuneration policies

Under the GAM Group's framework ultimate responsibility in compensation matters is held by the Board of Directors. The Board is supported in compensation-related issues by the Compensation Committee ("CompC").

- The Board is responsible for establishing the Group Compensation Policy, and with support of the CompC regularly reviewing the Group Compensation Policy in order to meet any important regulatory developments and the objectives of the Group.
- The CompC is delegated with the role of supporting the Board in setting compensation guidelines, establishing share-based compensation plans and approving the aggregate variable compensation expenditure of the Group as well as determining and proposing to the Board the individual total compensation payable to the members of the Board (other than its Chairman) for approval. The CompC regularly reports to the Board on the status of its activities, the development of the compensation architecture within the Group as well as on the operational implementation of this Policy. The CompC consists of at least three members of the Board all of whom are Non-Executive Directors.
- The Compensation Management Committee ('CMC') has delegated authority from the CompC to provide support and advice to the CompC to ensure that the compensation policy and practices across GAM Holding AG Group operate in line with EU regulations that apply to its regulated entities and delegates. The CMC's member are appointed by the Group CEO including senior members from the Risk, Compliance and Human Resources functions of the Group.

GAM Group's compensation philosophy is aligned with the Group's overall long-term objective of sustainable growth and profitability as well as its tolerance for risk. The Group's approach provides for compensation that attracts and retains employees in a given local market and motivates them to contribute to the development and growth of our business. The policy promotes sound and effective risk management and does not encourage inappropriate risk taking.

Link between pay and performance

As described above, GAM Group operates a Group-wide remuneration policy, which applies to all employees across the Group including the above entities. The compensation structure is designed to incentivise delivery of strong investment performance within a sound risk and control environment, and safeguard the long-term success and prosperity of the customer and the Manager's shareholders. A robust performance management system forms part of the compensation process and enables us to reward success and minimise the possibility of payment for failure.

The composition of the elements within an individual's overall compensation is the result of the function and performance of the individual, including alignment with the Group's risk tolerances, market competitiveness and overall profitability. The Group's total compensation approach comprises fixed and variable compensation.

Fixed compensation includes base salary, which reflects seniority, experience, skills and market conditions, together with fixed allowances for certain employees in Switzerland consistent with customary local practice.

Variable compensation is awarded annually and is dependent on Group, business area and individual performance. Cash bonuses that are driven by activities that leave meaningful amounts of future risk with the Group, either via direct balance sheet exposure or through the potential for other negative income events are prohibited.

For members of the Group Management Board, a portion of variable compensation is paid in the form of deferred, share-based awards, reflecting their accountability for the operating results achieved and the impact of their decisions on the Group's future development.

In addition to members of the Group Management Board, other senior employees of the Group have a portion of their variable compensation deferred to provide alignment with long-term interest of clients and shareholders.

Discretionary compensation decisions are based on individual's achievement of pre-set targets and contributions to the Group's development. This fosters a work ethic that is driven by high performance and tangible results.

Identified Staff

The categories of staff for inclusion as Identified staff for GAM Fund Management Limited include:

- Executive and non-executive members of the Board
- Other members of senior management
- Staff responsible for control functions

Directors of this regulated entity do not receive any kind of variable remuneration linked to their role. Should any variable remuneration be granted to directors in the future, such remuneration will be fixed and not linked to the short-term results of the entity.

The Identified Staff are identified and reviewed on an annual basis by the CMC in line with the criteria set out under EU regulations, specifically that if, in the performance of their professional activities certain staff of a delegate portfolio manager can have a material impact on the risk profiles of the funds they manage, these employees are considered as "Identified Staff". For this purpose the Group considers the respective delegate portfolio manager as subject to equally effective regulation if they are required by law and regulations or in accordance to internal standards to put in place a remuneration policy, which in accordance to the ESMA Remuneration Guidelines 2013/232 and 2016/575 is considered equivalent in its objectives. The Group's UCITS regulated entities will only delegate its portfolio management to firms, whose remuneration policy complies with the 'equivalence standard' as described.

Quantitative disclosures

The remuneration data provided below reflects amounts paid in respect of the performance financial year 2022 in relation to the UCITS funds managed by GAM Fund Management Limited.

GAM Fund Management Limited manages funds with a combined AUM of €11,036m at 31 December 2022.

Total annual remuneration paid to all Management Company employees	€4.67m
Of which fixed:	€4.67m
Of which variable:	€0.0m
Number of Management Company employees	67
Total Remuneration paid to Identified Staff in the Management Company	€1.83m
Of which paid to Senior Management:	€0.82m
Of which paid to other identified staff:	€1.01m
Total annual remuneration paid to employees in delegate(s):	€6.08m
Of which fixed:	€2.09m
Of which variable:	€3.99m

Notes

In the figures above, fixed remuneration relates to salary and pension benefits and variable remuneration includes the annual bonus including any long-term incentive awards.

Where relevant, the remuneration information provided in the table above relates to a proportion of the amount of total fixed and variable remuneration paid to employees in the Management Company and its delegate(s) that relates to their funds activities.

Additional Market Risk Notes

Market Risk

i) Funds which calculate risk using VaR

The VaR model is an estimate of the maximum loss each Fund may experience over any 20 day period, with a probability of 99%. The VaR is calculated by an external service provider using the historical simulation method using three years of weekly historical price data for the underlying securities. The VaR of the portfolio is stress tested on a fortnightly basis by running the VaR using current holdings against historical events. The VaR cannot take into account the fact that future market price movements may bear no relation to historical patterns as future market conditions could vary significantly from those experienced in the past.

VaR is an estimate of the maximum loss a Fund may suffer over a defined period and calculated with a specified confidence level. It is calculated for the investment pool of each Fund.

Additional Market Risk Notes, continued

Market Risk, continued

i) Funds which calculate risk using VaR, continued

The level of leverage may be calculated in a number of ways:

Sum of the notionals

This calculation has been disclosed in accordance with Central Bank requirements but it does not take into account any netting and hedging arrangements that a fund has in place. It is a "simple and easy to compute" formula of adding notional amounts without taking account of whether each derivative is used for risk reduction or otherwise, the disclosed sum of the notional amounts represents, in many cases, an inflated figure that fails to indicate the risk levels in a fund. For example, positions that economically offset risk, such as currency hedges, are required to be included in the gross notional calculation even though such transactions would reduce risk in a portfolio, thereby increasing the gross notional amount but actually creating a less risky product for the investor.

10 year equivalents

This is more relevant for fixed income funds and has been provided as a more appropriate leverage calculation for those type of funds. It measures the marginal impact on position value of a small change in interest rates such as a 1 basis point ("bp") move, and then to express that impact in terms of the quantity of the current 10–year note that would have the same sensitivity to rate moves.

	Leverage calculated at 30 June 2023 using		Leverage calculated at 30 June 2022 using	
	Sum of the nationals %	10 Year Equivalent unless otherwise indicated %	Sum of the nationals	10 Year Equivalent unless otherwise indicated %

Changes to the Prospectus

A new Prospectus was issued on 1 July 2022.

- Addition of Performance fee calculation examples under the "Performance Fee" section of the GAM Star Fund Plc Prospectus.
- o Example 1 Performance Fee Worked Example based on Outperforming a High Water Mark.
- o Example 2 Performance Fee Worked Example based on lower of High Water Mark and Benchmark outperformance.
- Additional Performance fee wording in the sub-fund supplement of the GAM Star Fund Plc Prospectus for:
 - GAM Star Alpha Technology,
 - GAM Star Emerging Market Rates,
 - GAM Star Global Rates.
 - GAM Star MBS Total Return,
 - GAM Star Disruptive Growth.

Performance fee to be paid annually in arrears to the Co-Investment Manager as soon as practicable after the end of the Calculation Period and in any event within "30 days of the end of the Calculation Period" and to note that "crystallisation frequency at which any accrued Performance Fee becomes payable to the Co-Investment Manager is annually".

- Additional Performance fee wording in the sub-fund supplement of the GAM Star Fund Plc Prospectus for:
- GAM Star Cat Bond.

Performance fee to be paid annually in arrears to the Co-Investment Manager as soon as practicable after the end of the Calculation Period and in any event within "45 days of the end of the Calculation Period" and to note that "crystallisation frequency at which any accrued Performance Fee becomes payable to the Co-Investment Manager is annually".

A new Prospectus was issued on 1 December 2022.

- Update to the Disclosure under SFDR Appendix to the supplement of each sub-fund disclosing under Article 8 and 9 this will increase the level of details and clarify certain processes but no material change is envisaged from the way the strategies are currently run.
- New disclosure under Article 8 of SFDR for the first time for the following sub-funds:
 - GAM Star MBS Total Return,
- GAM Star China Equity,
- GAM Star Asian Equity.

First Addendum: 6 March 2023

- In the Directory of the Prospectus the list of directors set out under the sub-section "Directors of the Manager" has been updated.
- Amendments to the supplements in the Section entitled "Investment Objectives and Policies" in respect to the below sub-funds of the Company have been updated.
 - GAM Star MBS total Return.
 - GAM Star Cat Bond.

Second Addendum: 11 August 2023

- In the Directory of the Prospectus the list of directors set out under the sub-section "Directors of the Manager" has been updated.
- In the Directory GAM Japan has been added under the sub-section 'Co-Investment Manager'.
- Some changes/removal of name under the sub-section of Manager/Management of the Company.
- Additional wording to the sections 'Emerging Market Risk section 'Risk Factors'.
- Removal of the following revoked sub-funds of the Company:
 - GAM Star China A Equity,
 - GAM Star UK Equity Income,
 - GAM Systematic Dynamic Multi Asset,
 - GAM Systematic Core Macro,
 - GAM Systematic Dynamic Credit.
- Deletion of wording under the sub-section of Minimal Initial Subscription and replaced with alternative wording.
- Changes to the list of funds GAM International Management Limited co-manages.
- Changes to GAM Hong Kong in the sub-manager section.
- GAM Japan Limited to be appointed under Delegate Investment Manager.
- Changes to some wording of the IOP for GAM Star Capital Appreciation/GAM Star Emerging Market Rates.
- Changes to Risk wording for GAM Star Japan Leaders.

Additional Information and Regulatory Requirements (Unaudited) (continued)

Securities Financing Transactions

Article 13 of Regulation (EU) 2015/2365 on transparency of securities financing transactions ("SFTs") and of reuse and amending Regulation (EU). No. 648/2012, requires UCITS investment companies to provide the following information on the use made of SFTs.

Securities lending

The below table details the value of securities on loan as a proportion of the Funds' total lendable assets and NAV as at 30 June 2023 and the income/returns earned for the financial year ended 30 June 2023. Total lendable assets are those assets held within the portfolio of the Funds that utilise security lending.

		Securities on lo	an
Fund	Currency	% of lendable assets	% of NAV
GAM Star Alpha Spectrum	€	22.40	15.16
GAM Star Alpha Technology	US\$	3.74	2.55
GAM Star Asian Equity	US\$	2.21	1.22
GAM Star China Equity	US\$	5.53	4.46
GAM Star Composite Global Equity	US\$	5.39	2.88
GAM Star Flexible Global Portfolio	€	17.08	7.84
GAM Star Japan Leaders	¥	11.76	11.50
GAM Star Disruptive Growth	US\$	2.01	1.73

Please refer to note 5 for details on how the total income earned on securities lending transactions is split between the Company and the Securities Lending Agent and how much income was earned by each party during the financial year ended 30 June 2023.

The following tables detail the value of securities on loan and associated collateral received, analysed by borrowing counterparty as at 30 June 2023:

GAM Star Alpha Spectrum

Barclays Capital Securities Limited, Citi Group Global Markets Limited, Goldman Sachs International, HSBC Bank Plc, JP Morgan Securities Plc, Macquarie Bank Limited, Merrill Lynch International, Morgan Stanley and Co International and UBS AG were the counterparties in use for securities lending purposes as at 30 June 2023. All securities lending contracts are settled on a bi-lateral basis. Non-cash collateral received in relation to securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received and posted by the Funds in respect of securities lending transactions as at 30 June 2023.

		Maturity Tenor								
Fund	Collateral type	Currency	Less than one year	One to five years	Greater than five years	Total				
GAM Star Alpha Spectrum	Sovereign debt	€	-	515,425	10,134,408	10,649,833				
GAM Star Alpha Technology	Sovereign debt	US\$	2,577	38,152	1,101,835	1,142,564				
GAM Star Asian Equity	Sovereign debt	US\$	-	136,415	97,153	233,568				
GAM Star China Equity	Sovereign debt	US\$	210,485	1,860,802	2,419,465	4,490,752				
GAM Star Composite Global Equity	Sovereign debt	US\$	19,049	326,595	4,719,526	5,065,170				
GAM Star Flexible Global Portfolio	Sovereign debt	€	119,918	870,698	7,966,830	8,957,446				
GAM Star Japan Leaders	Sovereign debt	¥	13,094,946	285,975,517	3,561,265,275	3,860,335,738				
GAM Star Disruptive Growth	Sovereign debt	US\$	109,365	359,857	4,104,134	4,573,356				

The maturity tenor analysis for Sovereign Debt securities received as collateral is based on the contractual maturity date. All non-cash collateral received by the Funds is held by the Depositary (or through its delegates) as at 30 June 2023.

GAM Star Fund p.l.c.

Additional Information and Regulatory Requirements (Unaudited) (continued)

Securities Financing Transactions, continued

The following table lists the ten largest issuers* by value of non-cash collateral received by the Funds across securities lending transactions as at 30 June 2023.

Fund	Collateral issuer	Value	% of NAV
GAM Star Alpha Spectrum	US Government	10,649,833	15.82
GAM Star Alpha Technology	US Government	1,142,564	2.63
GAM Star Asian Equity	US Government	233,568	1.28
GAM Star China Equity	US Government	4,490,752	4.70
GAM Star Composite Global Equity	US Government	5,065,170	3.00
GAM Star Flexible Global Portfolio	US Government	8,957,446	8.18
GAM Star Japan Leaders	Federal Republic of Germany, Kingdom of Belgium, Kingdom of the		
	Netherlands, Republic of France and US Government	3,860,335,738	12.06
GAM Star Disruptive Growth	US Government	4,573,356	1.78

^{*} There were no other issuers of non-cash collateral as at 30 June 2023.

