What is this product?

Type:

The Fund is a sub-Fund of M&G (Lux) Investment Funds 1, a société d'investissement à capital variable (SICAV), organised as an umbrella fund with segregated liability between sub-Funds. Governed and established under Luxembourg Law as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Objective:

The Fund aims to:

- financial objective: provide a higher total return (capital growth and income) than the global equity market over any five year period; and
- impact objective: invest in companies that deliver solutions to address the challenge of better health and well-being.

Core investment: at least 80% of the Fund is invested in the shares of companies, across any sector and of any size, from any developed market.

The Fund may also invest in the shares of emerging market companies. The Fund is concentrated and usually holds shares in fewer than 40 companies. The Fund invests in securities that meet the ESG Criteria, applying an Exclusionary Approach, as described in the precontractual annex.

Other investments: other funds (including funds managed by M&G) and cash or assets that can be turned into cash quickly.

Derivatives usage: To reduce risks and costs.

Strategy in brief:

- Investment approach: the Fund invests over the long term in companies delivering solutions to better health and well-being.
- Investment manager's ESG classification: Planet+ / Impact, as defined in the Prospectus.

Benchmark: MSCI World Net Return Index

The benchmark is a comparator against which the Fund's performance can be measured. The index has been chosen as the Fund's benchmark as it best reflects the Fund's financial objective. The benchmark is used solely to measure the Fund's performance and does not constrain the Fund's portfolio construction. The Fund is actively managed. The Investment Manager has complete freedom in choosing which investments to buy, hold and sell in the Fund. The Fund's holdings may deviate significantly from the benchmark's constituents and as a result the Fund's performance may deviate materially from the benchmark. The benchmark is shown in the share class currency.

Intended Retail Investor:

The Fund is for retail and institutional investors who want a combination of capital growth and income from a portfolio that invests globally in shares of companies which deliver solutions to address better health and well-being. The Fund is appropriate for investors with sustainability preferences. The return on your Fund is directly related to the value of its underlying assets, which is determined by the market's view on how well each company is performing, as well as reflecting broader economic and political themes. As an investor your capital is at risk. The value of your portfolio, and any income you may receive from it, can go down as well as up. You may get back less than you originally invested.

Any income from the Fund may be paid out to you annually.

Term: The Fund has no set maturity date but is designed to be held for a minimum of 5 years. However, it is possible for the Directors of the company to terminate the Fund, without the prior consent of the shareholders, where it is deemed to be uneconomic to run or in the best interests of shareholders. Refer to the Prospectus for more information.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product may lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 year(s). This product has no maturity date.

We have classified this product as 4 out of 7, which is a medium risk class.

Performance scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund over the last 10 years. Markets could develop very differently in the future.

What happens if is unable to pay out?

The assets of the Fund are held in safekeeping by the Depositary detailed in the prospectus. In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). The Depositary is required by Luxembourg law to be member of the Fonds de Garantie des Dépôts Luxembourg (FGDL, the Luxembourg Deposit Guarantee Fund) <https://www.cssf.lu/en/protection-of-depositors-and-investors/>

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is € 10.000,00.

Table 1: Costs over time (Based on an investment of € 10.000,00)

Scenarios	If you exit after: 1 year	If you exit after: 5 years*
Total costs	€224,00	€622,00
Annual cost impact (*)	2,30%	1,40%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12,18% before costs and 10,78% after costs. These figures include the maximum distribution fee that the person selling you the product may charge. This person will inform you of the actual distribution fee.

Table 2: Composition of costs

One-off costs upon entry or exit		If you exit after: 1 year
Entry costs	This is the maximum entry cost M&G will charge.	1,25%
Exit costs	This is the maximum exit fee M&G will charge.	0,00%
Ongoing costs
