What is this product?

Type: This investment fund is a sub-Fund of Legal & General SICAV, an umbrella type open-ended investment company incorporated as a société d'investissement à capital variable. The Fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Term: There is no fixed maturity date.

Objectives: The objective of the Fund is to provide a combination of growth and income above those of the ICE BofA USD 3 Month Deposit Offered Rate Constant Maturity Total Return Index, the "Benchmark Index". The Fund is actively managed and aims to outperform the Benchmark Index by 3.5% per annum. The Fund aims to deliver this objective while decarbonising the portfolio over time, targeting a 50% reduction in weighted average carbon intensity by 2030, compared to a December 2019 baseline level. The Fund aims to generate positive returns in all market conditions. The Fund has a higher performance target than that of the L&G Absolute Return Bond Fund. The objective is before the deduction of any charges and measured over rolling three year periods. There can be no assurance that the Fund will achieve its investment objective. The Manager has broad discretion over the composition of the Fund's portfolio. The Fund will invest at least 80% of its assets in a broad range of fixed income securities from around the world. These include bonds and other debt instruments, issued in a variety of currencies by companies and governments from around the world. In addition to decreasing the weighted average carbon intensity over time, the Fund promotes a range of environmental and social characteristics by: (i) Excluding investments in bonds issued by companies in the LGIM Future World Protection List ("FWPL") and (ii) Excluding companies from the Fund which do not meet the Manager's "Climate Impact Pledge", in order to encourage strong governance and sustainable strategies. The Fund will invest at least 70% of its assets in debt which has been rated by a recognised rating agency as investment grade (that is, rated BBB- or above by Standard & Poor's or Fitch or Baa3 or above by Moody's). The Fund may also invest in unrated bonds whose creditworthiness is, in the opinion of the Investment Manager, of comparable quality to other bonds eligible for investment by the Fund. The Fund may also invest in debt which is considered sub-investment grade that is, debt which is rated BB+ and below or equivalent by Standard & Poor's and Fitch and Ba1 and below by Moody's or in the opinion of the Investment Manager has a creditworthiness of comparable quality. The Fund may also invest in transferable securities, including but not limited to, depository receipts, permitted deposits, money market instruments, cash, near cash and units in collective investment schemes. The absolute return philosophy is focused on capital preservation and minimising falls in value. In order to achieve consistent positive returns, significant emphasis is placed on risk management and avoiding downside scenarios. The Fund will use derivatives extensively for investment purposes or to reduce risk or cost or to generate additional growth. Derivatives are financial instruments whose values are based upon the price of one or more other asset(s). Usage of derivatives is monitored to ensure that the Fund is not exposed to excessive or unintended risks. The financial derivative instruments that the Fund may invest in include the following: Spot and Forwards contracts, Credit Default Swaps, Options and Exchange Traded Futures. Some investments held by the Fund may be issued in currencies other than US dollar. The Fund may use a technique known as currency hedging to seek to protect against exchange rate movements between other currencies and US dollar. The Fund may invest up to 20% of its assets in asset-backed securities (ABS) and mortgage-backed securities (MBS). The Fund may invest up to 20% of its assets in contingent convertible debt securities. The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives. The Fund promotes a range of environmental and social characteristics. Further information can be found in the Supplement. The depositary of the Fund is Northern Trust Global Services SE. Further information about the Fund and the share class can be obtained from the Fund's prospectus and the annual and semi-annual reports, which are available, in addition to the latest prices for the unit class and details of any other unit classes, free of charge at: www.lgim.com.

Intended retail investor: This Fund is designed for investors looking for growth and income from an investment in range of fixed and variable rate income securities. Shares can be bought, sold or switched on any business day. Orders received by 2.00pm (CET) will be processed as at the valuation point on the same business day. Orders received after 2.00pm (CET) will be processed as at valuation point on the next business day. Shares can be bought, sold or switched on any business day. The Fund's base currency is denominated in US dollar (USD).

What is the risk and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low risk class.

The value of the fund may be affected by risks not in the SRI: failure of a counterparty, custodian or issuer; inability to sell holdings; trends in interest rates/inflation.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The Fund is not covered by an investor compensation scheme.

	Average return each year	17.0%	2.6%

* The Stress scenario shows what you might get back in extreme market circumstances.

** The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 2015-04 to 2020-03.

*** The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 2013-07 to 2014-11.

**** The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 2016-11 to 2021-10.

This table shows the money you could get back over the next 5 year(s), under different scenarios, assuming that you invest 10,000.00 GBP.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product with input from benchmark(s)/proxy over the last 10 years. Markets could develop very differently in the future.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

What happens if LGIM Managers (Europe) Limited is unable to pay out?

If LGIM Managers (Europe) Limited defaults, investors in the Fund would not face any financial losses. However, the value of an investment and any income taken from it is not guaranteed and can go down as well as up, you may not get back the amount you originally invested. The fund is not covered by an investor compensation scheme.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the holding period(s). They include potential early exit penalties. The figures assume you invest 10,000.00 GBP. The figures are estimates and may change in the future.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10,000.00 is invested.

Investment GBP 10,000.00	If you cash in after 1 year	If you cash in after 5 years
Total costs	105.00 GBP	553.00 GBP
Impact on return (RIY) per year (*)	1.05%	1.05%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 1.57% before costs and 0.52% after costs.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- What the different cost categories mean.
