STRATEGY

IDENTIFICATION

MANAGEMENT OBJECTIVE

The Fund's management objective is to offer unitholders:

- (i) partial and variable exposure, determined on the basis of a quantitative algorithm, to risky assets (hereinafter referred to as "Risky Assets"). Risky Assets are made up of long and/or short positions in different asset classes (equities, bonds) and incorporate non-financial criteria. The remaining exposure corresponds to prudent management enabling compliance with the protection mechanism outlined below;
- (ii) a rolling protection mechanism under which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of each month, as described below.

Taking into account the rolling protection mechanism, exposure to Risky Assets may vary between 0% and 75%, and may therefore be considered partial. Exposure to Risky Assets may become zero and, in this case, there is a risk that the Fund will implement prudent management for a month.

BENCHMARK INDEX:

Because of its management objective and the strategy pursued, the Fund cannot be compared to any benchmark.

BENCHMARK INDICES AS DEFINED IN THE BENCHMARK REGULATION

Within the framework of its investment strategy, the indices used by the Fund within the meaning of Regulation (EU) 2016/1011 of the European Parliament and of the Council (the "Benchmark Regulation"), their administrator as well as their registration status in the register referred to in Article 36 of the said Regulation are listed in the table below.

This register shall include a list containing the identity of all (i) administrators located within the European Union who have been approved or registered in accordance with Article 34 of the Benchmark Regulation, (ii) administrators located outside the European Union who fulfil the conditions set out in Article 30(1) of the Regulation, (iii) administrators located outside the European Union who have obtained recognition in accordance with Article 32 of the Regulation, (iv) administrators located outside the European Union who provide benchmark indices which have been authorised in accordance with the procedure laid down in Article 33 of the Regulation, as well as supervised entities authorising benchmark indices in accordance with Article 33 of the Regulation.

Name of the indices used by the Fund as defined in the Benchmark Regulation	Names of the administrators	Registration status
BNP Paribas Equity Eurozone Climate Care NTR Index	BNP PARIBAS SA	Registered in accordance with Article 34
BNP Paribas Equity US Climate Care NTR Index	BNP PARIBAS SA	Registered in accordance with Article 34
BNP Paribas Equity Japan Climate Care NTR Index	BNP PARIBAS SA	Registered in accordance with Article 34

For further information about these indices, investors are asked to consult the following websites: <https://indx.bnpparibas.com>.

The Management Company has a procedure for monitoring the benchmark indices used, which describes the measures to be implemented in the event that substantial changes are made to an index or if the index should cease to be provided.

INVESTMENT STRATEGY

STRATEGY USED TO ACHIEVE THE MANAGEMENT OBJECTIVE

In order to achieve its management objective, the Fund enters into a forward contract allowing it to benefit from variable synthetic exposure to the performance of Risky Assets and the rolling protection mechanism, as described below.

Description of Risky Assets

Risky Assets consist of long positions on equities and long and/or short positions on bonds.

Risky Assets are a diversified strategy that represents a dynamic investment in a basket of indices and futures selected according to a systematic model.

Risky Assets are based on a systematic model developed by BNP Paribas. The objective of the model used to build the portfolio of Risky Assets is to offer exposure to the performance of a quantitative "long/short" strategy and to determine the weights that will be assigned to each underlying asset in order to maximise the expected return under volatility constraints.

The Risky Assets' investment universe comprised two asset classes when the Fund was launched:

- (i) Equities (Eurozone, US, Japan using financial indices)
- (ii) Government bonds

With regard to the "equities" asset class:

The indices used for the "equities" asset class are the BNP Paribas Equity Eurozone Climate Care NTR Index (Bloomberg code: BNPIEZCC Index) denominated in EUR and calculated net dividends reinvested, BNP Paribas Equity US Climate Care NTR Index (Bloomberg code: BNPIUSCC Index) denominated in USD and calculated net dividends reinvested and BNP Paribas Equity Japan Climate Care NTR Index (Bloomberg code: BNPIJPCC Index) denominated in JPY and calculated net dividends reinvested. These indices, rebalanced quarterly using a systematic model, are diversified indices representing a dynamic investment in a basket of equities from the Eurozone, North American and Japanese markets respectively (the "Benchmark Universe"). The investment universe of the indices is made up of equities of companies of all market capitalisations selected on the basis of their ESG score according to the rating established by Vigeo Eiris and non-financial criteria provided by BNP PARIBAS ASSET MANAGEMENT France, liquidity constraints and their energy transition rating.

Equities are selected using a "selective" approach, which excludes at least 25% of the Benchmark Universe of each index at each re-weighting, and a "Best-In-Class" approach, which aims to select the leading companies in their sector.

The allocation algorithm then follows a thematic approach, assigning a weighting to each equity in the investment universe in order to optimise the energy transition and carbon footprint reduction criteria of the resulting basket of equities. The non-financial criteria apply to all securities in the Benchmark Universe.

To find out more about the indices used, investors should go to: <https://indx.bnpparibas.com>. Details of the indices and performance data are available on that same page. The method used to calculate the indices and any associated costs are available at: <https://docfinder.bnpparibas-am.com/api/files/E3D3D1A8-A161-483D-9932-91B930E9ABB7>. Investors can obtain a paper copy of the index methodologies within one week by sending a written request to BNP PARIBAS ASSET MANAGEMENT France – CIB STRATEGIES SALES SUPPORT – TSA 47000 – 75318 Paris Cedex 09, France. Email address: list.amqpecibsalessupport@bnpparibas.com.

