What is this product?

Type

SICAV

Term

The Fund is established for an indefinite period (open-ended fund) and can be terminated at any time as further stipulated in the articles of association of the SICAV. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives

Investment Objective

JSS Sustainable Equity – Real Estate Global (the "Fund") promotes environmental and social characteristics according to SFDR Art. 8, but does not have a sustainable investment objective according to SFDR Art. 9.

The Fund integrates environmental, social and governance aspects (ESG) along the investment process with the aim to reduce controversial exposures, align the portfolio with international norms, mitigate sustainability risks, harness opportunities emanating from ESG trends as well as to get a better-informed perspective of portfolio holdings.

The Fund seeks to mitigate risks and harness opportunities that derive from megatrends in sustainability (such as resource scarcity, demographic transition, climate change, accountability etc.). To this effect, the Fund systematically excludes issuers exposed to controversial activities as detailed by the "JSS standard exclusions" as described in chapter 3.1 of the Fund's prospectus. More than 90% of the Fund's assets must have a JSS ESG Rating. A best-in-class or positive ESG screening approach is then used to build an investment universe with the stronger ESG performers. The expectation is that this process reduces the investment universe of all issuers for which data is available by at least 20%. The Fund seeks to achieve long-term capital appreciation through global equity investments in the real estate sector.

Investment Policy

The Fund is actively managed without replicating any benchmark. However, the Fund is managed with reference to S&P Developed Property Index EUR (the "Benchmark").

The Fund invests in equities and equity securities of companies whose

activity is concentrated mainly in the real estate sector and that take environmental and social sustainability aspects into account in their business activities. These include, among others, companies whose activities involve the acquisition, development and use of property, or companies that own property and real estate for purposes of generating income. This also includes closed-end real estate investment funds such as REITs (Real Estate Investment Trusts) or other comparable real estate management companies. Individual business activities that are particularly contrary to the environmental or social requirements of the Fund (e.g. military infrastructure) may be excluded.

Generally, the majority of the positions within the Fund are constituents of the benchmark. In order to exploit specific investment opportunities the Investment Manager may discretionarily select securities not included in the benchmark. In addition, the Investment Manager integrates sustainability aspects which lead to an exclusion of investable benchmark components.

The holdings and their weightings in the sub-fund's portfolio will diverge from the weightings of the securities included in the Benchmark therefore the sub-fund's returns may deviate from the performance of the Benchmark. However the deviation from the benchmark is capped due to a tracking error limit which limits the potential outperformance.

Share Class Policy:

This share class of the Sub-Fund continually reinvests income.

Processing of subscription and redemption orders

You may redeem or convert shares in the Fund on any business day.

Intended retail Investor

The Sub-Fund is suitable for investors with a medium to long-term investment horizon who are aiming for asset growth. As a supplementary investment in the equities segment, the Sub-Fund is aimed for investors with a medium to high risk tolerance.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 8 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The product may be exposed to further risks such as operational, counterparty, political and legal risks. For further details please consult the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 13 years. Markets could develop very differently in the future.

Recommended holding period:		8 years	
Example Investment:		10,000 EUR	
		If you exit after 1 year	If you exit after 8 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,250 EUR	790 EUR
	Average return each year	-87.50%	-27.19%
Unfavourable	What you might get back after costs	7,400 EUR	8,070 EUR

What happens if J. Safra Sarasin Fund Management (Luxembourg) S.A. is unable to pay out?

The investor of this product will not face financial loss due to the default of J. Safra Sarasin Fund Management (Luxembourg) S.A., as the Fund is considered to be a separate and segregated pool of assets.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000.00

J. Safra Sarasin

	If you exit after 1 year	If you exit after 8 years
Total costs	129 EUR	1,462 EUR
Annual cost impact (*)	1.3%	1.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.7 % before costs and 4.4 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