All derivative instruments are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Agreement ("ISDA Agreement") or similar agreement. An ISDA Agreement is a bilateral agreement between the Funds and a counterparty that governs all derivative instruments entered into by the parties. The parties' exposures under the ISDA Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all derivative instruments entered into by the Funds under the ISDA Agreement. All collateral received/posted by the Funds in relation to the ISDA Agreement is cash as at 30 June 2023. All of the cash balances have an open maturity. The cash collateral received and disclosed above is custodied with the depositary. Cash collateral received may be reinvested in accordance with the requirements of the Central Bank at the discretion of the Investment Manager.

Additional Information and Regulatory Requirements (Unaudited) (continued)

General Information

The Company

GAM Star Fund p.l.c. (the "Company"), an investment company with variable capital and segregated liability between Funds, is authorised by the Central Bank of Ireland ("the Central Bank") as an undertaking for collective investment in transferable securities ("UCITS") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (S.I. No. 211 of 2011) as amended and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019).

The Manager

The Manager of the Company is GAM Fund Management Limited.

Dealing days

Shares may be purchased or sold on any day which is a business day in Dublin or alternatively such business day as stated in the Prospectus. In the case of all Funds, dealing will be at least twice a month. The Net Asset Value per share of each Fund will be determined on each Dealing Day at 23:00 hours (UK time) or such other time as the Manager may determine in the base currency of the relevant Fund.

Application for shares

All applications should be made directly to the Manager or via the German information and distribution agent of the Company, the Austrian paying agent of the Company, or via the Swiss representative of the Company. Shares will be purchased on the relevant Dealing Day and a contract note will be sent to the purchaser. Prospective shareholders should note that the price of shares may go down as well as up.

Redemption of shares

Requests for redemption of shares and requests for the switch of shares can be submitted via the German paying agent of the Company, the Austrian paying agent of the Company, the Swiss representative of the Company or directly to the Manager. This should be done in writing by post, by facsimile, by email or by telephone.

Income distributions

Income distributions are normally made within two months of year end.

Availability of Prices

Prices are available from GAM Fund Management Limited, on www.gam.com.

Reports

Annual and semi-annual reports are issued.

Purchases and Sales

Please contact the Manager, the Swiss representative or other local GAM Contacts to obtain a complete list of all purchases and sales for any Fund free of charge.

Prospectus

Further details concerning the Funds are contained in the Prospectus and Prospectus Addendum, the Key Investor Information Documents of the Company and the Articles of Incorporation. Copies of these, as well as copies of the annual and semi–annual reports, are available on application to the Manager, to the UK facilities agent, the German and Austrian information agent as well as to the Swiss representative free of charge.

Place of performance and forum in Switzerland

In the case of shares which are distributed in Switzerland or from Switzerland, the place of performance and the forum are at the domicile of the Swiss representative of the Fund in Zürich.

Reporting Fund Status (relevant to UK Shareholders only)

It is the policy of the Company to apply to HM Revenue and Customs ("HMRC") for certification of all Share classes (with the exception of GAM Star Alpha Spectrum and the non UK RFS Classes of the relevant Funds) as reporting funds as defined in the Offshore Funds (Tax) Regulations 2009.

Environmental and/or social characteristics

S		
ın	Did this financial product have a sustainable	investment objective?
or	Yes	● No
not I or nd	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU
is		Taxonomy with a social objective
in	It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act").
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in a economic activity that contributes to an environmental social objective, provided that the investment does n significantly harm any environmenta social objective an that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially

investments with an environmental objective might be aligned with the Taxonomy or not.

economic activities.

sustainable

Sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	99.99%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.99%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data covera ge	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	99.99%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverag e	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2023	99.9%	0%	362.4
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2023	99.99%	0%	2.64%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 June 2023	99.9%	0%	18.44%
--	-----------------------	------	-----------------	-------	----	--------

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weighted average %	MSCI	30 June 2023	96.16%	0%	65.46%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*.	Number of engagements	Internal Log	1 st July 2022 – 30 th June 2023	100%	0%	16

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

Adverse sust	ainability indicator	Fund consideration	
	1. GHG emissions	A range of indicators in relation to company GHG	
	Carbon footprint	emissions and carbon emission reduction	
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG	
	companies	emissions among others) were reviewed as part

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

Asset allocation describes the

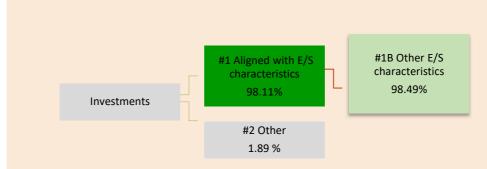

share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 98.16% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.89% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	19.85%
Technology Hardware & Equipment	14.66%
Semiconductors & Semiconductor Equipment	13.86%
Media & Entertainment	12.24%
Retailing	8.79%
Insurance	7.78%
Software & Services	6.00%
Pharmaceuticals & Biotechnology	5.19%
Automobiles & Components	2.68%
Energy	2.54%
Transportation	1.29%
Health Care Equipment & Services	1.14%
Real Estate	1.11%
Consumer Durables & Apparel	1.00%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

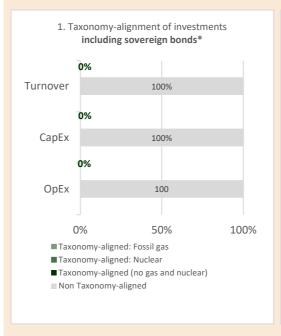

Yes

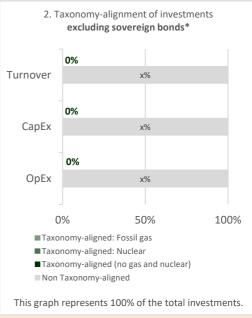

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. **Social and employee matters** – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 16 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM STAR CAT BOND (the "Fund") Legal entity identifier: 549300YA8HHODUOIOX41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be

aligned with the

Taxonomy or not.

Did th	Did this financial product have a sustainable investment objective?							
••	Yes	No No						
	It made sustainable investments with an environmental objective: 0% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective						
	t made sustainable investments with a social objective: 0%	It promoted E/S characteristics, but did not make any sustainable investments						

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and/or social characteristics:

- 1) The Delegate Investment Manager applied a proprietary rating methodology to support the promotion of high ESG characteristics in the Fund. The Fund primarily invests in securities assessed to have positive ESG ratings, while securities assessed as negative are not eligible for inclusion. The rating methodology is described in the Investment Strategy section the Fund's Propectus under the heading "Analysis of ESG Factors" and the Delegate Investment Manager's ESG Policy, which is available by accessing the link detailed in response to the question "Where can I find more product specific information online?" in the Prospectus;
- 2) Excluded insurance-linked securities ("ILS") from sponsors involved in specific activities considered to cause negative environmental and social impact, as described in the Sustainability Exclusion Criteria within the Prospectus; and
- 3) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact ("UN Global Compact"), by exclusion of ILS from sponsors that violate these principles.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the analysis of ESG factors

The Fund invested in ILS with only positive or neutral ESG ratings, as assessed by the Delegate Investment Manager's proprietary ESG rating methodology, and excluded investments that are rated as negative. This assessment is conducted at the investment and sponsor level and reported as % of the Fund's ILS investments in each category.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Proportion of data estimated ³	Output ⁴
nvestments vith POSITIVE :SG ratings: roportion of ecurities vithin the Fund vith a POSITIVE ponsor ESG ating based on the Delegate nvestment Manager's roprietary coring ramework.	% of Fund	Delegate Investment Manager internal ESG Score	30 June 2023	100%	Not applicable	93.13%
nvestments vith NEUTRAL ESG ratings: proportion of securities vithin the Fund vith a NEUTRAL sponsor ESG ating based on the Delegate nvestment Manager's proprietary scoring ramework.	% of Fund	Delegate Investment Manager internal ESG Score	30 June 2023		Not applicable	6.87%

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability

¹ Data snapshot taken at the Fund's year end.

² Calculated as the proportion of ILS investments (by NAV) that are assigned ESG ratings. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

³ Not applicable as the ESG Scores are assessed internally.

⁴ Calculated as the proportion of ILS investments (by NAV) that are rated ESG positive or neutral. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

2) Indicators relating to Sustainability Exclusion Criteria

Involvement by the sponsor in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus). This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

Given the nature of sponsors in the ILS market, which are predominantly (re)insurance entities and where are a large percentage of sponsors are privately held companies or government-related entities, product involvement assessments are based on internal research drawing on information made available by the sponsors as well as from public third-party sources.

Sustainability Indicator	Units	Data source	Date ⁵	Data coverage ⁶	Proportion of data estimated ⁷	Output ⁸
	ILS s	ponsored by	non-sove	reigns	ı	
Involvement in controversial weapons: share of investments in ILS sponsored by companies involved in the manufacture or selling of controversial weapons.	% of Fund	Internal research	31 Dec 2022	100%	Not applicable	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Internal research	31 Dec 2022	100%	Not applicable	0%
Involvement in tobacco manufacturing: share of investments in ILS sponsored by companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Internal research	30 June 2023	100%	Not applicable	0%
Involvement in tobacco retail and distribution: share of investments in ILS sponsored by companies involved in the distribution	% of Fund	Internal research	30 June 2023	100%	Not applicable	0%

⁵ Data snapshot taken at the Fund's year end.

⁶ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that are assessed Sustainability Exclusion Criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

⁷ Not applicable as compliance with the Sustainability Exclusion Criteria is assessed internally by the Delegate Investment Manager.

⁸ Calculated as the proportion of ILS investments (by NAV) from ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus.

and/or retail sale of tobacco products (above 5% revenue threshold).						
Involvement in oil sands extraction: share of investments in ILS sponsored by companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Internal research	30 June 2023	100%	Not applicable	0%
Involvement in thermal coal mining: Share of investments in ILS sponsored by companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Internal research	30 June 2023	100%	Not applicable	0%
	5	Sovereign spo	onsored IL	<u>.S</u>		
"Not Free" Sovereign Sponsors: share of investments in ILS sponsored by countries which have been assessed as "Not Free" by the Freedom House Global Freedom Score.	% of Fund	Freedom House	30 June 2023	100%	Not applicable	0%

3) <u>Indicators relating to international norms and standards ILS sponsored by non-sovereigns</u>

Companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the sponsor level and reported as % of the Fund's investment sponsored by entities failing the criteria.

No exceptions were made during the reporting period.

RepRisk and Sustainalytics are used as independent third-party assessments of current severe UN Global Compact violations of sponsors. If only one assessment is available for a sponsor, that assessment is used as the final assessment of a sponsor's compliance with the UN Global Compact. If a sponsor is not covered by either third-party data provider, internal research based on third-party data sources and engagement with the sponsor, if appropriate, are used to form an assessment.

Sustainability Indicator	Units	Data source	Date ⁹	Data coverage	Proportion of data estimated	Output ¹²
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	RepRisk/ Sustainalytics /Internal research	30 June 2023	95.76%	4.24%	0%

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

¹⁰ Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that are covered by at least one third-party data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

⁹ Data snapshot taken at the Fund's year end.

¹¹ Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that are not by at least one third-party data provider. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

¹² Calculated as the proportion of ILS investments (by NAV) from non-sovereign ILS sponsors that fail the criteria. The calculation does not include non-ILS assets defined under "#2 Other" in the Prospectus nor ILS from sovereign sponsors.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs)—as detailed in Table 1, and noting the additional indicators in Tables 2 and 3, of Annex 1 of the SFDR Delegated Act—on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Non-Sovereign Issuers

Adverse S	ustainability Indicator	Fund Considerations		
	Table 1	<u> </u>		
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on social and employee matters, throughout the reporting period.		
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	No investments in the Fund were sponsored by entities that have any direct involvement in controversial weapons throughout the reporting period.		
	Table 2	2		
Emissions	Investments in companies without carbon emission reduction initiatives	If an ILS sponsor is involved in the generation of energy from thermal coal with a revenue level above the Sustainability Exclusion Criteria threshold, then an		
Energy performance	5. Breakdown of energy consumption by type of non-renewable sources of energy	investment can only be made if the sponsor is involved in credible carbon emission reduction initiatives to bring the sponsor in line with the Sustainability Exclusion Criteria in a reasonable timeframe.		
		There is one ILS sponsors in the Fund that is involved in the generation of energy from thermal coal. that sponsor had a thermal coal-related revenue level below the Sustainability Exclusion Criteria threshold throughout the reporting period.		
Water, waste and material emissions		Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on environmental matters, throughout the reporting period.		

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Table 3					
Social and employee matters	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on labor standards matters, throughout the reporting period.				
Human Rights	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on human rights matters, throughout the reporting period.				
Anti-corruption and anti-bribery	Considered only if sponsor actions in this area leads to a UN Global Compact violation. No investments in the Fund were sponsored by entities that violate any of the UN Global Compact principles, including on anti-corruption and anti-bribery matters, throughout the reporting period.				

Sovereign Issuers

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

Investments typically support the (re)insurance industry, the sponsor type (e.g. insurer, reinsurer, corporate, government) is reflected in the columns "Sector" as this is most appropriate for the Fund. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations (that can also facilitate ILS issuance for sovereigns). During the reporting period there were six ILS sovereign sponsors within in the Fund.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

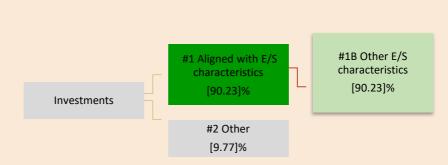

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding ILS that are rated NEUTRAL, cash, cash-equivalents, and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 90.23% of the Fund was aligned with E/S characteristics, while 9.77% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

In which economic sectors were the investments made?

