What is this product?

Type

This product is a fund. Classic Shares K&H HUF is a shareclass of the sub-fund We Care Responsible Investing, a sub-fund of the open-ended investment company governed by Belgian law, KBC Equity Fund. This open-ended investment company does fulfil the requirements of the UCITS Directive. (*)

Term

Unlimited

Objectives

KBC Equity Fund We Care Responsible Investing aims to generate a return by investing primarily in shares of companies that are contributing to the medical well-being of society through their products and services, such as:

- Production and development of medicine
- Biotech
- Medical technology
- Diagnostics, symptom recognition and tests
- Digital health care
- Care for elderly and sick people
- Outsourcing of medical activities
- Distribution of medical supplies
- Health and life insurance
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

The fund pursues responsible investing objectives based on a dualistic approach: a negative screening and a positive selection methodology.

This approach will be gradually implemented in the portfolio from 2 September 2022.

The negative screening entails that the fund may not invest in assets of companies that are excluded based on exclusion criteria (including tobacco, gambling activities and weapons). More information on the exclusion policy can be found at www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The positive selection methodology is a combination of portfolio targets and supporting sustainable development.

Portfolio targets are based on a reduction in carbon intensity and an improvement in ESG characteristics versus its benchmark. Sustainable development is supported by investing in companies that contribute to the achievement of the UN Sustainable Development Goals. More information on the positive selection methodology and the concrete goals of the compartment can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

KBC Equity Fund We Care Responsible Investing is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index (www.MSCI.com). However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio. In line with its investment policy, the fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

Due to the above responsible investing methodology, the portfolio's composition may differ from the benchmark's.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark. The long-term expected tracking error for this fund is higher than 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

KBC Equity Fund We Care Responsible Investing may make limited use of derivatives*. This means that derivatives can be used either to help achieve the investment objectives (for instance, to increase or decrease the exposure to one or more market segments in line with the investment strategy), or to neutralise the portfolio's sensitivity to market factors (by hedging an exchange rate risk, for example).

The fund is denominated in Hungarian forint.

The fund reinvests any income received in the manner set out in the prospectus (for more details, see section 'Types of units and fees and charges' of the information for this sub-fund in the prospectus).

The minimum subscription amount is 10 000 Hungarian forint.

Practical information

The custodian of KBC Equity Fund is KBC Bank NV.

You can obtain a copy of the prospectus and the most recent annual and half-yearly reports in Dutch or English free of charge from any branch or agency of the financial service provider KBC Bank NV or KBC Asset Management NV (Havenlaan 2, 1080 Brussels, Belgium) or via the following website: www.kbc.be/kid.

You can find the most recent net asset value* at www.beama.be. You can read all other practical information at: www.kbc.be/kid. Updated information on the

remuneration policy (as described in the prospectus under 'Management Company') can be found at www.kbc.be/investment-legal-documents (Remuneration Policy) and is available free of charge from any branch or agency of the financial service provider KBC Bank NV.

This key information document describes **Classic Shares K&H HUF**, a shareclass of **We Care Responsible Investing**, a sub-fund of the open-ended investment company* KBC Equity Fund.

The prospectus and periodic reports cover all sub-funds of the open-ended investment company.

Each sub-fund of KBC Equity Fund should be considered as a separate entity. Your rights as an investor are restricted to the assets of the sub-fund. The obligations of each individual sub-fund are covered only by the assets of that sub-fund.

Orders for fund units are executed daily (for more details, see the 'Information concerning the trading of shares' section of the information for this sub-fund in the prospectus).

You may exchange your investment in units in this sub-fund for units in another sub-fund. For additional information about this, see the 'Information concerning the trading of shares' section in the information concerning this sub-fund in the prospectus.

Intended retail investor

The product is aimed at retail investors who want to build up wealth and have an investment horizon of around 8 years.