With regard to the "government bonds" asset class:

Government bonds comply with the BNP Paribas Group's financial security framework, which has set standards in terms of compliance with economic or trade sanctions and the fight against money laundering, terrorist financing and corruption, which govern and limit exposure to certain territories. Information is available at the following page: <https://group.bnpparibas/publications>. In addition, a democracy score based on criteria established according to the signature of international ESG frameworks, standards on social criteria relating to human rights, controversial weapons, gender inequality, freedom of expression as well as governance and anti-corruption criteria, in favour of political stability and the rule of law are also used for the "government bonds" asset class.

NACHHALTIGKEITSGARANT 90

The process for selecting the underlying assets from each asset class is also based on criteria related to geographical diversification, liquidity and transparency.

Using an algorithm, automatic reallocation is carried out daily between the Risky Assets' different underlying assets. Optimal diversification, determined by the Management Company, will be achieved by applying a systematic optimisation model for the risk/return ratio based on historical data (performance, volatility and correlation). Exposure to Equity underlying assets may only be positive, while exposure to bond underlying assets may be positive or negative. In addition, the parameters of the allocation model have been determined to favour exposure to "Equity" underlying assets over other underlying assets; performance criteria are only considered for the bond component. Furthermore, as the underlying assets of the Risky Assets are denominated in currencies other than that of the Fund, currency risk hedging is implemented within the Risky Assets.

In addition, Risky Assets also benefit from a volatility control mechanism aimed at maintaining annual volatility at the target level of around 12%. Volatility is a risk indicator. The lower it is, the less risky the Fund is considered to be. However, the volatility criterion does not capture all of the specific risks of the underlying indices.

Sliding protection mechanism:

The Fund benefits from a sliding protection mechanism. The level of protection is re-evaluated every month. As such, for each valuation, the Fund's net asset value will be at least equal to the current month's level of protection revalued as 90% of the net asset value observed on the first working day of each month, with the exception of the first working day of each month, for which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of the previous month.

The rolling protection mechanism is therefore activated using a quantitative mechanism; it varies daily depending on changes to the Risky Assets' performance and the levels of protection acquired under the rolling protection mechanism as detailed above.

Exposure to Risky Assets may vary between 0% and 75%, and may therefore be considered partial. Exposure to Risky Assets may become zero and, in this case, there is a risk that the Fund will implement prudent management for a month.

Given that exposure to Risky Assets is achieved via conclusion of a forward contract (including TRS), the Fund may, as part of this synthetic replication, invest its assets in money market instruments and may use techniques for effective portfolio management (temporary sales or purchases of securities). The Fund may also invest in financial instruments (equities, bonds etc.), the yield of which will be exchanged against a monetary rate via the conclusion of forward contracts.

The Fund invests at least 75% of its net assets continuously in equities and/or securities similar to shares issued by companies in all countries respecting non-financial criteria.

The Management Company has developed tools used to check, whenever necessary, the valuation of the forward financial instruments provided by the counterparty to the contracts.

Information on the SFDR:

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR) establishes the rules regarding transparency and the provision of sustainability-related information.

The Fund promotes environmental, social and governance (ESG) characteristics in accordance with Article 8 of the SFDR. BNP PARIBAS Asset Management applies a sustainable investment approach, which includes the implementation of a sectoral policy and standards related to responsible business conduct within investment processes.

ESG criteria are commonly used to assess the level of sustainability of an investment. The extent and manner in which sustainable investment issues and risks are integrated into this sustainable investment approach vary depending on the type of strategy, asset class, region and instruments used.

For the purposes of exposure, as regards the investment strategy, via a forward financial instrument (synthetic exposure), analysing sustainability factors and risks as part of the investment decisions is also carried out when selecting the securities to be held in the Fund's assets.

The application of a non-financial strategy may also include methodological limitations, such as the risk of taking ESG criteria into account or the risk of systematic allocation incorporating non-financial criteria.

NACHHALTIGKEITSGARANT 90

Further information and documents on BNP Paribas Asset Management's approach to sustainable investment are available online at <https://www.bnpparibas-am.com/en/sustainability/>.

Main asset classes used (excluding embedded derivatives)

The Fund's portfolio is made up of the following asset classes and financial instruments:

Equities

The Fund may invest in capital securities and similar securities (shares, ADRs, GDRs, certificates and/or others, shares of closed-end funds etc.):

- Issued by listed and/or unlisted companies (up to a limit of 10% of the Fund's net assets) on regulated markets.
- Issued in euro or in other currencies.
- of all nationalities;
- regardless of business sector.

Direct investments in the securities mentioned above will be systematically hedged through the use of total return swaps or other derivative financial instruments with the same characteristics so as to avoid exposing the Fund to additional equity risk. Such investments are made within the scope of the Fund's investment strategy.

The Fund invests at least 75% of its net assets continuously in shares and/or securities similar to shares issued by companies in all countries.

Debt securities and money market instruments

The Fund may be invested in money market instruments (such as French Treasury bills, short-term negotiable securities) or negotiable debt securities denominated in all currencies. These instruments comprise securities acquired outright or under reverse repurchase agreements.

<i>INTEREST RATE SENSITIVITY RANGE</i>	<i>From 0 to 1</i>
<i>CURRENCY OF SECURITIES</i>	<i>All currencies</i>
<i>LEVEL OF CURRENCY RISK</i>	<i>None*</i>
<i>RANGE OF EXPOSURES CORRESPONDING TO THE GEOGRAPHIC AREA</i>	<i>Eurozone countries: 0% to 25% of net assets</i>
<i>OF THE SECURITIES' ISSUERS</i>	<i>Countries outside the Eurozone (OECD countries): from 0% to 10% of net assets</i>

* Assets denominated in a currency other than the euro are matched with one or more currency swaps in order to systematically hedge them against currency risk.