Investments typically support sponsors in the (re)insurance industry and the sponsor type (e.g. insurer, reinsurer, corporate, government) is reflected in the table below as it is most appropriate for the asset class. Allocations are shown as a % ILS-only NAV of the Fund as at 30 June 2023.

Sponsor Type	Allocation
Insurer	55.72%
Reinsurer	13.61%
Corporate	4.67%
Government	26.00%

Sponsors are classified as an insurer, reinsurer, corporate or government by the Delegate Investment Manager on a best-efforts basis. If a sponsor is involved in both insurance and reinsurance, it is classified according to the line of business that contributes the most by premium. Government sponsors of ILS within the Fund include local municipalities, transit authorities, state insurance entities and residual insurance pools formed by statute, national insurance programs (that can be classified as sovereign) and public-private reinsurance pools, as well as international organizations.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, the minimum proportion of the Fund's investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, is 0%.

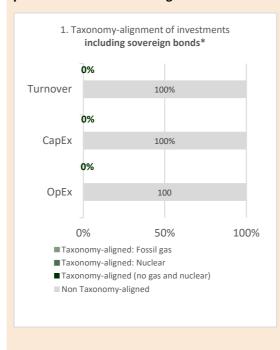

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

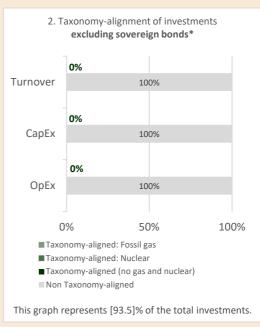

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy¹³?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all ILS sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

¹³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments were included under "2 Other":

- ILS rated NEUTRAL
- Cash
- Cash equivalents (including US Treasury Bills)
- Currency hedges for non-US dollar assets
- ILS repo positions

The non-ILS "other" investments listed above were used for currency and cash management purposes for the Fund.

All ILS investments in the Fund have the same investment rationale outlined above, including ILS with a neutral ESG rating.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to analysis of ESG factors

The Fund invested in ILS with only positive or neutral ESG ratings, based on a proprietary ESG rating methodology, and excluded investments that are rated as negative. This assessment was conducted at the investment and sponsor level.

2. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using internal research drawing on information from sponsors, independent ESG rating providers where available and other recognised public third-party sources. There were no breaches of the Sustainability Exclusion Criteria during the reporting period.

3. Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Delegate Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star China Equity (the "Fund" or "Financial Product")

Legal entity identifier: 5493003USMRCW7XRBC44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of environmentally sustainable

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2023	100%	0%	1,367.1
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2023	100%	0%	0%
Gender diversity on the Board (also related to good governance): percentage of board members who are	Weig hted avera ge %	MSCI	30 June 2023	100%	0%	17.54%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.			

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	99.74%	0%	62.21%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

Sustainability Indicator	Units	Data sourc e	Date	Data coverage	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment	Number of engagements	Intern al Log	1 st July 2022 – 30 th June 2023	100%	0%	14

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*.	
--	--

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Principal adverse

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Adverse sust	ainability indicator	Fund consideration
	1. GHG emissions	A range of indicators in relation to company GHG
	Carbon footprint	emissions and carbon emission reduction
	3. GHG Intensity of investee	initiatives (including Scope 1 & Scope 2 GHG
	companies	emissions among others) were reviewed as part
	4. Exposure to companies active	of the investment process, and were primarily
Greenhouse	in the fossil fuel sector	addressed in a qualitative way, for example through engagement with selected investee
gas	5. Share of non-renewable energy consumption and	companies on reduction targets and initiatives or
emissions	energy consumption and production	voting on resolutions to support greater
	Energy consumption intensity per high impact climate sector	transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
	10. Violations of UNGC principles	A range of PAI indicators were reviewed as part
	and OECD Guidelines for	of the investment process. Investee companies

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

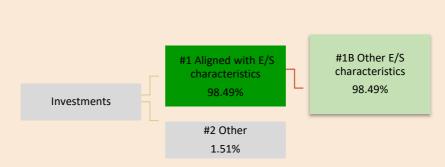

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets. All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 98.49% of the Fund attained the environmental and social characteristics promoted by the Fund, while 1.51% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Retailing	22.81%
Media & Entertainment	22.44%
Banks	13.97%
Pharmaceuticals & Biotechnology	8.61%
Insurance	8.45%
Software & Services	4.96%
Automobiles & Components	4.24%
Consumer Services	3.41%
Capital Goods	2.61%
Real Estate	2.21%
Health Care Equipment & Services	1.98%
Transportation	1.61%
Utilities	0.80%
Consumer Durables & Apparel	0.45%

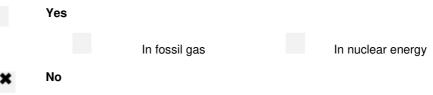

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

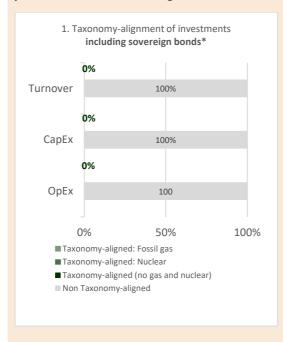

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

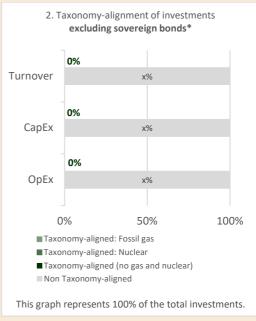

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 14 companies relating to ESG and sustainability concerns or opportunities.

Reference benchmarks are indexes to

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Continental European Equity (the "Fund" or "Financial Product")

Legal entity identifier: 549300YSCWDIOZ2LA130

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be aligned with the

Taxonomy or not.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

(above 10%						
revenue threshold).						
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2023	100%	0%	26,514.7
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2023	100%	0%	10.12%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

------------------------------------	-------------------------------	------	--------------------	------	----	--------

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	100%	0%	83.01%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country
LVMH Moet Hennessy Louis Vuitton SE	Retailing	6.63%	France
Nestle	Media & Entertainment	6.56%	Switzerland
Novo Nordisk	Insurance	5.87%	Denmark
Pernod Ricard	Retailing	4.28%	France
CaixaBank	Media & Entertainment	4.04%	Spain
TOTAL SE	Insurance	3.95%	France
Industria de Diseno Textil	Banks	3.89%	Spain
UniCredit	Media & Entertainment	3.72%	Italy
Atlas Copco	Retailing	3.72%	Sweden
New Linde	Banks	3.45%	United States
FinecoBank Banca Fineco	Energy	3.25%	Italy
Shell	Automobiles & Components	3.22%	Netherlands

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

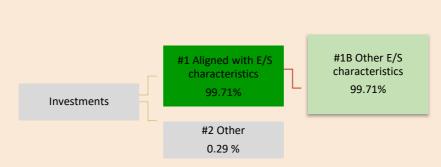

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 99.71% of the Fund attained the environmental and social characteristics promoted by the Fund, while 0.29% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	15.86%
Capital Goods	15.78%
Semiconductors & Semiconductor Equipment	11.91%
Food Beverage & Tobacco	10.84%
Energy	10.13%
Pharmaceuticals & Biotechnology	9.33%
Consumer Durables & Apparel	6.63%
Retailing	5.51%
Materials	4.26%
Transportation	3.11%
Financial Services	2.64%
Insurance	1.99%
Health Care Equipment & Services	1.77%
Media & Entertainment	0.39%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

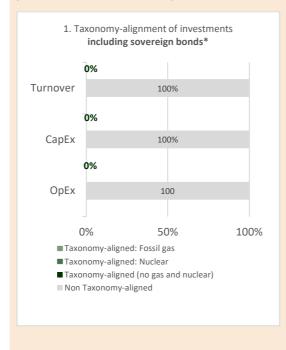

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

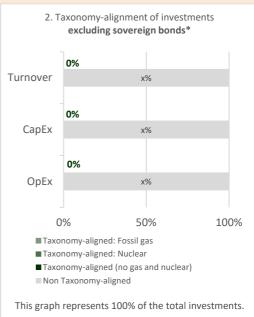

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 25 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
- Not applicable.
 - How did this financial product perform compared with the broad market index?

Not applicable

Reference
benchmarks are

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.		30 June 2023	0%	39.86%
--	--	--------------------	----	--------

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	88.44%	0%	82.76%

5) <u>Indicators relating to engagement activities</u>

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

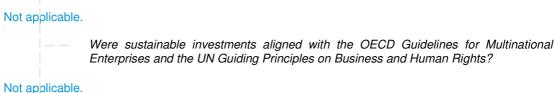

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sustainability indicator Fund consideration 1. GHG emissions A range of indicators in relation to company GHG 2. Carbon footprint emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG 3. GHG Intensity of investee emissions among others) were reviewed as part companies of the investment process, and were primarily 4. Exposure to companies active addressed in a qualitative way, for example in the fossil fuel sector Greenhouse through engagement with selected investee Share of non-renewable companies on reduction targets and initiatives or gas energy consumption and emissions voting on resolutions to support greater production transparency on climate-related risks. Investeee companies assessed to derive over 25% of 6. Energy consumption intensity revenue from thermal coal mining or electricity generation from thermal coal were excluded from per high impact climate sector the Fund. 7. Activities negatively affecting Indicators in relation to an investee company's **Biodiversity** biodiversity-sensitive areas impact on biodiversity, including deforestation, Water 8. Emissions to water water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example Hazardous waste and Waste radioactive waste ratio through engagement with selected companies. 10. Violations of UNGC principles A range of PAI indicators were reviewed as part of the investment process. Investee companies and OECD Guidelines for assessed as severely violating UN Global Multinational Enterprises Compact principles or assessed as having 11. Lack of processes compliance mechanisms exposure to controversial weapons are excluded to monitor compliance with UNGC from the Fund. Board gender diversity was priniples and OECD Guidelines considered primarily within engagement and Social and for Multinational Enterprises voting decisions. employee matters 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical biological weapons and weapons)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

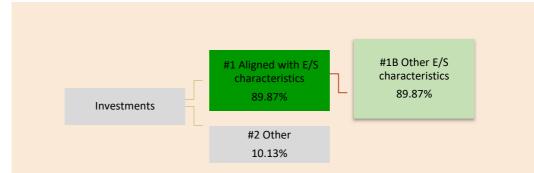

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 97.84% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.16% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	50.80%
Fixed Interest	19.11%
Insurance	8.32%
Financial Services	5.30%
Real Estate	2.41%
Utilities	2.03%
Energy	1.31%
Telecommunication Services	0.43%
Transportation	0.13%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

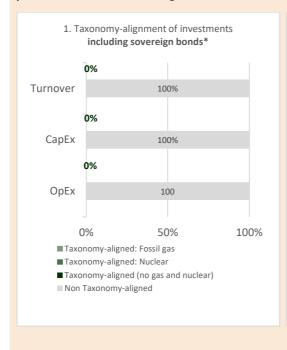

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

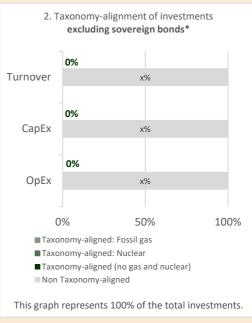

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

%?

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 31 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Not applicable.

Not applicable

How did this financial product perform compared with the reference benchmark?

How did this financial product perform compared with the broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- Investments in companies assessed to follow good governance practices, and
- Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

list of socially sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	99.06%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%
Involvement in assault weapons for civilian customers: share	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).						
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.59%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,
Water	8. Emissions to water	water and waste, were reviewed as part of the
Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

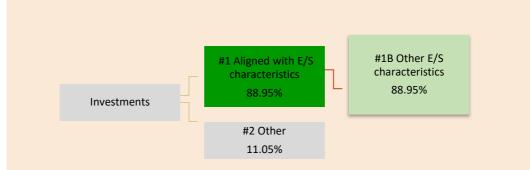

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 88.95% of the Fund attained the environmental and social characteristics promoted by the Fund, while 11.05% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	57.71%
Fixed Interest	20.79%
Insurance	8.92%
Utilities	1.67%
Financial Services	1.56%
Real Estate	0.56%
Telecommunication Services	0.52%
Food Beverage & Tobacco	0.34%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

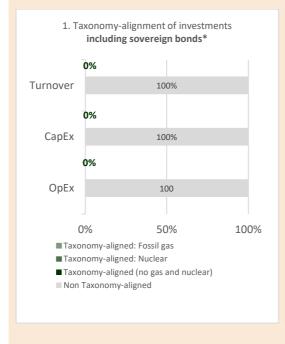

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

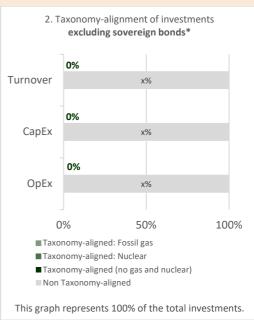

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 27 companies relating to ESG and sustainability concerns or opportunities.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference
benchmarks are

measure whether
the financial
product attains the
environmental or
social
characteristics that
they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Credit Opportunities (USD) (the "Fund" or "Financial Product")

Legal entity identifier: 5493004R2B7PEULBN196

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	● No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	99.99%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	88.42%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	99.99%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equivalent	MSCI	30 June 2023	99.99%	0%	5,734.1
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2023	99.99%	0%	1.62%
Gender diversity on the Board (also related to good	Weighted average %	MSCI	30 June 2023	99.9%	0%	40.00%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.			
--	--	--	--

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	82.48%	0%	83.94%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Sustainability Indicator	Units	Data sourc e	Date	Data covera ge	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*.	Number of engagements	Intern al Log	1 st July 2022 – 30 th June 2023	100%	0%	31

