What is this product?

Type:

The Fund is a sub-fund of the Magna Umbrella Fund Plc, an open-ended variable capital umbrella investment company with limited liability and segregated liability between Funds incorporated under the laws of Ireland with registered number 277318 and authorised as an undertaking for collective investment in transferable securities pursuant to the European Communities (UCITS) Regulations, 2011 (S.I. Number 352 of 2011), as amended. The Magna Umbrella Fund Plc is authorised in Ireland by the Central Bank of Ireland.

Term:

The Fund is not subject to any fixed term.

Objectives:

The investment objective of the Fund is to achieve capital growth by investing in Global Frontier Market Securities. The Fund's assets are predominantly invested in equities and debt securities listed on recognised exchanges issued by or in relation to securities of companies, governments and government agencies in Global Frontier Countries.

The type of Global Frontier Market Securities in which the Fund may invest will consist of equity and debt related securities issued by companies, governments, government agencies and instrumentalities of such governments as appropriate.

The Fund has the ability to also invest up to a limit of 30% of its net assets in MSCI Emerging Markets Securities, other than securities of issuers based in Global Frontiers Countries. Investment in Global Frontier Market Debt and/or in the debt securities of issuers based in any of the MSCI Emerging Markets shall not exceed 15% of the Fund's net assets.

The Fund may invest in equity related securities which in the view of the Investment Manager offer an efficient means of providing the Fund with exposure to equity securities listed or traded on Recognised Exchanges located in Global Frontier Countries and which are of a type which may be invested in directly by the Fund. The Fund may also invest in equity and debt related securities issued by or in relation to companies established outside any of the Global Frontier Countries but who derive a significant portion of their income from within the Global Frontier Countries. Up to one third of the Fund's net assets may be invested in equity and debt securities of companies located in any country outside the Global Frontier Countries but which carry out business in any Global Frontier Country without any requirement that such business be predominant in the overall operation or strategy of those companies and the equity and debt securities of such companies will be listed or traded on a Recognised Exchange or be eligible for settlement through either Clearstream or Euroclear.

The Fund is considered to be actively managed in reference to the MSCI Frontier Markets Free Net Total Return Index ("Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. However, the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

The base currency of the Fund is Euro. Any non-base currency share class will be currency hedged against the currency exposure between the denominated currency of the class and the base currency of the Fund. The Fund may invest in certain derivative instruments to gain efficient exposure to underlying companies, which may result in the Fund being leveraged.

The Directors are empowered to declare and pay dividends or Shares of any Class or Fund in the Company. Your attention is drawn to the section of the Prospectus entitled "The Shares" and the sub-section therein entitled "Dividends and Distributions" for further information.

You may redeem your Shares in the Fund on any day on which banks in Dublin, London and New York are open for business.

Intended Retail Investor:

This product is for retail investors, with basic investment knowledge, seeking growth through an actively managed fund and looking to invest over the medium to long term.

Details of the up-to-date remuneration policy of the Manager, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits including the composition of the remuneration committee, if any, are available at: <https://bridgeconsulting.ie/management-company-services>; and a paper copy of the remuneration is available on request from the Manager. The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Company.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the value of your investment. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Due to effects of unusual market conditions, other risks could be triggered, such as: counterparty risk and liquidity risk
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of [the product / a suitable benchmark] over the last [x] years.] Markets could develop very differently in the future.

Recommended holding period: 5 years Investment: 10 000 EUR			
Scenarios		1 year	5 years (recommended holding period)
Minimum	Stress		
	What you might get back after costs	880 EUR	800 EUR

The unfavourable scenario occurred for an investment between 04/2015 and 03/2020, the moderate scenario occurred for an investment between 01/2015 and 12/2019, and the favourable scenario occurred for an investment between 12/2012 and 11/2017.

What happens if Fiera Capital (UK) Limited is unable to pay out?

In the event of the default or liquidation of the Investment Manager, there would be no direct impact on investors as the assets are entrusted to and kept safe by the Depositary. If the Depositary becomes insolvent or otherwise unable to deliver under the product, you may face financial loss. The default of the product manufacturer or UCITS Management Company should not affect the assets.

The Company is not a 'guaranteed UCITS' within the meaning of the applicable Irish laws and regulations. As a result, there is no guarantee scheme in place which provides a guaranteed rate of return. You will not be covered by a compensation scheme.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 year	If you exit after 5 years
Total Costs	1023 EUR	4095 EUR
Annual Cost Impact ^(*)	10.23 %	6.07 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.76% before costs and 4.69% after costs.

(Where applicable): "We may share part of the costs with the person selling you the product to cover the services they provide to you. (Where applicable) [They will inform you of the amount.]"

(Where applicable): "These figures include the maximum distribution fee that the person selling you the product may charge ([] % of amount invested / [] EUR). This person will inform you of the actual distribution fee."
