What is this product?

Type

This product is a UCITS Investment Fund.

Term

This product has no fixed end date. However the Fund, at its absolute discretion, can redeem all the shares of the Fund under the circumstances set out in the prospectus.

Objectives

Investment objective The investment objective of the Fund is to achieve a positive total return.

Investment policies The Fund will seek to achieve its objective by opportunistically accessing a variety of global return sources such as government bonds, corporate debt securities, interest rates, currencies and emerging markets, taking both long and short positions which intend to deliver positive total returns over time.

The Fund may use financial derivative instruments (instruments for which the price is dependent on one or more underlying asset, "FDI") for hedging and/or efficient portfolio management and/or investment purposes. FDI may enable the Fund to obtain market exposure in excess of the value of the Fund's assets.

The Fund may invest in investment grade securities (Baa3 or higher by Moody's Investor Services or BBB- or higher by Standards & Poor's or equivalent as detailed in the supplement) and may also fully invest in below investment grade or "high yield" bonds and fixed income securities.

The Fund is actively managed and will seek to outperform cash by 1.5%-2.5%, gross of the fees of the Manager, the Investment Manager and the Distributor, but net of all other fees and expenses of the Fund, on average per annum over the medium to long term. For the purposes of the calculation of outperformance of cash, an appropriate rate has been used as detailed in the past performance document referred to in the "Other relevant information" section. The Fund is in no way constrained by any benchmark and there is no guarantee the Fund will outperform cash. Certain indices may also be used in the management of the Fund, including for investment purposes, as detailed in the supplement.

The Fund seeks to promote environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

The Fund will promote environmental characteristics by seeking to mitigate the impact of climate change through reducing the potential carbon footprint of the Fund. The Fund will seek to avoid exposure to companies that are deemed by the Investment Manager and its delegates as the worst carbon emitters with the lowest carbon transition potential, being companies whose carbon emissions intensity exceeds 3,000 tonnes CO2 equivalent per \$1million revenue, or those companies that generate more than 1% of revenue from thermal coal extraction, arctic drilling, or oil tar sand mining.

The Fund will seek to promote social characteristics by avoiding investment in companies which are involved in the manufacture, distribution or sales of controversial weapons, or which manufacture tobacco products or generate more than 50% of their revenue from tobacco distribution or sales.

The Fund follows good governance standards in the selection of

securities for investment and seeks to engage with any companies identified as violating UN Global Compact Principles ("UNGC") to remediate where possible. UNGC is a set of globally accepted standards on human rights, labour, the environment and anti-corruption.

The Fund may invest in loan instruments. The Fund may not invest more than 50% of its net asset value in emerging markets.

In certain instances, the Fund may hold up to 20% of its assets in global equities and equity related securities listed on recognised markets but the Fund will not directly acquire such securities. Investment selection will include an assessment of the various assets' (referred above) risk/reward profiles (i.e. an investment's total return potential vs. historical and/or prospective risk) and the necessity to protect against adverse market conditions (which may involve adjusting the manner of implementation of the Fund's investment policies (i.e. such as holding cash) in response to changes in inflation, interest rates, currency appreciation/depreciation etc.).

The Fund may achieve exposure to China by investing in eligible bonds traded on the China Interbank Bond Market through Bond Connect and/or the QFI regime.

The Fund may invest up to 10% of its net asset value in contingent convertibles (bonds which may be converted into equity or be forced to suffer a write down of principal upon the occurrence of a pre-determined event).

The level of leverage for the Fund is not expected to exceed 5000% of its net asset value, although higher levels of leverage may be experienced. The Fund's market exposure may vary in time and range from an anticipated maximum long position of 5100% to an anticipated maximum short position of 5000% of the net asset value of the Fund.

Redemption and Dealing You can buy and sell shares in the Fund on demand each day which is a bank business day in Ireland or the United Kingdom ("Dealing Day").

Distribution Policy The Share Class will not distribute dividends. Income and capital gains from the Fund are reinvested.

Intended retail investor

Investors who have at least a basic understanding of financial markets and the underlying investment instruments, who understand the risk of the Fund including the risk of capital loss and that the product should not constitute a complete investment plan and:

- have a long term investment horizon
- seek a product which promotes environmental and/or social characteristics

Practical information

Depository The Fund's assets are held through its depository, State Street Custodial Services (Ireland) Limited.

Further information This document describes a Share Class of the Fund, which is a sub-fund of MGI Funds plc constituted as an umbrella, comprising a number of sub-funds (including the Fund), each having a separate portfolio of assets. As a matter of Irish law, the assets of one sub-fund will not be available to meet the liabilities of another. However, MGI Funds plc is a single legal entity that may operate, have assets held

on its behalf, or be subject to claims in other jurisdictions that may not necessarily recognise such segregation. Accordingly, there is no absolute certainty that the assets of a sub-fund will not be exposed to the liabilities of other sub-funds of MGI Funds plc. Investors do not have the right to exchange shares in one sub-fund for shares in another sub-fund. The prospectus, latest annual and semi-annual reports, which are prepared

for the entire Umbrella, and information on other share classes are available free of charge in English on <https://investment-solutions.mercer.com>.

The net asset value per share is published on www.bloomberg.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Mercer Global Investments Management Limited is unable to pay out?

The Fund is responsible for paying redemptions and any other payment obligations due to investors. The Manager is not responsible for meeting the obligations of the Fund to investors from its own assets. The Fund's assets are safeguarded by the Depositary in accordance with applicable law. If the Fund is unable to pay out to investors due to its insolvency, investors will be unsecured creditors in the insolvency process and are likely to suffer a financial loss. Investors may also suffer a financial loss in the event of the Depositary's insolvency or default (or that of any custody delegate). Investors in UCITS, such as the Fund, are not covered under the terms of the Irish statutory investor compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	94 EUR	471 EUR
Annual cost impact*	1.0%	1.0%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.4% before costs and 0.5% after costs.
