This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Gothaer Comfort Ertrag

Share class T Security code: DWS0RW ISIN: DE000DWS0RW5

Management Company: DWS Investment GmbH, a member of the Deutsche Bank Group.

Objectives and investment policy

The objective of the investment policy is to achieve sustained capital appreciation that exceeds the benchmark (30% MSCI World (TR), 70% JPM Global Gov.Bond Ind.(hedged in EUR) (TR)). In order to achieve this, the fund invests globally in other funds, such as equity funds, bond funds, mixed funds and money market funds. Up to 25% of the fund's assets may be invested in real estate funds. Not more than 30% of the net assets may be invested in equity funds. Up to 50% of the fund's assets may be invested respectively in securities, bank balances and money market instruments. The selection of individual investments is at the discretion of the fund management. When investing in other funds, the fund management takes into account the earnings and risk potential of the target fund. The fund is oriented to the benchmark. It does not track it exactly but attempts to exceed its performance and can therefore deviate substantially - both positively and negatively - from the benchmark. The fund is subject to various risks. A more detailed description of risks can be found under 'Risks' in the sales prospectus. The currency of Gothaer Comfort Ertrag is EUR, the currency of the T share class is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares on each valuation day. The redemption may only be suspended in exceptional cases taking into account your interests as an investor.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The following are key risks for the fund and are not covered adequately by the risk and reward profile:

The fund invests a substantial portion in other funds. When investing in other funds, it must be taken into consideration that the individual target funds act independently of one another and that therefore multiple target funds may follow investment strategies which are identical or contrary to one another. This can result in a cumulative effect of existing risks, and any opportunities might be offset.
