

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. This information is required by law to help you to understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

We Digitize

Sub-fund of KBC Equity Fund

Classic Shares K&H HUF: BE6323645216 (ISIN-code for Capitalisation shares)

managed by KBC Asset Management NV

OBJECTIVES AND INVESTMENT POLICY

KBC Equity Fund We Digitize aims to generate a return by investing primarily in shares of companies whose products and services support the digital evolution, such as:

- Electronics
- Big data and artificial intelligence
- Quantum computing
- Cloud services and cloud computing
- Cybersecurity
- Semiconductors
- Data services to companies
- Software for professional purposes
- IT consultancy
- Network infrastructure
- Digital marketplaces
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

The fund pursues responsible investing objectives based on a dualistic approach: a negative screening and a positive selection methodology.

This approach will be gradually implemented in the portfolio from 13 September 2022.

The negative screening entails that the fund may not invest in assets of companies that are excluded based on exclusion criteria (including tobacco, gambling activities and weapons). More information on the exclusion policy can be found at www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The positive selection methodology is a combination of portfolio targets and supporting sustainable development.

Portfolio targets are based on a reduction in carbon intensity and an improvement in ESG characteristics versus its benchmark. Sustainable development is supported by investing in companies that contribute to the achievement of the UN Sustainable Development Goals. More information on the positive selection methodology and the concrete goals of the compartment can be found at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

KBC Equity Fund We Digitize is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index(www.MSCI.com). However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio. In line with its investment policy, the fund may not invest in all the instruments included in the benchmark. When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

Due to the aforementioned responsible investing methodology, the composition of the portfolio will differ from that of the benchmark. The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark. The longterm expected tracking error for this fund is higher than 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

KBC Equity Fund We Digitize may make limited use of derivatives*. This means that derivatives can be used either to help achieve the investment objectives (for instance, to increase or decrease the exposure to one or more market segments in line with the investment strategy), or to neutralise the portfolio's sensitivity to market factors (by hedging an exchange rate risk, for example).

The fund is denominated in Hungarian forint.

The minimum subscription amount is 10 000 Hungarian forint.

The fund reinvests any income received in the manner set out in the prospectus (for more details, see section 'Types of shares' and fees and charges' of the information for this sub-fund in the prospectus).

Orders for fund units are executed daily(for more details, see the 'Information concerning the trading of shares' section of the information for this sub-fund in the prospectus).

RISK AND REWARD PROFILE

This figure is based on data from the past, which is not always a reliable indication of risk and return in the future.

The risk and reward indicator is assessed regularly and can therefore go up or down.

The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return. While the figure gives an indication of the return the fund might generate, it also indicates the risk involved. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. You might even sustain a loss.

The figure has been calculated from the viewpoint of an investor in Hungarian forint.

Why does this fund have a risk and reward indicator of 6?

6 is typical for an equity fund and indicates that the fund is highly sensitive to the markets. Indeed shares do not provide a guaranteed return and their value can fluctuate sharply.

Moreover, an investment in this fund involves:

- A high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

There is no capital protection.

CHARGES

These charges are used to cover, among other things, the management costs of the fund, including marketing and distribution expenses. They reduce the investment's ability to grow. You can find additional information on the charges in the 'Types of shares and fees and charges' section in the information concerning this sub-fund in the prospectus.

One-off charges taken before or after you invest

Entry charge	5.00%	This is the <i>maximum</i> that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you will pay less. For more information on the actual entry and exit charges, please contact your financial adviser or distributor.
Exit charge	5.00% on sale of units within one month of purchase	
Switching from one sub-fund to another		If you would like to exchange your units in this sub-fund* for units in another sub-fund, you will be charged a fee comprising the Exit Charge for the old sub-fund and the Entry Charge for the new sub-fund (for more information, see the 'Types of shares and fees and charges' section in the information concerning this sub-fund in the prospectus).

Charges taken from the fund over a year

Ongoing charge	2.20%	The figure given here for the ongoing charge is an estimate because the remuneration for the management of the investment portfolio was adjusted on 7 January 2022. The annual report for each financial year will include detail on the exact charges made. This figure does not include transaction charges, except if the fund pays entry or exit charges when units in other funds are bought or sold, and may change from year to year.
----------------	-------	--

Charges taken from the fund under certain specific conditions

Performance fee None

PAST PERFORMANCE

Past performance should not be seen as a good indicator of future performance.

The calculation of past performance includes all charges and fees, except taxes and entry and exit charges.

Current benchmark composition: MSCI All Countries World - Net Return Index

* These performances were achieved under circumstances that no longer apply.

There is insufficient data for this year to give investors a useful indication of past performance.

Start year: 2020

Currency: Hungarian forint
