What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Sub-Fund is to achieve long-term capital appreciation.

Investment policies The Sub-Fund will invest in shares of companies listed in developed markets, with a focus on the US. Investment will be made on both a long and short basis, meaning that the Sub-Fund can make investments not only in the expectation that a company will do well and that its share price will go up as a result, but also where it believes a company is overvalued or likely to perform poorly, causing its share price to fall. The Sub-Fund can do this by using a derivative, such as a future, a swap or an option, the value of which will go up as the share price of the company concerned falls.

The Sub-Fund may also use derivatives to make long and short investments in equity market indices, as an alternative to investing in specific companies, and can use equity and credit indices (which are useful indicators of the health of an economy) for portfolio hedging purposes.

The Sub-Fund's allocation of investments is not predetermined and can be made across all types of economic sectors, regions or countries.

The strategy of the Sub-Fund is to select companies using three core investment principles – (i) only investing in fundamentally sound companies (ii) using short selling in a disciplined way and (iii) having a diverse portfolio. The Investment Manager is looking to select companies that are well-established with high barriers to entry and sensible long-term capital investment programmes. The Investment Manager is also looking to short companies whose market value is overinflated or unfounded in the Investment Manager's opinion, whose earnings or potential are declining or who are vulnerable as their current market value is based on unsustainable, one-off events.

The Sub-Fund may also invest up to 10% of its net assets in open-ended exchange traded funds and other open-ended collective investment schemes which enable the Sub-Fund to achieve its investment objective. The Sub-Fund may also invest in cash and money market instruments for cash management purposes.

Under normal market conditions, it is expected that long positions held by the Sub-Fund will represent up to 115% of the Net Asset Value of the Sub-Fund at any one time and short positions up to 95%, with net exposure typically between 10% and 75% of the Net Asset Value. The total value of long and short positions will normally be limited to 225%.

Benchmark The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund, and is not managed with reference to any benchmark.

Redemption and Dealing You may sell your shares in the Sub-Fund on any day that banks are open in Dublin, Ireland and Boston, the United States of America. You must submit your application to the Sub-Fund's Administrator before 1.00 p.m. (Irish time) one business day before the day on which you want to sell.

Distribution Policy Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.

Launch date The Sub-Fund came into existence in 2021. This Share class was launched on 18/01/2022.

Fund Currency As your shares are denominated in EUR and the Sub-Fund is valued in USD, forward contracts are used to attempt to eliminate the effects of changes in the currency exchange rates.

Conversion of units/shares You may switch your shares to the shares of another sub-fund of MontLake UCITS Platform ICAV free of charge.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Sub-Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the ICAV as set forth in the ICAV prospectus, the Sub-Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depository The Sub-Fund's assets are held with its depository, Northern Trust Fiduciary Services (Ireland) Limited.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 26 February 2016 and 26 February 2021.

Favourable: this type of scenario occurred for an investment between 29 December 2018 and 29 December 2023.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Sub-Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Sub-Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

■ 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	297 EUR	1,510 EUR
Annual cost impact*	3.0%	3.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.6% before costs and -1.4% after costs.
