ISIN: LU0366721537

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is capital appreciation, measured in Euros.

Investment Policy

The fund invests primarily (at least 70%) in equity securities of companies located in developed and emerging market countries. The fund generally focuses its investments in equity securities of larger companies and companies located in developed market countries. The fund generally invests in 50 or fewer companies. The fund will promote an environmental characteristic within the meaning of Article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR"). Please refer to the fund's Prospectus and website for additional information. The Investment Manager may also consider environmental, social and governance (ESG) factors in its fundamental investment analysis alongside other factors. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

The fund's benchmark, MSCI World Index (net div) (EUR), is indicated for performance comparison only. Although the fund's investments will generally be represented in the benchmark, components are likely to be weighted differently from the benchmark and the fund is likely to invest outside of the

benchmark to take advantage of attractive investment opportunities. The fund is actively managed within its objectives and the investment strategy will not restrict the extent to which portfolio holdings may deviate from the benchmark. It is expected that the fund's deviation from the benchmark will be significant.

Distributions

Income will not be distributed to unitholders but reflected in the assets of the fund.

Redeeming Shares

You may sell your units on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The fund is in category 6 because there has been high fluctuations in the fund's return historically.

Equity Risk: Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, geopolitical, public health, and regulatory conditions. This risk may be higher where the fund invests in a single country or region or invests in a smaller number of companies. The

fund invests in larger companies, which may underperform the broader market over time.

Emerging Markets Risk: Emerging markets can be more volatile and less liquid than more developed markets.

Currency Risk: Changes in currency rates can significantly affect the value of your investment, and may also affect the financial condition of the issuers in which the fund invests.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.

CHARGES

You pay the following costs for the operation of the fund. These charges reduce the value of your investment.

One-off charges taken before or after you invest

Entry charge.....	0.00%
Exit charge.....	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges.....	0.82%
----------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee.....	0.00%
----------------------	-------

The entry and exit charges shown are the highest possible charges you would pay. Please consult your financial intermediary to find out your actual charges which might be less.

The ongoing charges figure shown here is based on expenses for the year ended 30 September 2021. Ongoing charges may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the prospectus, which is available at fcp.mfs.com.

PAST PERFORMANCE

Past performance is not a guide to future performance. Performance shown takes into account ongoing charges but not entry and exit fees, if any, and is calculated in U.S. Dollars. Performance for the fund's benchmark is also shown.

The fund was launched in 2008.