The Fund may invest up to 25% of its net assets in bonds of any kind: fixed-rate bonds, variable-rate bonds, indexed bonds (inflation, CMRs, CMSs). These instruments consist primarily of securities that have been acquired outright or purchased under reverse repurchase agreements and had a minimum rating of BBB- (Standard & Poor's, Fitch) or Baa3 (Moody's) at purchase, or an internal rating assigned by the Management Company that meets equivalent criteria.

If there is a difference in the "issue" rating between agencies (S&P, Moody's, Fitch), the least favourable rating will be used. If the issue is not rated by any of the three agencies, equivalent "issuer" ratings will be used. If the "issuer" ratings differ between the agencies, the least favourable rating will be used.

The manager has internal methods for evaluating credit risk when selecting securities for the Fund and does not exclusively or systematically use the ratings issued by rating agencies. The aforementioned ratings are also used to make an overall assessment of the credit quality of an issue or issuer on which the manager bases their own convictions when selecting securities.

NACHHALTIGKEITSGARANT 90

If the rating of issuers is downgraded below "Investment grade", the Management Company will, in the interests of the unitholders, sell the securities.

Debt securities and money market instruments may account for up to 25% of the Fund's net assets. Investments outside the eurozone may account for up to 10% of the Fund's net assets.

Such investments are made within the scope of the Fund's investment strategy.

Units or shares of UCIs

For the purposes of liquidity management or specific management needs, the Fund may invest up to 10% of its net assets in units or shares of French or European UCITS and investment funds (AIF).

These UCITS and investment funds (AIFs) include:

- UCITS
- French investment funds (AIFs) or investment funds (AIFs) established in other European Union member states or investment funds established on the basis of a foreign law that meet the criteria set out in Article R. 214-13 of the French Monetary and Financial Code.

The UCIs mentioned above may be managed by the Management Company or by companies affiliated to it within the meaning of Article L. 233-16 of the French Commercial Code.

Derivatives

The Fund may use forward financial instruments, traded on regulated (French and foreign) or over-the-counter markets. The Fund may use the forward financial instruments mentioned below on these markets in order to be exposed to the investment strategy and to achieve hedging and management objectives where applicable:

- financial flow exchange contracts (swaps).
- futures and currency futures,
- options.

Transactions on these instruments are performed within the limit of approximately 100% of the Fund's assets and will primarily be swap contracts.

Where swap contracts are concerned, the Fund may enter into over-the-counter financial contracts (swaps), including total return swaps that exchange the performance of the Fund's assets against a fixed or variable rate, and one or more swaps that exchange a fixed or variable rate, as required, against the performance of the investment strategy.

Maximum proportion of assets under management that may be the subject of a total return swap: 220% of net assets. Proportion of assets under management expected to be the subject of a total return swap: 200% of net assets.

These financial instruments will be entered into with counterparties selected by the Management Company in line with its best execution and best selection policy from among those institutions with their registered office located in an OECD or European Union Member State referred to in Article R. 214-19 of the French Monetary and Financial Code, and who are rated as good quality issuers (equivalent to Investment Grade). These counterparties may be companies related or affiliated to the Management Company and in particular BNP PARIBAS SA in respect of the swap contracts, where appropriate, exchanging a fixed or variable rate against the performance of the investment strategy.

Instruments with embedded derivatives

The Fund does not plan to use securities with embedded derivatives (warrants, Credit Linked Notes, EMTNs etc.). Any warrants or rights obtained following transactions affecting the securities in the portfolio are, however, authorised.

Deposits

In order to achieve the management objective, the Fund may make deposits of a maximum term of 12 months, with one or more credit institutions and up to the limit of 10% of the net assets.

Cash borrowings

In the normal course of operations, the Fund may occasionally have a current account deficit and therefore need to borrow cash, subject to a limit of 10% of its net assets.

Temporary purchases and sales of securities

Types of transactions used: For the purposes of managing the Fund efficiently, the Management Company reserves the right to carry out temporary purchases and sales of securities, in particular: repurchase agreements, reverse repurchase agreements against cash, lending/borrowing of debt securities, capital securities and money market instruments, in accordance with the provisions of Article R. 214-18 of the French Monetary and Financial Code.

Types of transactions, all of which must be limited to achieving the management objective: All transactions are conducted so as to achieve the management objective or to optimise cash management and to comply at all times with constraints relating to the nature of the securities held.

Maximum proportion of assets under management that may be subject to such transactions or contracts: up to 100% of net assets.

Expected proportion of assets under management that will be subject to such transactions or contracts: Between 0% and 30% of net assets.

Potential leverage related to temporary purchases and sales of securities: no Remuneration: see "Charges and Fees" of prospectus.

All transactions will be conducted under market conditions and any income generated will be paid in full to the Fund.

These transactions will be entered into in line with the Management Company's best execution policy, and will be entered into with counterparties selected by the Management Company from among those institutions whose registered office is located in an OECD or European Union member state referred to in Article R. 214-19 of the French Monetary and Financial Code, with a good quality issuer rating. These transactions may be conducted with companies affiliated to the BNP Paribas Group.

(i) Contracts amounting to collateral

To guard against counterparty default, temporary purchases and sales of securities and transactions on over-the-counter derivative instruments may involve the pledging of securities and/or cash as collateral, and the Depositary will hold these securities and/or this cash in segregated accounts.

The eligibility of securities received as collateral is determined in accordance with investment constraints and in line with a discount procedure determined by the Management Company's risk department. Securities received as collateral must be liquid and capable of being transferred quickly on the market. The securities received from a single issuer may not exceed 20% of the Fund's net assets (with the exception of securities issued or guaranteed by an eligible OECD member state, in which case this limit may be increased to 100%, provided that this 100% is distributed among six issues, none of which represents more than 30% of the Fund's net assets). They must be issued by an entity that is independent of the counterparty.