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sustainability indicator **Fund consideration** A range of indicators in relation to company GHG 1. GHG emissions 2. Carbon footprint emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG 3. GHG Intensity of investee emissions among others) were reviewed as part companies of the investment process, and were primarily 4. Exposure to companies active addressed in a qualitative way, for example in the fossil fuel sector Greenhouse through engagement with selected investee 5. Share of non-renewable gas companies on reduction targets and initiatives or consumption energy emissions voting on resolutions to support greater production transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity 6. Energy consumption intensity generation from thermal coal were excluded from per high impact climate sector the Fund. 7. Activities negatively affecting Indicators in relation to an investee company's **Biodiversity** biodiversity-sensitive areas impact on biodiversity, including deforestation, water and waste, were reviewed as part of the Water 8. Emissions to water investment process and were primarily addressed in a qualitative way, for example Hazardous waste and Waste radioactive waste ratio through engagement with selected companies. 10. Violations of UNGC principles A range of PAI indicators were reviewed as part and OECD Guidelines for of the investment process. Investee companies Multinational Enterprises assessed as severely violating UN Global Compact principles or assessed as having 11. Lack of processes and compliance mechanisms exposure to controversial weapons are excluded from the Fund. Board gender diversity was monitor compliance with UNGC Social and considered primarily within engagement and priniples and OECD Guidelines employee for Multinational Enterprises voting decisions. matters 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines. cluster munitions, chemical weapons biological and weapons)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country
ABN Amro Cash Collateral USD	Cash	8.55%	United States
Banco Bilbao Vizcaya Argentaria 6.5% Perp	Banks	4.12%	Spain

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

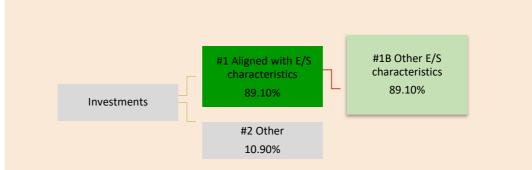

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 97.84% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.16% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	46.32%
Fixed Interest	27.47%
Insurance	10.54%
Financial Services	2.52%
Utilities	0.83%
Telecommunication Services	0.65%
Energy	0.44%
Real Estate	0.44%
Food Beverage & Tobacco	0.27%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

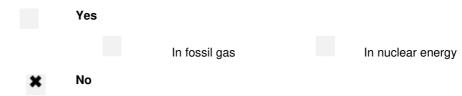

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

performance.

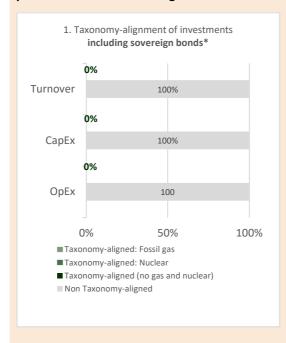

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

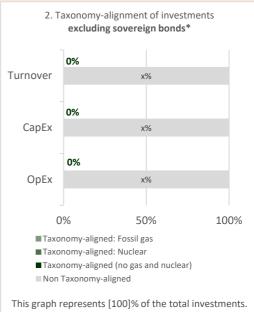

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 31 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Sustainable Emerging Equity (the "Fund") 549300ZIHQCMZKW18N16

Legal entity identifier:

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lav down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is

Environmental and/or social characteristics

Did th	is financial product have a sustainable	investment objective?
••	Yes	● No
	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
	t made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

GAM Sustainable Emerging Equity (the "Financial Product" or "Fund") promoted the following environmental and social characteristics:

- 1. Selection of companies with lower carbon intensity relative to their sector to contribute to the Fund's target of weighted average carbon intensity that is 30% lower than the Fund's benchmark, namely the MSCI Emerging Markets (the "Benchmark"),
- 2. Tilt towards companies with best-in-class ESG scores (focused on the management of ESG risks and opportunities) relative to sector peers to contribute to a target MSCI ESG Fund Rating of A or above,
- 3. Exclusion of companies involved in specific activities considered to cause negative environmental and social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus"),
- 4. Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact ("UNGC").
- 5. Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 6. Investments in companies assessed to follow good governance practices, and

7. Engagement with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to carbon intensity

All investments in the Fund are reviewed with respect to their carbon intensity. The Fund's investments are selected such that the weighted average carbon intensity of the Fund's portfolio is materially lower than that of the Benchmark.

Sustainability Indicator	Units	Source	Date 1	Data coverage ²	Data estimated ³	Output ⁴
Weighted Average Carbon Intensity – calculated as the Fund portfolio's exposure to carbon-intensive companies, expressed in tons CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).	tCO2e / \$M revenue	MSCI	30 June 2023	96.43%	0%	131.6

2) Indicators relating to ESG Scores

The Co-Investment Manager targets an overall MSCI ESG Fund Rating of A or above. The MSCI ESG Fund Rating is designed to assess the resilience of a fund's aggregate holdings to long-term ESG risks; highly rated funds consist of issuers with leading or improving management of key ESG risks.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

Sustainability Indicator	Units	Source	Date	Data coverage	Data estimated	Output ⁵
Fund ESG Rating— overall MSCI ESG Fund Rating. A higher ESG Rating indicates the Fund's holdings are leaders in the management of long-term ESG risks.	Score	MSCI	30 June 2023	96.43%	0%	AA

3) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the Sustainability Exclusion Criteria within the Prospectus).

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	96.43%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	99.70%	0%	0%
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2023	99.70%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of	% of Fund	Sustainalyt ics	30 June 2023	99.70%	0%	0%

 $^{^{\}rm 5}$ MSCI Fund Rating Methodology can be found $\underline{\text{here}}.$

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

tobacco products (above 5% revenue threshold).						
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2023	99.70%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2023	99.70%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalyt ics	30 June 2023	99.70%	0%	0%

4) Indicators relating to international norms and standards

Companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	96.43%	0%	0%

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found here.

5) Indicators relating to Principal Adverse Impacts

The Co-Investment Manager applied an internal systematic framework to consider and take action of to mitigate of principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁸
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tCO2 e	MSCI	30 June 2023	96.43%	0%	836.7
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund = Yes	MSCI	30 June 2023	96.43%	0%	5.89%
Gender diversity on the Board (also related to good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Nume ric value (ratio %)	MSCI	30 June 2023	96.43%	0%	20.20%

6) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Co-Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

⁸ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁹
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Nume ric value (ratio %)	MSCI	30 June 2023	96.43%	0%	65.29%

7) Indicators relating to engagement activities

Engagement with investee companies on environmental, social and governance issues as part of interactions with management, engagements following sustainability controversies or other significant events and Thematic engagements with issuers, for example on climate-related topics.

Sustainability Indicator	Units	Data sourc e	Date	Data coverage	Data estimated	Output ¹⁰
Engagement activity: Number of ESG-related engagement activities the Co- Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund.	Number of engagements	Intern al monit oring	30 June 2023	100%	0%	49

⁹ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

¹⁰ This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to a company's impact on biodiversity, including deforestation, water and
Water	8. Emissions to water	waste, were reviewed as part of the investment

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Waste	Hazardous waste and radioactive waste ratio	process and were primarily addressed in a qualitative way, for example through engagement with selected companies.
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Company	Semiconductors & Semiconductor Equipment	8.95%	Taiwan
Samsung Electronics Preference	Technology Hardware & Equipment	5.16%	Korea, Republic of
Naspers	Retailing	4.86%	South Africa
Housing Development Finance	Financial Services	3.50%	India
Grupo Financiero Banorte SAB de	Banks	2.37%	Mexico
Alibaba Group Holding	Retailing	2.27%	China
Axis Bank	Banks	1.86%	India
Qatar National Bank QPSC	Banks	1.86%	Qatar
Samsung SDI	Technology Hardware & Equipment	1.82%	Korea, Republic of
Emirates NBD PJSC	Banks	1.73%	U.A.E.
Reliance Industries	Energy	1.70%	India
Hong Kong Exchanges and Clearing	Financial Services	1.69%	Hong Kong
Banco do Brasil	Banks	1.60%	Brazil
China Resources Land	Equity Real Estate Investment Trusts (REITs)	1.56%	China
China Merchants Bank	Banks	1.51%	China

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

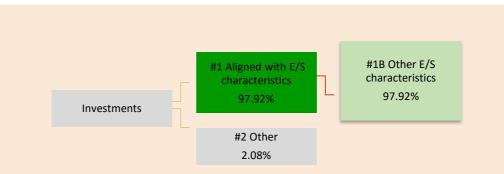

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 97.92% of the Fund was aligned with the E/S characteristics of the Fund, while 2.08% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Banks	21.90%
Retailing	10.98%
Semiconductors & Semiconductor Equipment	10.25%
Technology Hardware & Equipment	8.89%
Capital Goods	5.23%
Financial Services	5.19%
Materials	4.62%
Software & Services	3.68%
Insurance	3.55%
Energy	3.45%
Consumer Services	3.26%
Real Estate	2.85%
Consumer Durables & Apparel	2.17%
Media & Entertainment	1.93%
Automobiles & Components	1.90%
Transportation	1.74%

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

performance.

Food & Staples Retailing	1.64%
Telecommunication Services	1.40%
Utilities	1.35%
Pharmaceuticals & Biotechnology	0.77%
Health Care Equipment & Services	0.74%
Non-sector specific	0.38%
Food Beverage & Tobacco	0.17%

The Global Industry Classification Standard is used to determine economic sectors.

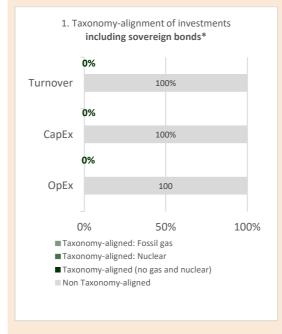

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

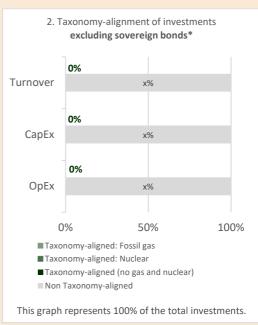

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

		luct invest in fossil gas an EU Taxonomy ¹¹ ?	d / or nu	clear energy related activities
	Yes			
		In fossil gas		In nuclear energy
×	No			

¹¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included cash / cash equivalents and / or certain derivatives for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to carbon intensity

Assessments of carbon intensity of investee companies were conducted quarterly using third-party data. Carbon intensity values were also assessed as part of the stock selection process, ongoing Fund monitoring and to inform engagement.

2) Actions relating to ESG Fund Rating

The Co-Investment Manager assessed ESG Scores as part of the stock selection process, ongoing Fund monitoring, and to inform engagement.

3) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

4) Indicators relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

5) Indicators relating to Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

6) Indicators relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Co-Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator.

This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

7) Indicators relating to engagement activities

The Co-investment Manager engaged with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement

The investment team maintains a record of all their key ESG engagement activities during the year and also upload its engagement activities as Bloomberg notes – as part of GAM general engagement recording process. During the year, there was 49 companies that were engaged with on ESG-related matters.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star European Equity (the "Fund" or "Financial Product")

Legal entity identifier: 549300TME4JJDOP4H631

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC),
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2023	100%	0%	22,619.4
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI	30 June 2023	100%	0%	14.67%
Gender diversity on the Board (also related to good	Weig hted	MSCI	30 June 2023	100%	0%	42.14%

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

|--|

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	100%	0%	82.27%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Sustainability Indicator	Units	Dat a sou rce	Date	Dat a cov era ge	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*.	Number of engagements	Inte rnal Log	1 st July 2022 – 30 th June 2023	100 %	0%	27

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

-Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment

decisions on

relating to

environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

sustainability factors

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country
LVMH Moet Hennessy Louis Vuitton SE	Consumer Durables & Apparel	5.85%	France
Nestle	Food Beverage & Tobacco	5.65%	Switzerland
Novo Nordisk	Pharmaceuticals & Biotechnology	5.05%	Denmark
CaixaBank	Banks	4.07%	Spain
London Stock Exchange Group	Financial Services	3.98%	United Kingdom
National Grid	Utilities	3.76%	United Kingdom
Industria de Diseno Textil	Retailing	3.68%	Spain
Atlas Copco	Capital Goods	3.49%	Sweden
Ashtead Group	Capital Goods	3.39%	United Kingdom
Pernod Ricard	Food Beverage & Tobacco	3.28%	France
FinecoBank Banca Fineco	Banks	3.21%	Italy
ASM International	Semiconductors & Semiconductor Equipment	3.18%	Netherlands
New Linde	Materials	3.15%	United States

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

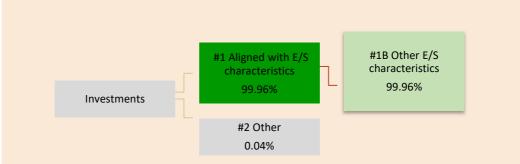

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 99.96% of the Fund attained the environmental and social characteristics promoted by the Fund, while 0.04% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Capital Goods	15.20%
Banks	14.38%
Food Beverage & Tobacco	11.20%
Energy	10.93%
Semiconductors & Semiconductor Equipment	8.85%
Pharmaceuticals & Biotechnology	8.24%
Financial Services	6.28%
Consumer Durables & Apparel	5.85%
Retailing	5.14%
Utilities	3.76%
Materials	3.15%
Transportation	3.05%
Insurance	1.99%
Commercial & Professional Services	0.94%
Health Care Equipment & Services	0.81%
Media & Entertainment	0.30%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional**

activities are
activities for which
low-carbon
alternatives are not
yet available and
among others have
greenhouse gas
emission levels
corresponding to
the best
performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

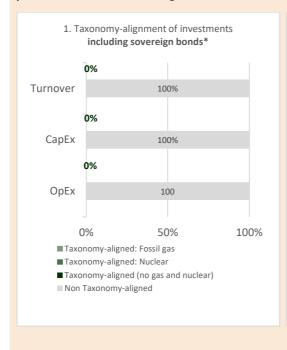

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

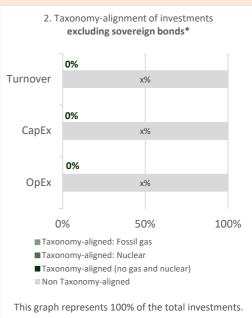

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 27 companies relating to ESG and sustainability concerns or opportunities.

