

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Multilabel SICAV - Artemide,

a sub-fund of the Multilabel SICAV  
(ISIN: LU0515666294, share class: B - EUR)  
GAM (Luxembourg) S.A., part of GAM Holding AG, manages this Fund

### Objectives and investment policy

- The aim of the sub-fund ("Fund") is to achieve above-average capital growth over the long term while maintaining an appropriate degree of diversification. For this purpose, it invests directly or indirectly in European shares (with a special focus on Italian shares) or debt securities.
- The Fund invests mainly in European shares and debt securities. In addition, however, it also uses complex financial instruments (e.g. derivatives), for example in order to protect its biggest investments from a loss of value.
- The Fund invests in floating-rate and fixed-rate debt securities and money market instruments issued by governments and companies. The Fund is also free to invest in debt securities which can be converted into shares.
- The Fund may invest in other regulated investment funds (up to 10% of its assets) and complex financial instruments (e.g. derivatives) as well as hold a large amount of.

The Fund also has the following characteristics of importance to investors:

- The Fund is actively managed. In order to calculate the performance-related fee the Fund follows the benchmark Euro Short-Term Rate (ESTR) + 8.5 Bps. The Fund has freedom of choice concerning investments and their weighting. It is able to invest in stocks included in the benchmark index, although is independent of the benchmark index.
- Investors may buy or sell the Fund on any bank working day in Luxembourg.
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Income is reinvested in the share class.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within four years.

### Risk and reward profile

The above indicator shows what risk and reward characteristics the Fund has, based on the Fund's historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- The past performance of the Fund provides no indication of its current or future performance.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulence) the tradeability of the assets in the Fund may be limited. In such situations, it may be possible to sell the assets in the Fund only at a loss, which will reduce the value of the Fund.
- The Fund invests in debt securities which are exposed to the risk that the borrower will be unable to meet its payment obligations.
- The Fund invests in complex financial instruments (e.g. derivatives), the value of which is connected to underlying assets. Certain of these financial instruments may produce a leverage effect which may have a sharp impact on the Fund's net asset value.
- If the Fund invests in non-standardised complex financial instruments, it is exposed to the risk that its counterparty will default.

## Charges

The costs borne by you are used to pay for the management of the Fund and its distribution and marketing. These costs reduce the Fund's performance.

### One-off charges taken before or after you invest

Subscription fee	5.00%
Redemption fee	3.00%
Conversion fee	2.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	1.77%
-----------------	-------

### Charges taken from the fund under certain specific conditions

#### Performance fee

10.00% of the outperformance in the case of a positive absolute performance and simultaneous positive relative performance against the benchmark index (Euro Short-Term Rate (ESTR) + 8.5 Bps (in Fund currency)) since the beginning of the year.

Performance fee charged in the last financial year: 0.75%.

Both the subscription and redemption fees and the conversion fees are maximum rates. You may be charged less than this. Your advisor will be able to provide you with further information.

The ongoing charges are calculated at the end of the financial year. The figure may differ from year to year. It does not include:

- Fees dependent on performance.
- Transaction costs, except if the Fund has to pay issue and redemption fees to buy or sell other collective investments.

Further information on costs is provided in the full prospectus. This can be downloaded from the websites [www.funds.gam.com](http://www.funds.gam.com) and [www.fundinfo.com](http://www.fundinfo.com).

## Past performance

- Past performance provides no indication of current or future performance.
- The performance data refer to the net asset value. Fees incurred on issue, redemption or exchange (e.g. transaction and custody charges incurred by the investor) are not included.
- Activation year of the share class: 2010
- Past performance has been calculated in EUR.
- This fund saw a benchmark change in January 2022, all benchmark performance before this date reflects the old benchmark.