NACHHALTIGKEITSGARANT 90

Assets
Cash (EUR, USD and GBP)
Interest rate instruments
Securities issued or guaranteed by an eligible OECD member country The Fund may receive securities issued or guaranteed by an eligible OECD member country as collateral, for more than 20% of its net assets. The Fund may thus be fully guaranteed by securities issued or guaranteed by a single eligible OECD Member State.
Supranational securities and securities issued by government agencies
Securities issued or guaranteed by a government of another eligible country
Debt securities and bonds issued by a company whose registered office is located in an eligible OECD member country
Convertible bonds issued by a company whose registered office is located in an eligible OECD member country
Units or shares of money market UCITS
MMI (money market instruments) issued by companies whose registered office is located in an eligible OECD member country or in another eligible country.
Eligible indices and related shares

Collateral other than in cash must not be sold, reinvested or pledged as security and is held by the depositary in a segregated account.

Collateral received as cash may be reinvested in accordance with AMF Position no. 2013-06. Cash received may therefore be held on deposit, invested in high-quality government bonds, used in reverse repurchase transactions or invested in short-term money market UCITS.

TOTAL RISK

To calculate the total risk of the Fund, the Management Company uses the risk value (absolute VaR) method. The Fund's leverage, assessed as the sum of the nominal positions on the financial contracts used, is 200%. However, it may reach a higher level.

FUND	VAR					
	MIN		AVERAGE		MAX	
	HIST	MC	HIST	MC	HIST	MC
NACHHALTIGKEITSGARANT 90	4.28%		4.90%		5.35%	

RISK PROFILE

Your money will be invested primarily in financial instruments selected by the Management Company. These instruments will be subject to financial market trends and risks.

Risk of capital loss

Due to the rolling protection mechanism, the Fund's net asset value may not decrease daily by more than 10% from the net asset value observed on the first working day of the month. Thus, if the level of the Fund's net asset value decreases, the levels of protection acquired will also fall. There is therefore a risk that holders will lose almost all of their capital after a long holding period.

Risks related to the model used by Risky Assets

The selection and allocation model used by Risky Assets is based on criteria for calculating returns and risks based on historically observed levels. So there is a risk that the model will not be efficient, and there is no guarantee that past market situations will recur in the future. The application of the model does not guarantee future results. Thus, through the model put in place, trend reversals should lead to a counter-performance of the Fund.

Risk related to changes in the underlying assets

Given the structure of the Fund, its valuation will depend on the development of the underlying assets comprising the Risky Assets. As Risky Assets potentially consist of long or short positions on these underlying assets, a fall or rise in the value of one or more underlying assets may lead to a fall in the Fund's net asset value.

Equity risk

The risks associated with investments in equities making up the indices used for the "equities" asset class include significant price fluctuations, negative information about the issuer or the market and the subordination of a company's shares to its bonds. Moreover, these fluctuations are often intensified in the short term. The risk that one or more companies suffer a downturn or fail to grow can have a negative impact on the performance of the Fund at a given time. There is no guarantee that investors will see an appreciation in value. The value of investments and the income they generate can go down as well as up.

Interest rate risk

The Fund is exposed to the interest rate market (via government bonds from OECD countries). The Fund's net asset value may decline if the algorithm fails to properly anticipate interest rate fluctuations in the countries concerned.

Counterparty risk

Counterparty risk refers to losses incurred by the Fund as a result of over-the-counter transactions concluded with a counterparty if that counterparty defaults. This risk exists primarily for futures contracts (including total return swaps), repurchase agreements etc. that the Fund may enter into with BNP Paribas or any other counterparty. However, counterparty risk is limited by the implementation of a guarantee granted to the Fund in accordance with the regulations in force.

Risk of conflicts of interest

The Fund is exposed to a risk of conflict of interest in particular in the conclusion of temporary sale or purchase of securities or financial contracts with counterparties related to the group to which the Management Company belongs, but also in the event that the Management Company is exposed via forward financial instruments to an index that is calculated, published and disseminated by an entity belonging to the same group as that of the Management Company. In this case, there is a potential conflict of interest between the interests of clients and the interests of the group to which the Management Company belongs. The Management Company's use of an effective conflict-of-interest management policy ensures that its clients' interests remain paramount.

Currency risk

Risky Assets may be exposed to underlying assets denominated in currencies other than that of the Fund. Currency risk hedging is therefore implemented within the Risky Assets with the aim of protecting against this risk. This hedging may, however, be imperfect. Consequently, there is a risk linked to fluctuations in these currencies against the euro.

Risks associated with collateral management

Management of collateral received in connection with securities-financing transactions and over-the-counter forward financial instruments (including total return swaps) may involve certain specific risks such as operational risks or custody risk. As such, these transactions may have a negative effect on the Fund's net asset value.

Legal risk

The use of temporary purchases and sales of securities and/or forward financial instruments (including total return swaps [TRS]) may result in a legal risk related to the execution of contracts.

NACHHALTIGKEITSGARANT 90

Risk associated with the incorporation of non-financial criteria

A non-financial approach may be implemented in different ways by management companies, in particular due to the lack of common or harmonised labels at European level. This also means that it can be difficult to compare strategies that incorporate non-financial criteria, as the selection and weighting applied to some investments can be based on indicators that may share the same name but have different underlying meanings. When evaluating a security on the basis of non-financial criteria, the Management Company may also use data sources provided by external research providers. Given the evolving nature of ESG, these data sources may currently be incomplete, inaccurate or unavailable. The application of responsible business conduct standards and non-financial criteria in the investment process may lead to the exclusion of the securities of certain issuers. Therefore, the financial performance of the Fund may sometimes be better or worse than the performance of related funds that do not apply these standards.

