Lyxor MSCI Greece UCITS ETF – Dist (the "Fund")

ISIN: FR0010405431 - Compartment of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.
Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund is a passively managed index-linked UCITS.

The Fund's investment objective is to track both the upward and the downward movements of the MSCI Greece IMI + Coca-Cola 20–35 Net Total Return Index (net dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR) and representative of the performance of large, mid, and small-cap stocks domiciled and/or listed in Greece, while minimising the tracking error between the performance of the Fund and the performance of its Benchmark Index as much as possible.

The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

Further information about the MSCI indices can be found on the MSCI website (www.msci.com).

The Fund aims to achieve its objective via indirect replication, i.e. by entering into one or more over-the-counter swaps (financial derivative instruments, "FDIs"). The Fund may invest in a diversified portfolio of international shares, whose performance will be swapped for the performance of the Benchmark Index using FDIs.

The updated composition of the securities portfolio held by the Fund is available at www.lyxoretf.com.

Its net asset value can also be found on the Fund's Reuters and Bloomberg pages and may be stated on the websites of the stock markets where the Fund is listed.

The Fund is eligible for the French equity savings plan (PEA) and therefore invests a minimum of 75% of its assets in equities of companies of the European Union.

The share currency is the Euro (EUR).

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 7 given its exposure to the Benchmark Index. Category 7 indicates that it is possible to suffer a very large or even complete capital loss, suddenly under normal market conditions, as the value of your investment could fluctuate very strongly and quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

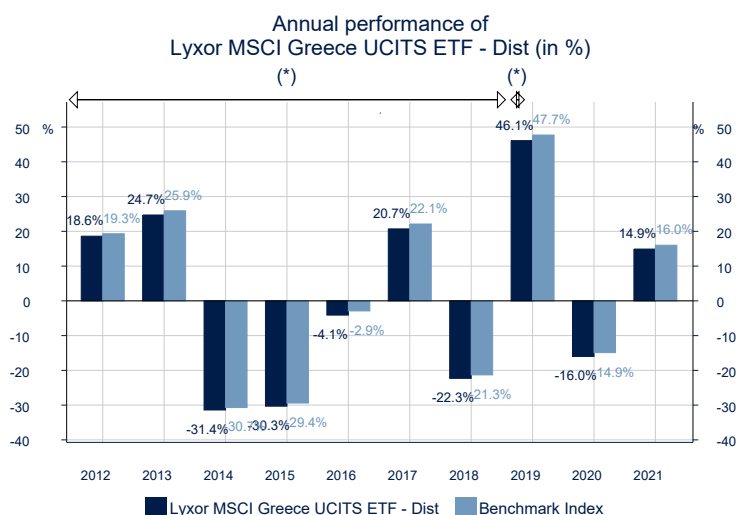

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
- **Risk associated with the use of derivative instruments:** The Fund may use financial contracts that entail various types of risks, including but not limited to leverage, high volatility, valuation, or liquidity risks.
- **Liquidity risk:** Under certain circumstances, such as a temporary decline in trading volumes on financial markets, a purchase/sale of certain financial instruments held by or affecting the value of the Fund may result in a significant change in their valuation. Under such circumstances, the Fund's net asset value could be adversely affected.
