M&G (Lux) Global Emerging Markets Fund

a sub-fund of M&G (Lux) Investment Funds 1

SGD Class A – Accumulation shares ISIN no. LU1670625125

Managed by M&G Luxembourg S.A.

Objective and investment policy

The fund aims to provide a combination of capital growth and income to deliver a return that is higher than that of the global emerging markets stockmarket over any five-year period.

Core investment: At least 80% of the fund is invested in the shares of companies that are based, or do most of their business, in emerging markets. The fund may invest in China A-Shares via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.

Other investments: The fund may invest in other funds and cash or assets that can be turned quickly into cash.

Derivatives: The fund may use derivatives to reduce the risks and costs of managing the fund.

Strategy in brief: The investment manager selects stocks using a bottom-up approach across a range of sectors. A long-term perspective is adopted to identify companies whose long-term prospects are, in the investment manager's opinion, being undervalued. It is the core belief of the investment manager that corporate governance and company-specific factors, in particular their profitability (which is measured in terms of return on capital), drive share prices over the long run. The fund's country and sector exposure is not influenced by top-down views.

Benchmark: MSCI Emerging Markets Net Return Index

The benchmark is a comparator against which the fund's performance can be measured. It is a net return index which includes dividends after the deduction of withholding taxes. The index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents.

For unhedged and currency hedged share classes, the benchmark is shown in the share class currency.

You can find more information about the objective and investment policy of the fund in the Prospectus.

Other information

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These may have a material impact on your returns.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

• The above risk and reward indicator is based on simulated historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 6 because its simulated Net Asset Value has shown medium to high rises and falls in value historically.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

- The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.
- Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.
- The fund can be exposed to different currencies. Movements in currency exchange rates may adversely affect the value of your investment.
- The fund may invest in China A shares. Investments in assets from China are subject to changeable political, regulatory and economic conditions, which may cause difficulties when selling or collecting income from these investments. In addition, such investment is made via the Stock Connect system, which may be more susceptible to clearing, settlement and counterparty risk. These factors could cause the fund to incur a loss.
- In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.
- The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.
- Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Further details of the risks that apply to the fund can be found in the fund's Prospectus at www.mandg.lu/literature

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	4,00%
Exit charge	0,00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	2,02%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The above ongoing charge figure is an estimate of the charges because of a change to the charging structure with effect from 1st October 2020.

The ongoing charge figure may vary from year to year and excludes portfolio transaction costs. The audit fees and custody transaction charges are borne by M&G until the fund size increases to above 200 million euros. The fund's annual report for each financial year will include details on the exact charges made.

For more information on charges, please see the relevant sections of the Prospectus at www.mandg.lu/literature