Sustainability risk

Unmanaged or unmitigated sustainability risks can impact returns on financial products. For example, if an environmental, social or governance event or situation were to occur, it could have an actual or potential negative impact on the value of an investment. The occurrence of such an event or situation can also lead to a change in the Fund's investment strategy, which can involve the exclusion of securities of certain issuers. More specifically, the negative effects of sustainability risks can affect issuers by means of a series of mechanisms, including: 1) a decrease in revenues; 2) higher costs; 3) damages or depreciation of asset value; 4) higher cost of capital; and 5) regulatory fines or risks. Owing to the nature of sustainability risks and specific issues such as climate change, the likelihood that sustainability risks will have an impact on returns on financial products is likely to increase in the longer term.

Risks relating to systematic allocation incorporating non-financial criteria

Some systematic strategies use non-financial filters and investment mechanisms applied during periodic adjustments. There is no guarantee that such non-financial filters or mechanisms will be applied at any time. For example, if a company is deemed to no longer meet an ESG requirement in between two adjustments of a given strategy, it can only be excluded at the next adjustment.

Volatility and protection mechanism risk

Due to the volatility control and protection mechanism implemented, exposure to Risky Assets may be limited and therefore the extent to which the environmental or social characteristics of the investment objective are achieved may be reduced.

Guarantee

BNP Paribas SA grants to the Fund, for a renewable period of 7 years, protection under which BNP Paribas SA guarantees to the Fund that for each Fund valuation day, the net asset value shall be at least equal to 90% of the net asset value observed on the first working day of the month (the "Protection"), with the exception of the first working day of each month, for which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of the previous month. The initial Protection level enjoyed by the Fund corresponds to 90% of the net asset value at the launch of the Fund. Each year, on the anniversary date of the Fund's creation (the "Extension Date"), the guarantee will be extended for a further year. However, prior to this date, BNP PARIBAS may choose to terminate the extension of the Protection, subject to a notice period of three months from the Extension Date concerned, as notified to the Management Company. If the Protection is not extended, (i) unitholders will be informed of this change and of the expiry date of the Protection, (ii) the Protection will continue to have effect until its expiry, (iii) the Management Company may decide to suspend subscriptions in the Fund and make the decision to dissolve the Fund on expiry of the Protection.

Any modification of the Protection (excluding its renewal or extension) shall be subject to the prior approval of the Autorité des marchés financiers (French Financial Markets Authority – AMF) and the Management Company shall inform unitholders of such changes in accordance with the conditions laid down in the regulations in force.

Facility providing the Protection: BNP PARIBAS SA

Governance methods: The Management Company will provide the Protection on behalf of the Fund. In the event that, on each date of determination of the net asset value, the net assets of the Fund would not be sufficient to ensure that the net asset value is greater than or equal to the protected level as described above, BNP Paribas will pay to the Fund, at the first request of the Management Company, the necessary complement.

Protection shall be given in consideration of the tax and regulatory provisions in force at the date of signature. The Protection may be subject to change in the event of a change in the aforementioned provisions leading the Fund to bear a direct or indirect financial burden of a fiscal or other nature.

RECOMMENDED MINIMUM INVESTMENT PERIOD: 4 years

NACHHALTIGKEITSGARANT 90

MANAGEMENT REPORT

STATUTORY AUDITOR

PricewaterhouseCoopers

INVESTMENT POLICY

The NachhaltigkeitsGarant 90 fund launched on 3 December 2021 is a non-guaranteed fund (unsecured capital). Its management objective is to offer unitholders:

- partial and variable exposure, determined according to a quantitative algorithm, to risky assets;
- Sliding protection under which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of each month.

In order to achieve its management objective, the Fund enters into a forward contract allowing it to benefit from variable synthetic exposure to the performance of Risky Assets and the rolling protection mechanism.

Risky Assets consist of long positions on equities and long and/or short positions on bonds.

Risky Assets are a diversified strategy that represents a dynamic investment in a basket of indices and futures selected according to a systematic model.

The level of protection is re-evaluated every month. As such, for each valuation, the Fund's net asset value will be at least equal to the current month's level of protection revalued as 90% of the net asset value observed on the first working day of each month, with the exception of the first working day of each month, for which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of the previous month.

The rolling protection mechanism is therefore activated using a quantitative mechanism; it varies daily depending on changes to the Risky Assets' performance and the levels of protection acquired under the rolling protection mechanism.

Exposure to Risky Assets may vary between 0% and 75%, and may therefore be considered partial. Exposure to Risky Assets may become zero and, in this case, there is a risk that the Fund will implement prudent management for a month.

The I EUR unit was launched on 3 December 2021. Its initial NAV was €100.

INFORMATION ON THE MANAGEMENT COMPANY'S REMUNERATION POLICY

Qualitative aspects of remuneration

Information regarding the remuneration policy applicable to the 2021 financial year is available on request from the Management Company: BNP PARIBAS ASSET MANAGEMENT France – TSA 47000 – 75318 Paris Cedex 09, France. Detailed information regarding the Management Company's remuneration policy is also available online at <https://www.bnpparibas-am.com/en/remuneration-policy/>.

Quantitative aspects of remuneration

Quantitative information regarding remuneration is outlined below, as required by Article 22 of the AIFM directive (Directive 2011/61/EU of 8 June 2011) and by Article 69-3 of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format that complies with the recommendations of the AFG (Association Française de Gestion – French asset management association)¹.