Reference benchmarks are indexes to

measure whether

product attains the environmental or

characteristics that they promote.

social

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

 Not applicable.
 - How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Global Rates (the "Fund") Legal entity identifier: ZVIMWIFXTC2J79D70175

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Did th	Oid this financial product have a sustainable investment objective?							
••		Yes	• •	×	No			
		de sustainable investments with nvironmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		chara while inves	moted Environmental/Social (E/S) acteristics and it did not have as its objective a sustainable tment, it had a proportion of 0% of sustainable tments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
		e sustainable investments with al objective:%			noted E/S characteristics, but did not make any inable investments			

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

- 1) Environmental characteristics a minimum threshold as measured by the Yale Environmental Performance Index (EPI) which assesses factors, including:
 - Climate change (relating to mitigation efforts);
 - Environmental health (including waste management; heavy metals; sanitation and drinking water; air quality);
 - Ecosystem vitality (biodiversity and habitat; ecosystem services; fisheries; acid rain; agriculture; water resources).

More information on the Yale Environmental Performance Index (EPI) can be found on https://epi.yale.edu/

- 2) Social characteristics a minimum threshold as measured by the Freedom House Global Freedom Score, which assesses factors including:
 - Political rights (including electoral process; political pluralism and participation; functioning of government);
 - civil liberties (including freedom of expression and belief; associational and organisational rights; rule of law; personal autonomy and individual rights).

More information on the Freedom House Global Freedom Score can be found on https://freedomhouse.org/

- Social characteristics a minimum threshold as measured by the Social Progress Index, which assess factors including:
 - Health (including nutrition and basic medical care; water and sanitation; shelter; and personal safety);
 - Foundations of wellbeing (including access to basic knowledge; access to information & communications; health & wellness; and environmental quality);
 - Opportunity (including personal rights; personal freedom & choice; inclusiveness; access to advanced education).

More information on the Social Progress Index can be found on https://www.socialprogress.org/

Governance - a minimum threshold as measured by the Financial Action Task Force, which assesses adherence to internationally recognized and approved standards to counter money laundering and terrorist financing at a country level.

More information on the Financial Action Task Force can be found on fatf-gafi.org

Consideration of Principal Adverse Impacts on sustainability factors relevant to sovereigns and supranationals from selected indicators outlined in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the Exclusion Criteria

The Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. There were no breaches of the Exclusion Criteria during the year. No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Environmental Performance Index >= 35: Proportion of investments from countries with an	% of Fund	Yale Environmental Performance Index (EPI)	30 June 2023	100%	0%	100%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 18th August 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ The calculation does not include assets defined under "#2 Other" in the Prospectus. Calculations are performed based on net positive exposure to each sovereign, by combining fixed income and global currency exposures on a re-weighted basis to 100% of the portfolio meaning that net negative currency and sovereign fixed income exposure is not reflected in the data reported. Global currencies are mapped to the relevant sovereign (e.g. BRL currency exposure is mapped to the Brazil sovereign)

Environmental Performance Index >= 35						
Global Freedom Score (Total Score & Status) >= 10: Proportion of investments from countries with a Global Freedom Score (Total Score & Status) >= 10	% of Fund	Freedom House Global Freedom Score	30 June 2023	100%	0%	100%
Social Progress Index Tier < Tier 6: Proportion of investments from countries with a Social Progress Index Tier < Tier 6	% of Fund	Social Progress Index	30 June 2023	100%	0%	100%
Non-FATF compliance: countries that are FATF compliant	% of Fund	Financial Action Task Force	30 June 2023	100%	0%	100%
FATF Watch List: countries on the FATF Watch List	% of Fund	Financial Action Task Force	30 June 2023	100%	0%	0%

2) Indicators relating to Principal Adverse Impacts

The Fund takes into account principal adverse impacts (PAIs), as detailed in Table 1, and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The Fund's performance against the following PAI indicators are reported quantitatively.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output
GHG Intensity: weighted average GHG intensity of investee countries	t/EUR millio n	MSCI	30 June 2023	95.05%	0%	397.41
Investee countries subject to social violations: Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law.	% of Fund	MSCI	30 June 2023	95.05%	0%	0%

Average political stability score: assessment of the stability and peace in a region looking at political stability and the absence of violence / terrorism and the global peace index. Scores range between 0 and 10. Lower scores indicates high political instability, violence and conflict.	Nume ric value (scor e)	MSCI	30 June 2023	100%	0%	7.63
Average corruption score: a measure of the degree to which public sector corruption is perceived to exist in different countries around the world. Scores range between 0 and 100. Countries with lower score are perceived to be more corrupt.	Nume ric value (scor e)	MSCI	30 June 2023	95.05%	0%	68.95

...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the principal adverse impacts (PAIs), as detailed in Table 1 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

An assessment of the PAI indicators was conducted quarterly between the Investment Team and Governance and Responsible Investment team within GAM. The indicators are assessed against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Adverse susta	ainability indicator	Actions
		Table 1
Environmental	15. GHG Intensity	A range of indicators in relation to country-level GHG emissions and GHG intensity are embedded into the EPI Index (including projected GHG emissions in 2050; CO2 Growth Rate; CH4 Growth Rate; CO2 from Land Cover; GHG Intensity Trend; F-Gas Growth Rate; Black Carbon Growth Rate; GHG Emissions per Capita; and N2O Growth Rate). These indicators contribute to the EPI score for each country which is used in the selection of eligible countries for the Financial Product.
		In addition, investments were monitored against a set of internally developed thresholds constructed to flag excessive GHG Intensity levels. No investments were flagged during the year.
Social	16. Investee countries subject to social violations	A range of issues in relation to potential social violations are embedded in the Freedom House Global Freedom Score (including safeguards against corruption; protection of civil liberties; equity of opportunity; freedom from economic exploitation; rule of law).
		In addition, investments were monitored against a set of internally developed thresholds constructed to flag material instances of countries subject to social violations. No investments were flagged during the year.
		Table 3
Governance	21. Average corruption score	Corruption is integrated within the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

		In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's corruption score is deemed to be excessively low.
Governance	23. Average political stability score	Political stability is integrated with the Freedom House Global Freedom Score. Sovereign issuers that receive a "Not Free" score on the Freedom House Global Freedom Score are not eligible for investment. Supranational institutions, such as the World Bank, the United Nations, a regional development bank or another body with robust and transparent sustainability safeguards are considered based on the issuing entity.
		In addition, investments were monitored against a set of internally developed thresholds constructed to flag instances where a country's political score is deemed to be excessively low.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country
JPY - Japanese Yen		26.97%	Japan
NOK - Norwegian Krone		24.80%	Norway
BRL - Brazilian Real		18.11%	Brazil
CAD - Canadian Dollar		13.78%	Canada
USD - United States Dollar		11.81%	United States of America
EUR - Euro		4.52%	European Union

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The largest investments are calculated on the basis of reweighted net positive currency exposure.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

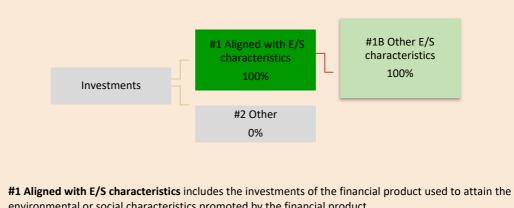

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, , e.g. relevant for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets are aligned with the environmental and social characteristics of the Fund since all investments, including cash and currency allocations, are subject to country-level binding elements of the investment strategy to promote environmental and social characteristics. During the period, investments aligned with E/S characteristics remained at 100% as all investments, including cash, are aligned with these characteristics.

environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or

In which economic sectors were the investments made?

Sector	Allocation
Sovereign	100%

The Fund invested in government bonds, cash, interest rate swaps, interest rates options, interest rate futures, and forward foreign exchange contracts during the year. We disclosure asset type rather than sector as this is most relevant to the Fund.

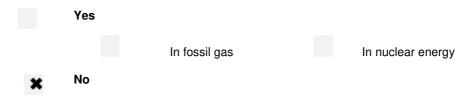

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

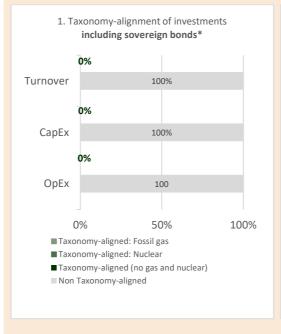

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

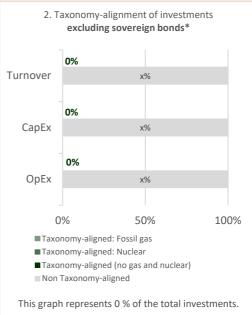

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁵?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the Exclusion Criteria

The Exclusion Criteria are programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers, NGO sources and recognised third party sources. These data sources and outputs are reviewed and/or updated at least quarterly. There were no breaches of the Exclusion Criteria during the year.

2) Indicators relating to Principal Adverse Impacts

The indicators are assessed quarterly against a set of internally developed thresholds, constructed to flag where investments may be involved in material adverse impacts and prioritise appropriate action.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Japan Leaders (the "Fund" or "Financial Product")

Legal entity identifier: 549300WSXYGYCMCU1B08

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable investments with It promoted Environmental/Social (E/S) characteristics and an environmental objective: % while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable in economic activities that investments qualify as environmentally sustainable under the EU with an environmental objective in economic Taxonomy activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in economic sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with It promoted E/S characteristics, but did not make any sustainable investments a social objective: %

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC).
- Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

list of socially

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	100%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 24th July 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here. More information about Sustainalytics coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	100%	0%	0%

2) Indicators relating to international norms and standards

Investee companies are expected to adhere to minimum international norms and standards as defined by the UN Global Compact (as defined in the Prospectus). Investee companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁵
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI	30 June 2023	100%	0%	0%

3) Indicators relating to Principal Adverse Impacts

The Investment Manager applied an internal framework to consider and, where considered appropriate, take action to mitigate principal adverse impacts on sustainability factors.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁶
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent	tons CO2 equiv alent	MSCI	30 June 2023	100%	0%	3,928.8

⁵ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. We use MSCI data to determine adherence to the UN Global Compact. For this data point, we are specifically looking at whether a company is deemed to 'Fail' adhering to the underlying principles. More information on MSCI's approach can be found https://example.com/here/.

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. The was calculated using MSCl's 'SFDR Point-in-Time PASI Statement'. More information on MSCl's approach to Principal Adverse Impacts can be found here.

|--|

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Weig hted avera ge %	MSCI	30 June 2023	100%	0%	44.21%

5) Indicators relating to engagement activities

The investment strategy includes engagement activities with investee companies on environmental, social and governance issues as part of interactions with management, including engagements following sustainability controversies, PAI review and/or thematic engagement.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Sustainability Indicator	Units	Data sourc e	Date	Data cover age	Data estimated	Output ⁸
Engagement activity: Number of ESG-related engagement activities the Investment Manager was involved in as part of regular interactions with management, such as engagements following sustainability controversies and thematic engagement relating to the Fund*. ...and compared to previous periods?

N/A. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration			
	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example			
Greenhouse gas emissions	Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector	through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investeee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.			
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	Indicators in relation to an investee company's impact on biodiversity, including deforestation,			
Water Waste	8. Emissions to water 9. Hazardous waste and radioactive waste ratio	water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.			
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.			

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Sumitomo Mitsui Trust Holdings	Banks	3.97%	Japan
Recruit Holdings	Commercial & Professional Services	3.94%	Japan
Sysmex	Health Care Equipment & Services	3.93%	Japan

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

N/A. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

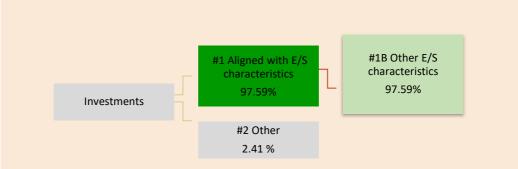

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 97.59% of the Fund attained the environmental and social characteristics promoted by the Fund, while 2.41% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Capital Goods	23.36%
Automobiles & Components	12.14%
Household & Personal Products	11.63%
Health Care Equipment & Services	11.46%
Financial Services	4.11%
Semiconductors & Semiconductor Equipment	4.10%
Consumer Durables & Apparel	4.06%
Materials	4.04%
Banks	3.97%
Commercial & Professional Services	3.94%
Software & Services	3.78%
Media & Entertainment	3.77%
Technology Hardware & Equipment	3.75%
Retailing	3.67%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

the best

performance.

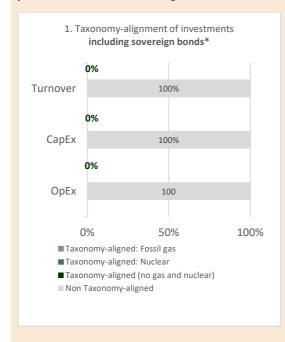

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

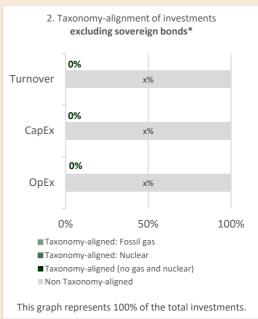

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" invvestments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 15 companies relating to ESG and sustainability concerns or opportunities.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star MBS Total Return (the "Fund") Legal entity identifier: 549300E84U4YLAZL9Y55

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

	It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective						
	t made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments						

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Given the unique structure of these securities, and absence of a prescribed asset class specific approach to such securities within the SFDR framework, this Fund promotes environmental and social characteristics at the issuer level and/or at the level of the parent company of the issuer (hereinafter referred to collectively as "Issuer"), rather than at the level of the underlying assets.

