

MFS® INVESTMENT FUNDS —
BLENDED RESEARCH® EMERGING MARKETS EQUITY FUND
(Euro W Class)

a sub-fund of MFS Investment Funds

This fund is managed by MFS Investment Management Company (Lux) S.à r.l.
ISIN: LU1713399795

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is capital appreciation, measured in U.S. dollars.

Investment Policy

The fund invests primarily (at least 70%) of its net assets in equity securities of issuers that are tied economically to emerging market countries. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

The Investment Manager uses a bottom-up approach to buying and selling individual investments for the fund. Investments are selected primarily based on blending fundamental and quantitative research to create a blended rating for an issuer. When the Investment Manager's fundamental rating is not available, the Investment Manager treats the issuer as having a neutral fundamental rating. The Investment Manager may consider environmental, social and governance (ESG) factors in its fundamental investment analysis alongside other factors. The fund falls within Article 6 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") and does not promote an environmental or social characteristic, or have sustainable investment as its objective. The Investment Manager then constructs the portfolio using a portfolio optimization process that considers the blended rating, as well as issuer, industry, and sector weightings, market capitalization, measures of expected volatility of the fund's returns and other factors, with a goal of constructing a portfolio with a target predicted tracking error of approximately 2% compared to the MSCI Emerging Markets Index (net div). Tracking error measures how the differences between fund and benchmark returns vary over time.

The Investment Manager has the discretion to adjust the inputs and parameters for the optimization process and the fund's portfolio holdings.

Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the benchmark to take advantage of attractive investment opportunities.

Distributions

Income will not be distributed to unitholders but reflected in the assets of the fund.

Redeeming Shares

You may sell your units on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

Tracking error generally measures how the differences between the fund's monthly returns and the Index's monthly returns have varied over a specified time period. A higher tracking error means fund and index returns are less correlated, while a lower tracking error means the returns are more correlated. Actual tracking error realised will depend partly on market conditions and therefore may deviate from predicted tracking error.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The fund is in category 6 because there has been high fluctuations in the fund's return historically.

Equity Risk: Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, geopolitical, public health, and regulatory conditions. This risk may be higher where the fund invests in a single country or region.

Emerging Markets Risk: Emerging markets can have less developed markets and legal, regulatory, and accounting systems, and greater political, social, and economic instability making them more volatile and less liquid than more developed markets.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Strategy Risk: The fund's strategy to blend fundamental and quantitative research and to maintain a target predicted tracking error over time may not produce the intended results. Quantitative models (both proprietary and third-party) may not produce the intended results due to various factors used in the models and technical issues in the use of the models. In addition, the Investment Manager's fundamental research is not available for all issuers. There also is no assurance that the fund will meet its target predicted tracking error, or that the fund's predicted tracking error and actual tracking

error will be similar. In addition, the Investment Manager's fundamental research is not available for all issuers.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.

CHARGES

You pay the following costs for the operation of the fund. These charges reduce the value of your investment.

One-off charges taken before or after you invest

Entry charge.....0.00%
Exit charge.....0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges.....0.51%

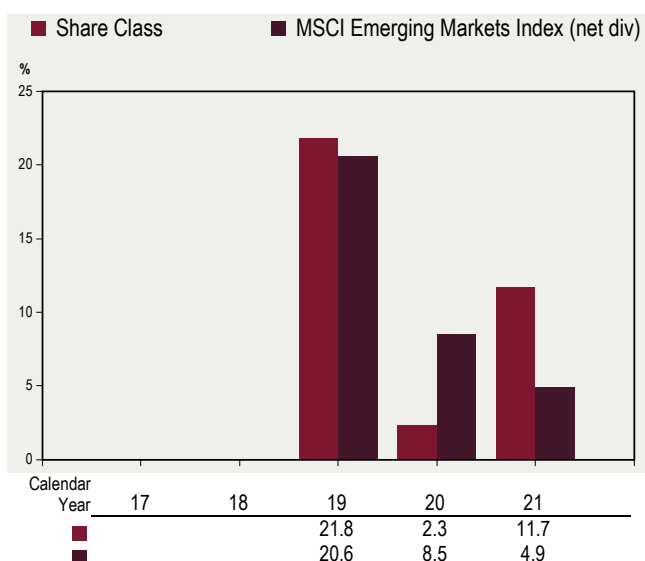

Charges taken from the fund under certain specific conditions

Performance fee.....0.00%

The entry and exit charges shown are the highest possible charges you would pay. Please consult your financial intermediary to find out your actual charges which might be less.

The ongoing charges figure shown here is based on expenses for the year ended 30 September 2021. Ongoing charges may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the prospectus, which is available at fcp.mfs.com.

PAST PERFORMANCE

Past performance is not a guide to future performance. Performance shown takes into account ongoing charges but not entry and exit fees, if any, and is calculated in Euros. Performance for the fund's benchmark is also shown.

The fund was launched in 2018.

PRACTICAL INFORMATION

Depositary

State Street Bank International GmbH, Luxembourg Branch, is the depositary.

Exchanging Between Funds

You may exchange your units into units of another fund of MFS Investment Funds or into units of another class within the same fund of MFS Investment Funds.