Aggregated remuneration of employees of BNP PARIBAS ASSET MANAGEMENT France ("BNPP AM France") (Article 22-2-e of the AIFM Directive and Article 69-3 (a) of the UCITS V Directive):

	Number of employees	Total compensation (€k) (fixed + variable)	Of which total variable compensation (€k)
All employees of BNPP AM France ²	978	133,825	50,406

Aggregated remuneration of employees of BNPP AM France whose activity has a significant impact on the risk profile and who are therefore "Identified Staff"³ (Article 22-2-f of the AIFM Directive and Article 69-3 (b) of the UCITS V Directive):

Business sector	Number of employees	Total remuneration (€k)
Identified Staff employed by BNPP AM France :	176	42,857
<i>including Alternative Investment Fund managers/UCITS managers/managers of European discretionary funds</i>	154	34,914

¹ Note: The above remuneration amounts cannot be reconciled directly with the accounting data for the year because they reflect the sums awarded based on the number of employees at the end of the annual variable remuneration campaign, in May 2021. Therefore, for example, these amounts include all the variable remuneration awarded during this campaign, regardless of whether or not it was deferred, and regardless of whether or not the employees ultimately remained at the company.

² In addition to these employees and the corresponding amounts, the following should be noted:

- 5 employees of the Austrian branch, one of whom has the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €916k and €370k respectively;
- 23 employees of the German branch, one of whom has the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €5,026k and €1,867k respectively;
- 53 employees of the Italian branch, two of whom have the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €6,171k and €1,910k respectively;
- 74 employees of the Dutch branch, 10 of whom have the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €10,668k and €2,902k respectively.

³ The list of Identified Staff is determined in light of the review conducted at year end.

NACHHALTIGKEITSGARANT 90

Other information:

➤ Number of AIFs and UCITS managed by BNPP AM France:

	Number of funds (31/12/2022)	Assets under management (€ billion) as at 31/12/2022
UCITS	188	79
Alternative Investment Funds	315	45

- In 2022, carried interest of €6.6k was paid to BNPP AM France staff employed as at 31 December 2022.
- An independent central audit of the overall BNP Paribas Asset Management remuneration policy and its implementation in 2021 was conducted between June and September 2022, under the supervision of the remuneration committee of BNP Paribas Asset Management Holding Group and its Board of Directors. Following this audit, which covered BNP Paribas Asset Management entities holding an AIFM and/or UCITS licence, the policy was awarded a "Satisfactory" grade (the best out of four possible grades) in recognition of the robustness of the current system, particularly in its key stages: identification of Identified Staff, consistency of the performance–remuneration link, application of mandatory deferral rules, and implementation of indexation and deferral mechanisms. A recommendation (not a warning) was made in 2022 to members of management teams who do not directly manage the portfolios themselves in order to improve some of the documentation and controls of the selection of index baskets.
- Additional information on the way in which variable remuneration is determined and on deferred remuneration instruments can be found in the remuneration policy, which has been published on the company's website.

UCITS ESTABLISHED IN THE FORM OF A MUTUAL FUND
Governed by the French Monetary and Financial Code

Management Company
BNP PARIBAS ASSET MANAGEMENT France
1 boulevard Haussmann
75009 Paris, France

Opinion

In performing the task entrusted to us by the Management Company, we carried out the audit of the annual financial statements of the UCITS established as the NACHHALTIGKEITSGARANT 90 mutual fund for the financial year of one year and 27 days ended 30 December 2022, as attached to this report.

We certify that the annual financial statements are, in accordance with French accounting rules and principles, accurate and consistent and give a true and fair view of the performance of the past financial year, as well as the financial position and the assets and liabilities of the UCITS established as a mutual fund, at the end of this financial year.

Basis of opinion

Audit terms of reference

We have conducted our audit in accordance with the standards of professional practice applicable in France. We believe that the evidence gathered is sufficient and appropriate to justify our opinion. Our responsibilities pursuant to these standards are set out in the "*Statutory Auditor's responsibilities regarding the audit of the annual financial statements*" section of this report.

Independence

We carried out our audit in accordance with the rules of independence laid down in the French Commercial Code and the Code of Ethics for Statutory Auditors, for the period from 3 December 2021, to the date of issue of our report.

Justification of assessments

In accordance with the provisions of Articles L. 823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following assessments, which, in our professional opinion, were the most significant for the audit of the financial year's annual financial statements.

The assessments were made as part of our audit of the annual financial statements, taken as a whole, and therefore contributed to the formation of the opinion expressed in the first part of this report. We have no comment to make on any individual aspect of these annual financial statements.

1. Over-the-counter financial agreements:

The over-the-counter financial agreements held in the portfolio are valued in accordance with the methods described in the note on accounting methods and rules. Prices are calculated by the counterparties to the agreements and validated by the Management Company using financial models. Applied mathematical models are based on external data and market assumptions. Based on the elements leading to the determination of the valuations made, we have conducted an assessment of the approach implemented by the Management Company.

2. Other financial instruments in the portfolio:

The assessments we performed related to the appropriateness of the accounting principles adopted and to the reasonableness of the significant estimates used.

Specific verifications

In accordance with the standards of professional practice applicable in France, we have also conducted the specific verifications required by the legal and regulatory provisions.

We have no observations to make concerning the fairness and the consistency with the annual financial statements of the data provided in the Management Company's management report.

NACHHALTIGKEITSGARANT 90

Responsibilities of the Management Company relating to the annual financial statements

It is the Management Company's responsibility to prepare annual financial statements that give a true and fair view, in accordance with French accounting rules and principles, and to implement the internal controls it deems necessary for the preparation of annual financial statements that do not include any material misstatement, whether due to fraud or error.

When preparing the annual financial statements, it is the Management Company's responsibility to assess the Fund's ability to continue as a going concern, to present in said financial statements, where applicable, the necessary information relating to its viability as a going concern and to apply the going concern accounting policy, unless it intends to wind up the Fund or to cease trading.

