Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The objective of the Fund is to achieve long-term capital growth.
- The Fund invests primarily in shares of companies engaged in exploring, mining, processing, or dealing and investing in gold and other precious metals.
- The Fund does not invest directly in gold and other precious metals.
- The Fund invests worldwide.
- The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).
- The Fund is actively managed and is not constrained by its benchmark, the Philadelphia Stock Exchange Gold & Silver Index (Total Return), which is used for comparison purposes. However, as the benchmark is a suitable proxy for the investment strategy, it is likely that some of the Fund's holdings are also components of the benchmark. As an actively managed fund, this overlap will change and this statement may be updated from time to time.
- The Fund has broad discretion over portfolio construction and therefore securities, weightings and risk characteristics will differ. As a result, it is expected that over time the risk return characteristics of the Fund may diverge materially to the benchmark.
- Please refer to the Past Performance section below where a benchmark will be displayed if relevant.
- The Fund promotes environmental, social and governance (ESG) criteria as covered under Article 8 of the Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector.
- You can buy and sell shares in the Fund on any Dealing Day (as defined in the Prospectus).
- Any income from your investment will be reinvested.

Risk and Reward Profile

Lower Risk Higher Risk

← Typically lower rewards Typically higher rewards →

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Share Class is in risk category 7 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- Investment in instruments providing exposure to commodities is generally considered to be high risk which may result in large fluctuations in the value of the Fund.
- Return on your investment may be adversely affected by variations in exchange rates.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- The Fund may use derivatives (complex instruments) for investment purposes which may result in the Fund being significantly leveraged and may result in large fluctuations in the value of the Fund. The use of derivatives transactions may expose the Fund to counterparty risks that may result in losses to the Fund associated with the bankruptcy or insolvency of a counterparty.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- As this Fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader investment mandate.
- This Share Class is denominated in a different currency than the base currency of the Fund and is not intended to be hedged. Therefore, return on your investment may be adversely affected by variations in exchange rates between the two currencies.
- Investments in small and medium sized companies involve greater risks than those customarily associated with larger companies.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
