What is this product?

Objectives, Process and Policies

Objective To achieve a return by investing in companies with exposure to the theme of genetic therapies, globally.

Investment Process

Investment Approach

- Uses the ThemeBot which, through natural language processing, determines textual relevance and revenue attribution to identify companies with the highest exposure to the theme.
- Considers insights from a team of specialist sector analysts who review the ThemeBot's results to assess their appropriateness for the portfolio.
- Determines the position sizes of the securities identified as having the highest exposure to the theme by taking into consideration not only textual relevance and revenue attribution but also their quality, liquidity and market capitalisation.

Benchmark uses and resemblance

- Performance comparison.

The Sub-Fund is actively managed without reference or constraints relative to its benchmark.

Main investment exposure Will invest in equities of companies that have been identified by the Investment Manager as being involved in research, development, production or marketing of genetic therapies and their associated businesses anywhere in the world, including emerging markets.

To identify these companies, the Investment Manager uses the ThemeBot which is a proprietary natural language processing tool that:

- identifies and determines the relevance of key words and concepts related to the theme, and
- evaluates public documentation such as regulatory filings, broker reports, news reports or company profiles to identify those companies providing the highest exposure to the theme.

The Investment Manager supervises and monitors the theme identification and portfolio construction process and actively selects securities for the Sub-Fund's portfolio. At least 90% of companies purchased will be analysed against the theme.

The theme of genetic therapies, which is the thematic focus of the Sub-Fund, aligns with the pursuit of global principles aiming to improve sustainable and socially responsible finance in relation to the promotion of good health and well-being.

While not constrained to any sector, the Sub-Fund will have significant positions in specific sectors or markets such as healthcare and biotechnology.

The Sub-Fund may invest a significant portion of its assets in small capitalisation companies and have significant positions in specific sectors or markets from time to time. At least 51% of assets are

invested in companies with positive environmental and/or social characteristics that follow good governance practices as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data.

The Sub-Fund invests at least 10% of assets excluding Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments, money market funds and derivatives for EPM, in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives. The Investment Manager evaluates and applies values and norms based screening to implement exclusions. To support this screening, it relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Management Company's Website (www.jpmmorganassetmanagement.lu).

Other investment exposure Up to 20% of net assets in Ancillary Liquid Assets and up to 20% of assets in Deposits with Credit Institutions, money market instruments and money market funds for managing cash subscriptions and redemptions as well as current and exceptional payments. Up to 100% of net assets in Ancillary Liquid Assets for defensive purposes on a temporary basis, if justified by exceptionally unfavourable market conditions.