The annual financial statements have been prepared by the Management Company.

Statutory Auditor's responsibilities regarding the audit of the annual financial statements

Audit objective and methodology

It is our responsibility to draw up a report on the annual financial statements. Our aim is to obtain reasonable assurance that the annual financial statements, taken as a whole, are free of material misstatement. Reasonable assurance corresponds to a high level of assurance, but does not guarantee that an audit performed in accordance with the standards of professional practice can systematically detect any material misstatement. Misstatements may arise from fraud or error and are considered material where it can reasonably be expected that, taken individually or together, they may influence the economic decisions made by users of the annual financial statements that are based upon such misstatements.

As specified in Article L. 823-10-1 of the French Commercial Code, our task is to certify the financial statements and not to guarantee the viability or quality of management of the Fund.

As part of an audit performed in accordance with the standards of professional practice applicable in France, the Statutory Auditor exercises its professional judgement throughout this audit. In addition:

- it identifies and assesses the risks that the annual financial statements may contain material misstatements, whether due to fraud or error, sets out and implements the audit procedures intended to counter these risks, and collates the items that it deems sufficient and appropriate to justify its opinion. The risk of non-detection of a material misstatement due to fraud is higher than that of non-detection of a material misstatement due to an error, since fraud may involve collusion, forgery, deliberate omissions, misrepresentation or the circumvention of internal control processes;

*PricewaterhouseCoopers Audit, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex, France
Tel.: +33 (0)1 56 57 58 59, Fax: +33 (0)1 56 57 58 60, www.pwc.fr*

NACHHALTIGKEITSGARANT 90

- it takes note of the internal control processes relevant to the audit so as to set out audit procedures that are appropriate to the circumstances, and not to express an opinion on the effectiveness of the internal control processes;
- it assesses the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management Company, as well as the information provided in their regard in the annual financial statements;
- it assesses the appropriateness of the application by the Management Company of the going concern accounting policy and, based on the evidence gathered, whether or not there is significant uncertainty relating to events or circumstances that may affect the Fund's ability to continue as a going concern. This assessment is based on the evidence gathered up to the date of its report, on the understanding that subsequent events or circumstances may affect its viability as a going concern. If it concludes that there is significant uncertainty, it draws the attention of readers of the report to the information provided in the annual financial statements about this uncertainty or, if this information is not provided or is not relevant, it issues certification with reservations or a refusal to certify;
- it appraises the overall presentation of the annual financial statements and assesses whether said statements reflect the underlying transactions and events such that they provide a true and fair view thereof.

In accordance with the law, we would like to inform you that we were unable to issue this report within the regulatory deadlines due to the delayed receipt of certain documents necessary for the completion of our work.

Accounting principles and policies

The annual financial statements are presented in the form provided for by ANC Regulation No. 2014-01 of 14 January 2014, as amended.

The financial year had an exceptional duration of 1 year and 27 days.

The accounting currency is the euro.

All transferable securities held in the portfolio are recognised at historical cost, excluding charges.

Securities, futures and options held in the portfolio denominated in a foreign currency are converted into the accounting currency based on the exchange rates in Paris on the valuation day.

The portfolio's value is appraised whenever the net asset value is calculated and at the end of the accounting period using the following methods:

Transferable securities

Listed securities: at stock market value, including accrued coupons (at the day's closing price).

However, transferable securities for which the price is not established on the valuation day or which are quoted by contributors and for which the price has been adjusted, and securities that are not traded on a regulated market, are valued under the responsibility of the Management Company (or the Board of Directors for an open-ended investment company (société d'investissement à capital variable – SICAV)), at their likely trading value. Prices are adjusted by the Management Company based on its knowledge of the issuers and/or markets.

UCIs: at their last known net asset value or, if unavailable, at their last estimated value. The net asset values of the securities of foreign undertakings for collective investment valued on a monthly basis are confirmed by the fund administrators. Valuations are updated weekly based on the estimates issued by the administrators of these UCIs and validated by the fund manager.

Negotiable debt securities and equivalent securities that are not traded in high volumes are valued using an actuarial method at a rate applicable to issues of equivalent securities, to which a variance representative of the intrinsic features of the issuer is assigned, if appropriate. In the absence of sensitivity, securities with a residual term of three months are valued at the most recent rate until maturity; for those acquired for periods of less than three months, the interest is calculated on a straight-line basis.

Temporary purchases and sales of securities:

- Securities lending: the receivable representing the securities lent is valued at the securities' market value.
- Securities borrowing: the borrowed securities and the corresponding debt are valued at the securities' market value.
- Collateral: With regard to securities received as collateral when lending securities, the UCI has chosen to include these securities in the balance sheet using the value of the debt corresponding to the obligation to return these securities.
- Repurchase agreements with a residual term of three months or less: individualisation of the receivable based on the contract price. In this case, the remuneration is calculated on a straight-line basis.
- Long-term repurchase agreements: These are recorded and valued at their nominal amount, even if their maturity date extends beyond three months. Any associated accrued interest is added to this amount. However, some contracts provide special terms in the event of requests for early repayment in order to take into account the impact of the increase in the counterparty's financing curve. Accrued interest may then be reduced by this impact, with no applicable floor. The impact is in proportion to the residual maturity of the agreement and the difference between the contractual margin and the market margin for the same maturity date.
- Repurchase agreements with a residual maturity of three months or less: stock market value. The debt valued on the basis of the contractual value is recorded as a balance sheet liability. In this case, the remuneration is calculated on a straight-line basis.

Forward financial instruments and options

Futures: at the day's settlement price.

