Multipartner SICAV - Konwave Gold Equity Fund,

a sub-fund of the Multipartner SICAV
(ISIN: LU1819711935, share class: R - USD)
GAM (Luxembourg) S.A., part of GAM Holding AG, manages this Fund

Objectives and investment policy

- The aim of the sub-fund ("Fund") is to achieve long-term capital growth. For this purpose, the Fund invests in shares in the gold sector.
- The Fund invests at least 2/3 of its assets in the shares of companies in the gold sector. This sector includes companies which focus their operations on the exploration, production, processing and trading mainly of gold but also, to a lesser degree, of other precious metals.

The Fund also has the following characteristics of importance to investors:

- The Fund is actively managed. In order to calculate the performance-related fee the Fund follows the benchmark FTSE Gold Mines Series (All Mines). The Fund has freedom of choice concerning investments and their weighting. It is able to invest in stocks included in the benchmark index, although is independent of the benchmark index.
- Investors may buy or sell the Fund on any bank working day in Luxembourg.
- The Fund has several share classes. These may differ with regard to fees, minimum investment, currency, use of revenues and investor qualification.
- Income is reinvested in the share class.
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within seven years.

Risk and reward profile

The above indicator shows the risk-return characteristics of the Fund based on its historical performance over the last five years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index.

- The Fund is assigned to the above category based on its historical fluctuations in value.
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment.
- The past performance of the Fund provides no indication of its current or future performance.
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past.
- The Fund does not offer the investor a guaranteed return. Nor does it guarantee the fixed repayment of the money invested in the Fund by the investor.

The indicator takes account of those risks which are entailed in the Fund's net asset value. These mainly involve fluctuations in the value of investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulence) the tradeability of the assets in the Fund may be limited. In such situations, it may be possible to sell the assets in the Fund only at a loss, which will reduce the value of the Fund.