The Fund promoted the following environmental and social characteristics at the issuer level:

- Exclusion of securities from Issuers that are assessed as R(ed) as part of the internal MBS Sustainability Due Diligence framework as detailed in the GAM Star Fund Plc Prospectus (the "Prospectus"). This framework incorporates an assessment of sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anticompetitive practices, violation of international standards, predatory lending, among others),
- 2) Exclusion of securities from Issuers involved in specific activities considered to cause negative environmental and social impact, and
- 3) Assessed adherence to generally accepted international norms and standards, as set by the United Nations Global Compact ("UNGC").

The environmental and social characteristics were promoted in line with the binding elements of the Investment Strategy of the Fund, as outlined in the the Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to the MBS Sustainability Due Diligence

The internal MBS Sustainability Due Diligence is an internal assessment applied at the Issuer level and uses a flagging approach to assess entities flagged in very severe risk incidents relating to sustainability issues that are considered most relevant to the MBS/ABS asset class. The due diligence process uses third-party ESG data (RepRisk), and internal qualitative analysis and is applied to all securities in the Fund. This framework incorporates an assessment of 'very severe risk incidents' for material sustainability issues (including corruption, bribery, money laundering, executive compensation issues, fraud, tax evasion, anti-competitive practices, violation of international standards, and predatory lending, among others).

R(ed) Issuers are associated with severe incidents related to the sustainability issues outlined in the Prospectus and where insufficient actions have been taken to address the issue. These issuers may have also been involved in breaches of the Sustainability Exclusions Criteria and/or the UN Global Compact and insufficient actions have been taken to address these issues.

A(mber) issuers are associated with very severe incidents related to the sustainability issues outlined in the Prospectus, but material actions have been taken to address the issue. These issuers may also have been involved in a serious breach of the UN Global Compact but material actions have been taken to address the issue.

G(reen) issuers have not been flagged for 'very severe' sustainability risk incidents related to sustainability issues outlined in the Prospectus, involvement in the ineligible activities under the Sustainability Exclusion Criteria or serious breaches of the United Nations Global Compact.

The proportion of the fund invested in securities issued by R(ed) or A(mber) issuers is shown in the following table.

Sustainability Indicator	Units	Data source ¹	Date ²	Data coverage ²	Data estimated ⁴	Output ⁵

Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 25% revenue threshold).		MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2023	95 %	0 %	0 %

⁶ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

"Not Free" Sovereign issuers: share of investments in sovereign issuances from countries which have been assessed as "Not	N/A	30 June 2023	0 %	0 %	0 %

3) <u>Indicators relating to international norms and standards</u>

Issuers are expected to adhere to minimum international norms and standards as defined by the UN Global Compact. Issuers assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. This assessment is conducted at the issuer level and reported as % of the Fund's investment issued by entities failing the criteria.

No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments issued by entities that have been involved in violations of the UNGC principles.	% of Fund	MBS Sustainability Due Diligence RepRisk, MSCI	30 June 2023	95 %	0 %	0 %

...and compared to previous periods?

Not applicable. The Fund is not required to report against previous periodic reports until 2024 onwards.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Not applicable.

⁷ Calculated as the proportion of investment (by NAV). The calculation does not include assets defined under "#2 Other" in the Prospectus.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Non sovereign Issuers

Advers	e sustainability indicator	Fund Considerations
Table 1		
Social & Employee Matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Issuers with any violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises were excluded from investment.
	14. Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)	Issuers with exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons, and biological weapons) were excluded from investment
	Tab	
Social and employee matters	7. Incidents of discrimination	Considered if Issuer's actions in this area leads to a UNGC violation.
Human Rights	12. Operations and suppliers at significant risk of incidents of child labour 13. Operations and suppliers at significant risk of incidents of forced or compulsory labour 14. Number of identified cases of severe human rights issues and incidents	Considered if Issuer's actions in this area leads to a UNGC violation.
Anti- corruption and anti- bribery	16. Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery	Considered if Issuer's actions in this area leads to a UNGC violation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

17. Number of convictions and amount of fines for violations of anti-corruption and antibribery laws	Anti-corruption and anti-bribery are assessed as part of the MBS Sustainability Due Diligence

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

What was the proportion of sustainability-related investments?

Not applicable. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

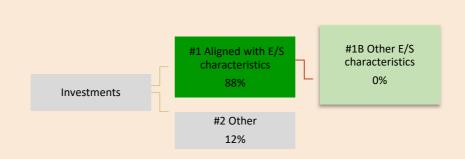

What was the asset allocation?

The Co-Investment Manager targets a minimum of 70% (or above) of the net asset value of the Fund to be to be aligned with environmental/social characteristics promoted by the Fund. The Fund does not commit to holding sustainable investments. As at 30 June 2023, 88% of the net asset value of the Fund was aligned with the E/S characteristics promoted by the Fund, and 12% was allocated to investments categorised as "#2 Other" per the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector (NACE)	Allocation
Financial service activities, except insurance and pension funding	83.60%
Real estate activities	2.30%
Activities auxiliary to financial services and insurance activities	2.00%
Not Covered	12.10%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁸?

	Yes		
		In fossil gas	In nuclear energy
×	No		

⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

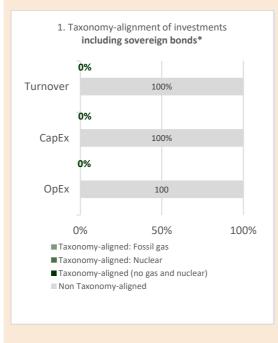

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

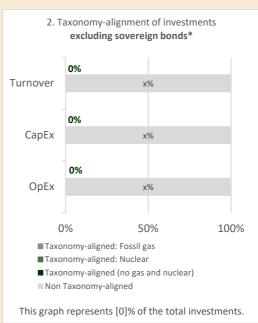

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

the best

performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments under #2 Other includes cash and certain derivatives, Issuers assessed as A(mber) as part of the MBS Sustainability Due Diligence process, and Issuers where there is a lack of sustainability data coverage. We do not deem an assessment of minimum environmental and social safeguards to be relevant for cash by nature of the asset class, nor derivatives where full look through is not possible. The Co-Investment Manager continuously seeks to engage with data providers to improve coverage. A(mber) Issuers are monitored on an ongoing basis and the Co-Investment Manager engaged with these Issuers to remediate the incident and prevent further harm.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1) Actions relating to the MBS Due Diligence

The MBS Sustainability Due Diligence framework was applied at the Issuer level. The framework incorporates an assessment of "very severe risk incidents" relating to material sustainability issues, which are considered most relevant to the MBS, ABS, or other debt security issued. An assessment of good governance at the Issuer level is integrated into the framework.

We updated the MBS Sustainability Due Diligence assessment on a quarterly basis, and used third-party ESG data, company reports, and other sources as appropriate. The due diligence was reviewed by the investment manager and internal oversight committee.

2) Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

3) Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis. The Co-Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?

 Not applicable.
- How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Star Disruptive Growth (the "Fund" or "Financial Product")

Legal entity identifier: 549300I3EICUYP4RZ214

Environmental and/or social characteristics

Did this financial product have a sustainable	investment objective?
Yes	● No
in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- 1) Exclusion of companies involved in specific activities considered to cause negative environmental and/or social impact, as described in the Sustainability Exclusion Criteria detailed in the Fund Prospectus (the "Prospectus").,
- 2) Assessed adherence to generally accepted international norms and standards set by the United Nations Global Compact (UNGC).
- 3) Consideration of Principal Adverse Impacts ("PAIs") on sustainability factors as detailed in Table 1 of Annex I of the Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"),
- 4) Investments in companies assessed to follow good governance practices, and
- 5) Engagement with investee companies on environmental, social and governance issues as described in the Prospectus.

The environmental and social characteristics were promoted in line with the binding elements of the investment strategy of the Fund, as outlined in the Prospectus. There were no breaches of the exclusion criteria.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially

Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

economic activities.

sustainable

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the environmental and/or social characteristics of the Fund.

1) Indicators relating to Sustainability Exclusion Criteria

Involvement in the following activities, beyond the revenue threshold specified, result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). No exceptions were made during the reporting period.

Sustainability Indicator	Units	Data source	Date ¹	Data coverage ²	Data estimated ³	Output ⁴
Involvement in controversial weapons: share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	MSCI	30 June 2023	96.09%	0%	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	96.09%	0%	0%

¹ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 24th July 2023.

² Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. Where there is less than 100% coverage, this would be due to the third party provider not covering the issuer. We engage with service providers and companies directly with the objective of increasing data coverage and disclosure. More information about MSCI's coverage can be found here.

³ Calculated as the proportion of investments (by NAV) for which data is estimated. The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus. MSCI data methodology can be found here. Information on Sustainalytics product involvement can be found here.

⁴ Calculated as the proportion of investment (by NAV). The calculation does not include non-equity assets defined under "#2 Other" in the Prospectus.

Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 10% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	96.09%	0%	0%
Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	96.09%	0%	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	96.09%	0%	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 25% revenue threshold).	% of Fund	Sustainalytics	30 June 2023	96.09%	0%	0%

governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	avera ge %			

4) Indicators relating to good governance

The investment strategy incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. In addition, the assessment is conducted on an ongoing basis to inform voting decisions and engagement activity.

Sustainability Indicator	Units	Data source	Date	Data coverage	Data estimated	Output ⁷
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. Not applicable.

⁸This output is the total number of companies that the Investment Team engaged with that were held in the portfolio as at 30th June 2023. The Investment Team may have engaged with companies i) on more than one occasion, ii) for pre-investment due diligence, iii) throughout the reporting period which were sold prior to the 30th June 2023 and therefore will not be reflected here. There could also be cases when companies within the portfolio were engaged with by other investments teams that are part of GAM Holding AG where there is a cross-holding, these are also not reflected in this output.

^{*}GAM's definition of engagement can be found in our Engagement Policy on our website.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with the provisions of the Prospectus, the Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

The actions taken in relation to the PAI indicators considered are summarised in the table below:

Indicators applicable to investments in investee companies

Adverse sust	ainability indicator	Fund consideration		
Greenhouse gas emissions	1. GHG emissions 2. Carbon footprint 3. GHG Intensity of investee companies 4. Exposure to companies active in the fossil fuel sector 5. Share of non-renewable energy consumption and production 6. Energy consumption intensity per high impact climate sector	A range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected investee companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Investee companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.		
Biodiversity Water	Activities negatively affecting biodiversity-sensitive areas Emissions to water	Indicators in relation to an investee company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the		
Waste	Hazardous waste and radioactive waste ratio	investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies.		
Social and employee matters	10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises 11. Lack of processes and compliance mechanisms to monitor compliance with UNGC priniples and OECD Guidelines for Multinational Enterprises 12. Unadjusted gender pay gap 13. Board gender diversity 14. Exposure to controversial weapons (anti- personnel mines, cluster munitions, chemical weapons and biological weapons)	A range of PAI indicators were reviewed as part of the investment process. Investee companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.		

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30 June 2023

Largest Investments	Sector	% Assets	Country
Microsoft	Software & Services	9.30%	United States
Apphabet Inc om. A	Media & Entertainment	7.66%	United States
Intuitive Surgical	Health Care Equipment & Services	4.16%	United States
Afiniti International Class C Pref.	Consumer Durables & Apparel	3.88%	United States
NVIDIA	Semiconductors & Semiconductor Equipment	3.77%	United States
Coinbase Global	Financial Services	3.62%	United States
Netflix	Media & Entertainment	3.51%	United States
Li Auto	Automobiles & Components	2.95%	China
Airbnb	Consumer Services	2.94%	United States
Salesforce	Software & Services	2.92%	United States
Marvell Technology	Semiconductors & Semiconductor Equipment	2.89%	United States
Microstrategy	Software & Services	2.88%	United States

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period.

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

Not applicable. Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period is provided below.

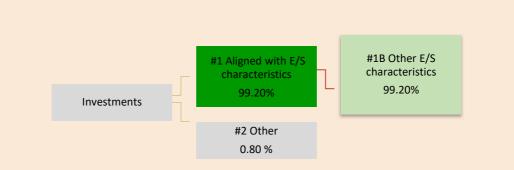

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, , e.g.
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

What was the asset allocation?

All assets excluding cash/cash equivalent instruments and/or certain derivatives are aligned with environmental/social characteristics of the Fund. As at 30 June 2023 (snapshot at year-end), 99.20% of the Fund attained the environmental and social characteristics promoted by the Fund, while 0.80% was in assets categorised as #2 Other in accordance with the Prospectus. Further details in relation to such assets is set out in the section entitled "What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?" below.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Allocation
Software & Services	31.99%
Media & Entertainment	12.70%
Semiconductors & Semiconductor Equipment	11.08%
Health Care Equipment & Services	8.99%
Consumer Services	5.67%
Technology Hardware & Equipment	4.89%
Automobiles & Components	4.56%
Consumer Durables & Apparel	3.88%
Financial Services	3.65%
Transportation	3.47%
Commercial & Professional Services	2.83%
Capital Goods	1.90%
Retailing	1.54%
Pharmaceuticals & Biotechnology	1.10%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

the best

performance.

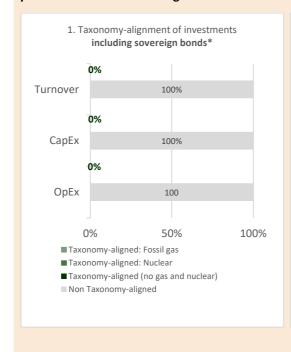

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

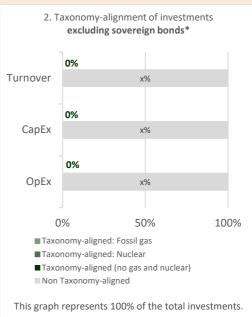

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in a minimum level of "sustainable investments" within the meaning of the SFDR and it does not currently commit to a minimum level of investments taking into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation. As such, any investments that contribute to environmentally sustainable economic activities for the purposes of the Taxonomy Regulation, including investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy, are held on an incidental basis and is currently estimated to be <10% based on available data.