The off-balance sheet valuation is calculated on the basis of the nominal value, its settlement price and, where appropriate, the exchange rate.

Options: the day's closing price or, failing this, the last known price.

Over-the-counter options: These options are valued at their market value, based on prices reported by the counterparties. These valuations are subject to controls by the Management Company.

The off-balance sheet valuation is calculated as an underlying equivalent based on the delta and the price of the underlying asset and, where appropriate, the exchange rate.

NACHHALTIGKEITSGARANT 90

Forward exchange contracts: revaluation of foreign currency commitments at the daily rate with the premium/discount calculated according to the term of the contract.

Term deposits: These are recorded and valued at their nominal amount, even if their maturity date extends beyond three months. Any associated accrued interest is added to this amount. However, some contracts provide special terms in the event of requests for early repayment in order to take into account the impact of the increase in the counterparty's financing curve. Accrued interest may then be reduced by this impact, but cannot be negative. Term deposits are valued at least at their nominal value.

Interest rate swaps:

- for swaps with a maturity of less than three months, interest is calculated on a straight-line basis.
- swaps with a maturity of more than three months are revalued at market value.

Synthetic products (a security linked to a swap) are recognised as a whole. Interest accrued on swaps forming part of these products is valued on a straight-line basis.

Asset swaps and synthetic products are valued on the basis of their market value. The valuation of asset swaps is based on the valuation of hedged securities, less the impact of changes in credit spreads. This impact is valued using the average of the spreads reported monthly by four counterparties, adjusted by a margin that depends on the rating of the issuer.

The off-balance sheet commitment for swaps corresponds to their nominal value.

Structured swaps (swaps with optional components): These swaps are valued at their market value, based on prices reported by the counterparties. These valuations are subject to controls by the Management Company.

The off-balance sheet commitment of these swaps corresponds to their nominal value.

The index swaps valuation, calculated by the OTC Pricing & Services team, is used to calculate the net asset value after checking its consistency with the counterparty's valuation if this is received within the deadlines. If this is unavailable or inconsistent, OTC Pricing & Services approaches the counterparty to identify and resolve the problems.

The off-balance sheet commitment of these swaps corresponds to their nominal value.

Financial management fees

- Maximum 1.39% (incl. tax)

Fees are calculated on the basis of the net assets. These fees, not including transaction fees, will be charged directly to the Fund's income statement.

These fees cover all of the costs invoiced directly to the UCI, except for transaction fees. Transaction costs include intermediary fees (e.g. brokerage fees, stock market taxes etc.) as well as transaction fees, if any, that may be charged, in particular by the depositary and the Management Company.

Administrative fees not paid to the Management Company:

- 0.15% incl. tax on the basis of net assets

Research expenses

None

None

GUARANTEE:

BNP Paribas SA grants to the Fund, for a renewable period of 5 years, protection under which BNP Paribas SA guarantees to the Fund that for each Fund valuation day, the net asset value shall be at least equal to 90% of the net asset value observed on the first working day of the month (the "Protection"), with the exception of the first working day of each month, for which the net asset value will be at least equal to 90% of the net asset value observed on the first working day of the previous month. The initial Protection level enjoyed by the Fund corresponds to 90% of the net asset value at the launch of the Fund.

Any modification of the Protection (excluding its renewal) shall be subject to the prior approval of the Autorité des marchés financiers (French Financial Markets Authority – AMF) and the Management Company shall inform unitholders of such changes in accordance with the conditions laid down in the regulations in force.

Facility providing the Protection: BNP PARIBAS SA

Governance methods: The Management Company will provide the Protection on behalf of the Fund. In the event that, on each date of determination of the net asset value, the net assets of the Fund would not be sufficient to ensure that the net asset value is greater than or equal to the protected level as described above, BNP Paribas will pay to the Fund, at the first request of the Management Company, the necessary complement.

Protection shall be given in consideration of the tax and regulatory provisions in force at the date of signature. The Protection may be subject to change in the event of a change in the aforementioned provisions leading the Fund to bear a direct or indirect financial burden of a fiscal or other nature.

Change in net assets

	Financial year 30/12/2022
Net assets at the beginning of the financial year	-
Subscriptions (including subscription fees paid to the UCI)	2,480,100.05

ADDITIONAL INFORMATION FOR INVESTORS IN THE FEDERAL REPUBLIC OF GERMANY

Facilities in the Federal Republic of Germany according to section 306a (1) of the Investment Code:

The prospectus, the key information documents, the management regulations and the annual and semi-annual reports may be obtained, free of charge, in hardcopy form at BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France, (LIST.AMGPECIBSALESSUPPORT@bnpparibas.com), during normal opening hours.

Applications for the redemptions and conversion of shares may be sent to BNP Paribas 9, rue du Débarcadère, 93500 Pantin.

All payments to investors, including redemption proceeds and potential distributions may, upon request, be paid through BNP Paribas 9, rue du Débarcadère, 93500 Pantin.

The issue, redemption and conversion prices, the net asset value as well as any notices to investors are also available from BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France.

Information and access to procedures and arrangements referred to in Article 15 of Directive 2009/65/EC relating to investors' exercise of their rights can be obtained from BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France, (LIST.AMGPECIBSALESSUPPORT@bnpparibas.com phone number: +33 1 58 97 00 00).

In addition, the issue and redemption prices are published on www.bnpparibas-am.de.

No units of EU UCITS will be issued as printed individual certificates.

In addition, communications to investors in the Federal Republic of Germany will be made available by means of a durable medium (section 167 of the Investment Code) in the following cases:

- suspension of the redemption of the units,
- termination of the management of the fund or its liquidation,
- any amendments to the company rules which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the fund with one or more other funds and
- the change of the fund into a feeder fund or the modification of a master fund.
