

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JYSKE SICAV HIGH YIELD CORPORATE BONDS (SRI), a sub-fund of Jyske SICAV, class EUR IC (ISIN: LU1529111731)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A. (the "Management Company"), which is a member of the UBS Group.

Objectives and investment policy

The objective of the portfolio management is to generate a return over time, which is at least in line with the market development measured by a comparable benchmark return.

The Sub-Fund's assets are primarily invested directly and indirectly in a portfolio of high-yield bonds issued by companies. The majority of the bonds will be rated below investment grade. The bonds involve a high credit risk. In principle, investments in other currencies than EUR will be hedged to EUR.

The Sub-Fund is managed according to specific principles of socially responsible investments (SRI) and excludes certain companies or securities.

The Sub-Fund may invest in Regulated Markets that are covered by Article 4(1)(14) of the MiFID directive, and also in other regulated markets in the EU and third countries that are members of the World Federation of Exchanges (WFE) or Federation of European Securities Exchanges (FESE) and that have been approved by the Board of Directors. In addition, the Sub-Fund's assets may be invested in the US market for high-yield bonds, also called the OTC fixed income market, regulated by the FINRA (Financial Industry Regulators Authority) and in Rule 144 A issues that can be converted into instruments registered within one year with the U.S. Securities and Exchange Commission (SEC) in accordance with the Securities Act of 1933 and are traded on the OTC fixed income market. There are no requirements of the rating of such bonds, of the size of the issues or of the liquidity hereof. The Sub-Fund may also invest directly in rated CoCos for less than 20% of its assets.

No more than 10% of the Sub-Fund's net assets may be invested in Transferable Securities or Money Market Instruments other than those referred to in Article 41(1) of the 2010 Law. The Sub-

Fund may invest up to 10% of its assets in UCITS and other UCIs. As a part of the portfolio management the Sub-Fund may invest in financial derivative instruments. You can assess the reward of the Sub-Fund by comparing it with the reward of the benchmark which is composed by 50% ICE BofAML BB-B European Currency High Yield Constrained Index (Hedged into EUR), and 50% ICE BofAML BB-B US High Yield Constrained Index (Hedged into EUR). The Sub-Fund pursues an active investment strategy. Due to the active strategy, the Sub-Fund's investments may deviate considerably from the benchmark, and your reward may be higher as well as lower than the benchmark. The benchmark is only used for comparison of performance.

Investors may demand to redeem their units on any business day in which banks are open for business in Luxembourg and Denmark.

The income in respect of an accumulation share class is not distributed but is retained in the Sub-Fund.

This Share Class is reserved for Institutional Investors.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 4 years of investment.

Risk and reward profile

The above risk indicator shows the correlation between the risk involved in and the return potential of various investments. The fund's ranking on the indicator is determined by the fluctuations in the net asset value of the fund over the past five years. The calculation of the ranking is based on the fund's actual return, while a representative return can be used if the fund has not existed for the full calculation period. Large fluctuations result in high risk and a ranking to the right on the risk indicator. Small fluctuations result in lower risk and a ranking to the left on the risk scale. Category 1 does not mean that investments are risk free. The fund's ranking on the indicator is calculated to be 4. Please be aware, that the ranking on the indicator is calculated on the basis of historical data and may not be a reliable indication of the future risk and return profile. The ranking may therefore change over time.

Please note that there are risks that the risk indicator does not allow for to a sufficient degree, for instance operational risk and liquidity risk.

Since the fund invests in bonds, it is particularly exposed to losses caused by the bond issuer defaulting or obtaining a lower credit rating, which may have an adverse effect on the return. To limit the consequences of this, the fund is, subject to trading restrictions to keep the risk at an acceptable level.

Due to financial crises, etc., the securities may no longer be traded, or they may only be traded to a limited extent, which may have an adverse effect on the return. We limit this risk by diversifying the investments in the fund on a wide range of securities.

The fund uses derivatives, which are used either to reduce or maintain the fund's overall risk, but are not used to increase the overall risk of the fund.

In the prospectus under "Section 5: General Risk Factors", you can find a list of the risks affecting the fund's return.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.66%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The **entry charge** and **exit charge** shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

These **ongoing charges** are the actual charges over the last 12 months. They can vary from year to year. They do not include:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.fundinfo.com or www.jyskesicav.lu.

Past performance

■ LU1529111731

■ 50% ICE BofAML BB-B European Currency High Yield Constrained Index (Hedged into EUR), and 50% ICE BofAML BB-B US High Yield Constrained Index (Hedged into EUR)

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year-end over year-end change of the class net asset value. In general any past performance takes account of all ongoing charges, but not the entry charge. If the sub-fund is managed against a benchmark, its return is also shown.

The class was launched in 2017.

The past performance is calculated in EUR.