Did the financial product invest in fossil gas and / or nuclear energy related activities that comply with the EU Taxonomy⁹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Other" investments of the Fund included [cash / cash equivalents and / or certain derivatives] for liquidity and efficient management of the Fund. An assessment of minimum environmental and social safeguards is deemed not to be relevant for cash and cash equivalents by nature of the asset class, nor derivatives where full look through is not possible.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

1. Actions relating to Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were assessed, on a best-efforts basis, as part of investment controlling, using Sustainalytics. There were no breaches of the Sustainability Exclusion Criteria during the reporting period

2. Actions relating to international norms and standards

UN Global Compact compliance was assessed, on a best-efforts basis, as part of investment controlling. The Investment Manager used third-party data providers' frameworks and data to categorise serious breaches, which were intended to identify credible allegations of a violation of global norms, supplemented by internal research where third-party data coverage was unavailable. There were no breaches of the UN Global Compact compliance during the period.

3. Actions relating to Principal Adverse Impacts on sustainability factors

The Fund considered principal adverse impacts (PAIs) on sustainability factors, as detailed in Table 1 and selected indicators from Tables 2 and/or 3 of Annex I of the SFDR Delegated Act, in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data.

Greenhouse gas emissions and involvement in fossil fuel sector – a range of indicators in relation to company GHG emissions and carbon emission reduction initiatives (including Scope 1 & Scope 2 GHG emissions among others) were reviewed as part of the investment process, and were primarily addressed in a qualitative way, for example through engagement with selected companies on reduction targets and initiatives or voting on resolutions to support greater transparency on climate-related risks. Companies assessed to derive over 25% of revenue from thermal coal mining or electricity generation from thermal coal were excluded from the Fund.

Biodiversity, water & waste – indicators in relation to a company's impact on biodiversity, including deforestation, water and waste, were reviewed as part of the investment process and were primarily addressed in a qualitative way, for example through engagement with selected companies

Social and employee matters – a range of PAI indicators were reviewed as part of the investment process. Companies assessed as severely violating UN Global Compact principles or assessed as having exposure to controversial weapons are excluded from the Fund. Board gender diversity was considered primarily within engagement and voting decisions.

4. Actions relating to good governance

The investment Manager incorporated a principles-based approach when assessing good governance. The assessment informed investment decisions and was used by the Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund. In addition, the assessment was conducted on an ongoing basis to inform voting decisions and engagement activity. This included consideration of board structure and independence, alignment of remuneration, transparency of ownership and control, audit and accounting. Good governance was assessed in a qualitative and/or quantitative way dependent on the relevance of the specific indicator. This included:

- Sound management structures including Board independence, Board diversity and audit committee independence
- Employee relations in particular any serious breaches of UN Global Compact principles are excluded
- Remuneration of staff
- Tax compliance in particular any companies flagged for significant tax violations

In addition, good governance was supported by ensuring companies adhere to minimum standards as defined by the ten principles of the United Nations Global Compact, which cover anti-corruption (Principle 10) and labour rights (Principles 3-6) and well as environmental governance (Principles 7-9).

5. Actions relating to engagement

Engagement was made on behalf of the Fund with investee companies on environmental, social and governance issues in line with their investment and due diligence process. Throughout the 12 month period, from 01/07/2022 to 30/06/2023, the investment team engaged with 7 companies relating to ESG and sustainability concerns or opportunities.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance
practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: GAM Sustainable Climate Bond (the "Fund")

Legal entity identifier: 5493007KJSYSWBPW5518

Sustainable investment objective

Did t	his financial product have a sustainable	investment objective?
••	★ Yes	No No
×	in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
¥	It made sustainable investments with a social objective: 2.6%	It promoted E/S characteristics, but did not make any sustainable investments

All data presented in the annex which follows has been calculated based on the portfolio holdings of the Fund as at 30 June 2023 and constitutes unaudited information which has not been subject to any assurance provided by the Auditors or any third party.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Fund is to contribute to the environmental objectives of climate change mitigation/climate change adaptation. 81.4% of the Fund invested in climate change mitigation and climate change adaptation projects.¹

¹Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency.

The Fund achieved its investment objective through investment principally in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds) that contributed to positive environmental or social impact issued by companies in the financial sector which aimed to generate environmental and/or social impact alongside a financial return. A range of green projects were financed including projects for renewable energy production; green buildings; sustainable transport; water and waste management; eco-efficient and circular economy solutions; and such other environmental projects that Atlanticomnium SA (the "Delegate Investment Manager") determined as relevant. There were also social projects as a result of investment in Sustainability and/or Social bonds. The Fund is invested in green bonds at 83% and sustainability bonds at 17%.

The sustainable objective was targeted in line with the binding elements of the investment strategy of the Fund, as outlined in the Fund's Prospectus, and there were no breaches of the exclusion criteria or significant adverse impacts during the year.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The following sustainability indicators are used to measure the attainment of the sustainable investment objectives of the Fund. The coverage excludes assets classified as "#Not sustainable".

1) Indicators relating to climate change mitigation/climate change adaptation

The following indicators relate to the environmental objective of the Fund, which is achieved through the investment in Green Bonds (or Sustainability Bonds, Social Bonds, and Transition Bonds).

Sustainability Indicator	Units	Source	Date ²	Cove rage ³	Proportio n of data estimated	Output
Alignment with ICMA Green Bond Principles, Sustainability Bond Guidelines and/ Social Bond Principles, or equivalent: proportion of investments aligned to these principles.	% of Fund	Bloomberg ⁵	30 June 2023	100%	NA	83% of the Fund in green bonds, 17% in sustainabilit y bonds
Alignment with EU Taxonomy: proportion of sustainable investments with an environmental objective that is aligned with the EU Taxonomy.	% of Fund	Internal Analysis ⁶	30 June 2023	100%	NA	25.6%
Type of project: split by green and/social activity aligned with ICMA principles or equivalent	Categor y	Internal Analysis ⁵	30 June 2023	100%	NA	See chart below

³ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

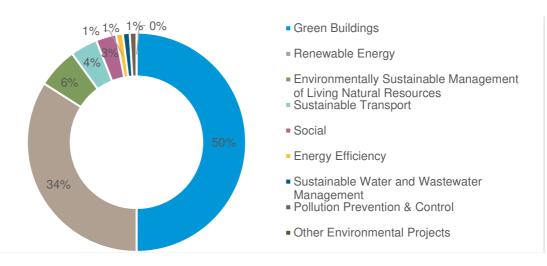

² Data snapshot taken at the Fund's year end.

⁴ Calculated as the proportion of investments (by NAV) for which data is available. The calculation does not include assets defined under "#2 Other" in the Prospectus.

⁵ Data snapshot taken at the Fund's year end (30 June 2023). Bloomberg Data (Bloomberg classifications) accessed on 7th August 2023.

⁶ Data snapshot taken at the Fund's year end (30 June 2023). Internal analysis was carried out by the Designated Investment Manager.

CO ₂ Emissions Avoided: avoided emissions from projects financed	tCO ₂ e	Carbon4 Finance, Internal Analysis ⁷	30 June 2023	63%	7%	778
MW/MWh of renewable capacity installed/generated: renewable energy capacity from projects financed	MWh	Carbon4 Finance, Internal Analysis ⁵	30 June 2023	63%	7%	1649
M ² of green buildings financed/refurbished: square meters of green buildings financed and renovated	M ²	Carbon4 Finance, Internal Analysis ⁵	30 June 2023	63%	7%	Financed: 965m ² Refurbishe d: 987m ²

The projects were selected based on the green bond assessment framework that is designed to identify green bonds and other 'impact' bonds that will deliver meaningful impact. The Delegate Investment Manager's framework recognizes the ICMA Green Bond Principles (June 2021) and builds on an approach consistent with our investment philosophy – bottom-up research-intensive and adding value through engagement.

The Fund (excluding cash & others of c9%), is mainly invested in green bonds (83%) and sustainability bonds (17%). This reflects the objective of the Fund to generate a positive environmental impact by investing in labelled bonds and providing visibility on the 'use of proceeds' and key metrics associated with these bonds. Over the year, there has been an increase in sustainability bonds in the Fund, as a result of both new issuers being added to the Fund (for example ANZ who issue mainly in sustainability format) and new issues coming in sustainability format as well as green format. The largest categories financed are Green Buildings (50%) and Renewable Energy (34%). Through the investment in sustainability bonds, 3% of proceeds relate to projects with a positive social impact. The project breakdown is based on the portfolio holdings as at 30.06.2023 and based on Delegate Investment Manager's internal data and company documents.

⁷ Data snapshot taken at the Fund's year end (30 June 2023), using data provided by Carbon4Finance for end 2022 analysis. Data is based on 70% of holdings (excluding cash). 63% of the data covered is based on Carbon4Finance average whereas for 7% coverage the data was estimated based on the project types and data from the same issuers. 30% of the portfolio includes new issuers that were not covered in the end December 2022 holdings analysed by Carbon4Finance and hence not able to be included in this report. Where several green bonds from the same issuer are allocated to the same pool of projects, data was extrapolated from other bonds of the same issuer where possible.

2) Indicators relating to Sustainability Exclusion Criteria at issuer level

Involvement by the issuer in the following activities, beyond the revenue threshold specified, would result in the investment being ineligible (other than where outlined in the GAM Sustainability Exclusions Policy). The following exclusion criteria strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria).

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Involvement in controversial weapons (also related to Principal Adverse Impacts): share of investments in investee companies involved in the manufacture or selling of controversial weapons.	% of Fund	Sustainalytics, MSCI ⁸	30 June 2023	100%	NA	0%
Involvement in weapons manufacturing or weapons component manufacturing: share of investments in investee companies involved in the manufacture of military weapons systems, and/or tailor-made components of these weapons systems, and/or tailor-made products or services that support military weapons systems (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in assault weapons for civilian customers: share of investments in investee companies involved in the manufacture and sale of assault weapons to civilian customers (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%

 $^{^{8}}$ Data snapshot taken at the Fund's year end. Sustainalytics and MSCI data as at 24 $^{\rm th}$ July 2023.

Involvement in tobacco manufacturing: share of investments in investee companies involved in the manufacture of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in tobacco retail and distribution: share of investments in investee companies involved in the distribution and/or retail sale of tobacco products (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in oil sands extraction: share of investments in companies involved in oil sands extraction (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in thermal coal: Share of investments in companies involved in mining thermal coal or from generating electricity from thermal coal (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%

Involvement in alcohol (production): share of investments in companies involved in production of alcoholic beverages as well as the supply of alcohol-related products and or services (above 5% revenue threshold). Involvement in alcohol (retail): share of investments in companies	% of Fund % of Fund	Sustainalytics ⁷ Sustainalytics ⁷	30 June 2023 30 June 2023	97%	NA NA	0%
involved in retail sales of alcoholic beverages or alcohol- related products (above 10% revenue threshold)						
Involvement in nuclear energy: share of investments in companies involved in the production of nuclear power, the manufacture and supply of essential components for nuclear power plants, and uranium mining (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in adult entertainment production and distribution: share of investments in investee companies involved in the production of adult entertainment and/or owns/operates adult entertainment establishments, or are involved in the distribution of adult entertainment materials (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%
Involvement in shale energy extraction: share of investments in companies involved in shale energy extraction (above 5% revenue threshold).	% of Fund	Sustainalytics ⁷	30 June 2023	97%	NA	0%

Involvement in arctic oil & gas exploration extraction: share of investments in companies involved in arctic oil and gas exploration (above 5% revenue	% of Fund	Sustainalytics ⁷	30 June 2023	100%	NA	0%
exploration (above 5% revenue threshold).						

3) Indicators relating to international norms and standards at issuer level

Companies are expected to adhere to minimum international norms and standards as defined by the United Nations Global Compact (the "UN Global Compact"). Companies assessed as having seriously breached the UN Global Compact are excluded, unless the issuer is considered to have taken substantial and adequate steps to have addressed the allegations. UN Global Compact adherence strengthens the avoidance of significant harm to other sustainability factors ("DNSH" criteria) and alignment with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Violations of UN Global Compact principles (also related to Principal Adverse Impacts): share of investments in investee companies that have been involved in violations of the UNGC principles.	% of Fund	MSCI ⁹	30 June 2023	100%	NA	0%

4) Indicators relating to Principal Adverse Impacts at issuer level

The following indicators for adverse impacts, from Tables 1 of Annex I of Commission Delegated Regulation (EU) 2022/ 1288 (the "SFDR Delegated Act"), are reported as a minimum. This list may be expanded over time. These indicators are reported for the issuers of green, sustainability and/or social bonds and thus not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Scope 1 & Scope 2 Greenhouse gas (GHG) emissions: Absolute greenhouse gas emissions associated with a portfolio, expressed in tons CO2 equivalent.	tCO2e	MSCI 10	30 June 2023	100%	NA	12
Investments in companies active in fossil fuel sector: share of investments in companies active in the fossil fuel sector.	% of Fund	MSCI ⁹	30 June 2023	100%	NA	0%

⁹ Data snapshot taken at the Fund's year end. MSCI data as at 24th July 2023.

¹⁰ Data snapshot taken at the Fund's year end. MSCI data as at 24th July 2023.

Gender diversity on the Board (also included in good governance): percentage of board members who are female. For companies with a two-tier board, the calculation is based on members of the	Numeric value (ratio %)	MSCI ⁹	30 June 2023	100%	NA	42%
Supervisory Board only.						

Based on the values of the three principal adverse impact indicators in the table above, we consider the portfolio holdings meet the 'do no significant harm' provision. These values are collected and will be compared with next year's Fund data for a year-on-year comparison. The absolute emissions at Scope 1 and 2 are relatively low due to the Fund's focus on the financial sector. The gender diversity on the boards of the Fund's investee companies is more than 1.5 times higher than the average of 25% (based on OECD¹¹ report on 50 jurisdictions)

5) Indicators relating to good governance at issuer level

The investment strategy of the Fund incorporates a principles-based approach when assessing good governance. The assessment informs investment decisions and is used by the Delegate Investment Manager to satisfy itself that good governance practices are in place when selecting investments for the Fund. This assessment is at the issuer level and not at the bond/project level.