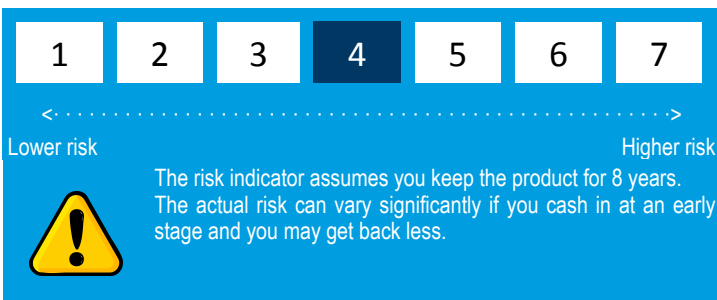

These investors are willing to take a certain amount of risk for a potentially higher return and can bear losses under adverse conditions.

These investors have at least a basic knowledge of and/or experience with investing.

They have also a preference for responsible investment.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class.

4 is typical for an equity fund and indicates that the fund is highly sensitive to the markets. Indeed shares do not provide a guaranteed return and their value can fluctuate sharply.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.

There is no capital protection.

Scenarios

The figures shown include all the costs of the product itself and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 13 years.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 8 years

Example Investment: 4 000 000 HUF

If you exit after 1 year

If you exit after 8 years

Scenarios

Scenarios		If you exit after 1 year	If you exit after 8 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	702 144.79 HUF -82.45%	461 882.58 HUF -23.65%
Unfavourable	What you might get back after costs Average return each year	3 454 122.67 HUF -13.65%	4 496 637.37 HUF 1.47%
Moderate	What you might get back after costs Average return each year	4 553 391.37 HUF 13.83%	14 103 218.04 HUF 17.06%
Favourable	What you might get back after costs Average return each year	5 938 518.26 HUF 48.46%	16 412 083.68 HUF 19.30%

Unfavourable scenario on 8 years or less: This type of scenario occurred for an investment starting in November 2021 and ending in October 2022.

Moderate scenario on 8 years: This type of scenario occurred for an investment starting in June 2011 and ending in May 2019.

Favourable scenario on 8 years: This type of scenario occurred for an investment starting in September 2011 and ending in August 2019.

What happens if is unable to pay out?

Because you invest directly in the fund, the failure of the Management Company, KBC Asset Management NV, to make distributions (for example, due to insolvency) would have no direct consequences on the ability of the fund to make distributions.

In the event that the fund itself fails to make distributions, you may lose your investment entirely. The fund is not covered by any compensation, guarantee scheme or any other form of investor guarantee.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that in the first year you would get back the amount you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario and 4 000 000 HUF is invested.

	If you exit after 1 year	If you exit after 8 years
Total costs	292 338 HUF	938 703 HUF
Annual cost impact (*)	7.3%	2.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 20.0% before costs and 17.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge: 5.0% of the amount invested. This person will inform you of the actual distribution fee.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Max. 5.00% of the amount you pay in when entering this investment. This includes distribution costs of max. 5.00% of amount invested.	200 000 HUF
Exit costs	We do not charge an exit fee for this product. However, if you exit within one month after the entry, an exit fee of max. 5.00% can be charged.	0 HUF
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2.09% of the value of your investment per year. This is an estimate based on actual costs over the last year.	83 671 HUF
Transaction costs	0.22% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	8 667 HUF
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 HUF

How long should I hold it and can I take my money out early?

Recommended holding period: 8 years

Given the investment strategy of this product, we recommend holding on to this product for 8 years or longer. The holding period is determined with the aims to reduce the timing risk when entering and exiting the product, and to ensure sufficient time for the underlying assets to recover in case of unfavourable market conditions. According to our estimates, the probability of getting a positive return is higher when you hold on to the recommended holding period or longer. You can exit this product before the recommended holding period, but in that case the probability of getting less back than the initial investment is higher.

A partial or full exit is free of charge. However, if you exit within one month after the entry, the fee mentioned in the 'What are the costs?' section can be charged.

How can I complain?

Your intermediary is the first point of contact for your complaints. If you cannot reach agreement, you can contact klachten@kbc.be Tel. 016/ 43 25 94, Brusselsesteenweg 100 3000 Leuven, or gestiondesplaintes@cbc.be Tel. 081 803 163, Avenue Albert I 5000 Namur or ombudsman@ombudsfm.be Tel. 02 545 77 70, North Gate II, Koning Albert II-laan 8 bus 2 1000 Brussels. You can find the complete complaints procedure at www.kbc.be or www.cbc.be. However, you always retain the right to initiate legal proceedings.

Other relevant information
