Lyxor MSCI Digital Economy ESG Filtered (DR) UCITS ETF - Acc (the "Fund")

ISIN: LU2023678878 - A sub-fund of the investment company named Lyxor Index Fund (the "Company") domiciled in Luxembourg. Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Objectives and investment policy

The Fund is an index-tracking UCITS passively managed.

The investment objective of the Fund is to track both the upward and the downward evolution of the MSCI ACWI IMI Digital Economy ESG Filtered Net Total Return Index (the "Benchmark Index") denominated in US Dollars (USD), while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Benchmark Index aims to represent the performance of companies that are expected to derive significant revenues from the digital economy value chain and exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe, based on an ESG rating. The ESG rating methodology is based on ESG key issues including but not limited to water stress, carbon emissions, labor management or business ethics. The Benchmark Index uses a "Best-in-class" approach, i.e., bottom quartile companies by ESG industry-adjusted rating are excluded from the theme universe. For further information in relation to the general and specific ESG objectives targeted by the Sub-Fund, please refer to the Transparency Code of the Sub-Fund available on <https://www.lyxoretf.com/>. Limits of the methodology of the Benchmark Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies and the risks linked to ESG methodologies and to ESG score computation.

MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the Benchmark Index constituents on the basis that any dividends or distributions are included in the Benchmark Index returns after withholding tax retention.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index. To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy. The potential use this technique is published on Lyxor's website: www.lyxoretf.com.

Updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the website of the stock exchanges where the Fund is listed.

The share currency is the US Dollar (USD).
