Benchmark uses and resemblance

- Performance comparison.
- Basis for relative VaR calculations.

The Sub-Fund is actively managed. Though the majority of its holdings (excluding derivatives) are likely to be components of the benchmark, the Investment Manager has broad discretion to deviate from its securities, weightings and risk characteristics.

The degree to which the Sub-Fund may resemble the composition and risk characteristics of the benchmark will vary over time and its performance may be meaningfully different.

Main investment exposure Primarily invests in debt securities (including MBS/ABS), equities and real estate investment trusts (REITs) from issuers anywhere in the world, including emerging markets.

The Sub-Fund is expected to invest between 0% and 45% of its assets in mortgage-backed securities (MBS) and/or asset-backed securities (ABS) of any credit quality. MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases.

The Sub-Fund may invest in below investment grade and unrated securities.

The Sub-Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes, and in convertible securities and currencies.

The Sub-Fund may invest up to 20% of its assets in equity linked notes.

Dividends are not guaranteed given that returns to investors will vary from year to year depending on dividends paid and capital returns, which could be negative. Under exceptional market conditions the

Sub-Fund may be unable to meet its preferred volatility level and the realised volatility may be greater than intended.

At least 51% of assets are invested in issuers with positive environmental and/or social characteristics that follow good governance practices as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data.

The Sub-Fund invests at least 10% of assets excluding Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments, money market funds and derivatives for EPM, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Management Company's Website (www.ipmorganassetmanagement.lu).

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign and 90% of investment grade securities purchased. **Other investment exposure** Up to 3% in contingent convertible bonds. Up to 20% of net assets in Ancillary Liquid Assets and up to 20% of assets in Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments.