Sustainability Indicator	Units	Source	Date	Coverage	Proportion of data estimated	Output
Board independence: the percentage of board members that meet GAM's criteria for independent management, as measured by a third-party data provider. For companies with a two-tier board, the calculation is based on members of the Supervisory Board only.	Numeric value (ratio %)	MSCI ⁹	30 June 2023	100%	NA	87%

...and compared to previous periods?

Not applicable as no previous periodic report, in accordance with Section 2 of Clapter V of the Commission Delegated Regulation (EU) 2022/1288, was required to be published by the Fund.

¹¹ ENHANCING GENDER DIVERSITY ON BOARDS AND IN SENIOR MANAGEMENT OF LISTED COMPANIES © OECD 2022

The Delegate Investment Manager's internal Green Bond Assessment Framework ("the Framework") considers 'do no significant harm' as a minimum criteria in the context of projects financed by the Green, Sustainability Bonds, Social Bonds, and Transition Bonds invested at the green bond and issuer level. These processes are intended to mitigate the risk that that investments in the Fund are not in contradiction with the sustainable investment objectives.

An analysis of each issuing entity's ESG profile was performed to avoid issuers contributing to significant harm. The analysis of an issuer's ESG credentials included consideration and monitoring of the principal adverse impacts (PAIs), as detailed in Table 1 of Annex 1 of the SFDR Delegated Act and in some cases involved consideration of those in Tables 2 and 3. This was done both with an in-depth analysis of the indicators and on an ongoing basis through the monitoring of controversies.

The Sustainability Exclusion Criteria and assessed adherence to the UN Global Compact detailed principles strengthened the avoidance of harmful impacts through the avoidance of certain sectors and activities.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The Delegate Investment Manager engaged with issuers on strengthening transparency around taxonomy and 'do no significant harm' requirements, within their green, sustainable, social and/or transition bond frameworks and post-issuance reporting.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund considered the indicators for principal adverse impacts on sustainability factors, within the ESG scoring framework and Sustainability Exclusion Criteria at the issuer level, and within the overall impact of the green, social and /or transition projects financed.

For issuer-level ESG quality, the particular focus was on climate impact, employee issues, governance and other PAIs, as detailed in Table 1 of Annex 1 of the SFDR Delegated Act. These were taken into account within the Framework used by the Delegate Investment Manager.

The Fund applied Sustainability Exclusion Criteria and exclusions relating to UN Global Compact violations to restrict investment into issuers whose conduct may result in negative impacts on sustainability factors.

At the green bond level, the Framework included an analysis of the governance and processes surrounding the selection of green projects by the issuer. This included an analysis of processes in place to assess and mitigate potential harmful impact on sustainability factors.

The specific PAIs considered are disclosed in the table below in response to question "How did this financial product consider principal adverse impacts on sustainability factors?".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund was aligned with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

This was achieved through the exclusion of issuers involved in serious violation of the UN Global Compact and other fundamental conventions outlined above, the application of internal ESG analysis according to GAM's internal Framework, investment due diligence and issuer engagement.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there were potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Principal adverse

impacts are the

The table above provides a snapshot of the largest investments as at 30 June 2023. This snapshot is reflective of the general portfolio composition throughout the reporting period including assets classified as "#Not sustainable" (i.e. all investments of the Fund).

The Global Industry Classification Standard is used to determine economic sectors.

What was the proportion of sustainability-related investments?

Information on the proportion of the Fund which promoted environmental/social characteristics during the reference period (30 June 2023) is provided below. 81.4 % of the Fund invested n adaptation and mitigation projects¹².

¹²Investments attributed to projects classified as green buildings, renewable energy, sustainable transport and energy efficiency.

Asset allocation describes the share of investments in specific assets.

To comply with

the criteria for fossil gas include limitations on

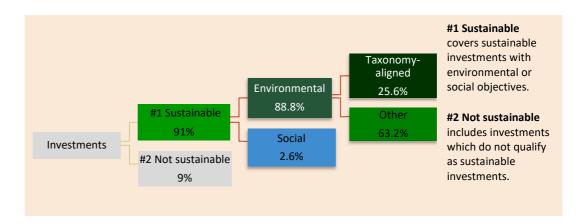

emissions and switching to fully

renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

the EU Taxonomy,

What was the asset allocation?

The Fund allocated 88.8% of its investments to sustainable investments with an environmental objective and 2.6% to sustainable investments with a social objective. It was calculated that 25.6% of investments of the Fund were aligned with the EU Taxonomy on such basis as further detailed below.

See reponse below to the Question titled "What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards" for information on the non-sustainable investments of the Fund.

In which economic sectors were the investments made?

The Fund primarily invests in bonds from issuers within the financial services sector.

Sector	Allocation
Banks	67.49%
Insurance	27.30%
Fixed Interest	23.34%
Financial Services	0.74%
Cash and Hedges	(18.87 %)

Enabling activities directly enable other

rules.

activities to make a substantial contribution to an environmental objective

Transitional activities

are economic activities for which low-carbon alternatives are not vet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Given the very recent introduction of taxonomy, data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited. Nevertheless, given the nature of the portfolio and our regulatory obligation to disclose a proportion of investments that are taxonomy aligned we have conducted an initial analysis of the portfolio.

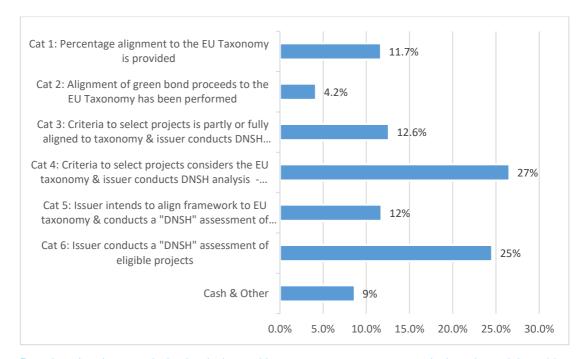

While data on taxonomy alignment is limited, and noting the challenges outlined in this section, we have calculated that the proportion of investments in environmentally sustainable economic activities aligned with the EU Taxonomy (including in transitional and enabling activities) is 25.6% of the portfolio based on currently available data.

Moreover, the Delegate Investment Manager has conducted a review of green bond reporting and documentation to assess alignment to the EU taxonomy. These have been split into six categories the first three of which, as outlined below, are relevant to determining the percentage of investments of the Fund that are taxonomy aligned.

Category 1: For 12% of the Fund's holdings, the issuer provides the percentage of alignment of green bond proceeds to the EU taxonomy, which is either internally (by the issuer) or externally assessed (typically by a recognized ESG provider such as Sustainalytics or ISS).

Category 2: For a further 4% of holdings, the post-issuance reporting contains an external verification of the alignment of the proceeds of the green bonds to the EU taxonomy, without an explicit alignment number.

Category 3: For 13% of holdings, the issuer's criteria for project selection and "Do no significant harm" assessment are partly or fully aligned with the EU taxonomy and alignment is externally assessed as part of pre-issuance verification/review (typically by a recognized ESG provider such as Sustainalytics or ISS).

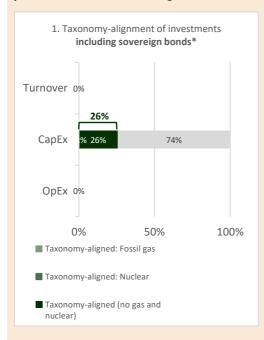

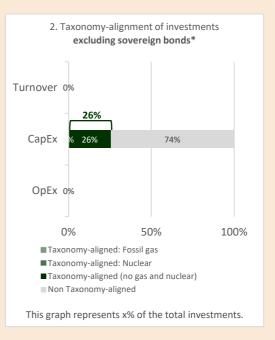

Based on the above analysis, the designated investment manager conservatively estimated that >90% of the proceeds of holdings in categories 1 to 3 are aligned to the EU taxonomy given that either (1) for these holdings the percentage alignment has been disclosed by the issuer or (2) there has been an external verification on the alignment to the EU taxonomy either at the pre- or post-issuance level. Based on this, taxonomy alignment of the Fund is 25.6% (90% of 28.5% holdings in categories 1-3), in line with the estimated 25% share stated in the Fund Supplement.

Taxonomy-aligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies
- expenditure
 (CapEx) showing
 the green
 investments
 made by investee
 companies, e.g.
 for a transition to
 a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Information on taxonomy alignment based on investee company turnover and OpEx is not relevant as the Fund assesses taxonomy alignment based on the level of the use of proceeds (project level), not the investee company / issuer level.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹³?

Yes:

In fossil gas
In nuclear energy

No

None of the taxonomy aligned investments are related to fossil gas or nuclear energy.

What was the share of investments made in transitional and enabling activities?

It is estimated that <5% of the Fund invests in projects in transitional and enabling activities. Data availability on taxonomy alignment is currently challenging. While some issuers have started reporting, overall data on taxonomy alignment remains limited.

¹³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as no previous periodic report, in accordance with Section 2 of Clapter V of the Commission Delegated Regulation (EU) 2022/1288, was required to be published by the Fund.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

63% on the basis of the calculation detailed above for determing the percentage of investments of the Fund that were taxonomy aligned.

What was the share of socially sustainable investments?

The share of socially sustainable investments is 2.6% of the Fund's AUM. These investments include projects such as Affordable Basic Infrastructure, Social & Affordable Housing and Access to Essential Services.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund only allocates to securities to cash deposits, cash equivalents, certificates of deposits, Money Market Instruments and / or derivatives, at the discretion of the Delegate Investment Manager.

Cash deposits, cash equivalents, certificates of deposits, money market instruments and/or derivatives were used for liquidity and hedging purposes, and are included under #2 Not Sustainable. All investments are aligned with the Fund's sustainable investment objective and the Fund's Green Bond Assessment Framework.

What actions have been taken to attain the sustainable investment objective during the reference period?

1) Actions relating to the sustainable objective

The investment objective of the Fund is to achieve long term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. The Fund sought to achieve this investment objective through investment principally in Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. Impact Bonds are defined in the Fund's Supplement as bonds which have a specific environmental, social and governance purpose and include, but are not limited to, Green Bonds, Social Bonds, Sustainability Bonds and Transition Bonds that contribute to positive environmental or social impact.

Positive environmental impact was generated by investing in green and impact bonds where proceeds could only be allocated to green projects such as renewable energy or green buildings. Green bonds provide investors with visibility on the use of proceeds and a measurable impact.

The Fund invested mainly in green bonds from the financial sector, namely banks and insurers. This is based on a conviction that the financial sector has a pivotal role to play in the environmental transition.

The European banking sector has tremendous impact potential as it finances the bulk of the economy, at around 80% of corporates.

The Fund sought to offer attractive returns by investing across the capital structure, in both senior and subordinated green bonds of financials. This may allow pickup in spread and yield compared to the Euro Investment Grade Corporate Bond market. The Fund was conservatively managed, aiming for a strong investment grade rating.

2) Actions relating to avoidance of significant harm

a. Sustainability Exclusion Criteria

The Sustainability Exclusion Criteria were programmed, on a best-efforts basis, into the investment controls, using information from independent ESG rating providers and recognised third party sources There were no breaches of the Sustainability Exclusion Criteria during the period.

b. International norms and standards

UN Global Compact compliance was programmed, on a best-efforts basis, into the investment controls, drawing on information from independent ESG rating providers and recognised third party sources and internal research as necessary. The Delegate Investment Manager used a third-party data provider's framework and data to categorise serious breaches, which are intended to identify credible allegations of a violation of global norms.

c. Principal Adverse Impacts

The Fund considered principal adverse impacts (PAIs), as detailed in Table 1, and the additional indicators in Tables 2 and 3 of Annex 1 of the SFDR Delegated Act, on sustainability factors in a qualitative and/or quantitative way dependent on the relevance of the specific indicator and the quality and availability of data. The PAI indicators were taken into account within the ESG analysis used to assess potential investments and determine whether there are potential negative impacts associated with the investment, both at the issuer and project level.

The Delegate Investment Manager excluded companies involved in the manufacturing of controversial weapons (anti-personnel mines, cluster munitions, biological and chemical weapons), certain types of fossil fuel exposure and any serious breaches of the ten UN Global Compact principles (see Sustainability Exclusions).

3) Actions relating to good governance

The governance practices of issuers were examined as part of the Issuer ESG Quality assessment, which is part of the Green Bond Assessment Framework in relation to the management and oversight of the bond proceeds. The assessment informed investment decisions and was used by the Delegate Investment Manager to satisfy itself that good governance practices were in place when selecting investments for the Fund.

The Issuer ESG Quality assessment included consideration of board structure and organization, risk management and oversight, remuneration, auditors, ethics, transparency and controversies. Issuers are rated from Very Low Risk to Very High Risk, and issuers rated as High Risk or Very High Risk would not be eligible for investment.

4) Actions relating to engagement activities

Engagement underpins the Delegate Investment Manager's Green Bond Framework Assessment. Issuers were selected for engagement as a result of sustainability controversies, PAI review and/or other thematic review.

Where issuers did not meet the minimum requirements of the Green Bond Assessment Framework the Designated Investment Manager engaged with the issuers. These engagements aimed to improve the robustness, transparency and accuracy of issuers in alignment with the objective of the Fund.

How did this financial product perform compared to the reference sustainable benchmark?

How did the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainable Finance Disclosure Regulation (SFDR)

The investments underlying the remaining funds do not take into account the EU criteria for environmentally sustainable economic activities and refer to Article 6 of regulation (EU) 2019/2088 or SFDR.

GAM Star Fund p.l.c. is authorised as a UCITS pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989 and is subject to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision and Enforcement) Act, 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and is a recognised scheme under the Financial Services and Markets Act 2000.
